

Figure S1 The expression pattern of *sws1* in medaka. (A) Detection of *sws1* mRNA expression in different tissues by RT-PCR ($n = 3$). (B) The mRNA level of *sws1* in larval and adult medaka ($n = 6$). All data were expressed as means \pm S.E.M.

Figure S2 The survival and morphology of WT and *sws1*^{-/-} medaka larvae. (A) Statistic analysis of survival rate in WT and *sws1*^{-/-} medaka larvae. (B) Photographs of larvae at 6 dph for WT and *sws1*^{-/-} medaka. Scale bar: 500 μ m.
