

# regulation of protein complex assembly

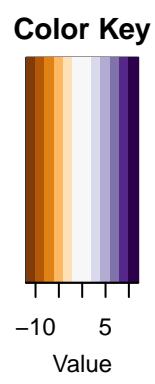

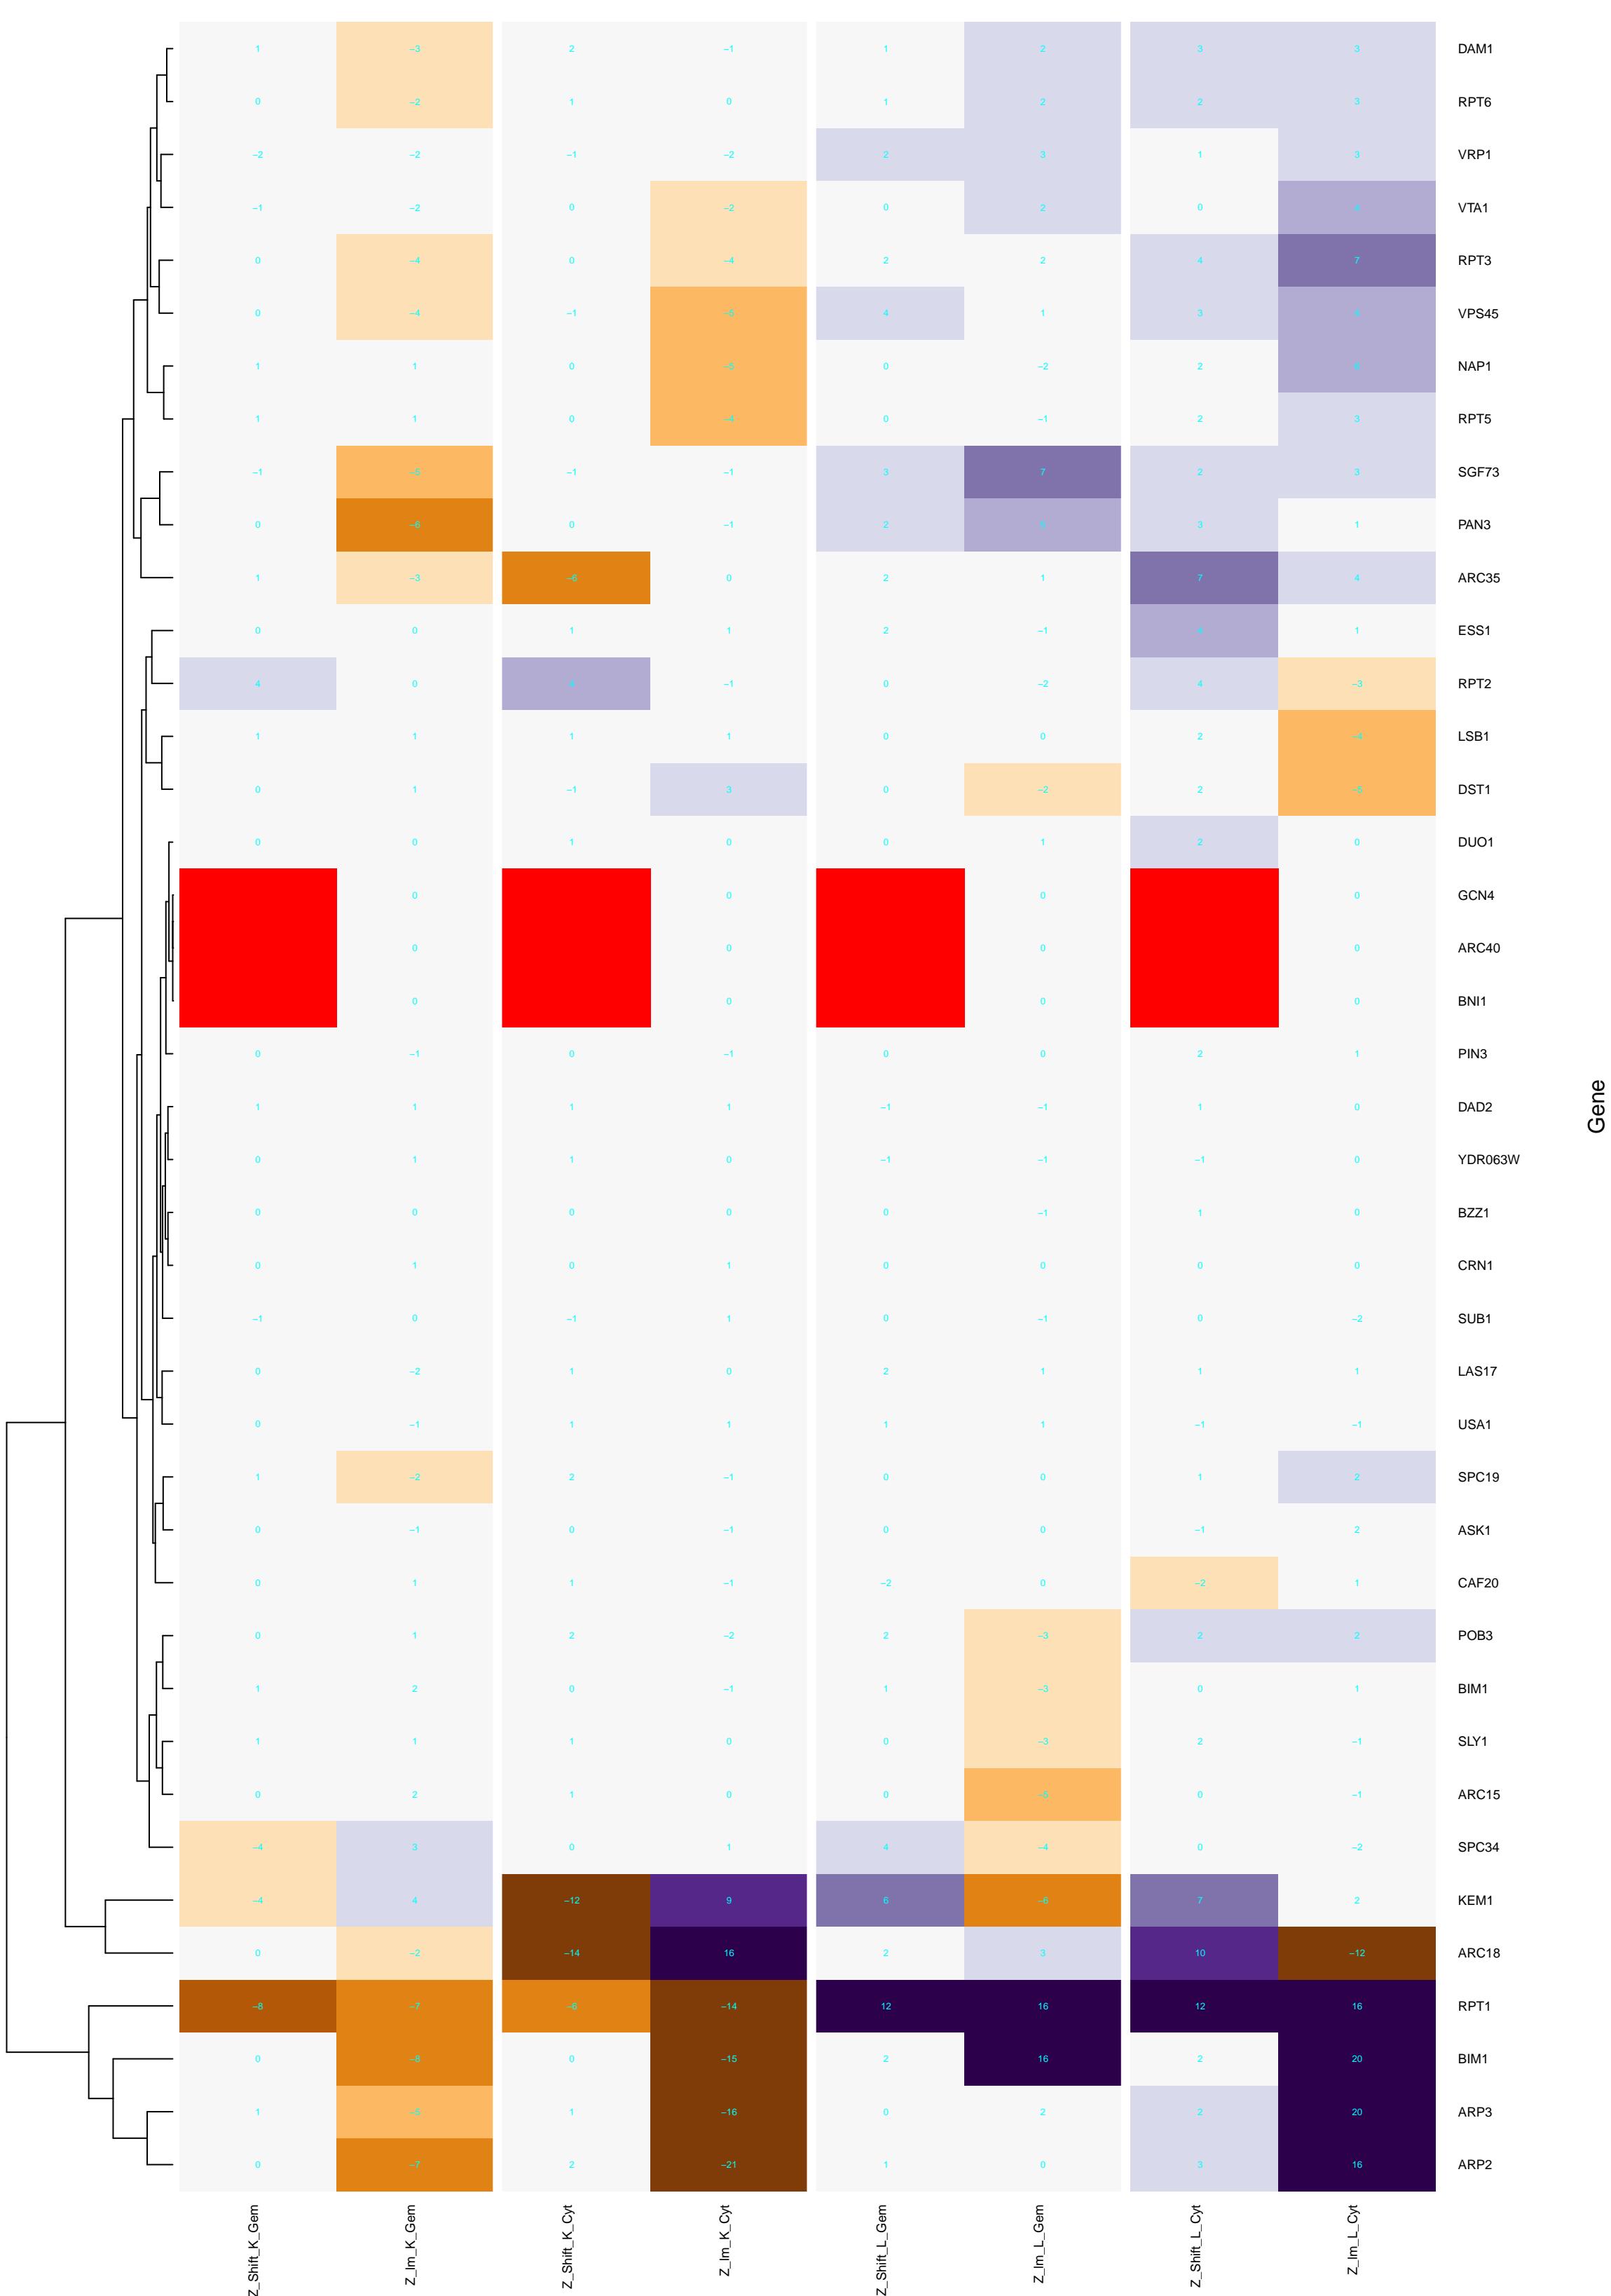

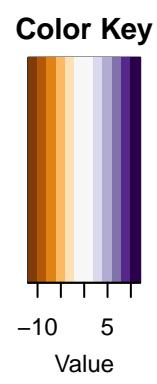

## negative regulation of protein complex assembly

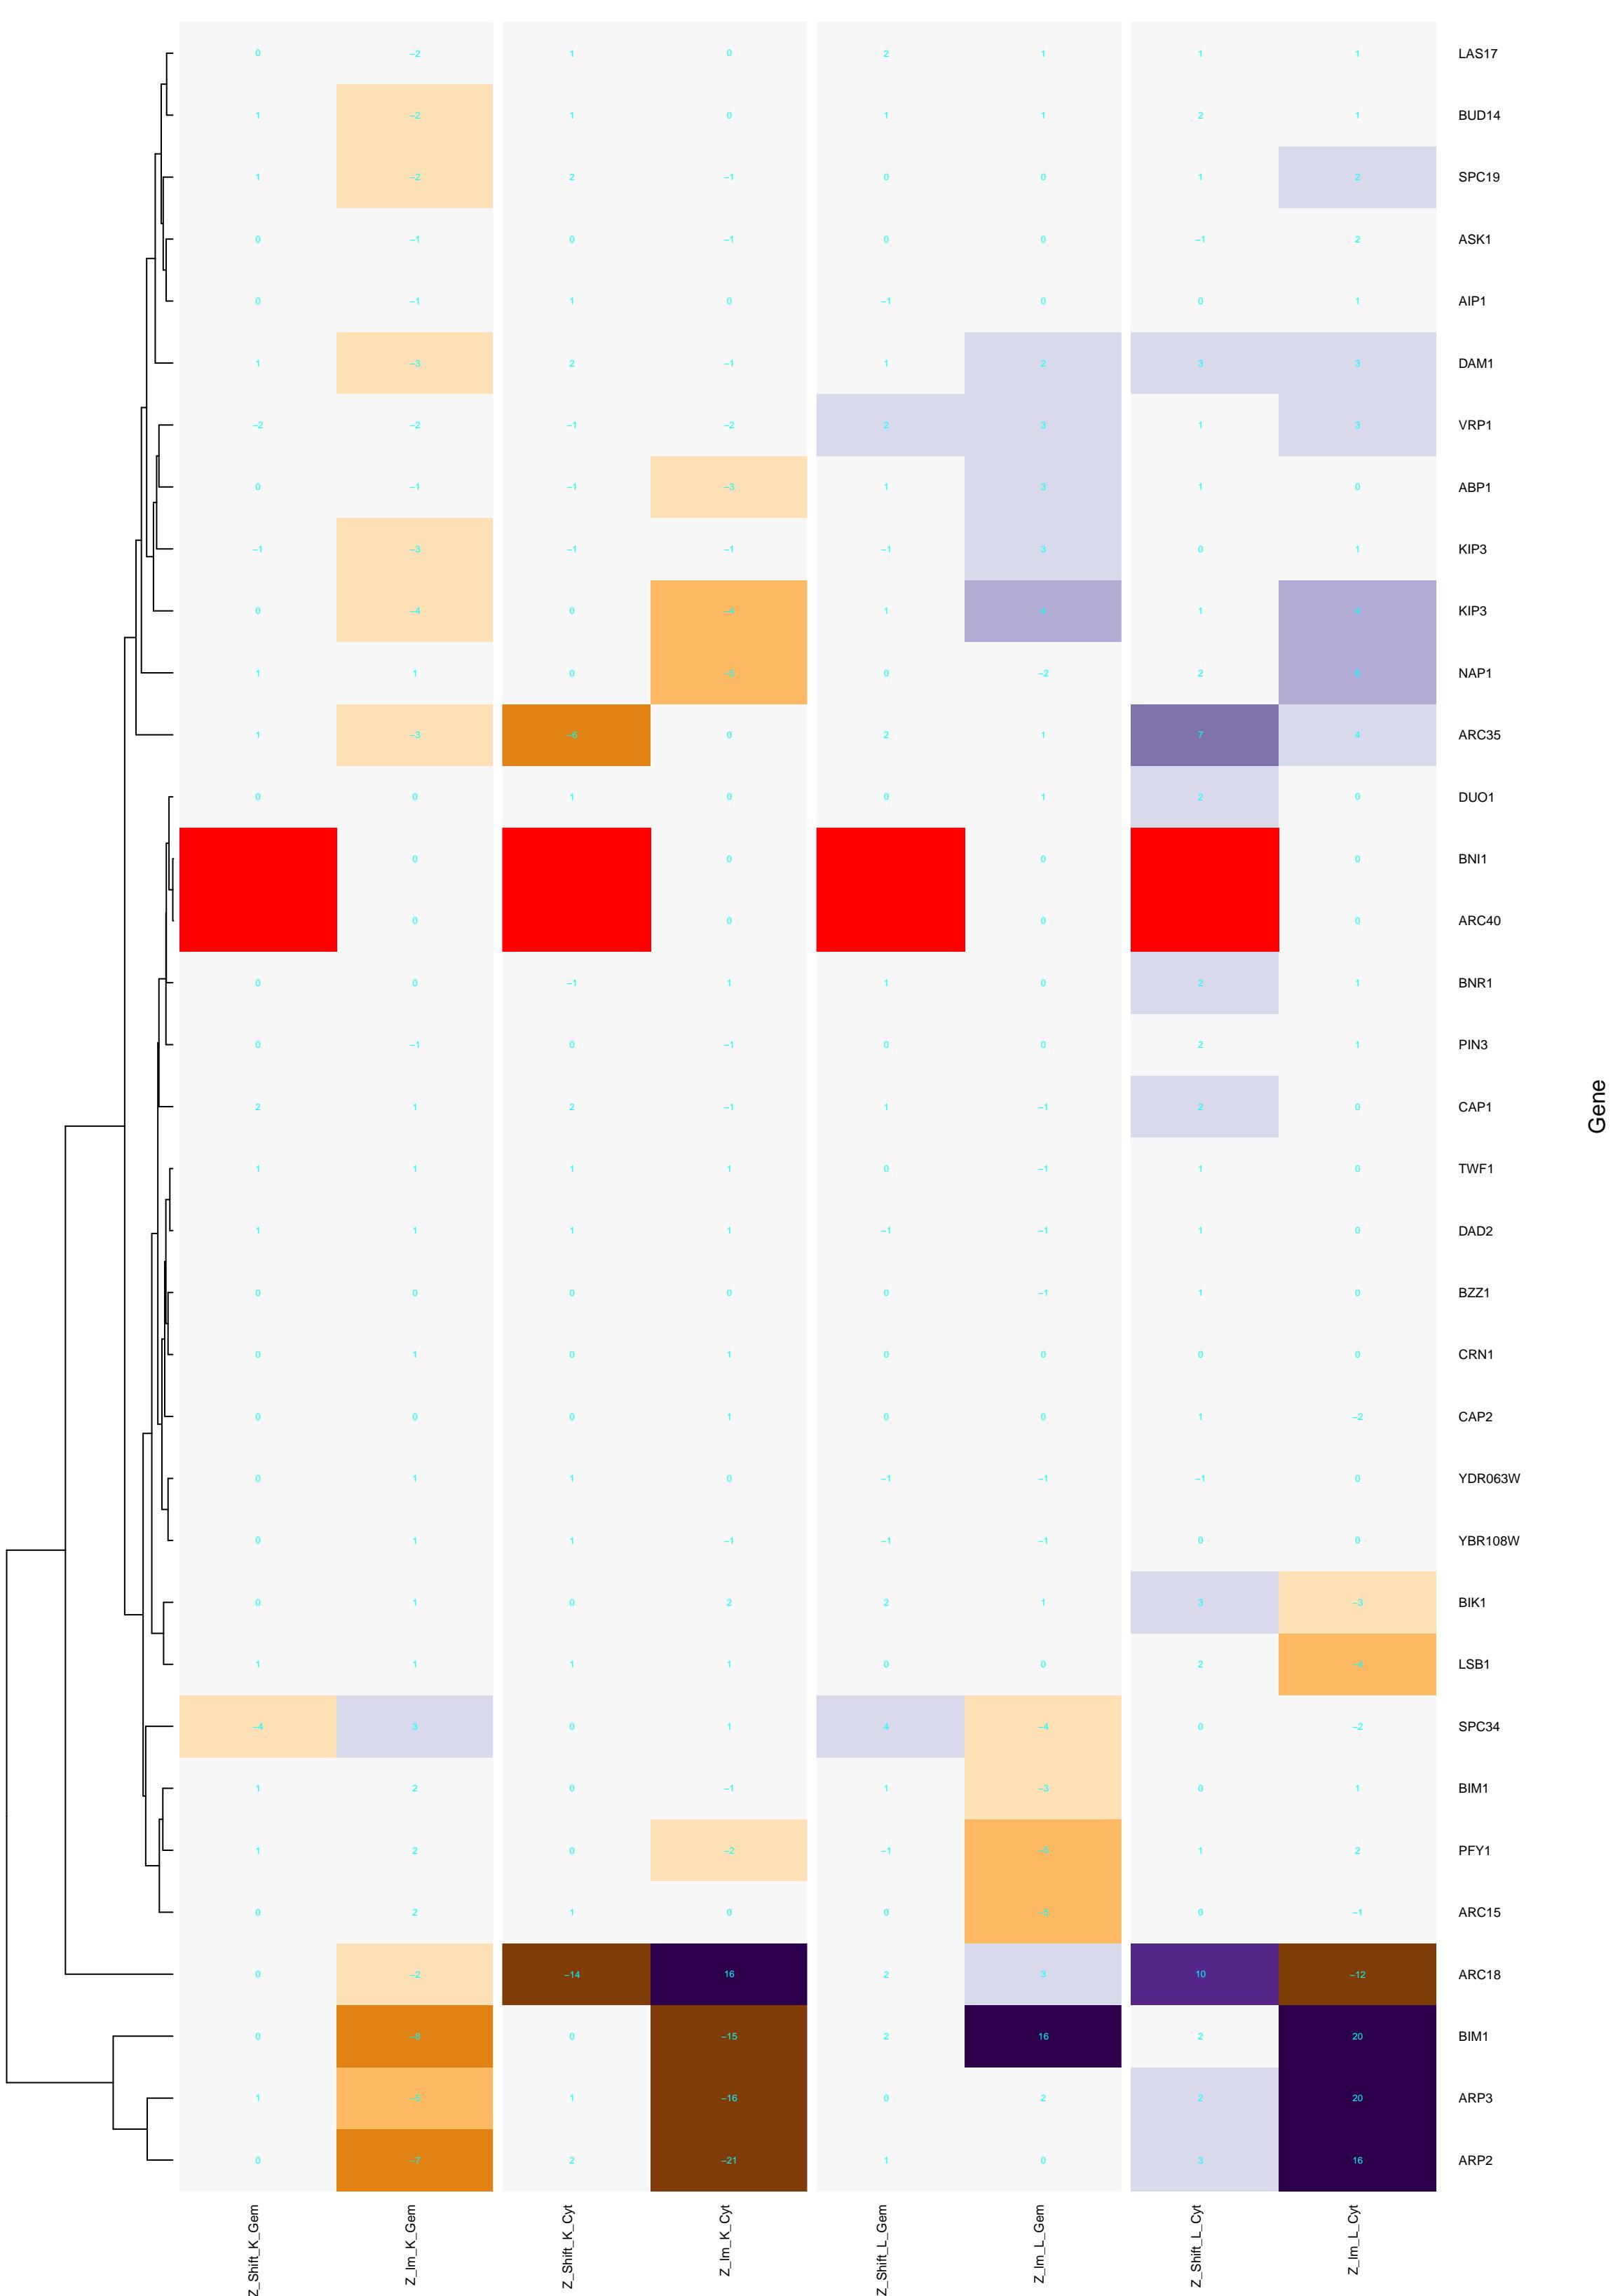

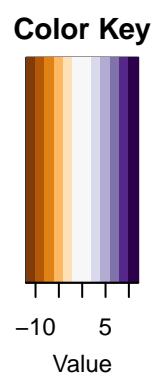

## positive regulation of protein complex assembly

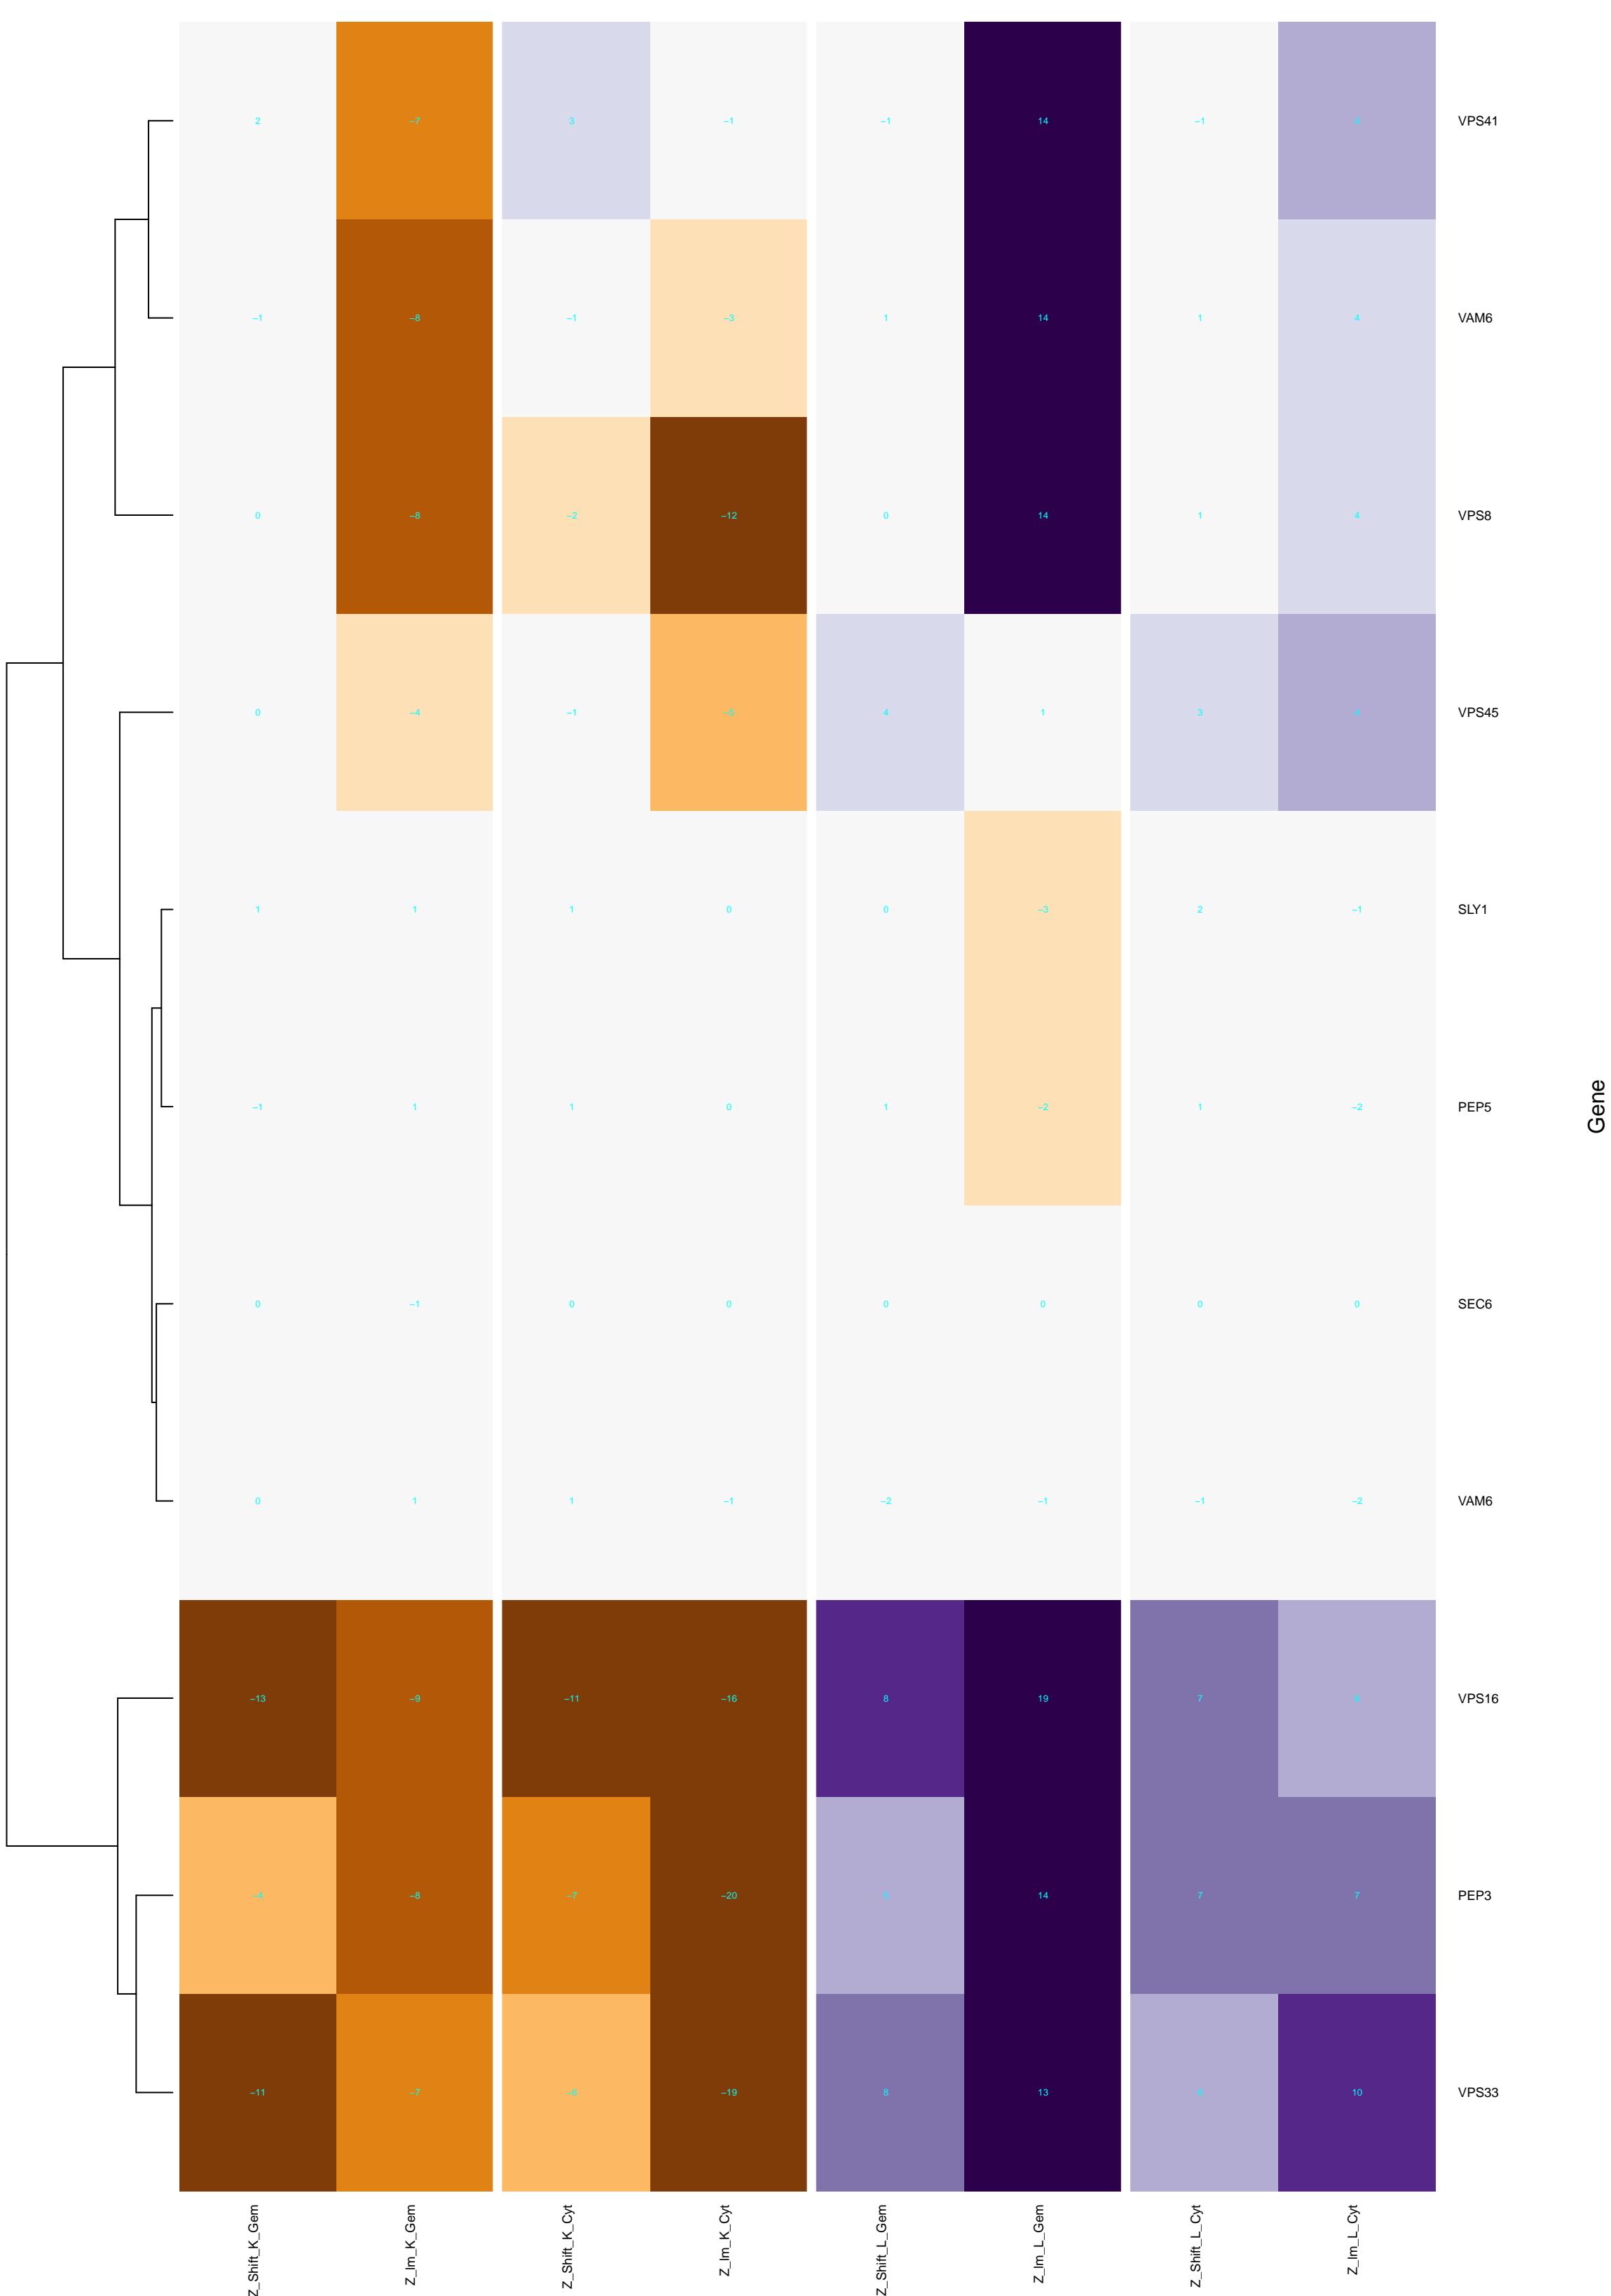

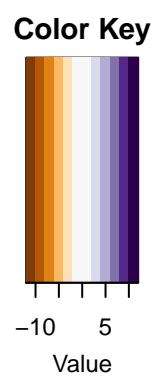

# regulation of protein polymerization

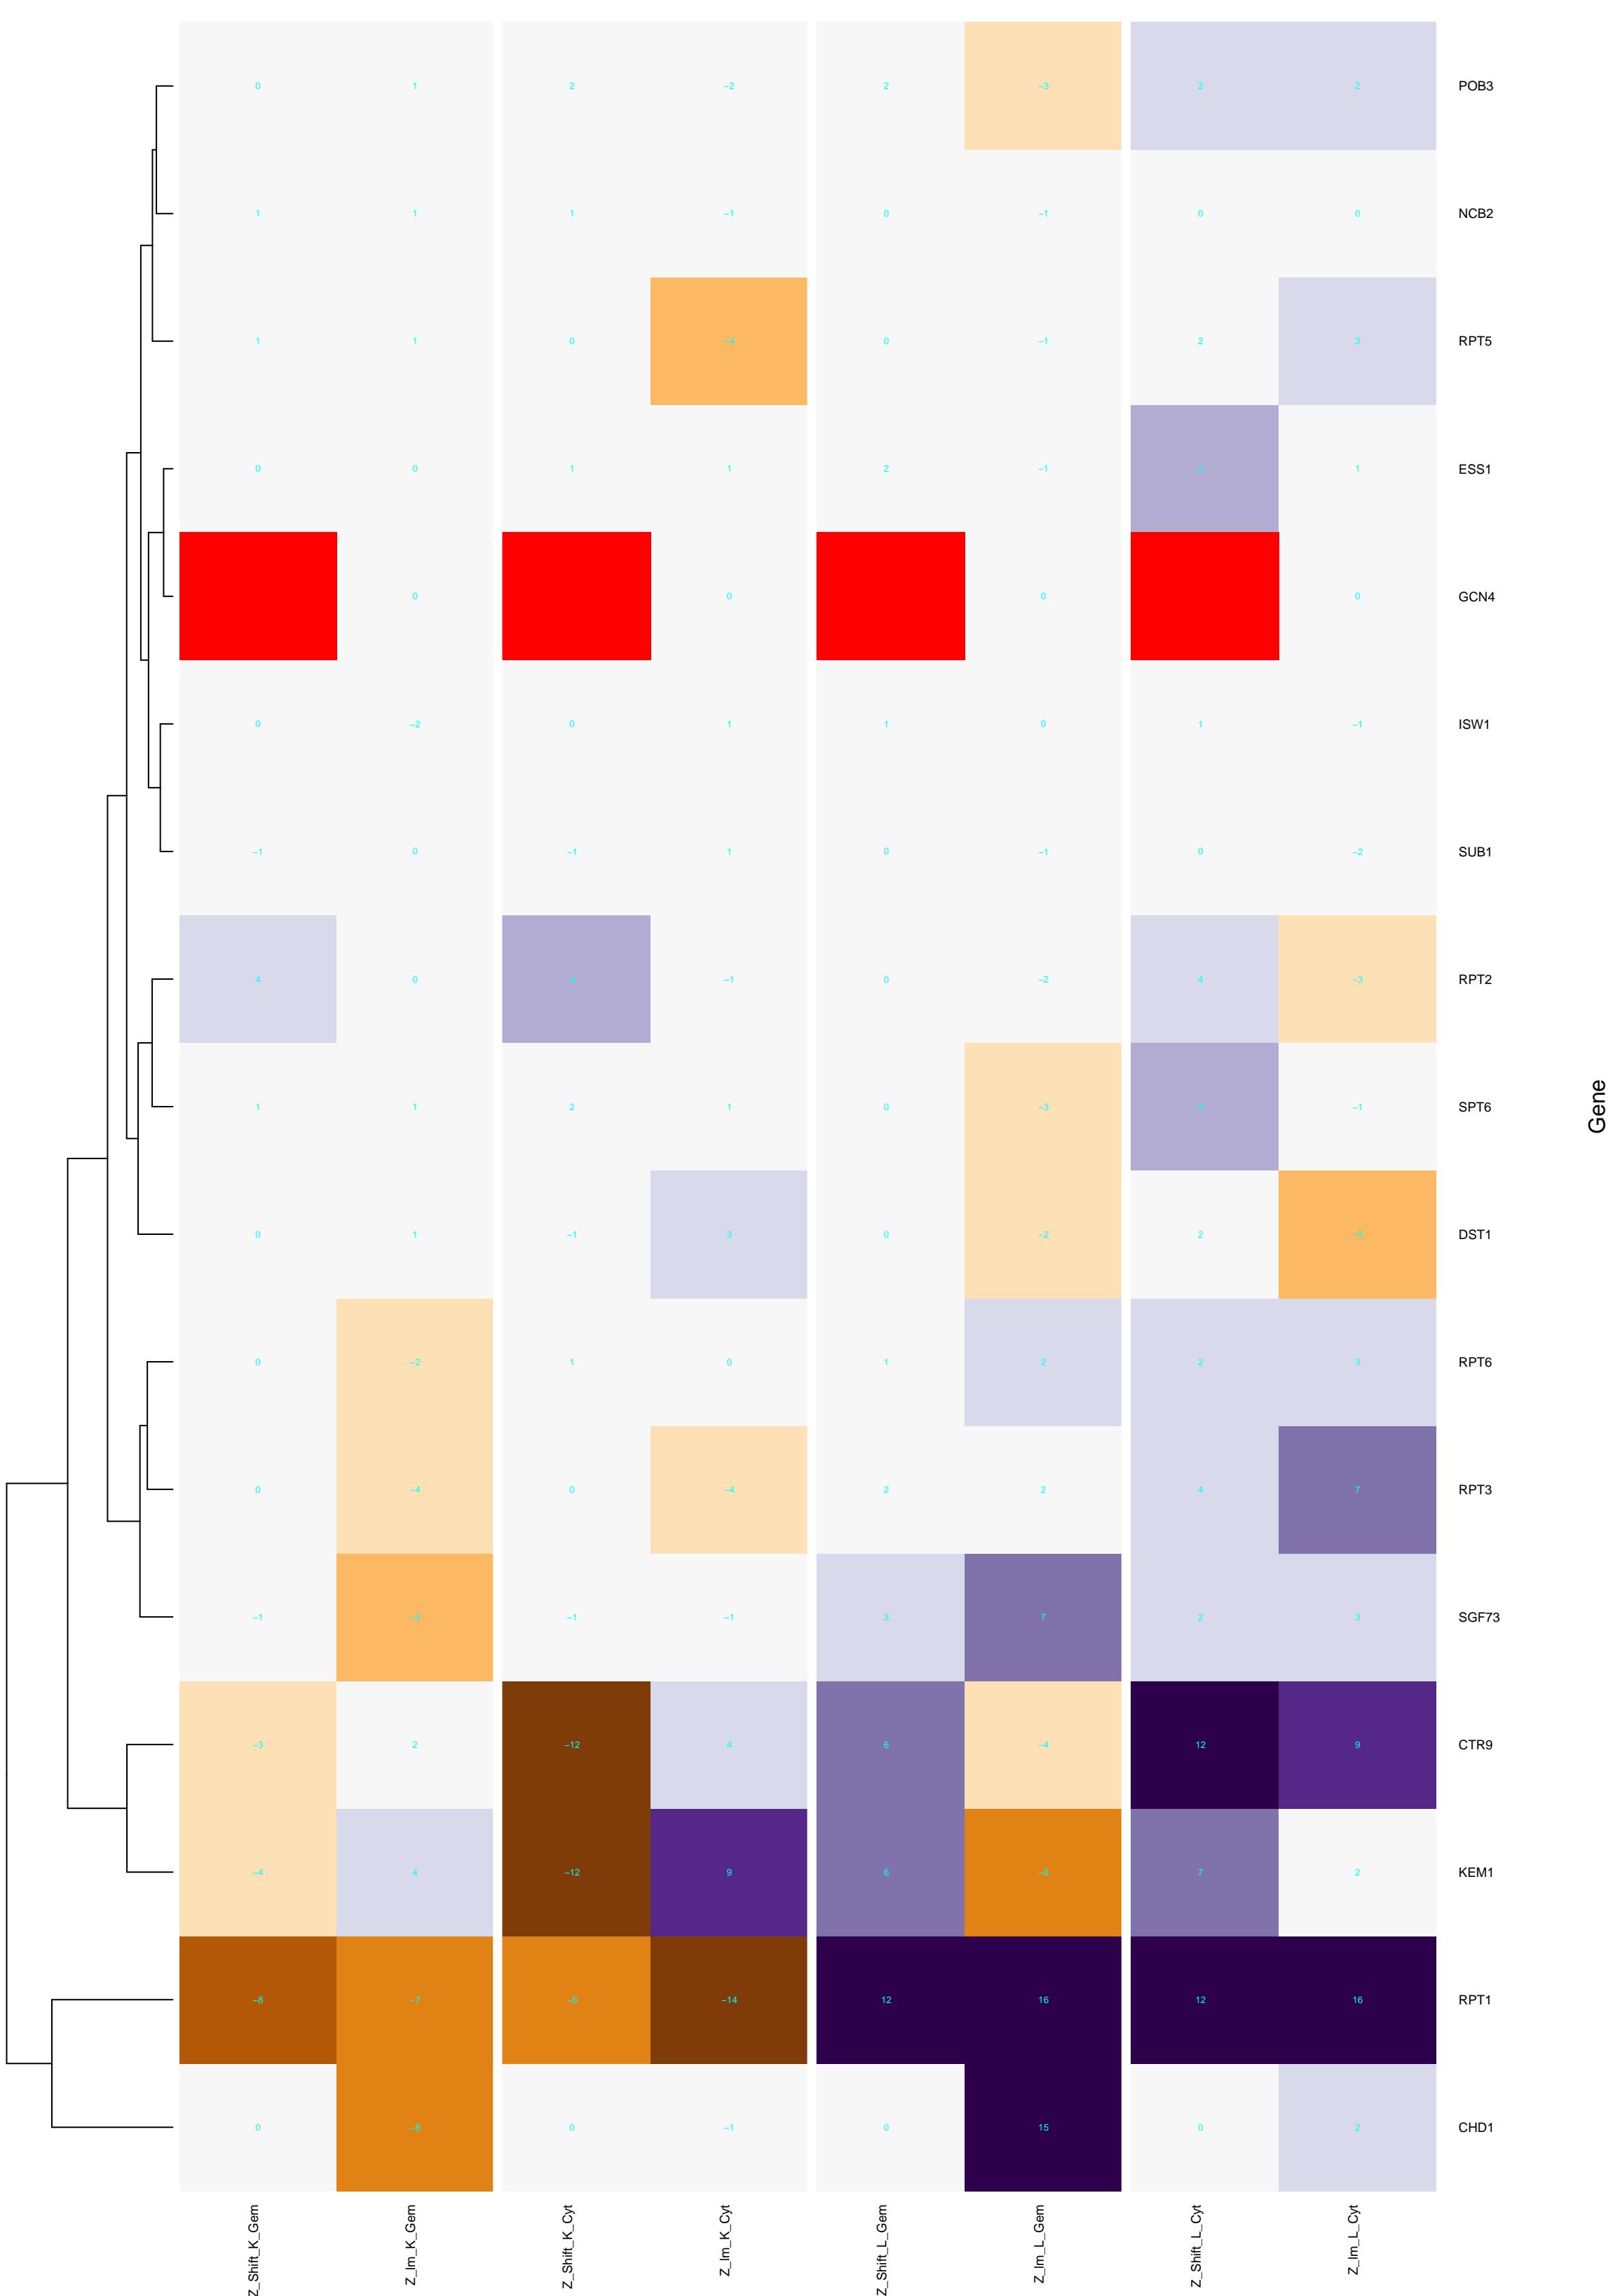

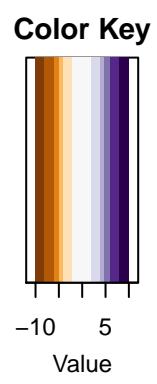

## regulation of SNARE complex assembly

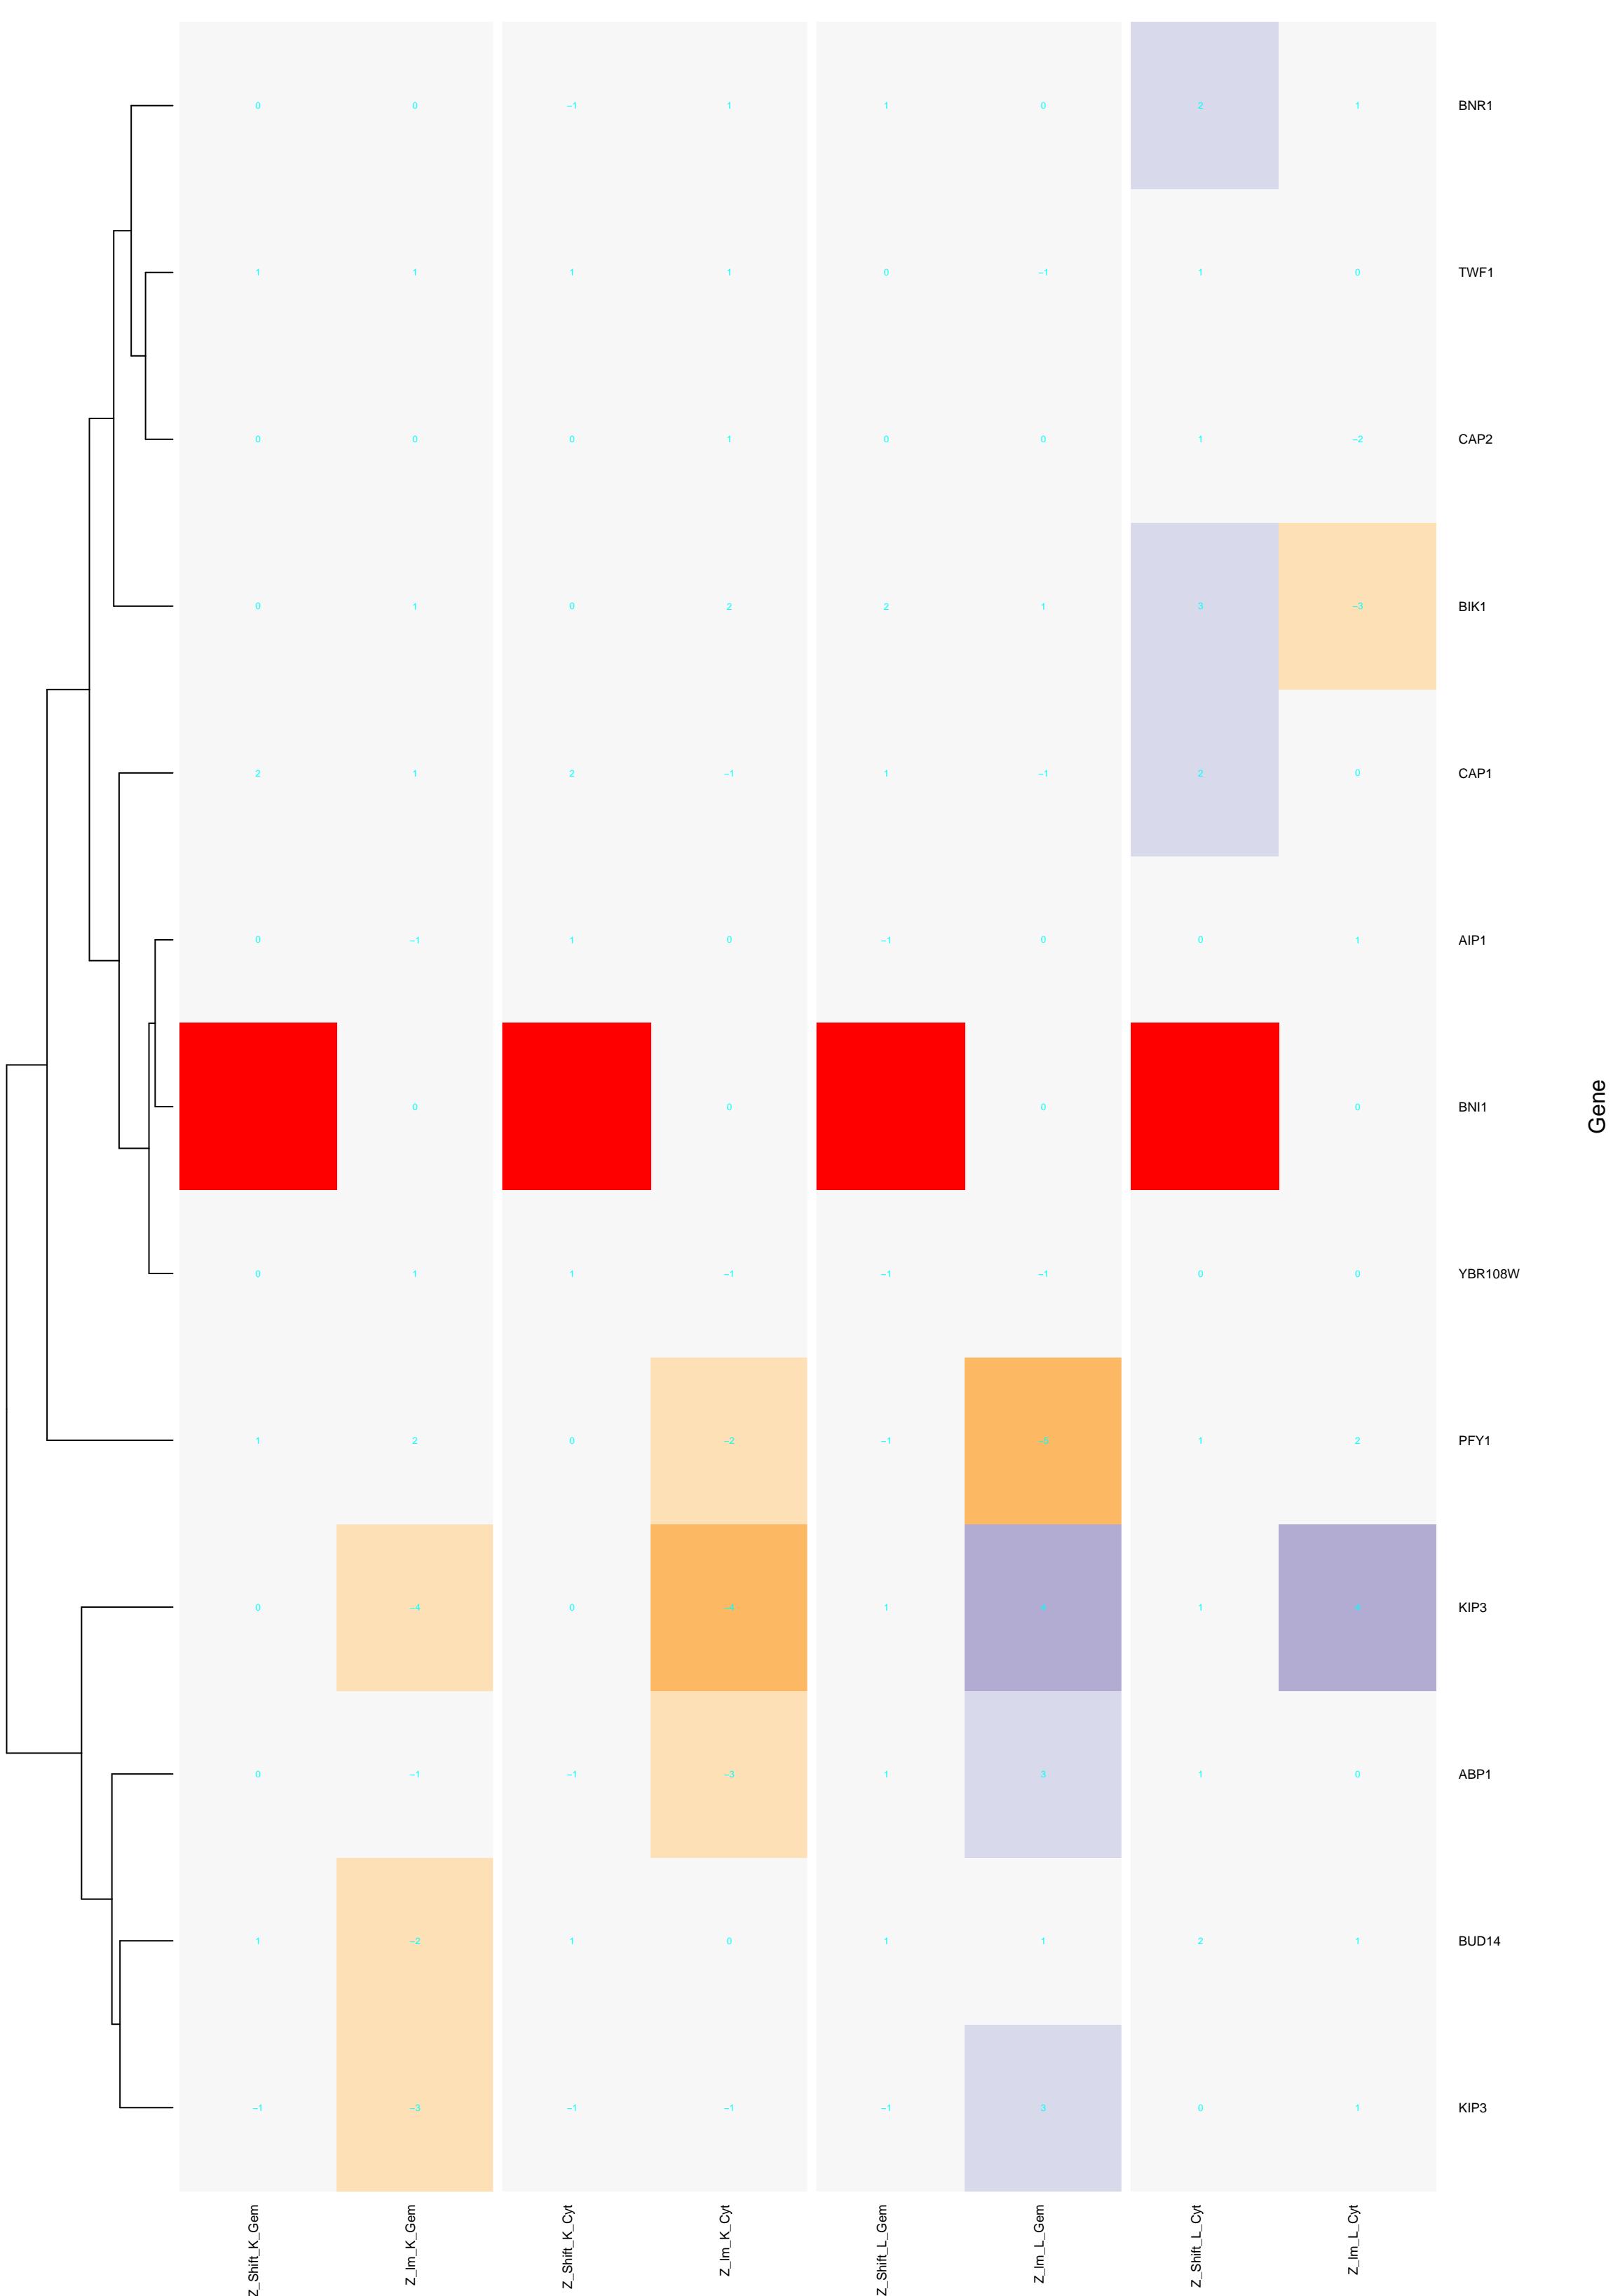

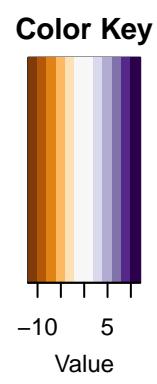

# regulation of DNA-templated transcription, initiation

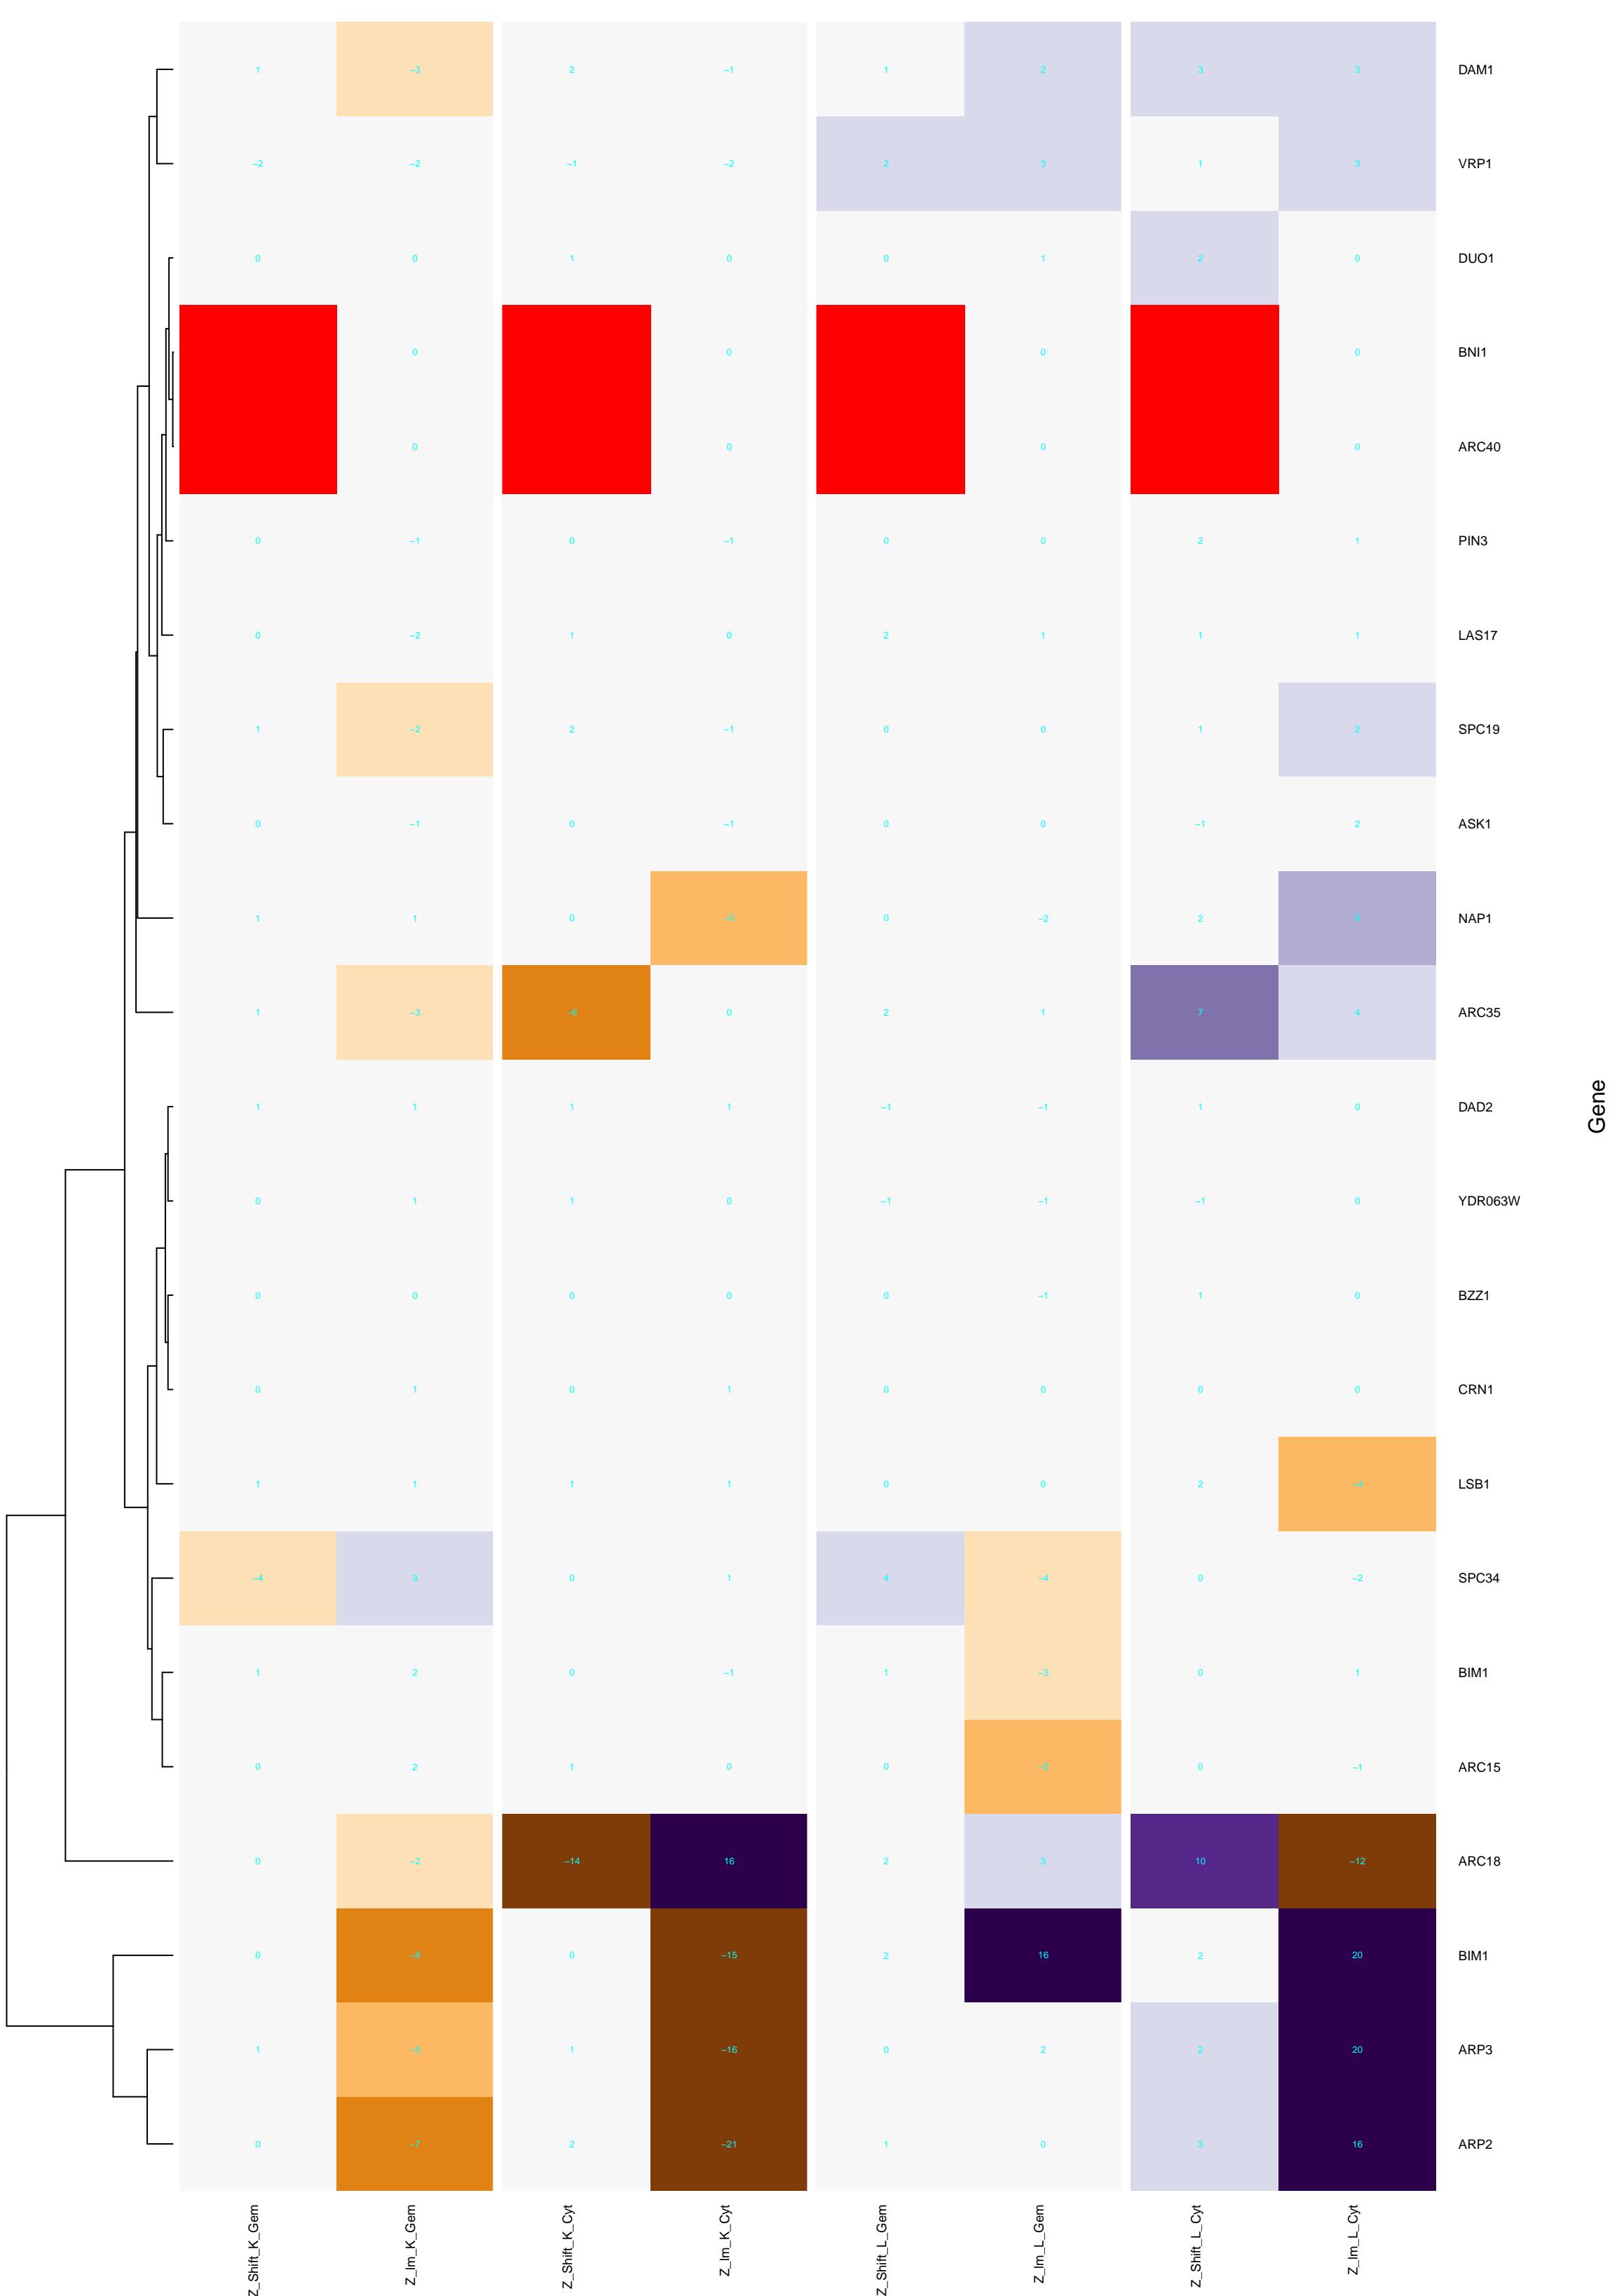

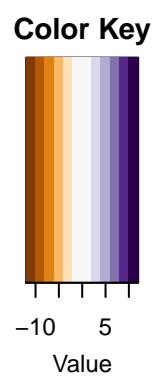

## negative regulation of protein polymerization

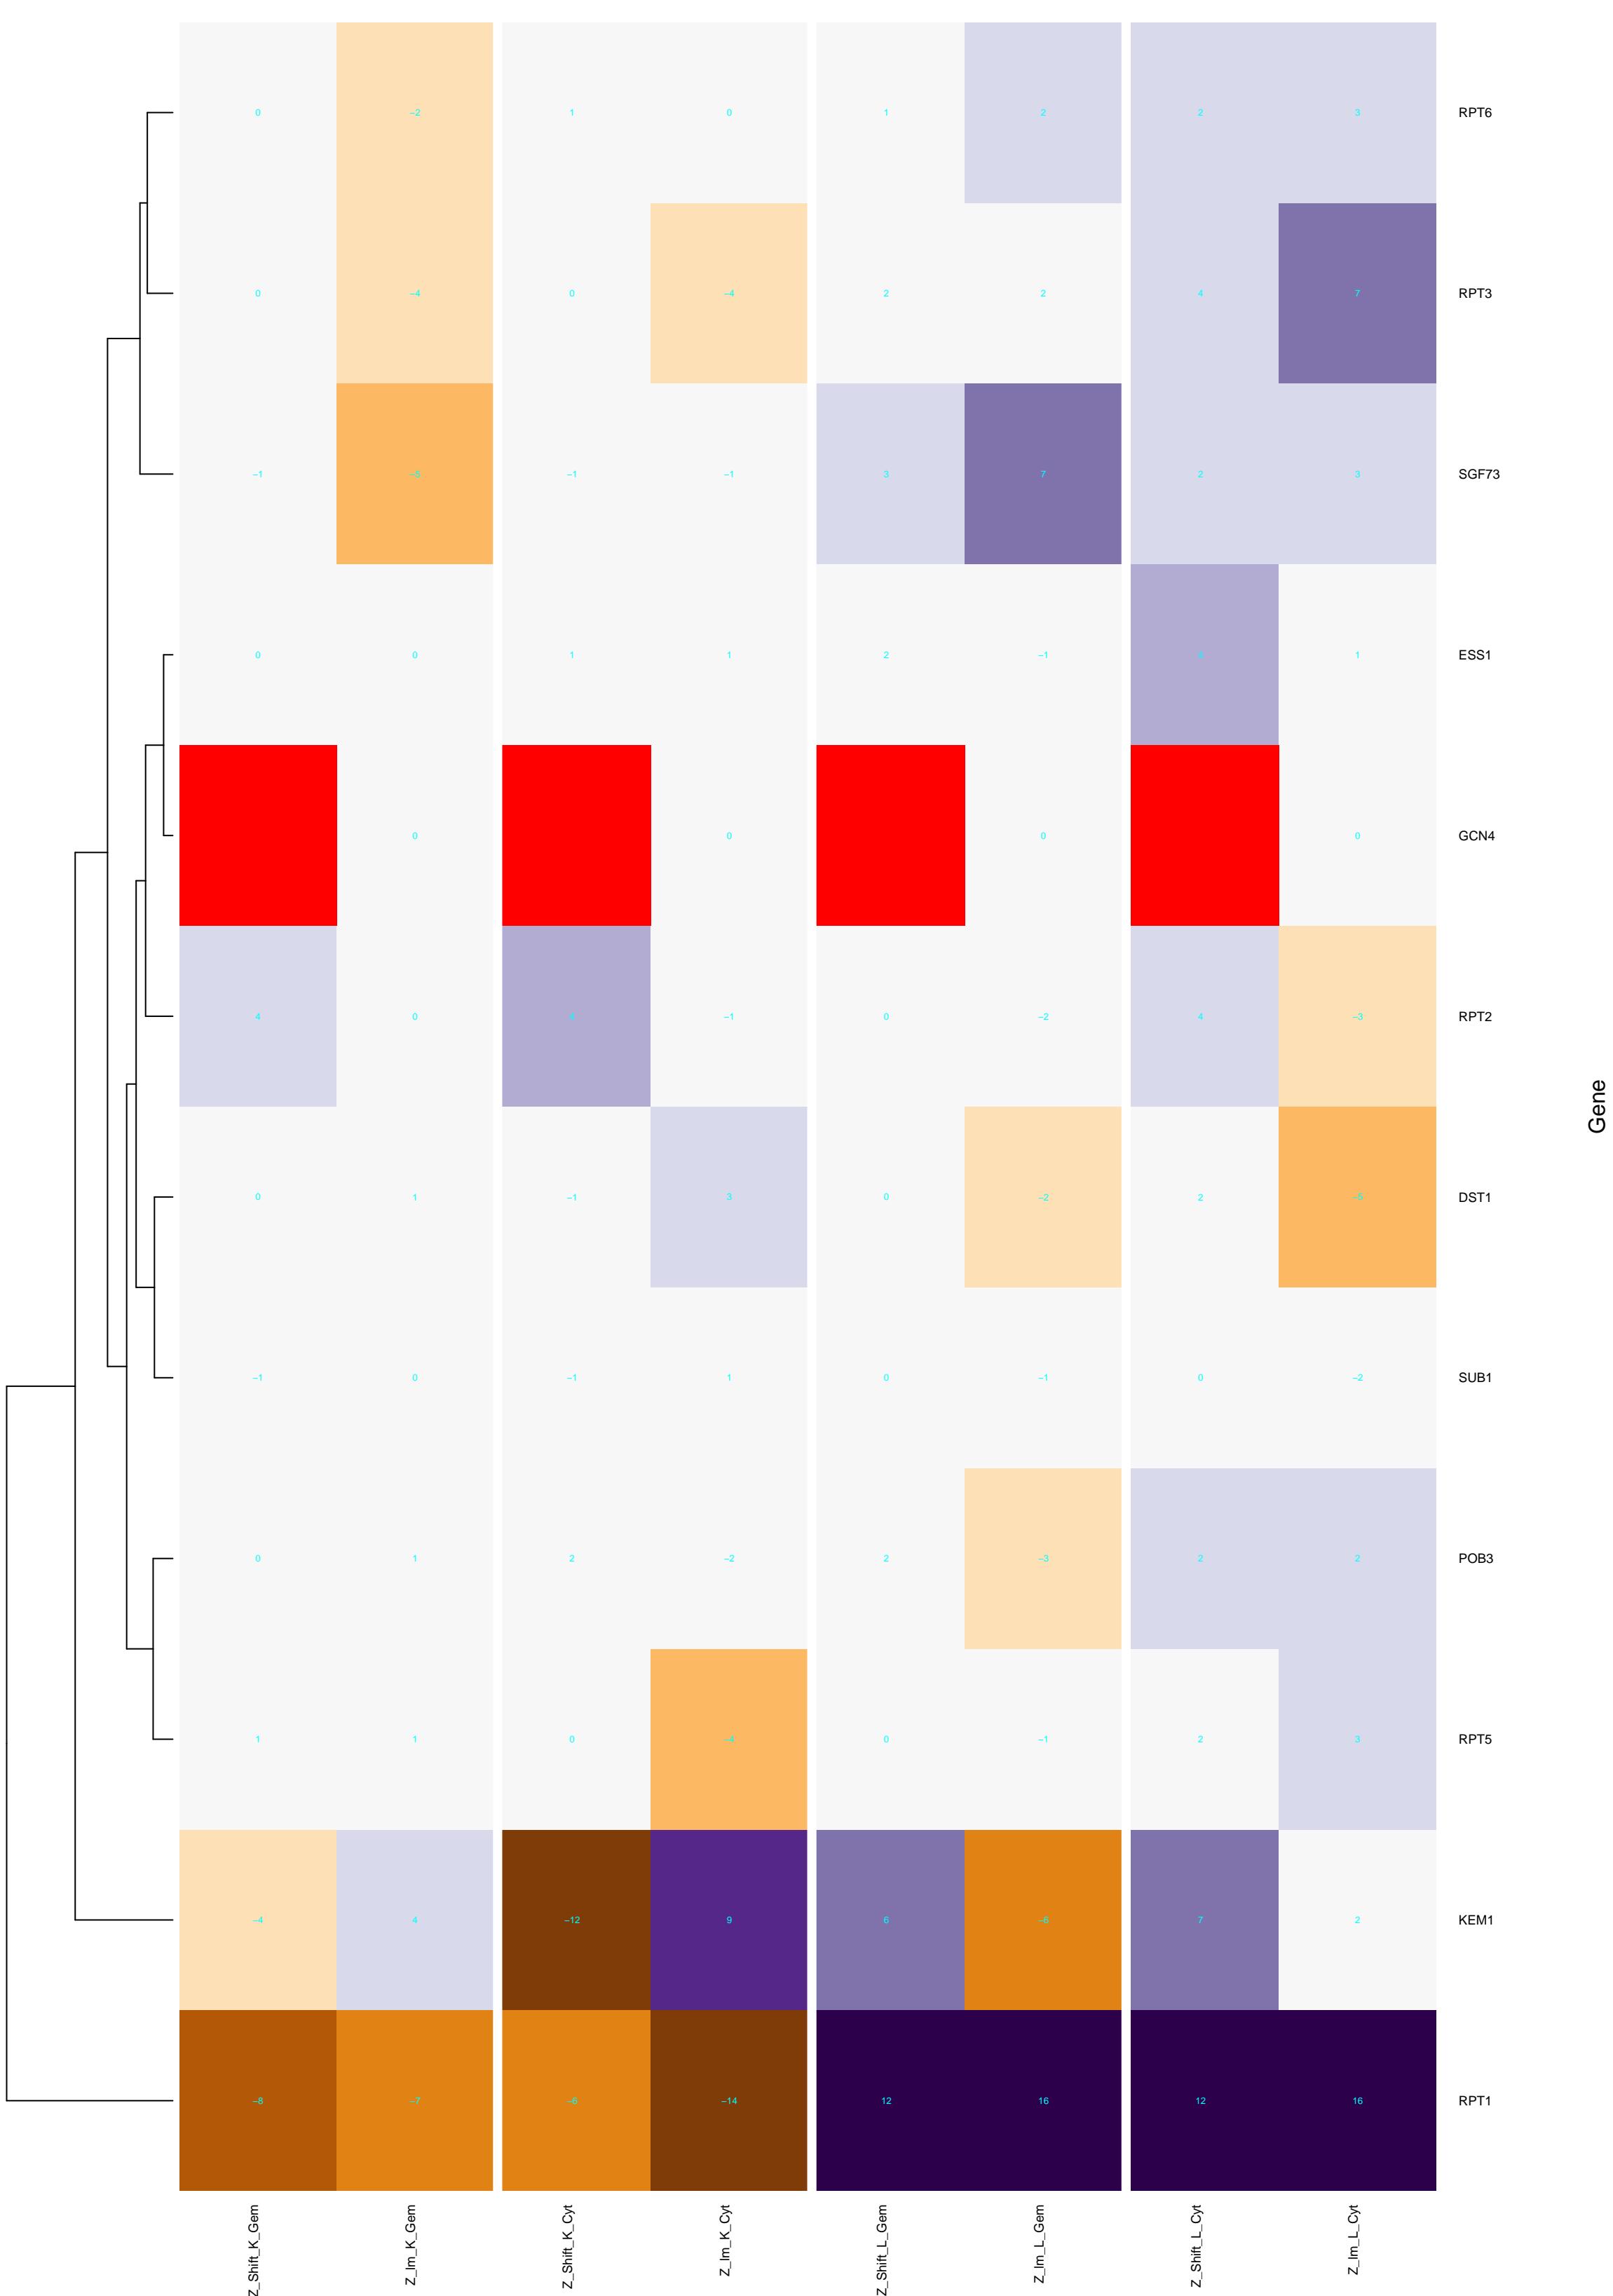

## positive regulation of protein polymerization

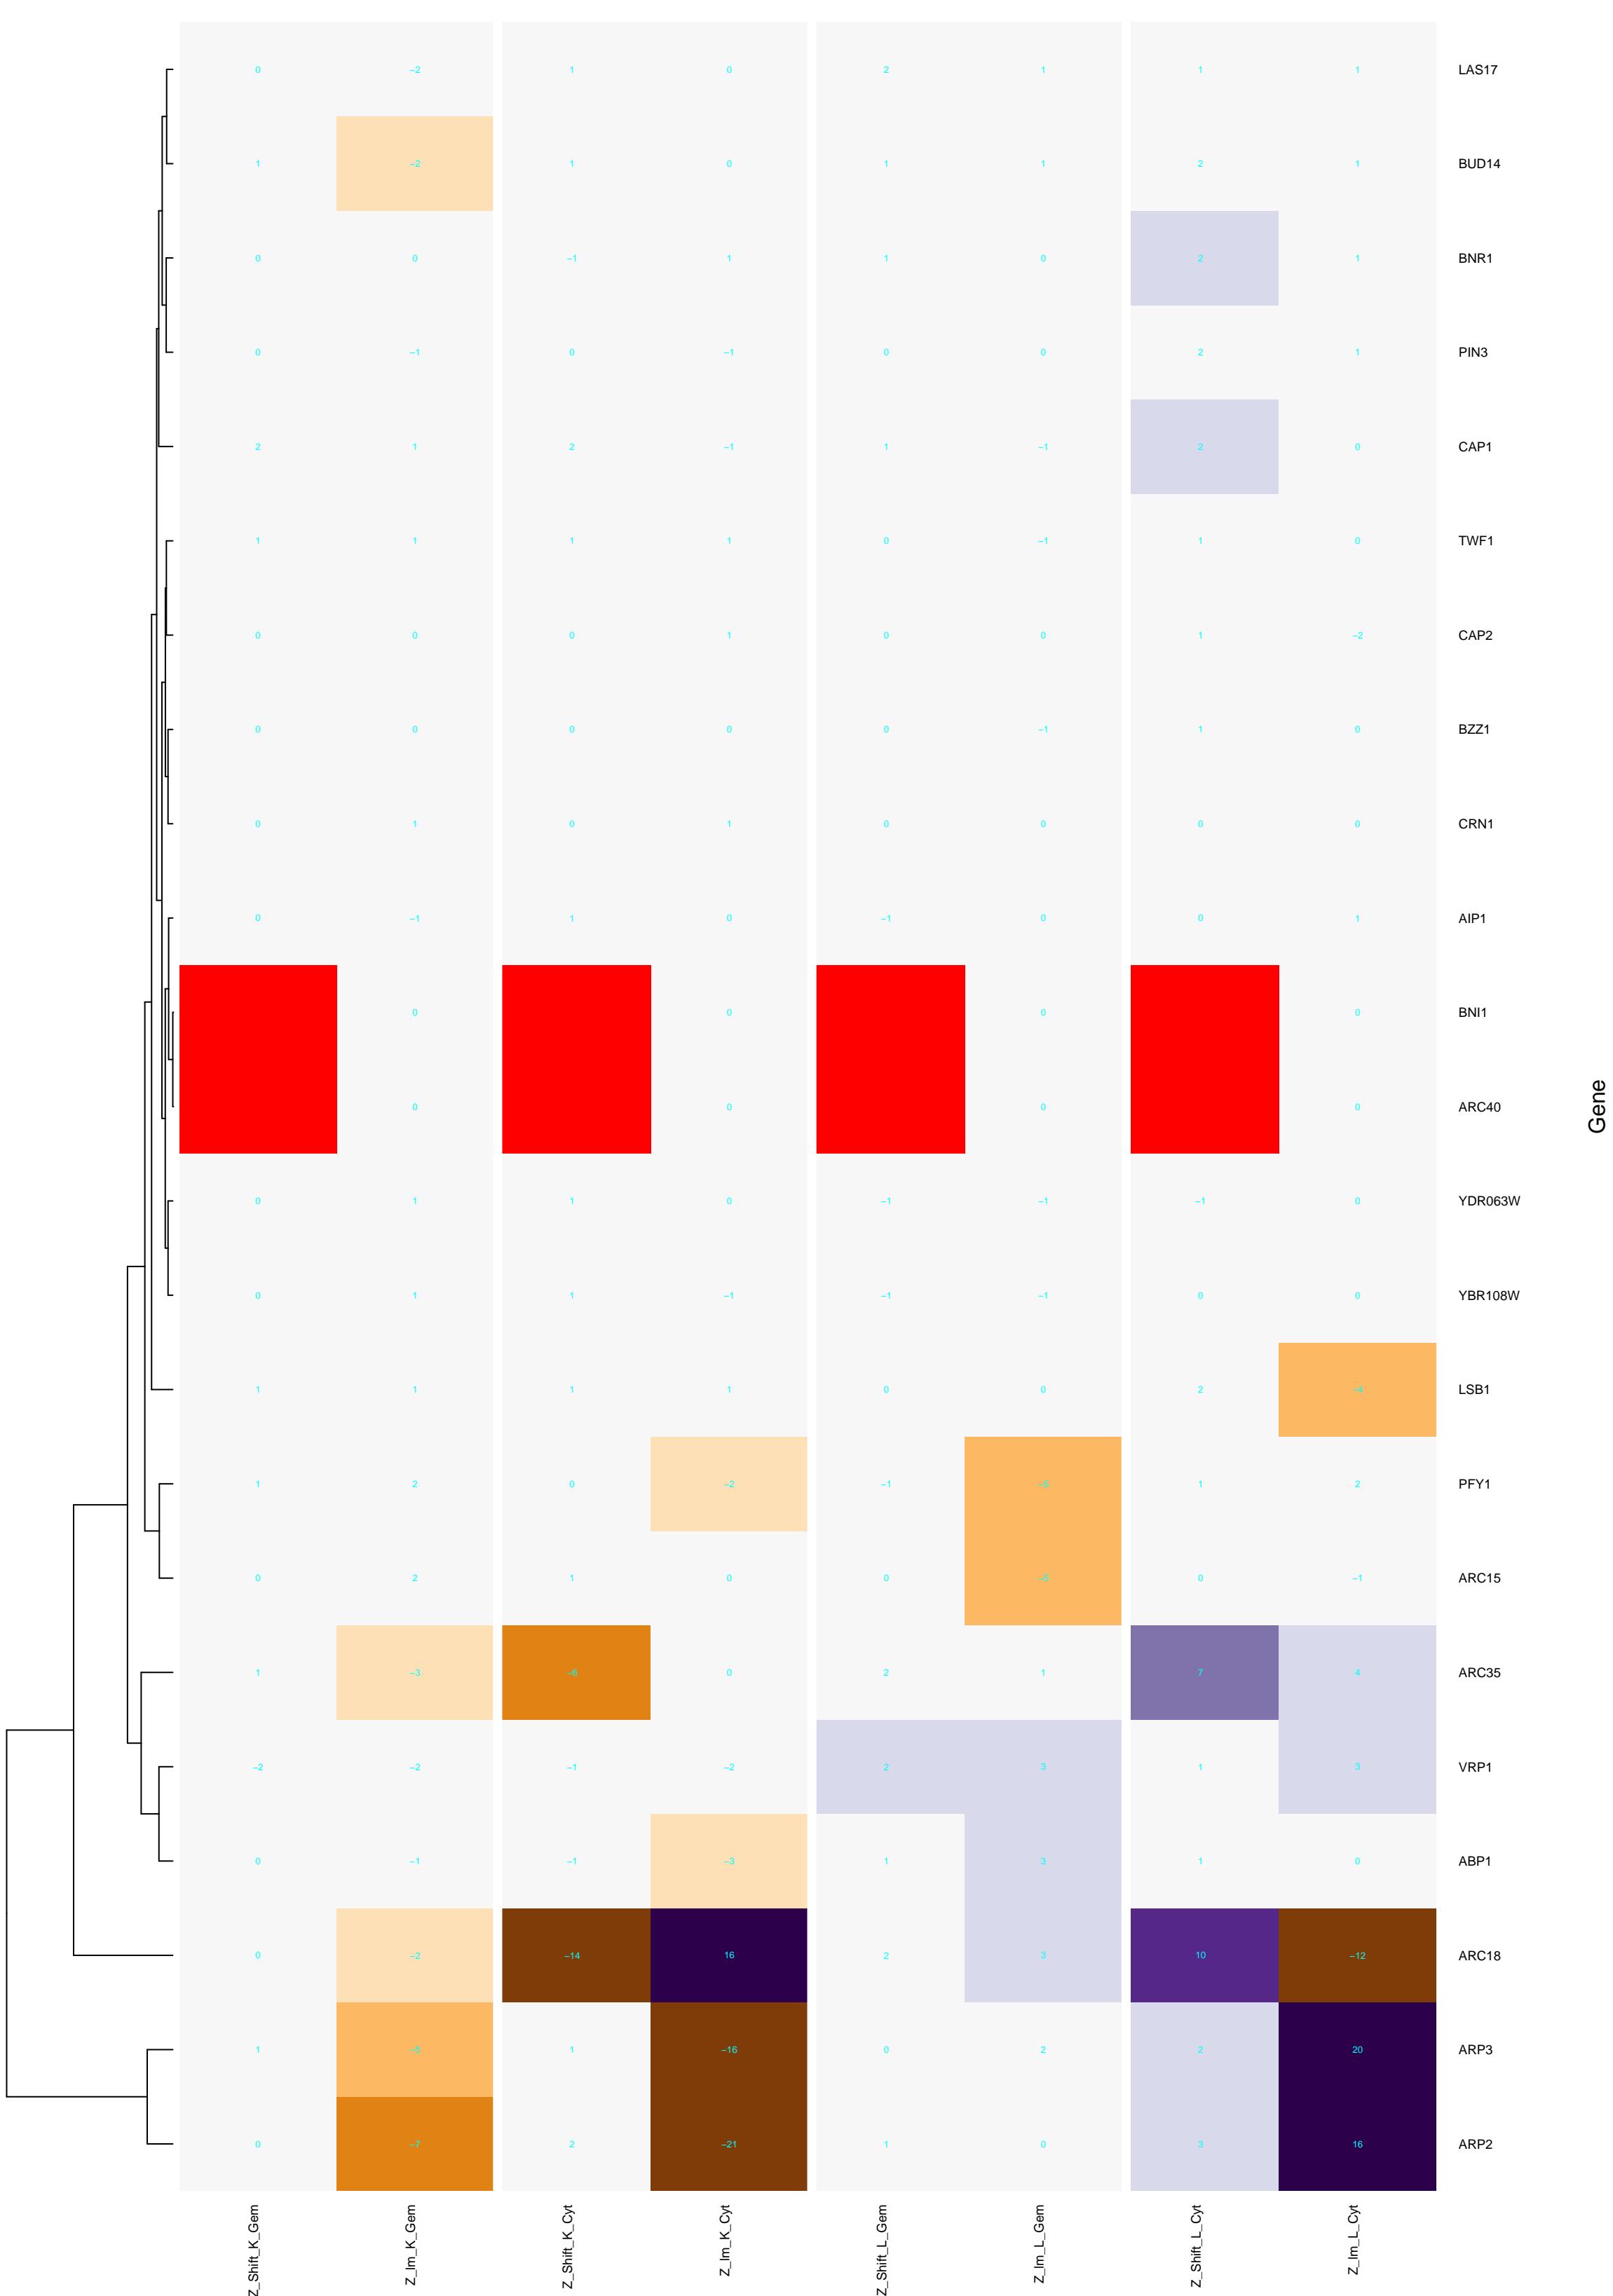

## positive regulation of DNA-templated transcription, initiation

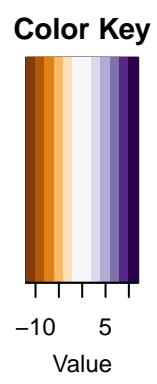

Color Key

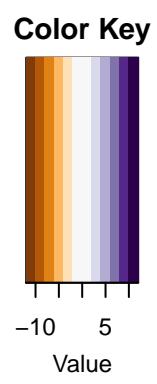

## regulation of actin filament polymerization

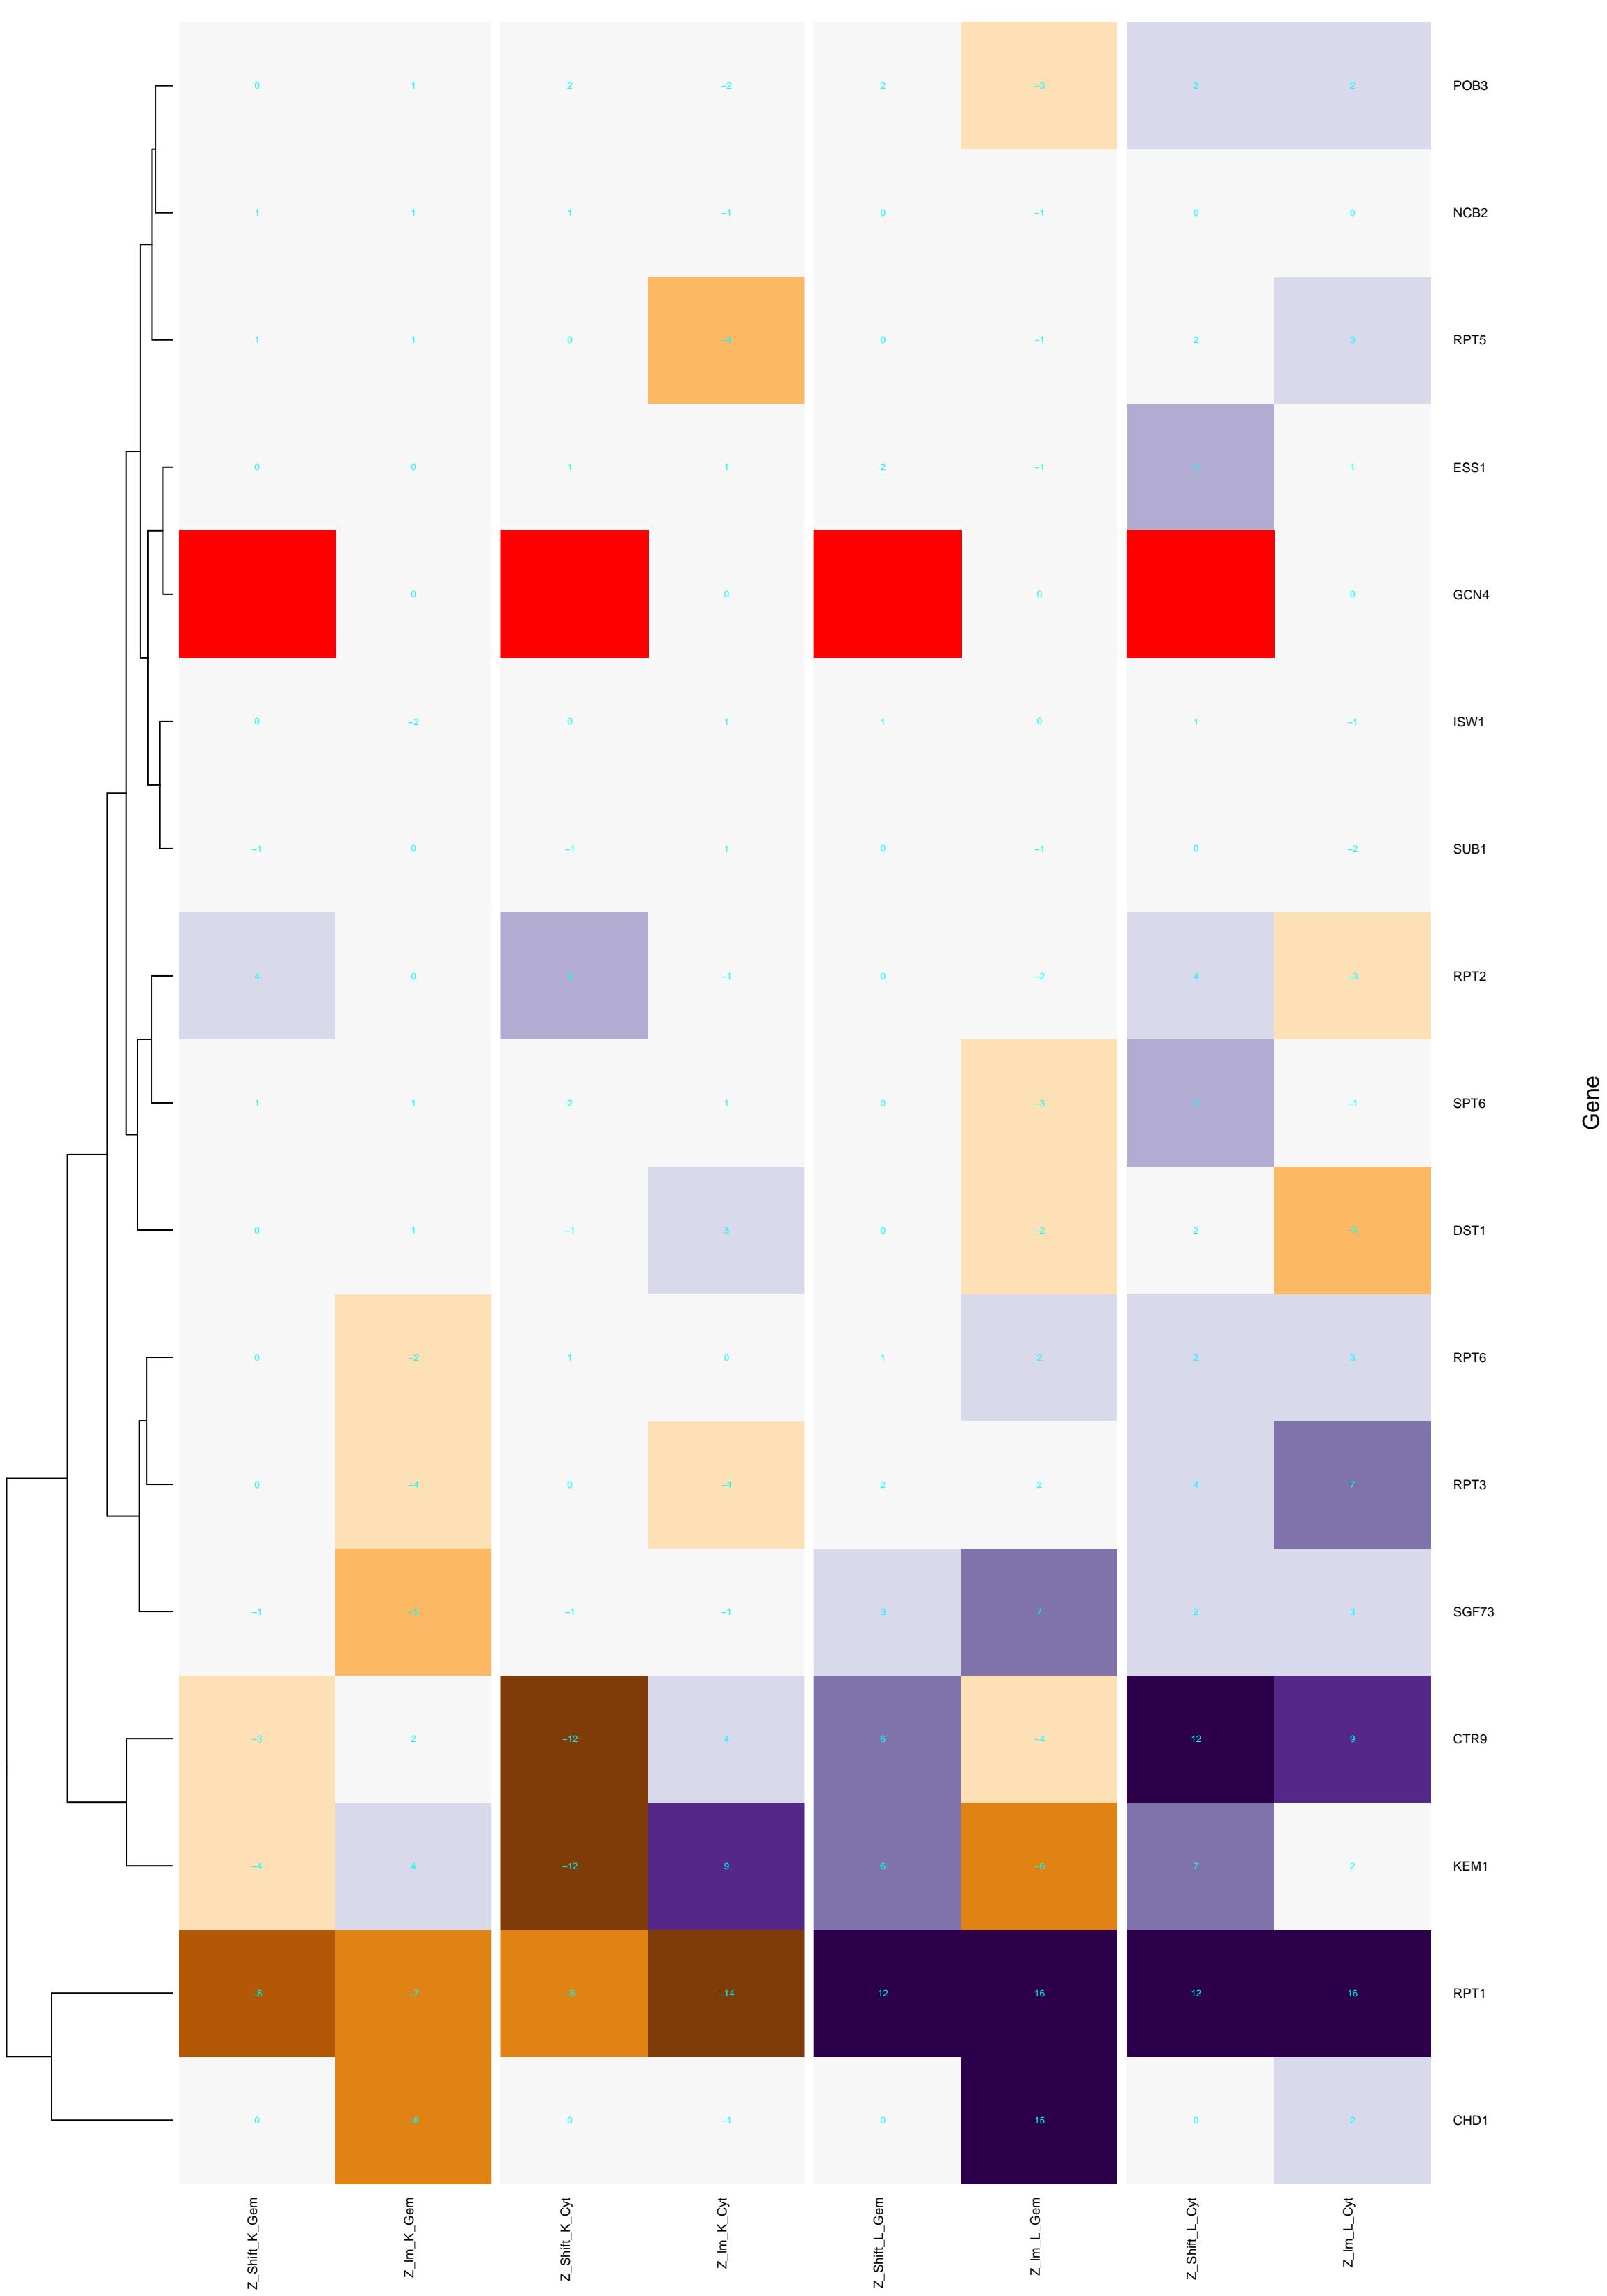

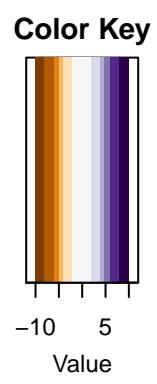

## regulation of microtubule polymerization

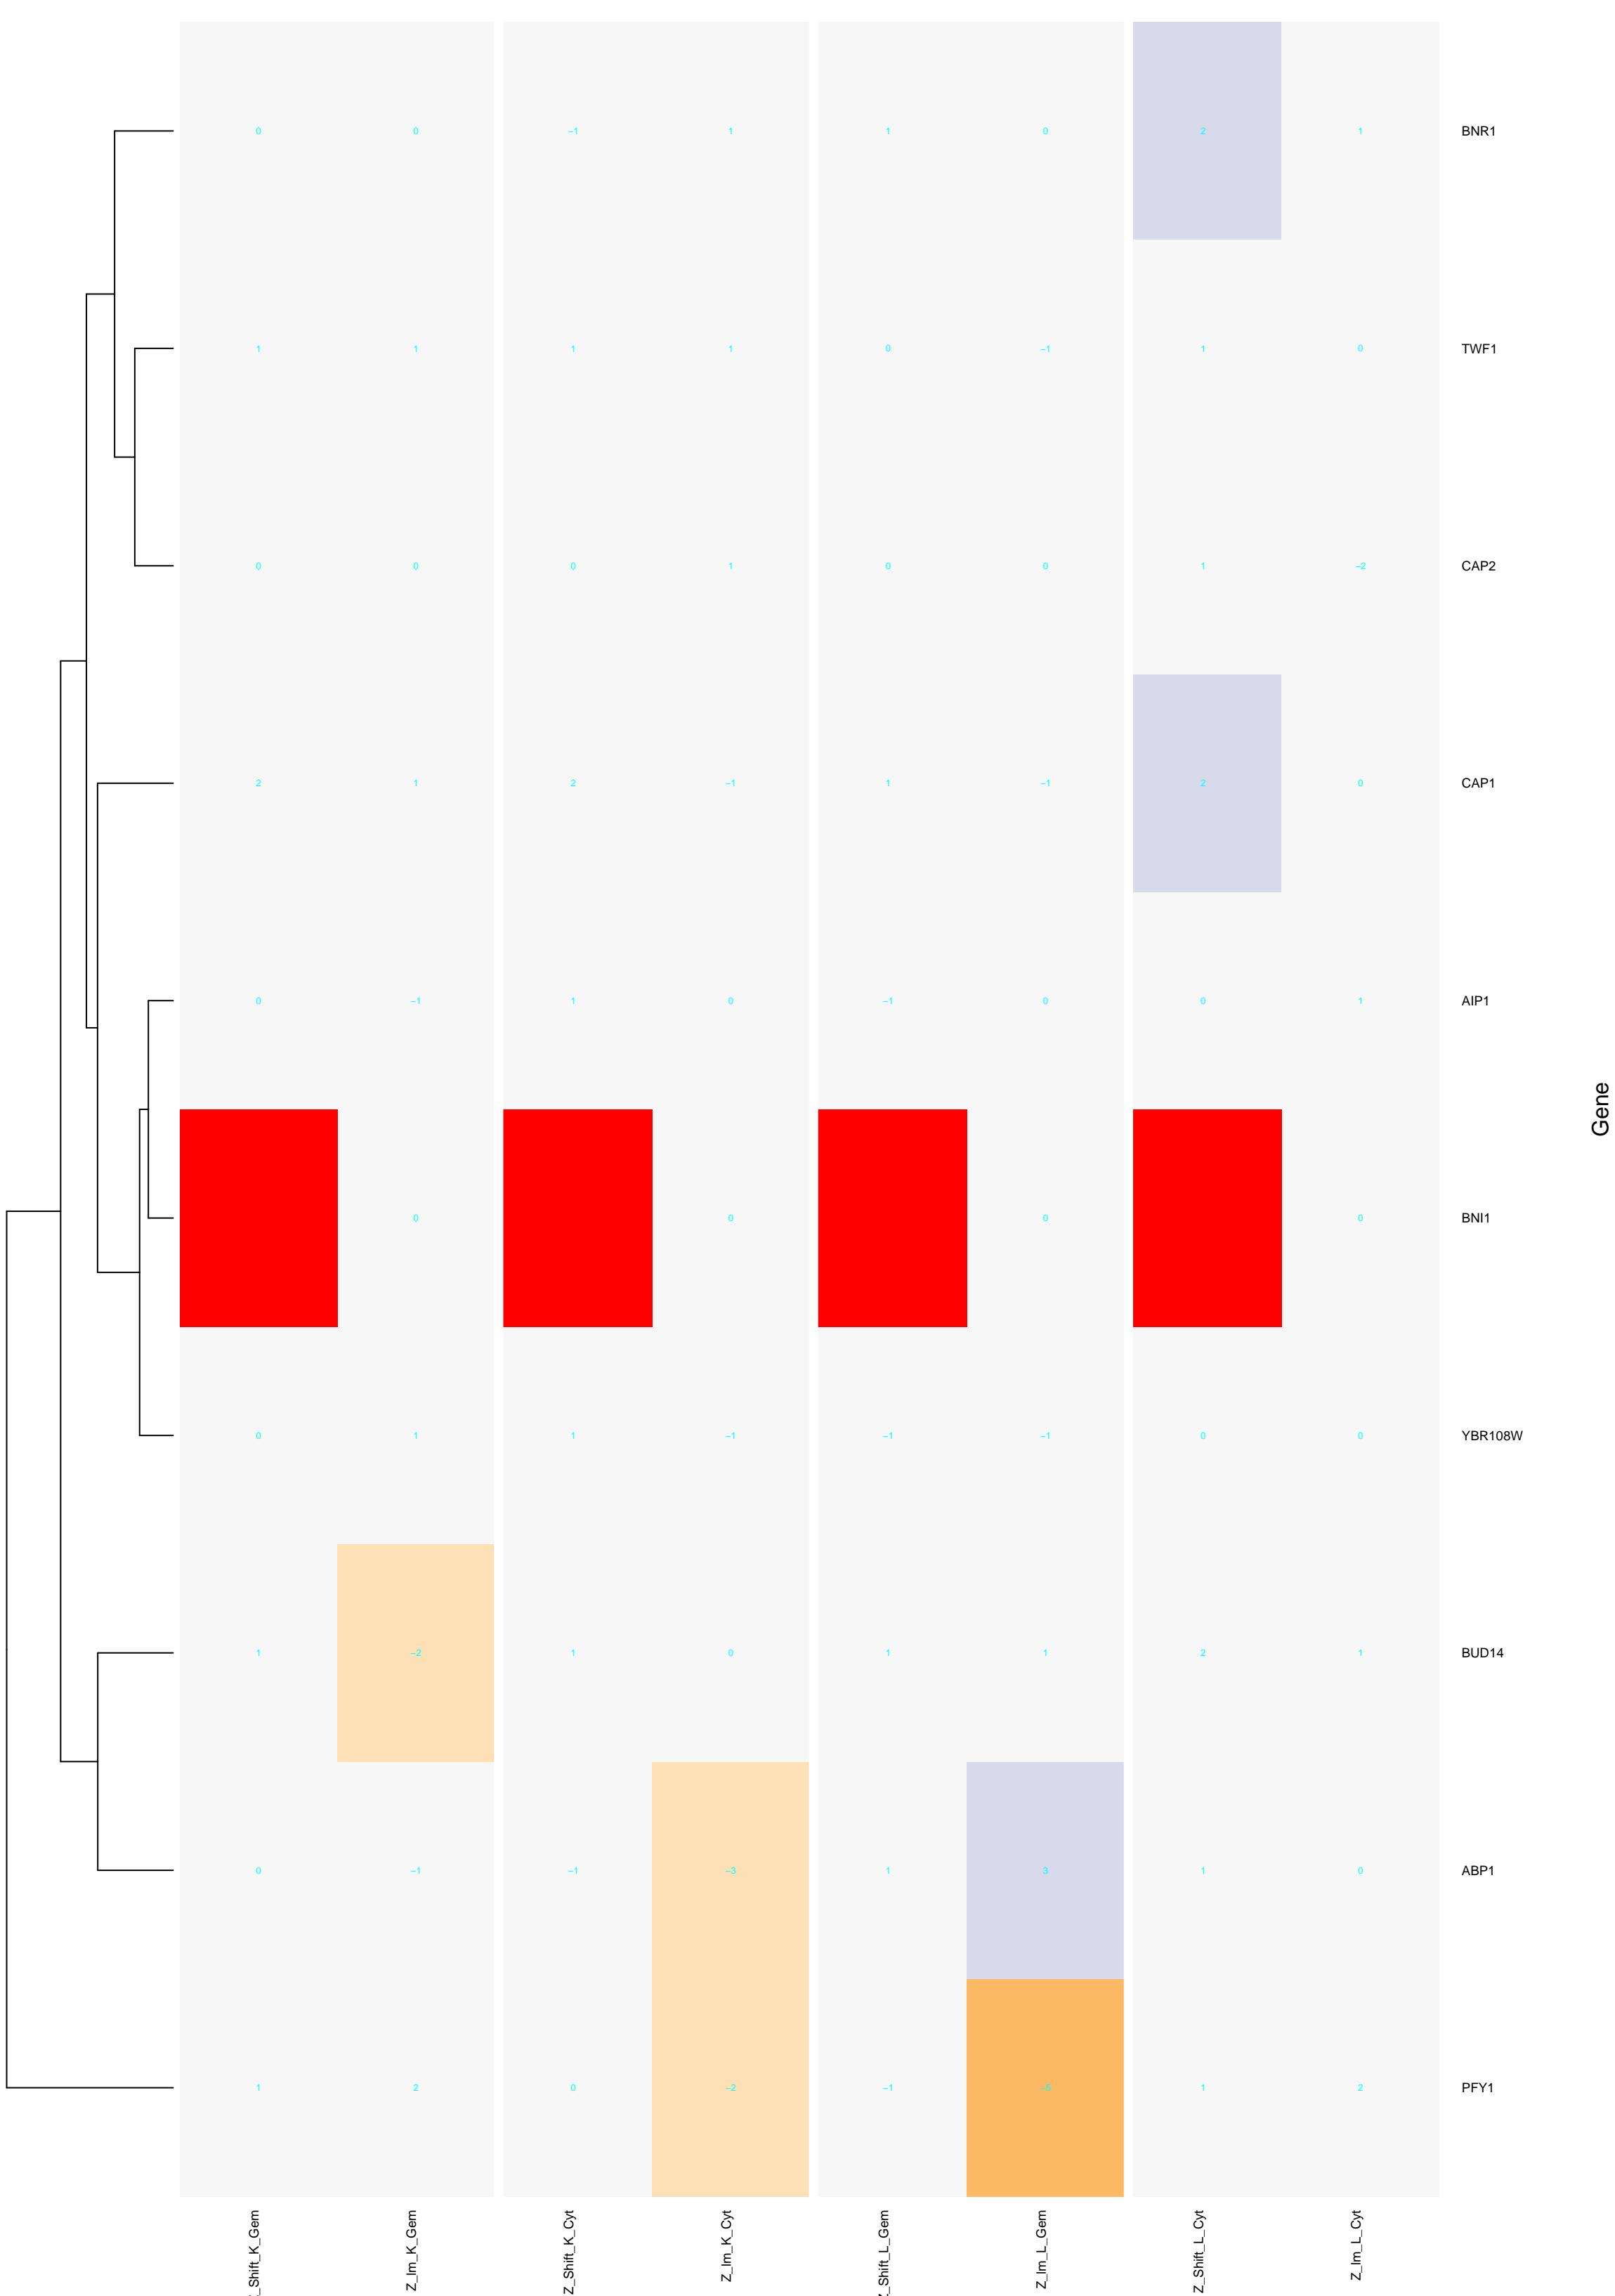

## regulation of transcription initiation from RNA polymerase II promoter

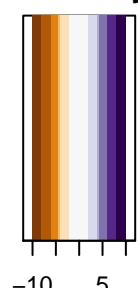

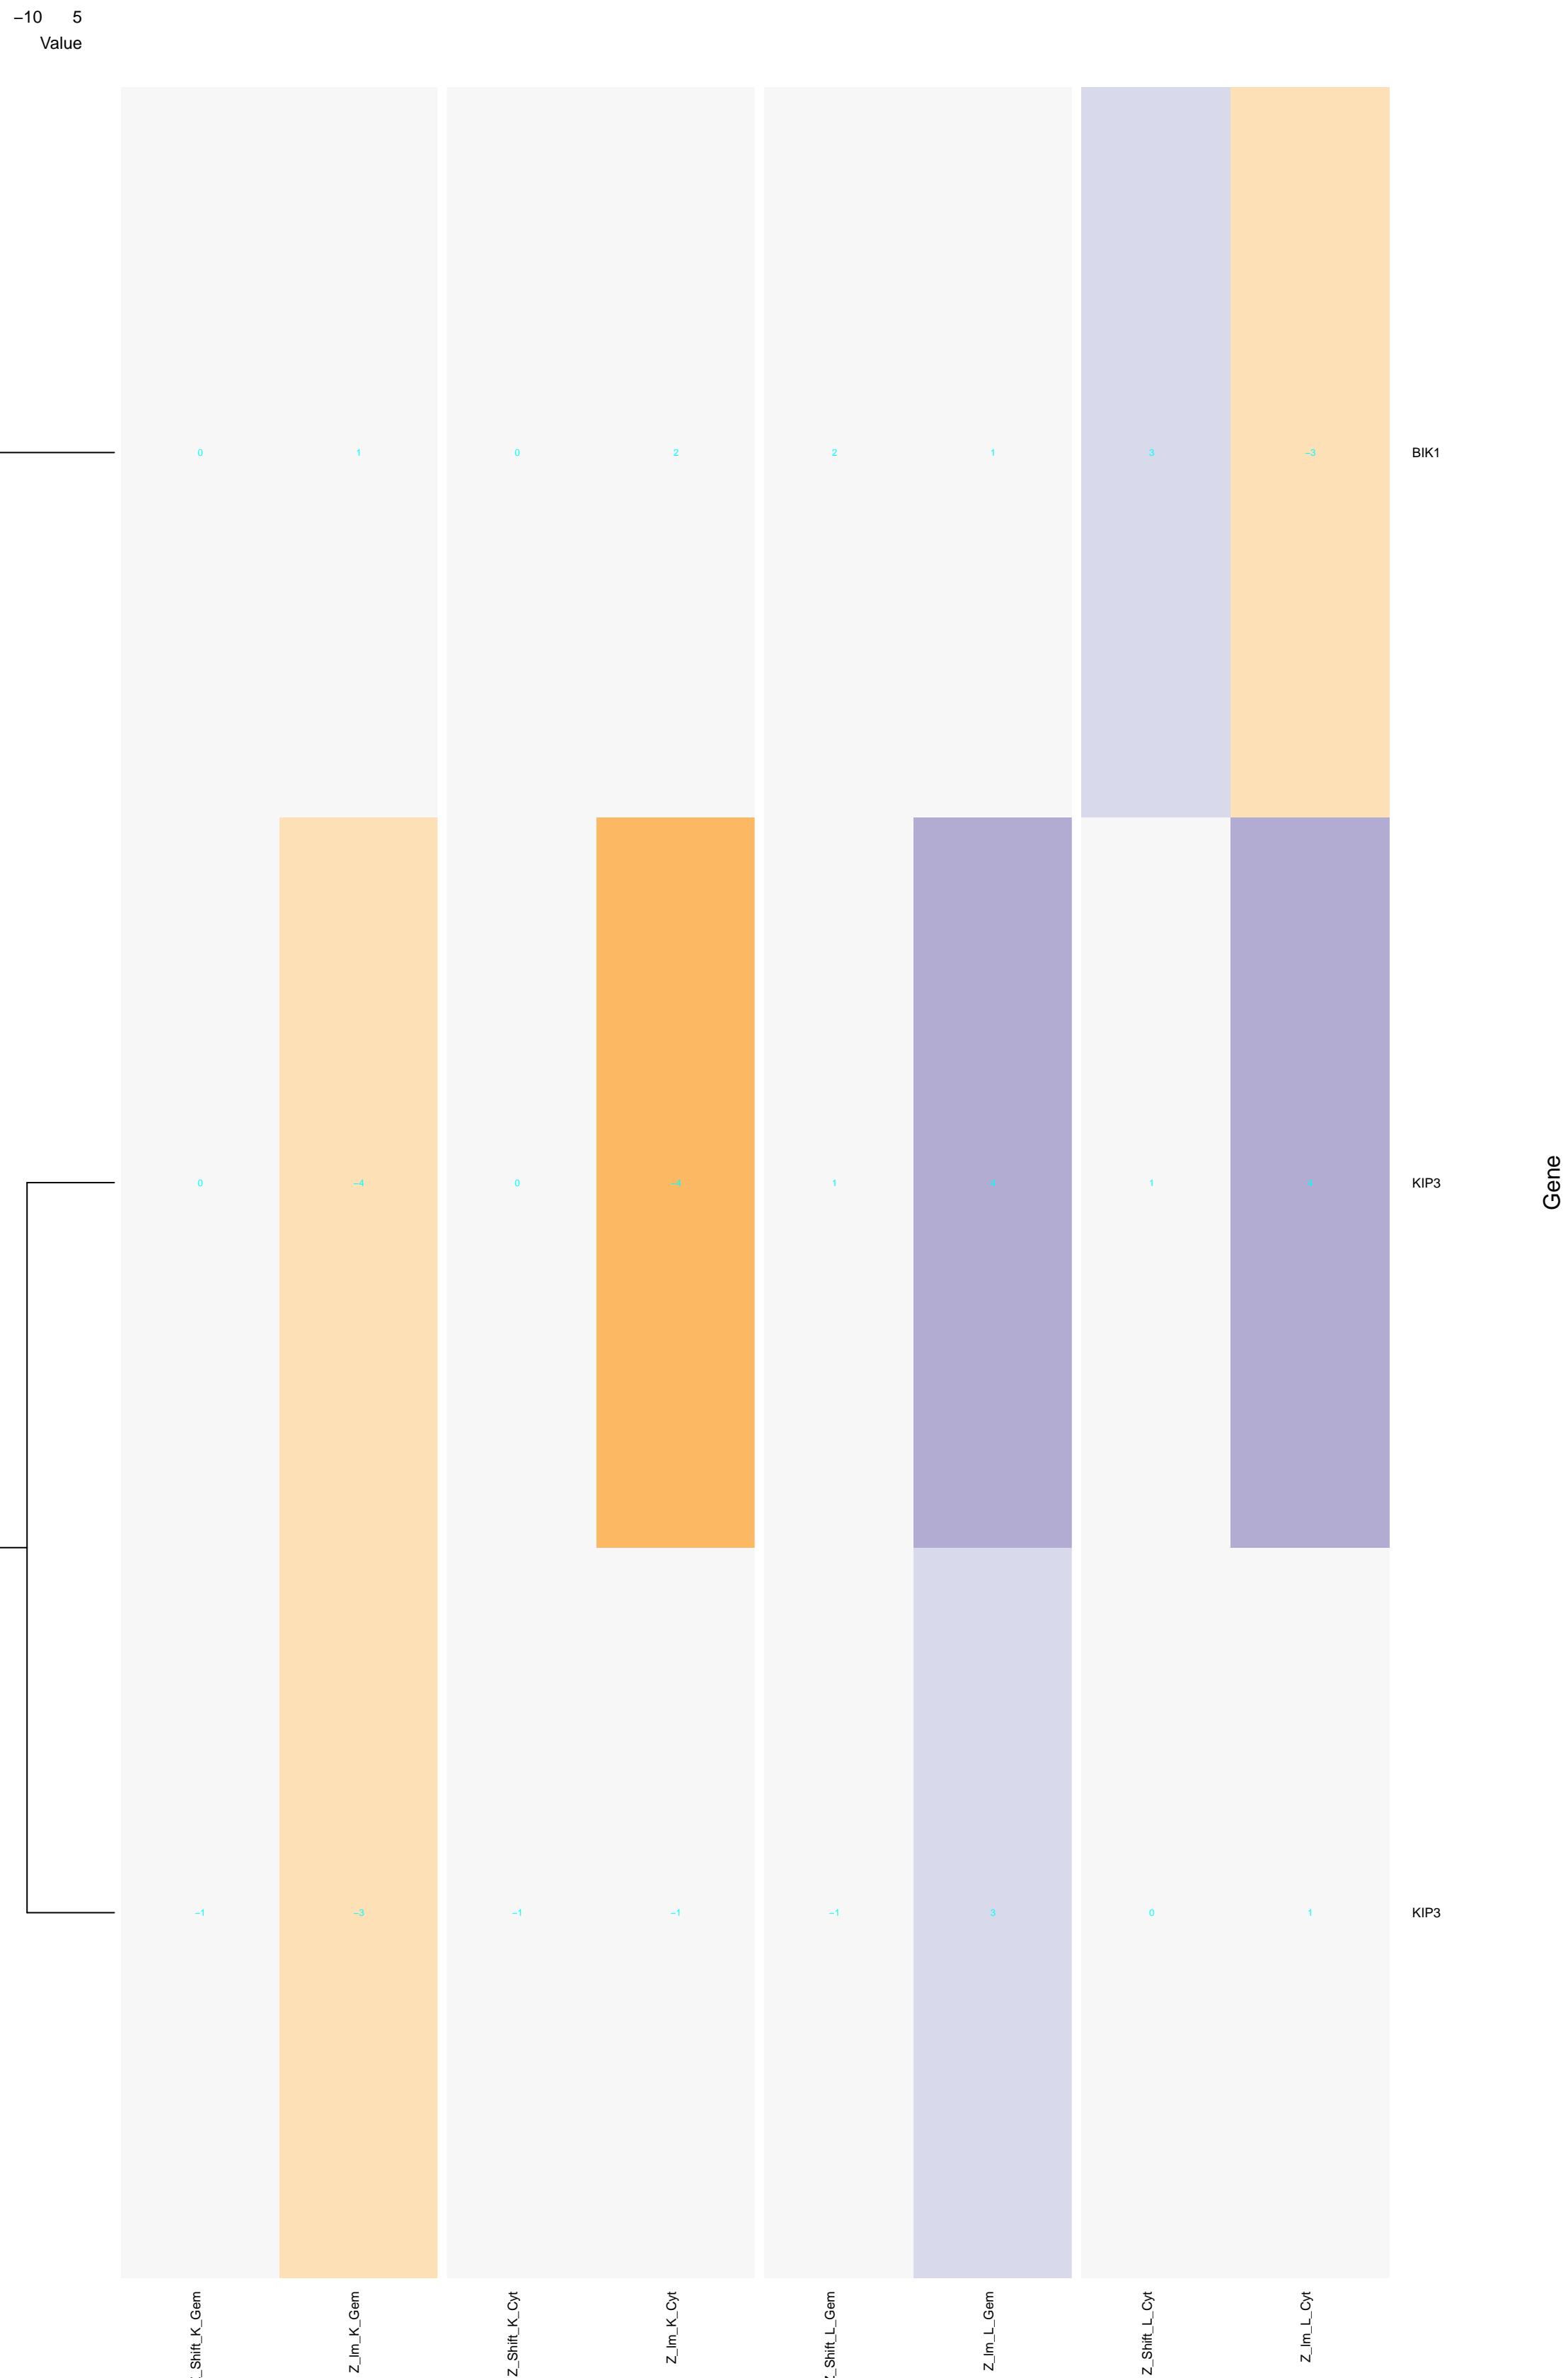

## negative regulation of actin filament polymerization

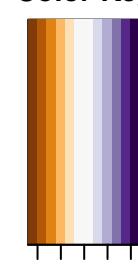

Color Key

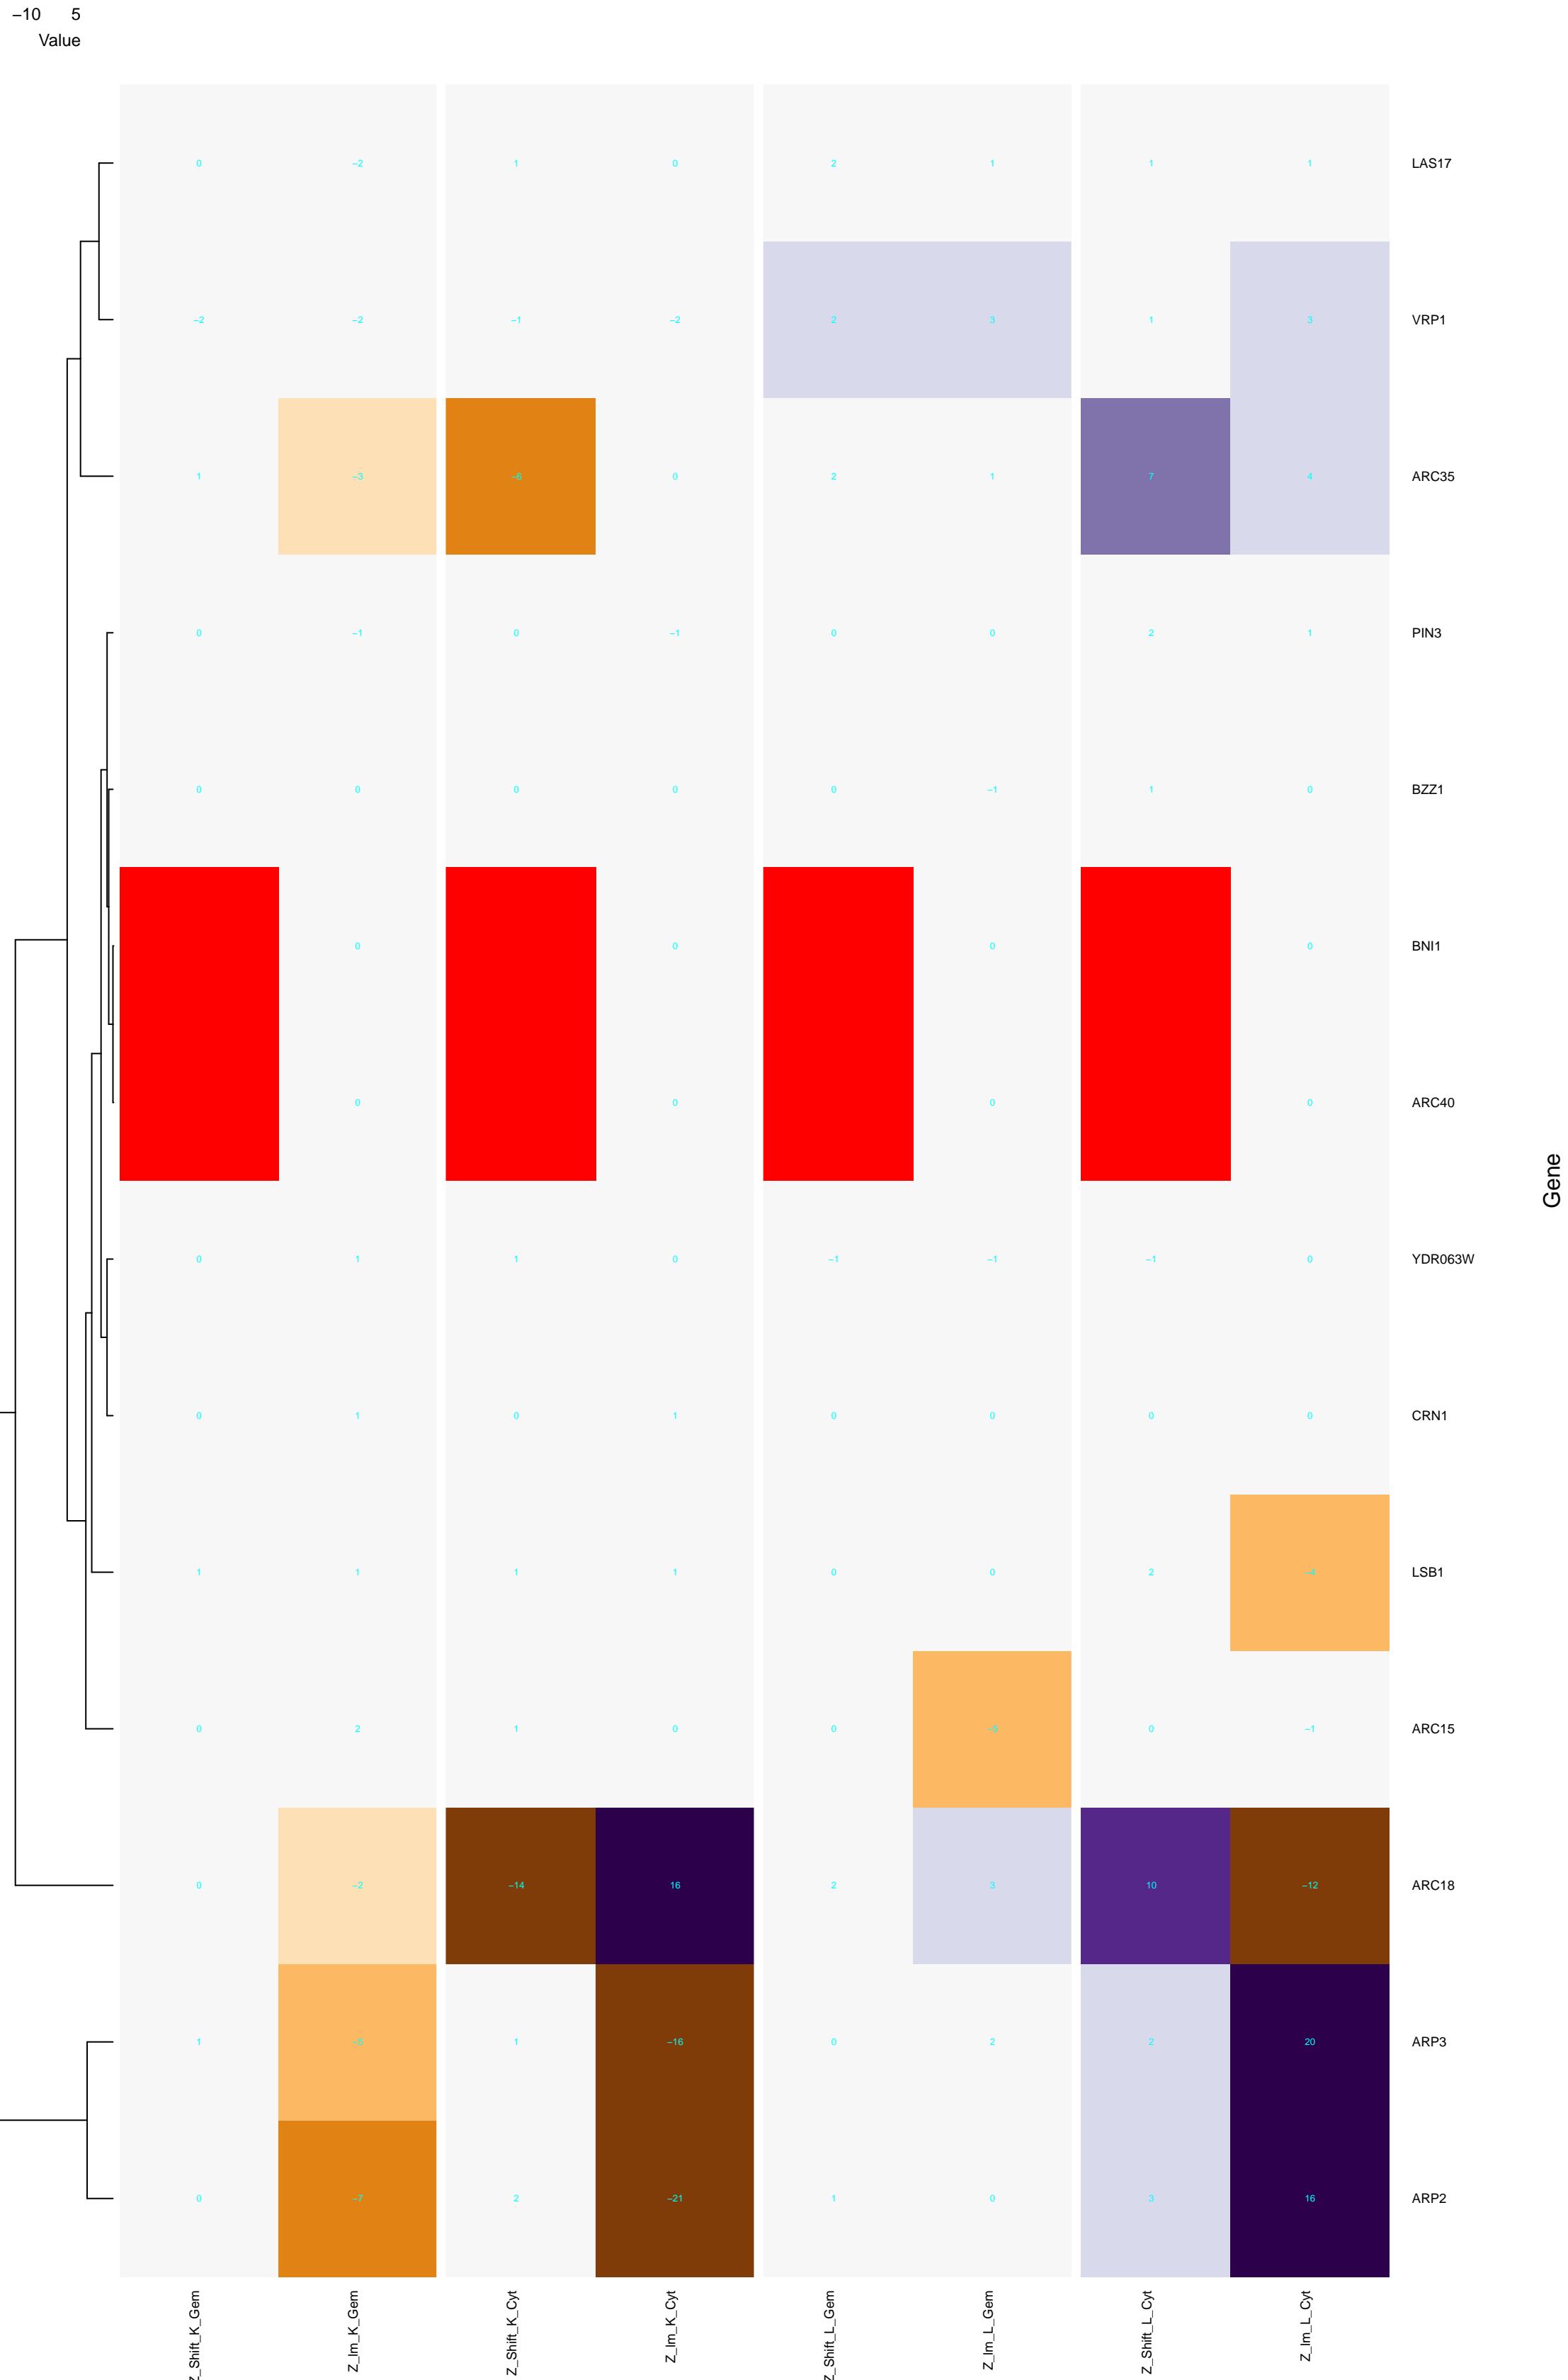

## negative regulation of microtubule polymerization

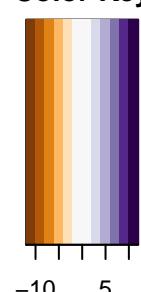

Color Key

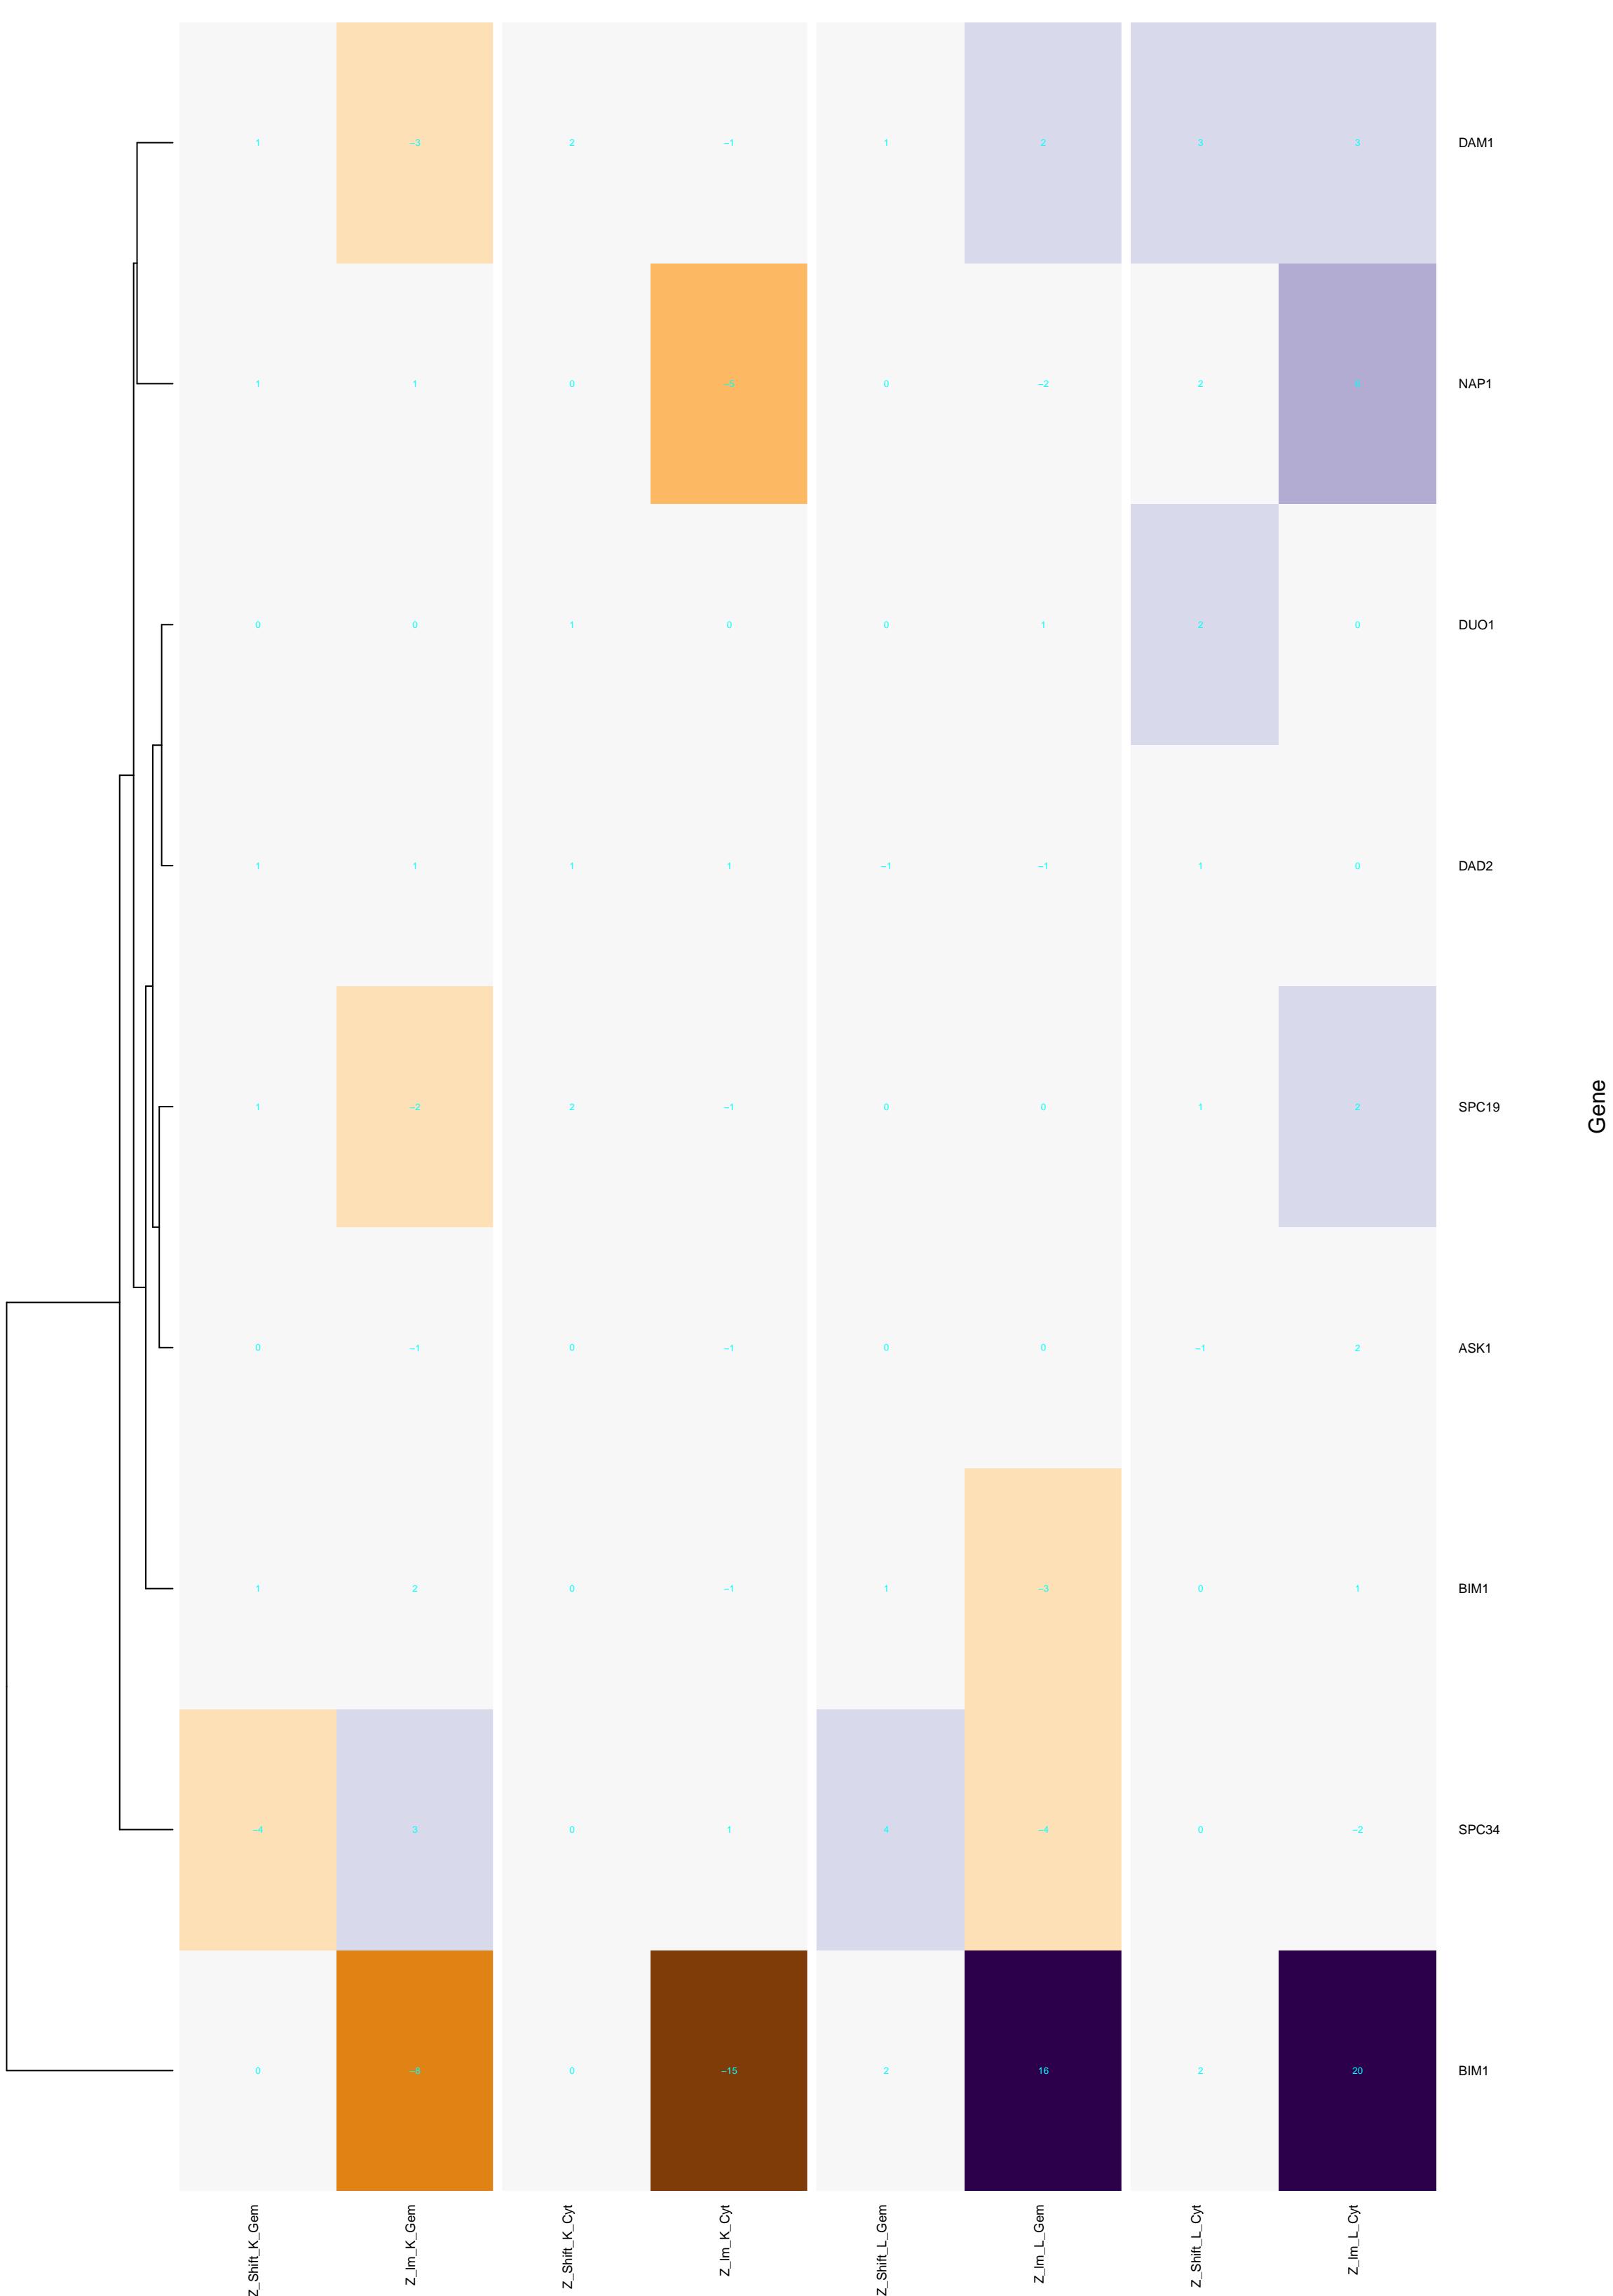

## positive regulation of actin filament polymerization

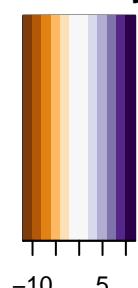

Color Key

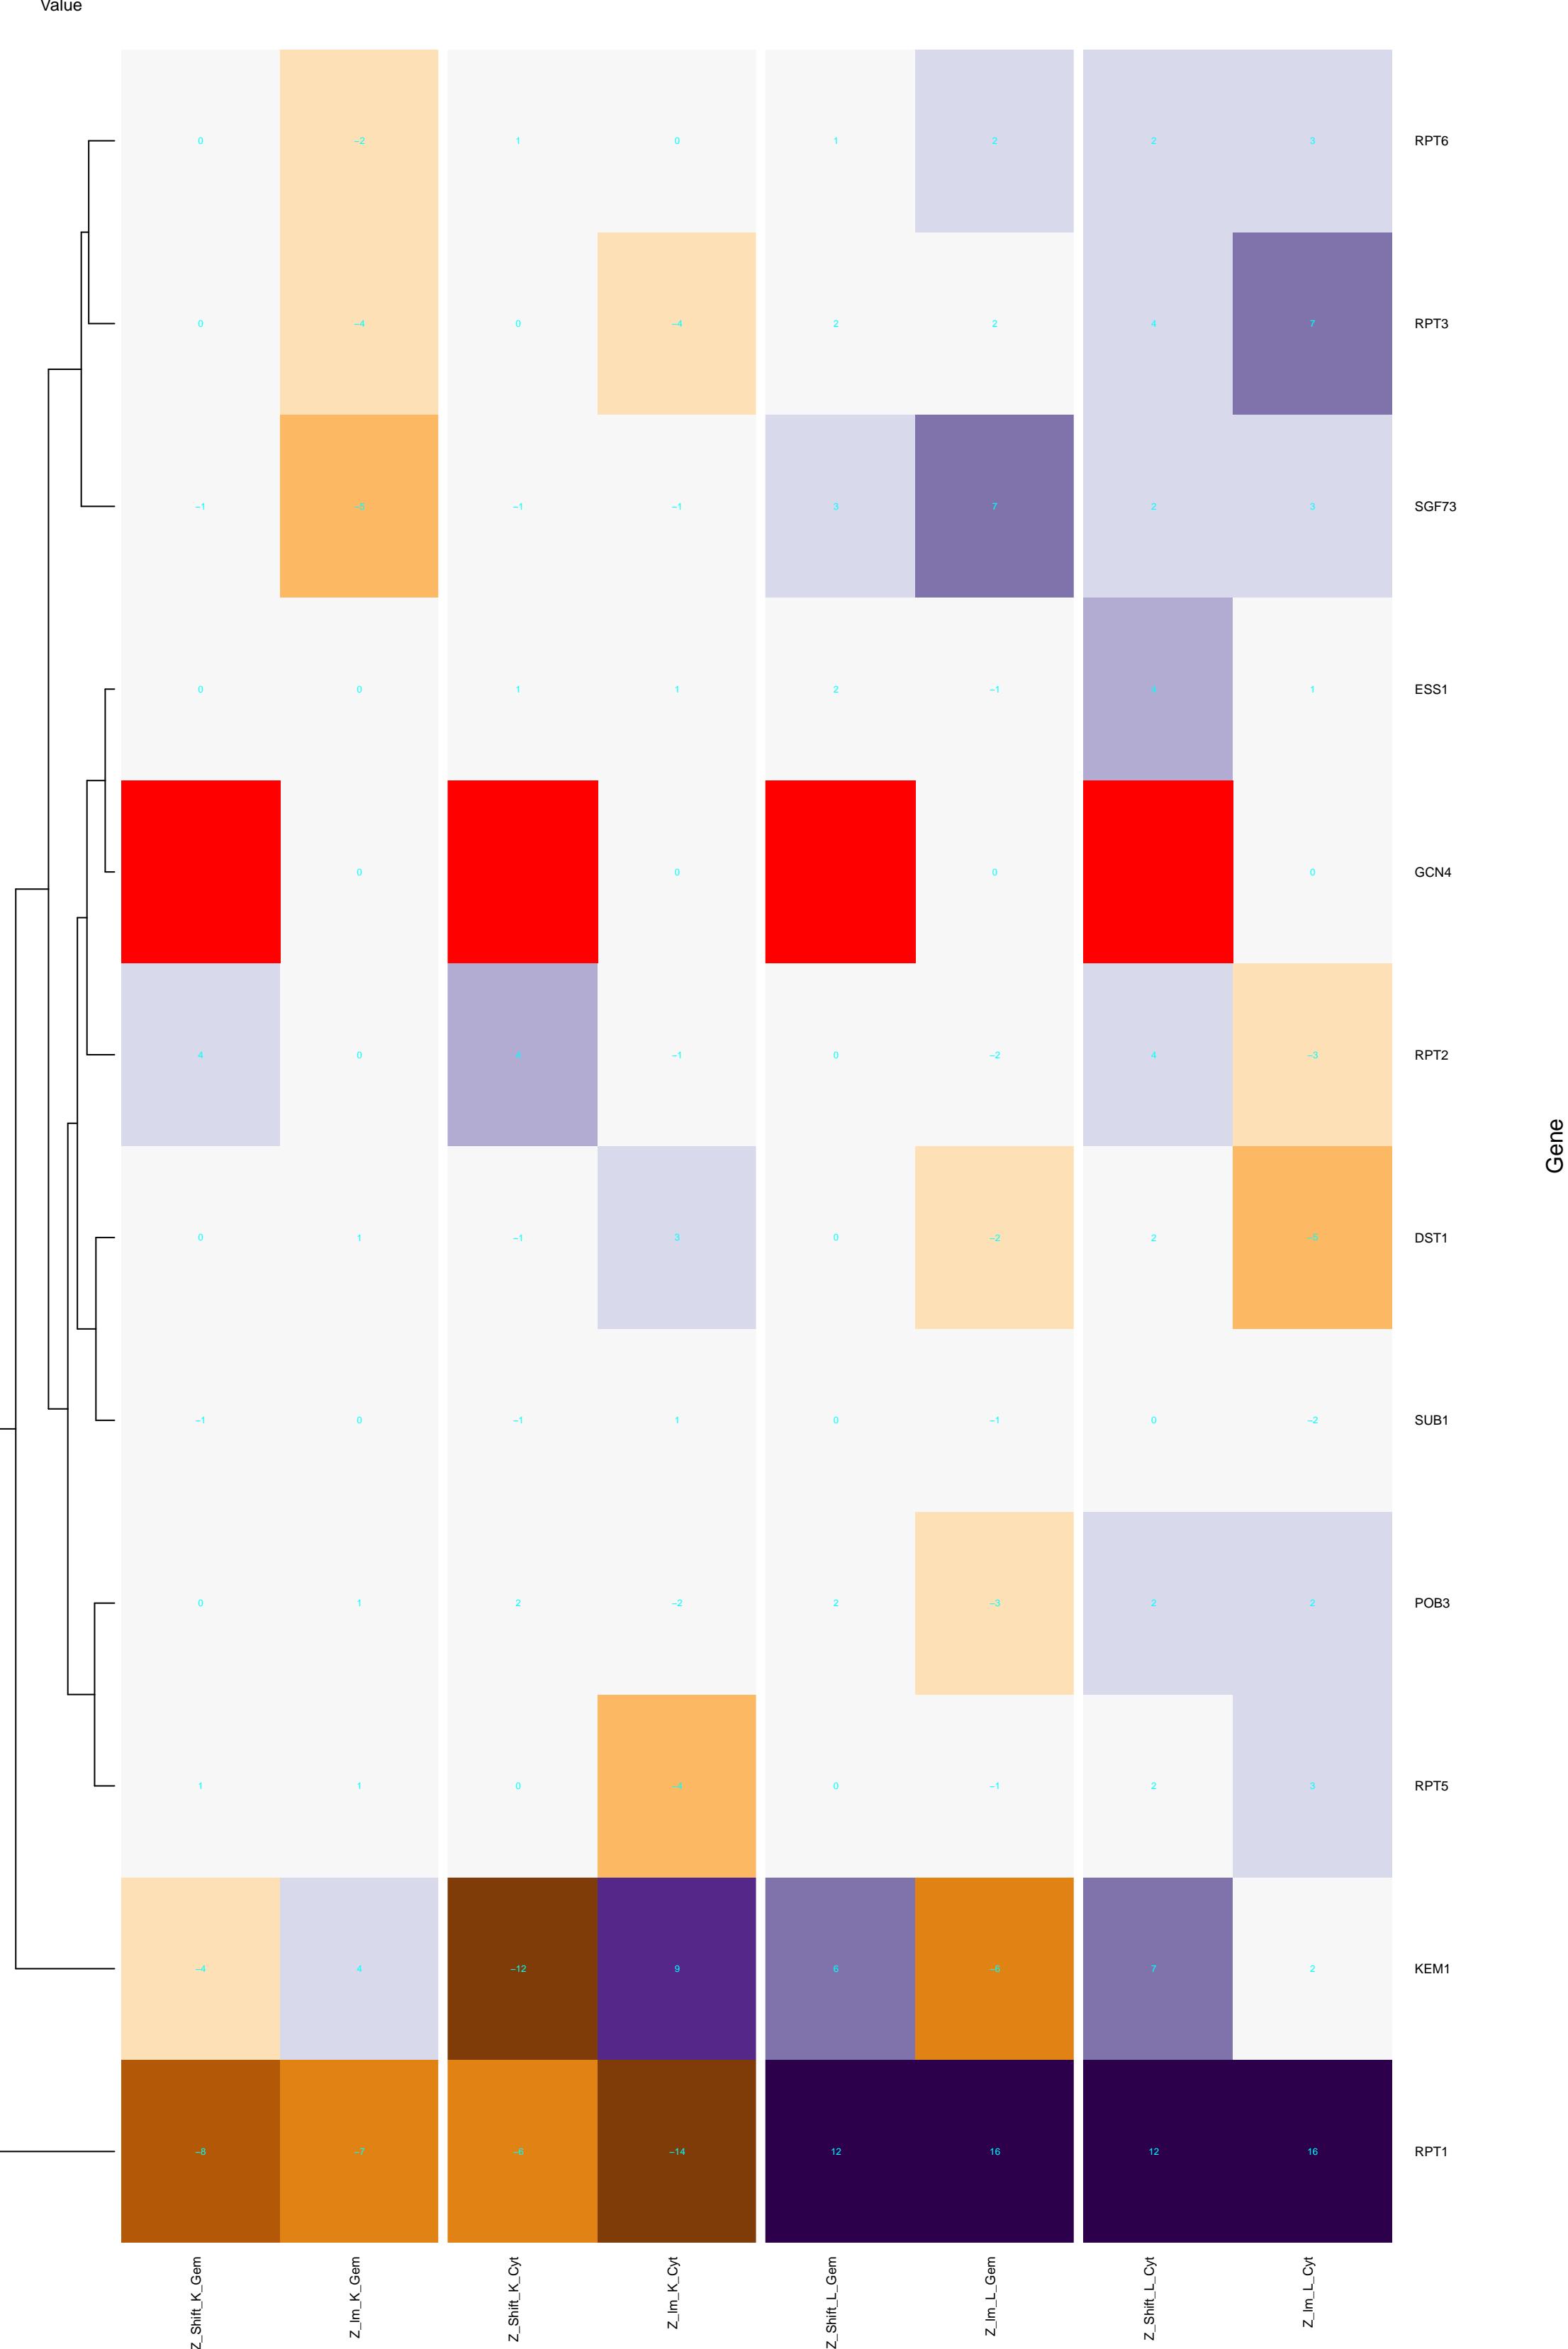

## positive regulation of microtubule polymerization

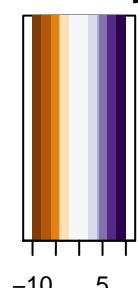

Color Key

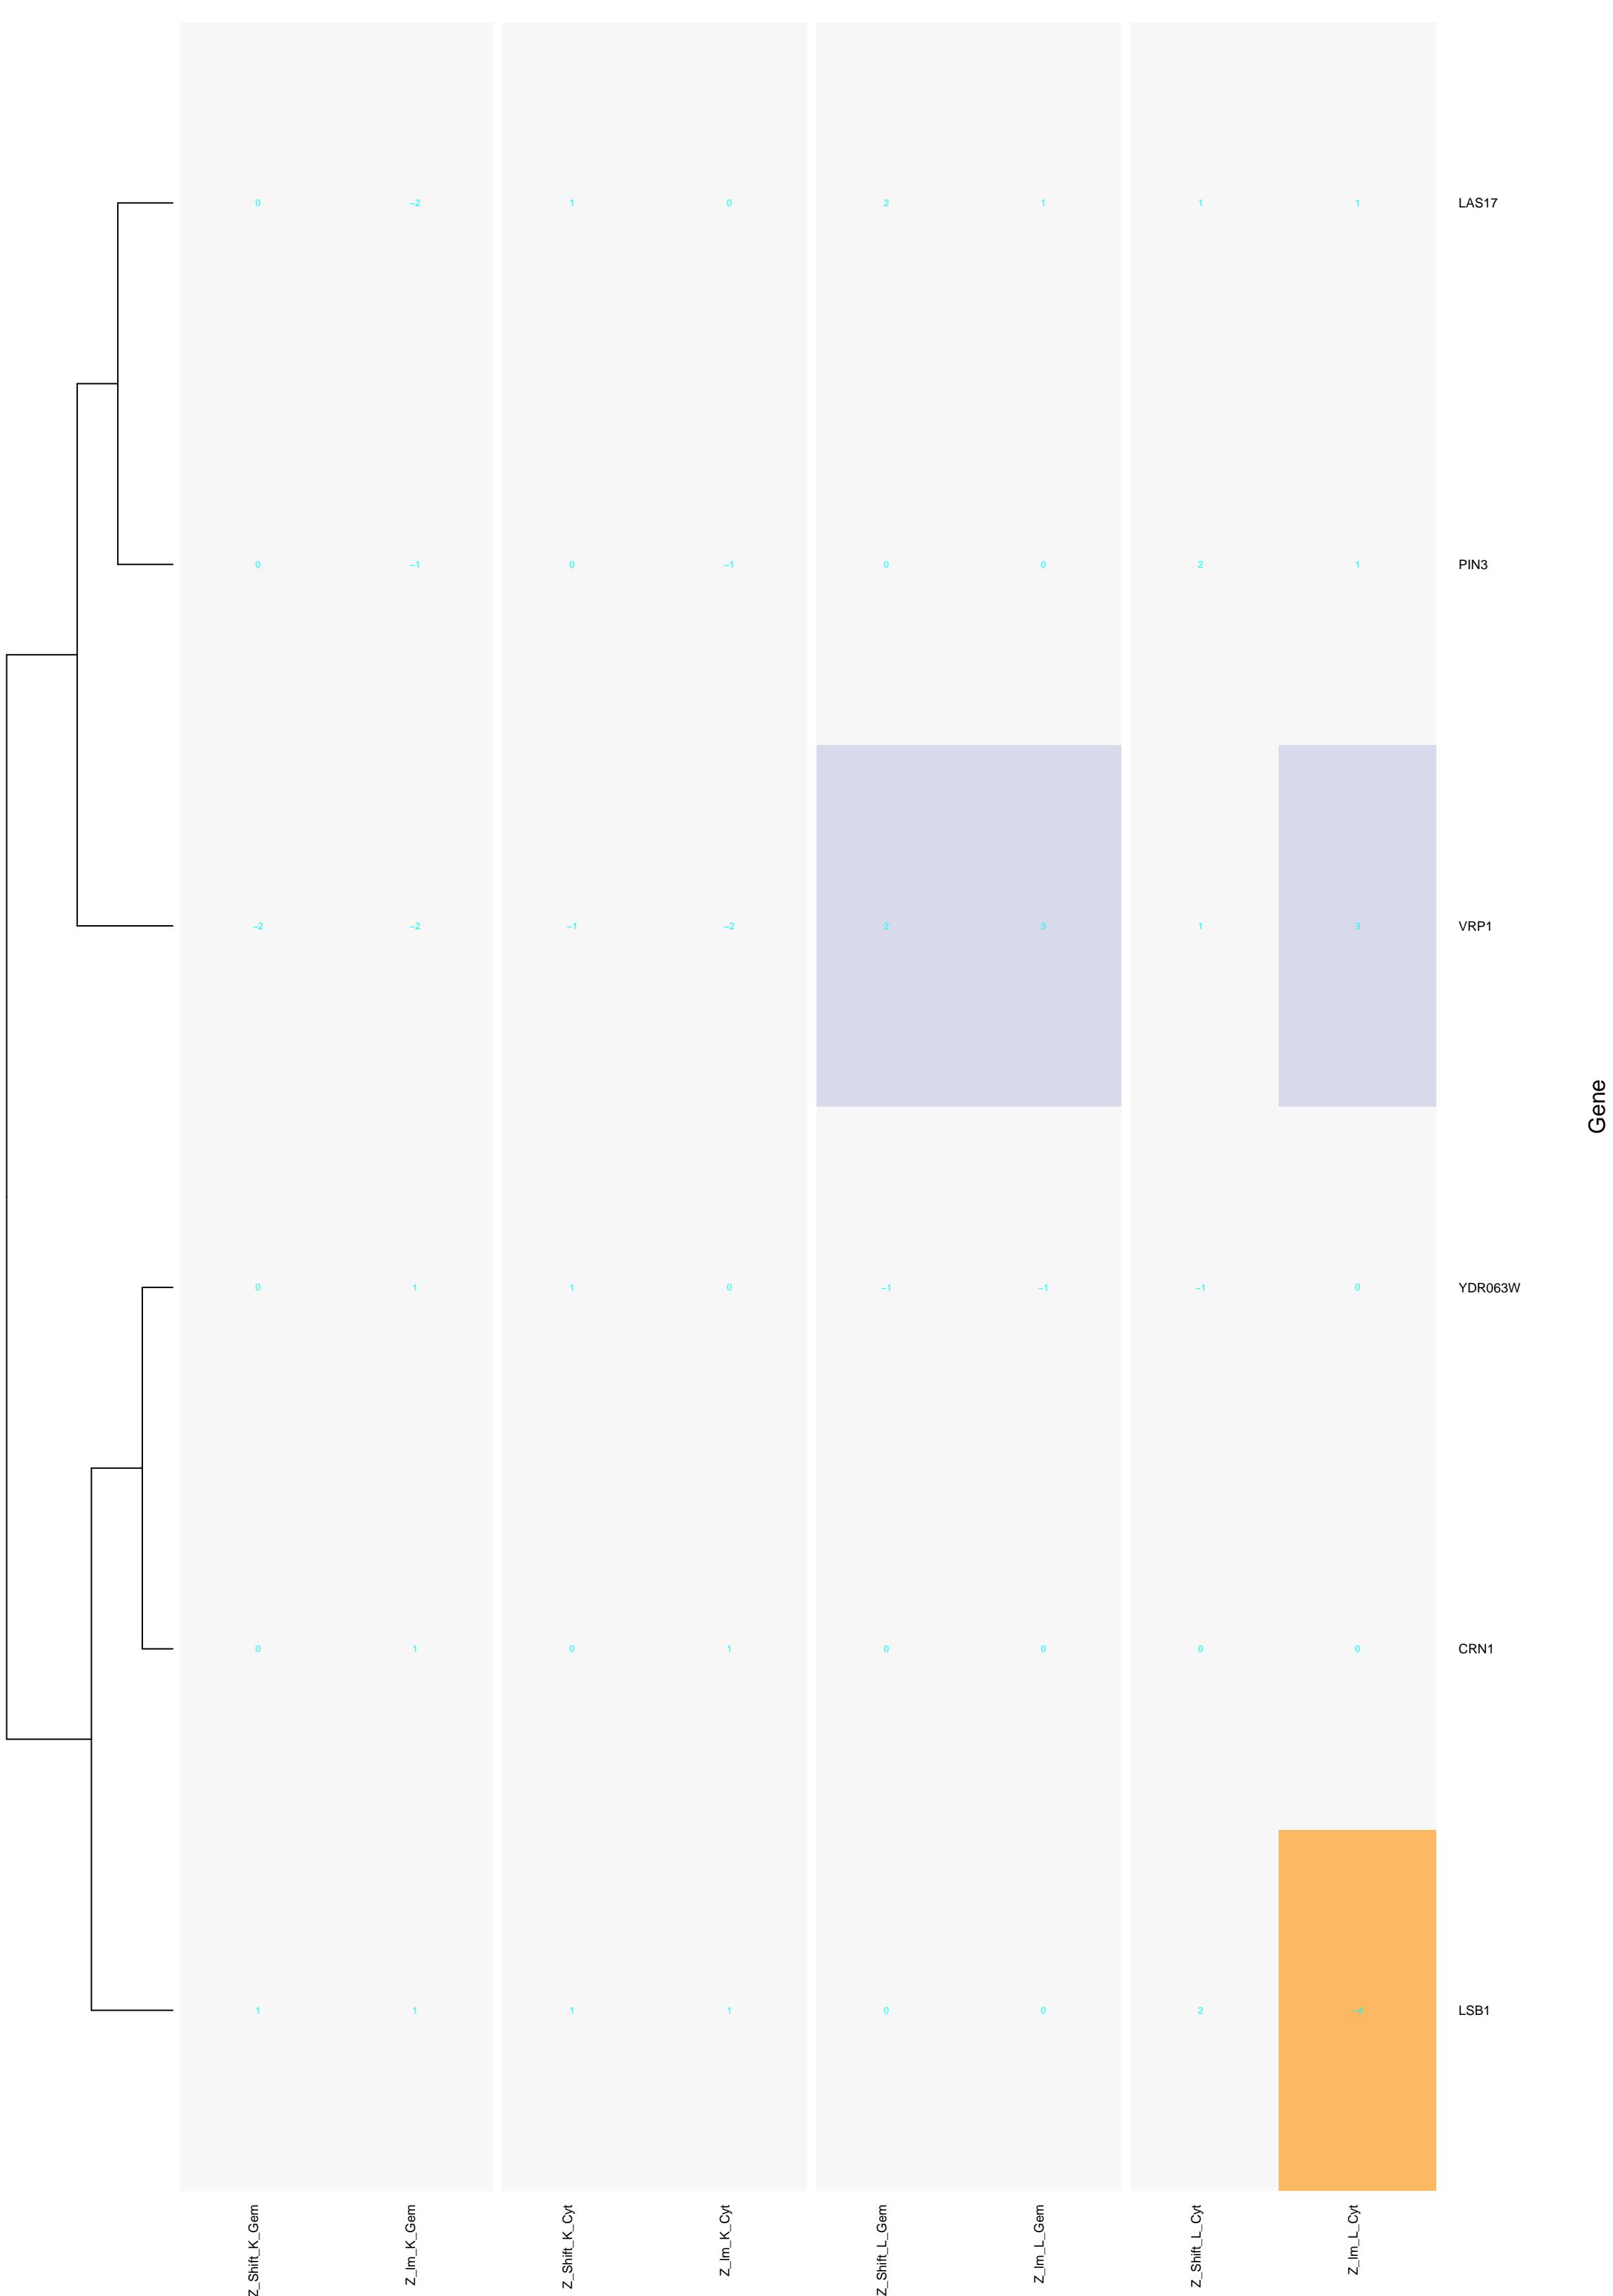

## positive regulation of transcription initiation from RNA polymerase II promoter

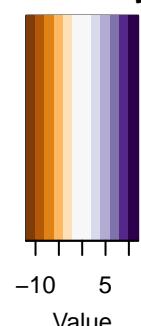

Color Key

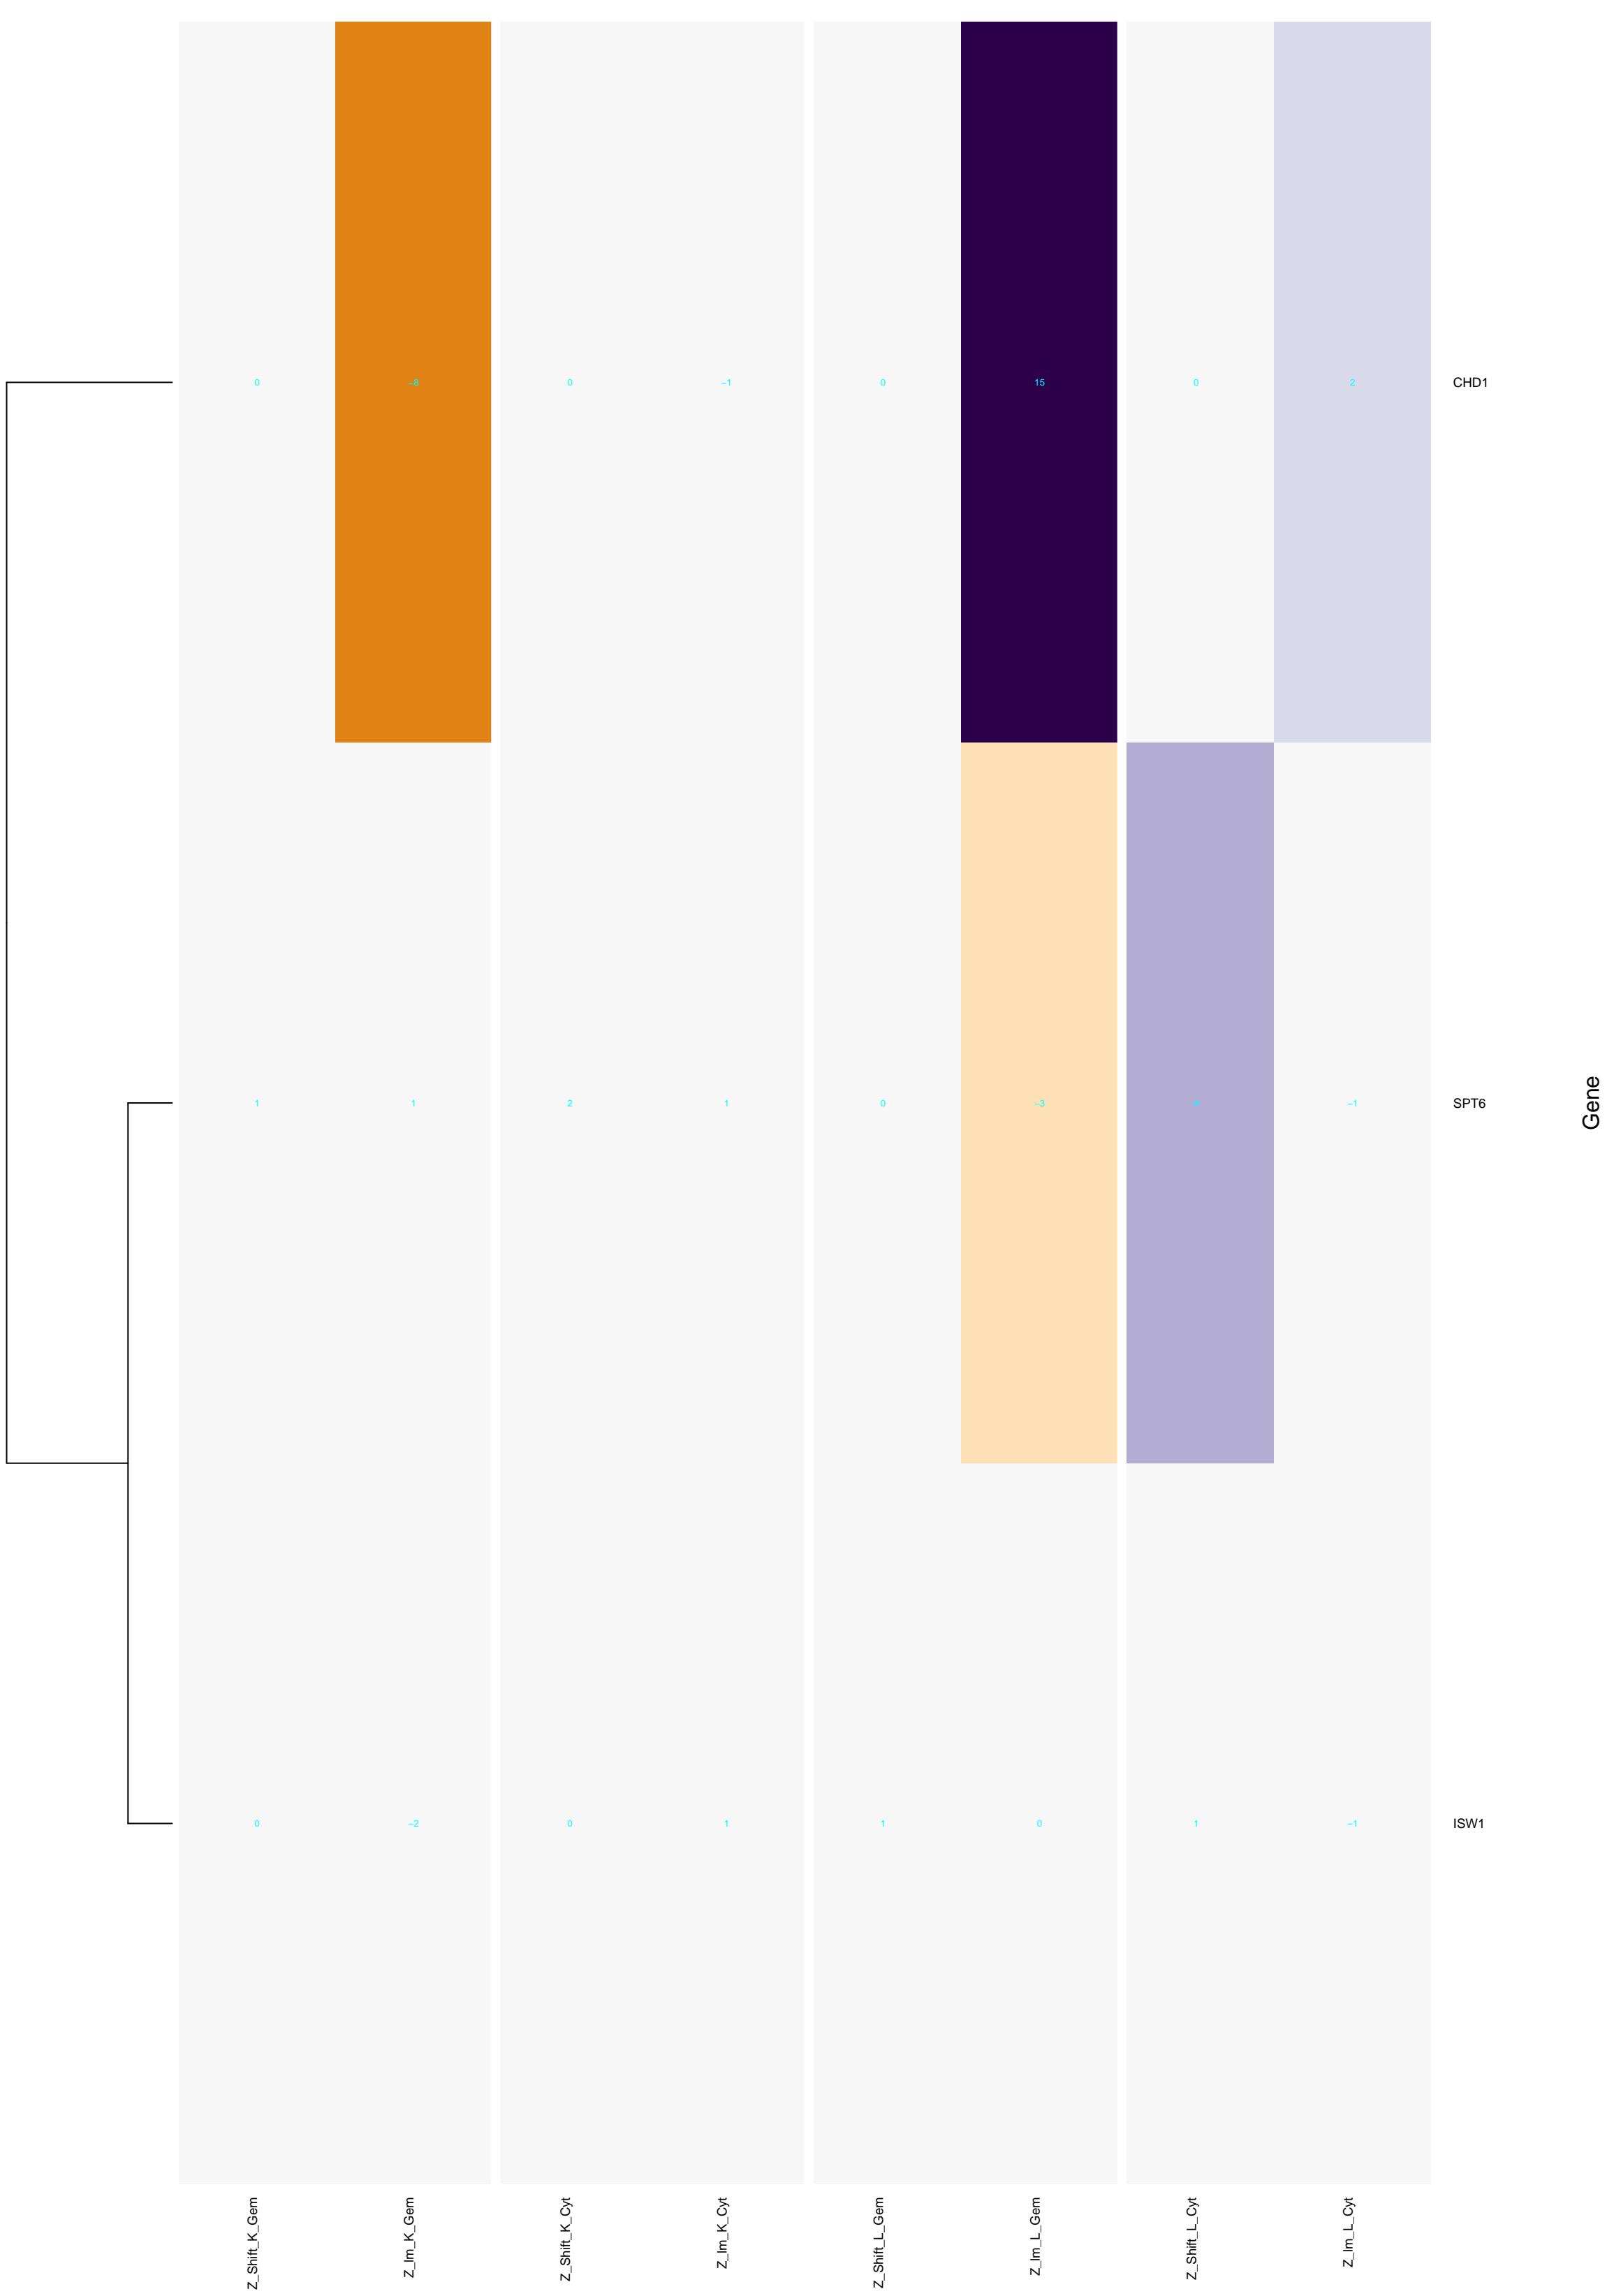

## regulation of actin nucleation

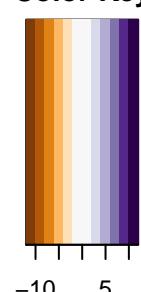

Color Key

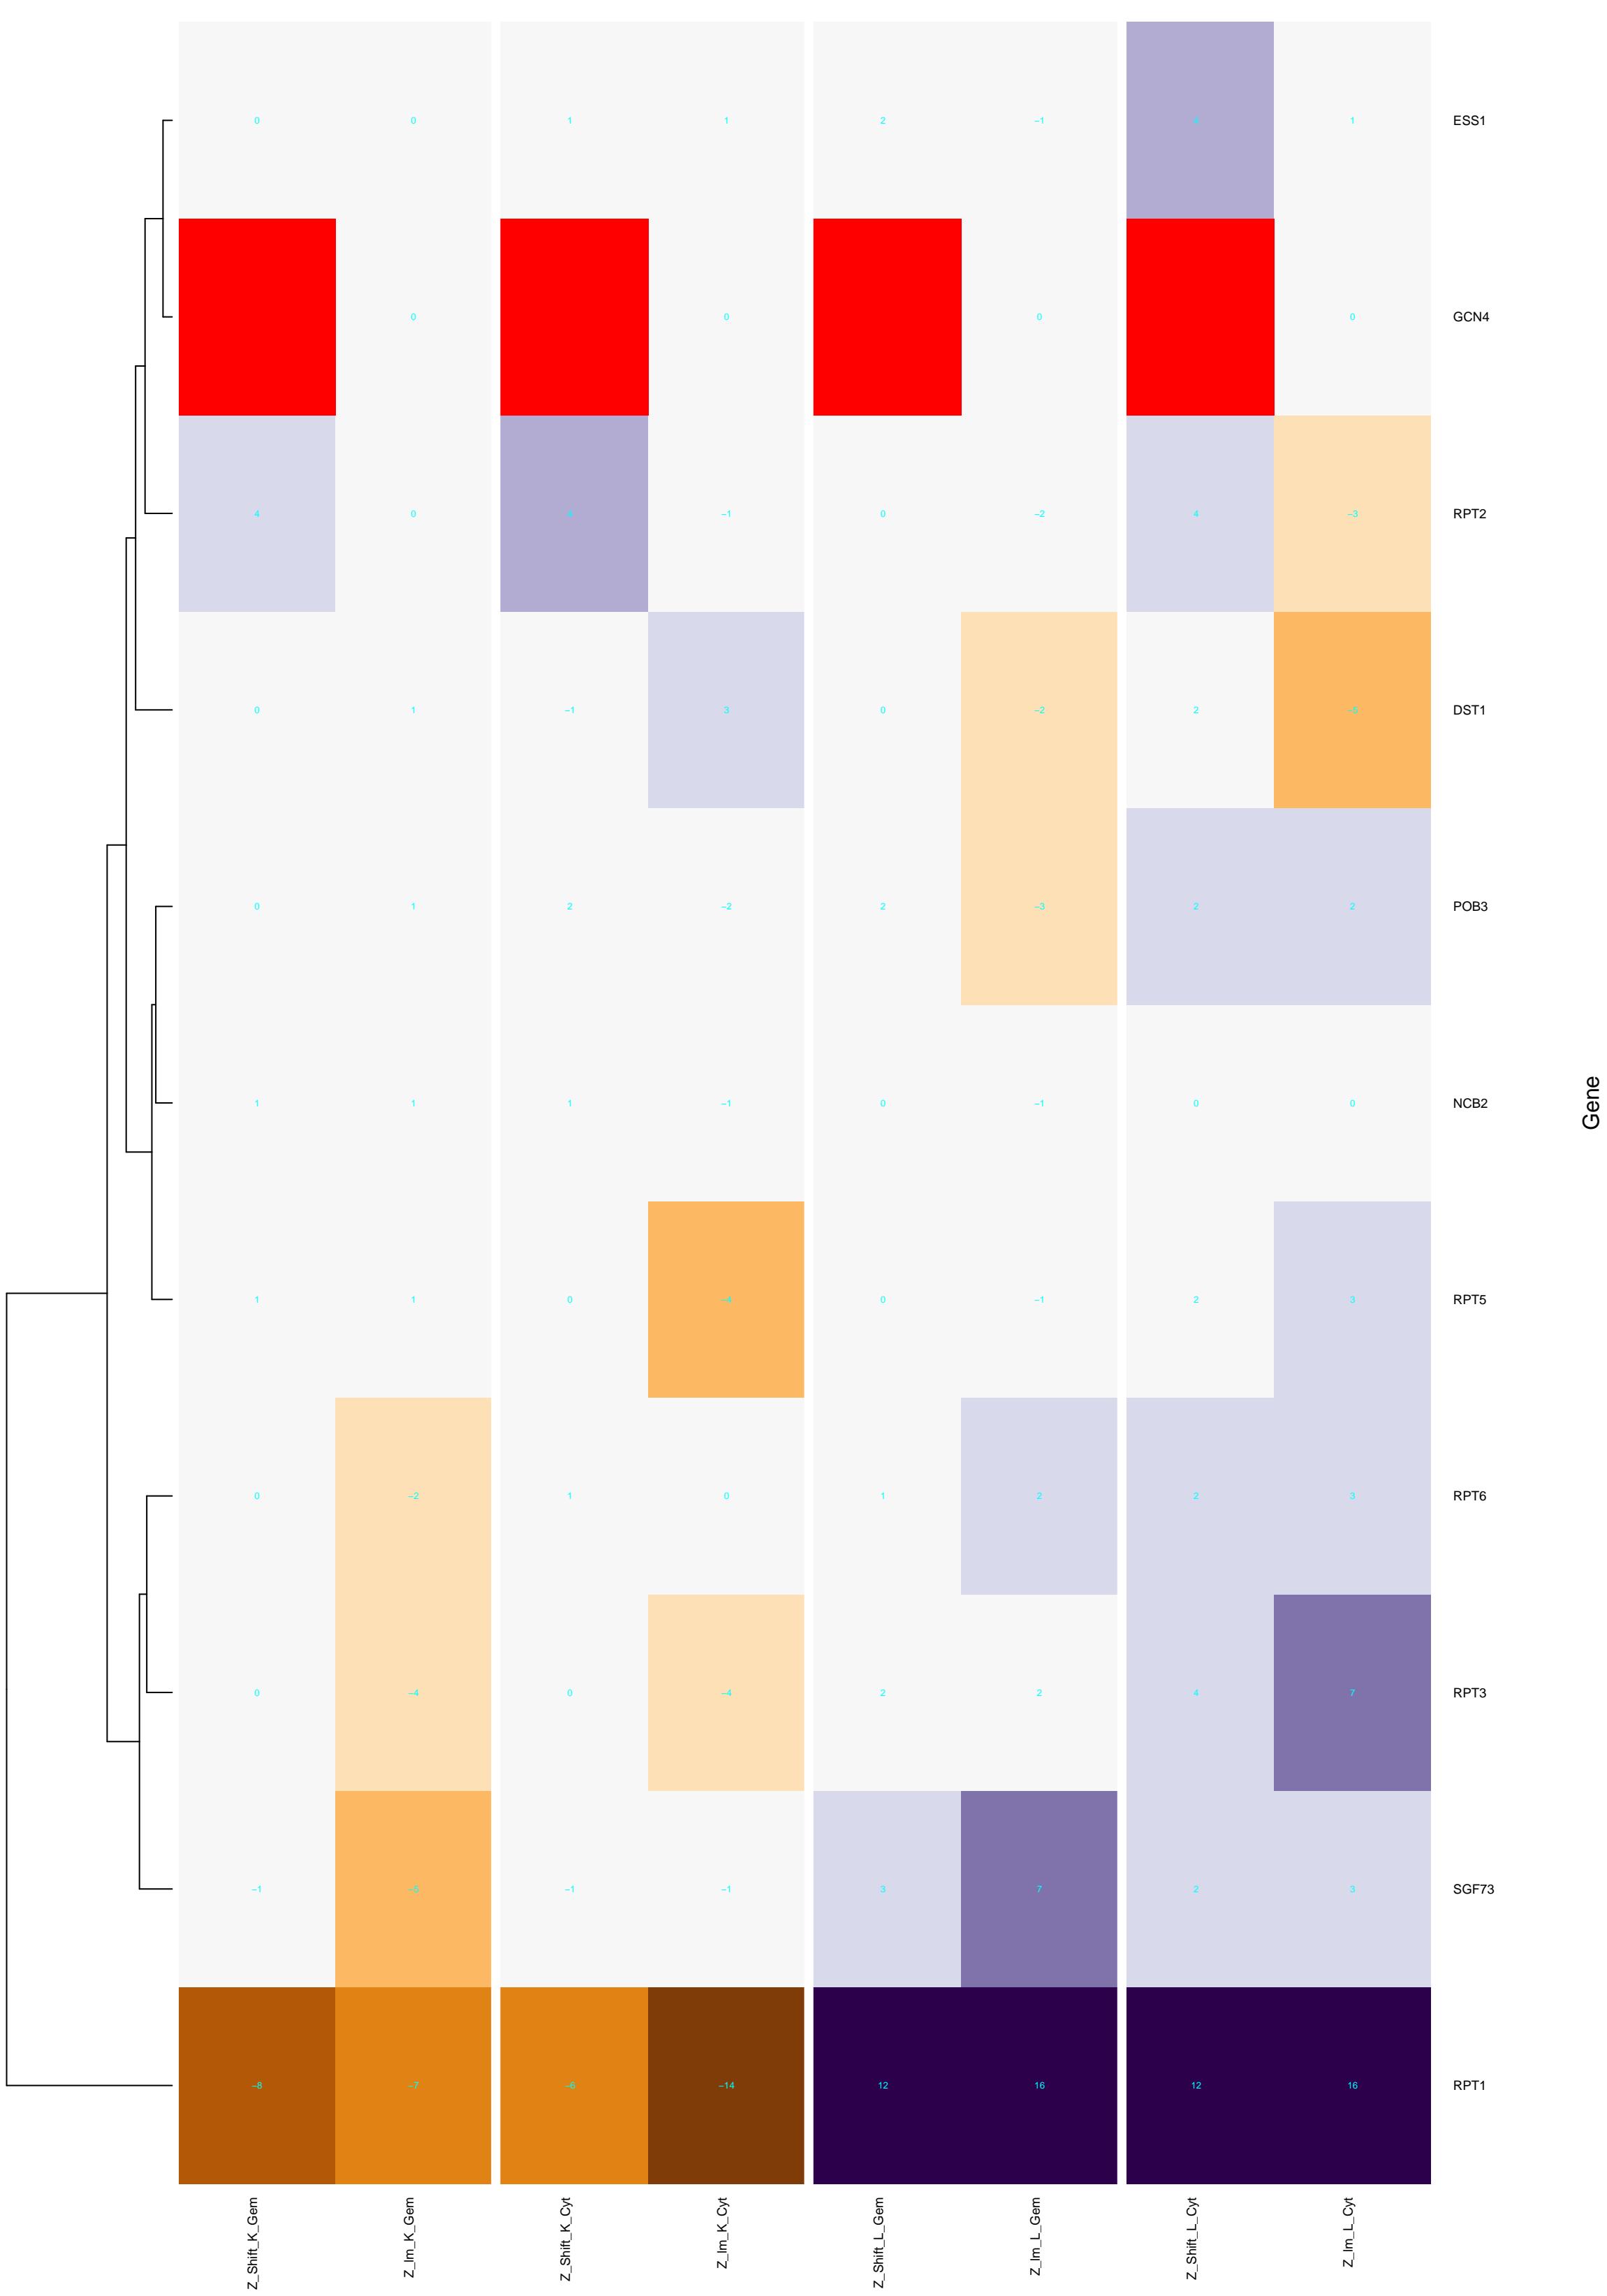

## regulation of transcriptional start site selection at RNA polymerase II promoter

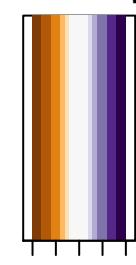

Color Key

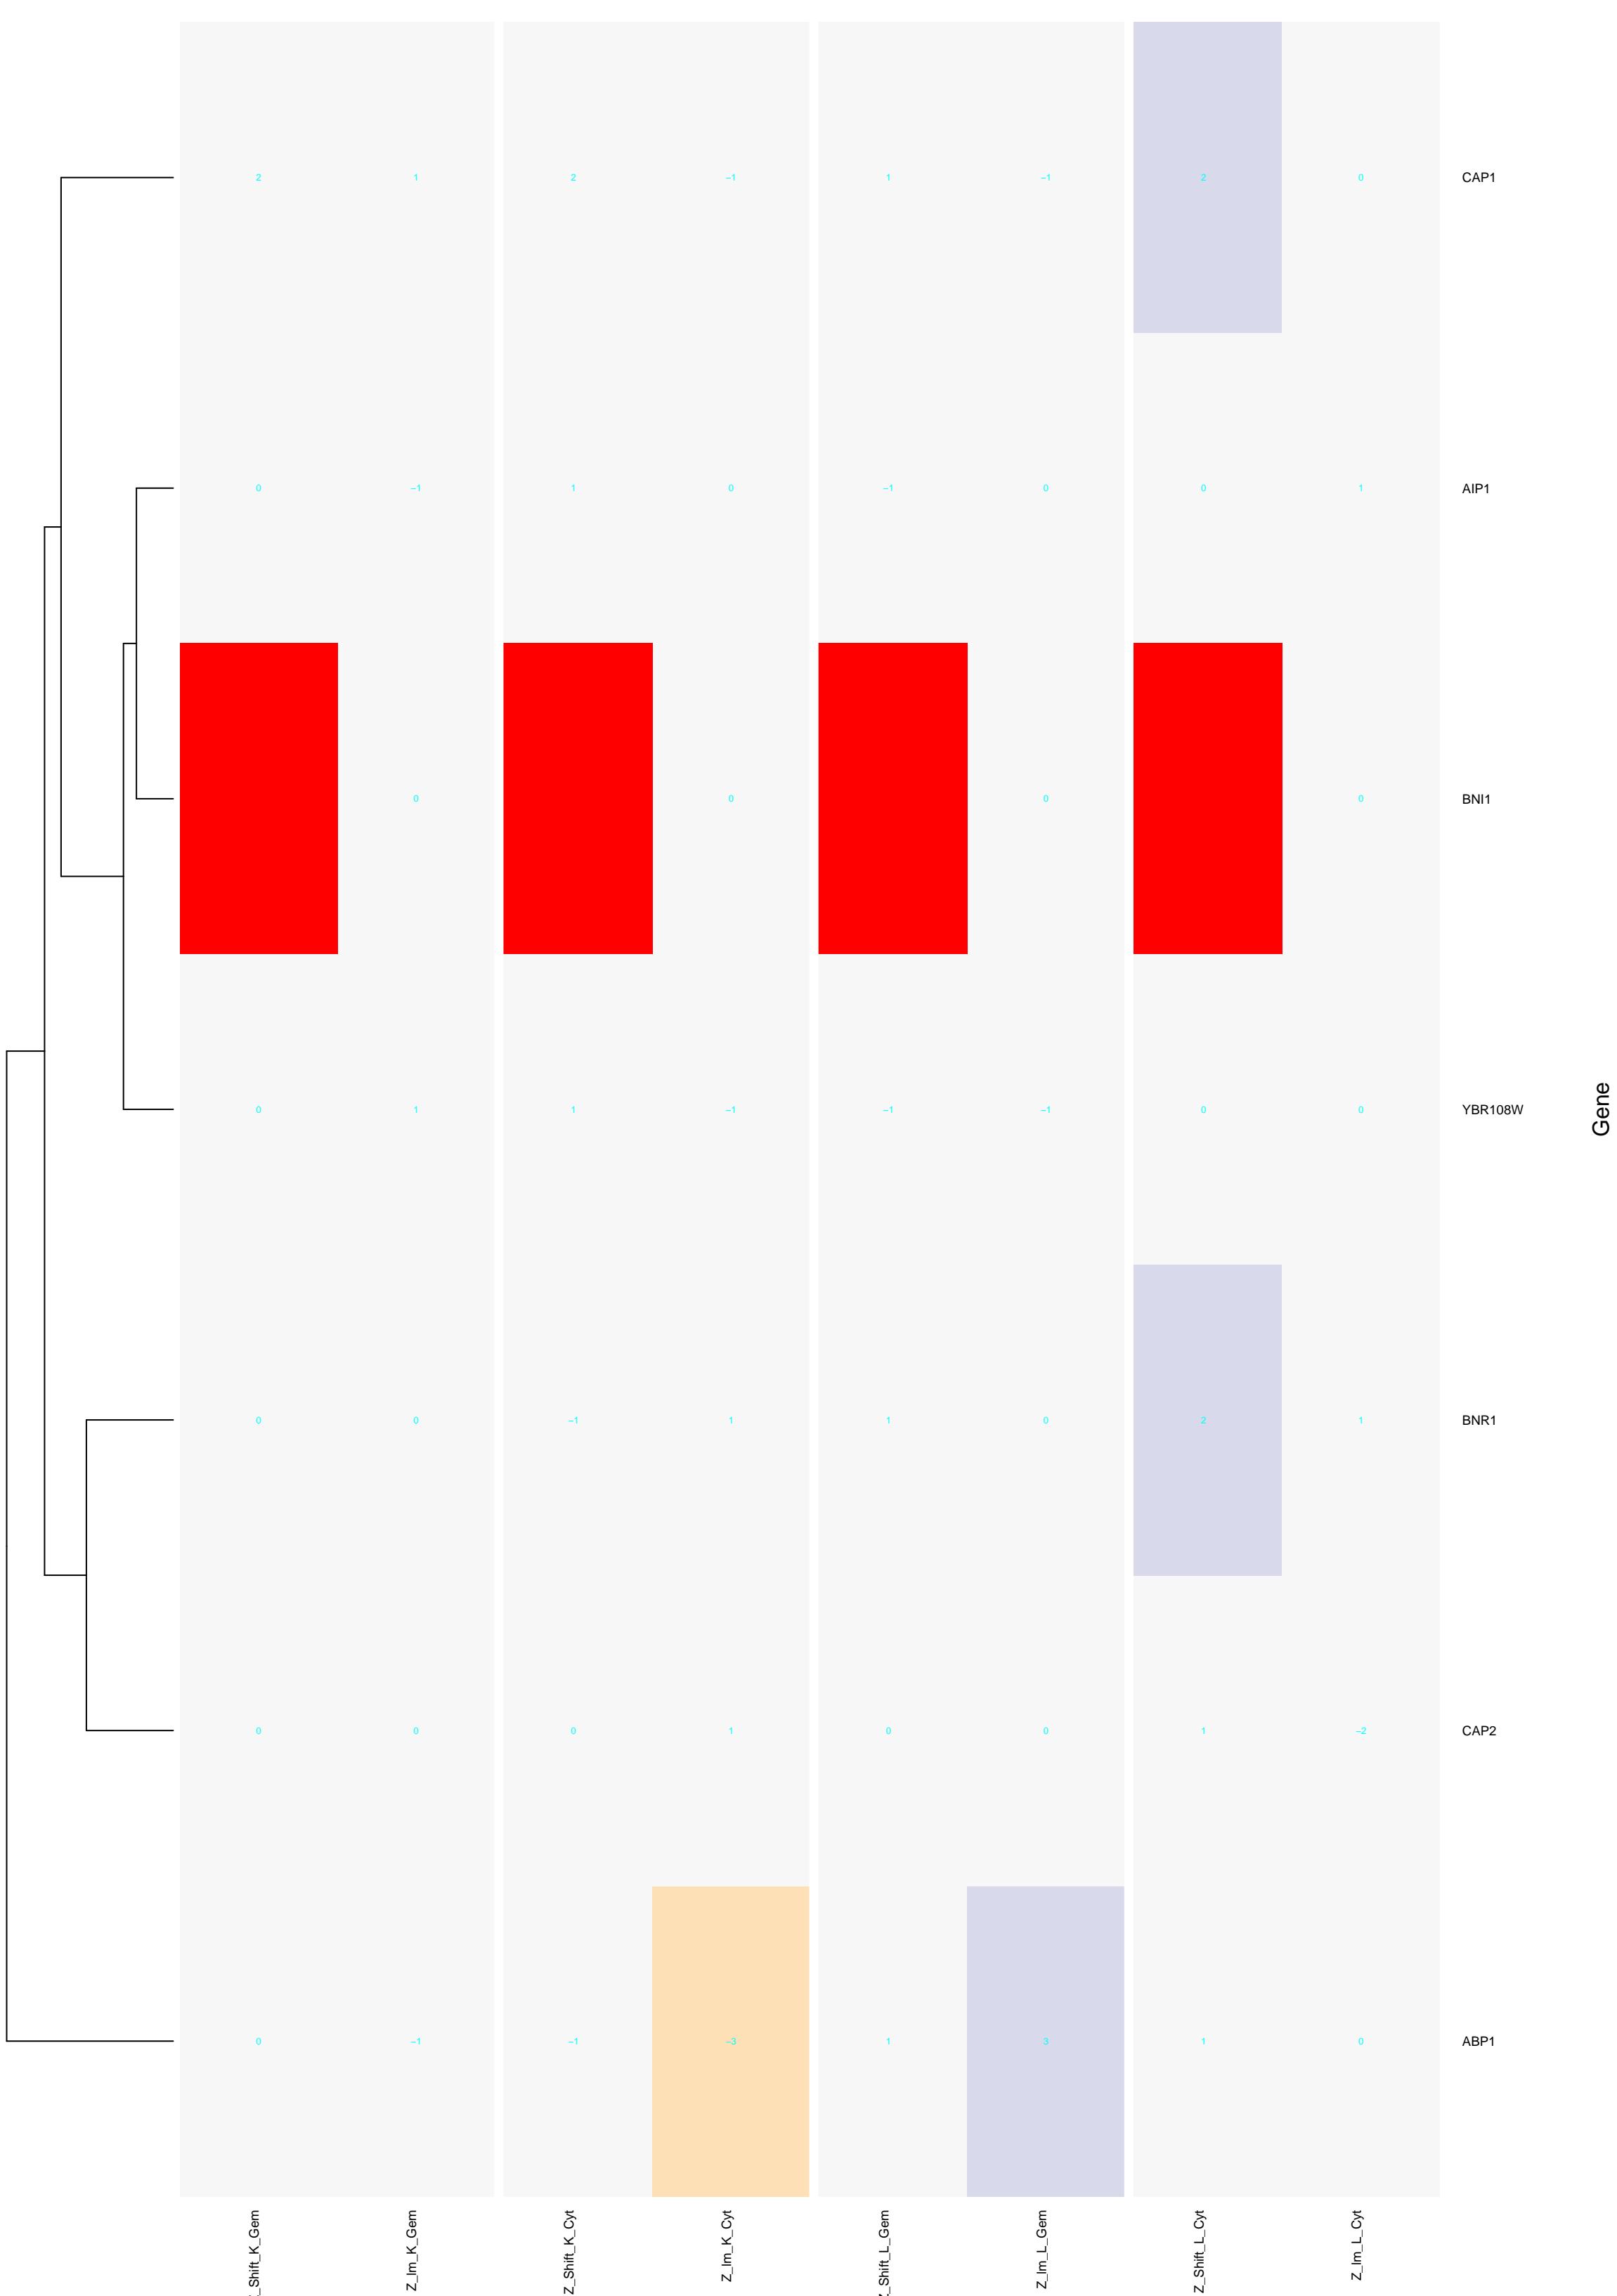

# regulation of RNA polymerase II transcriptional preinitiation complex assembly

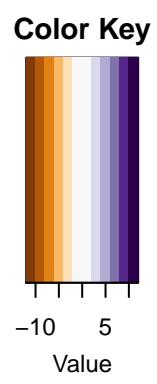

Color Key

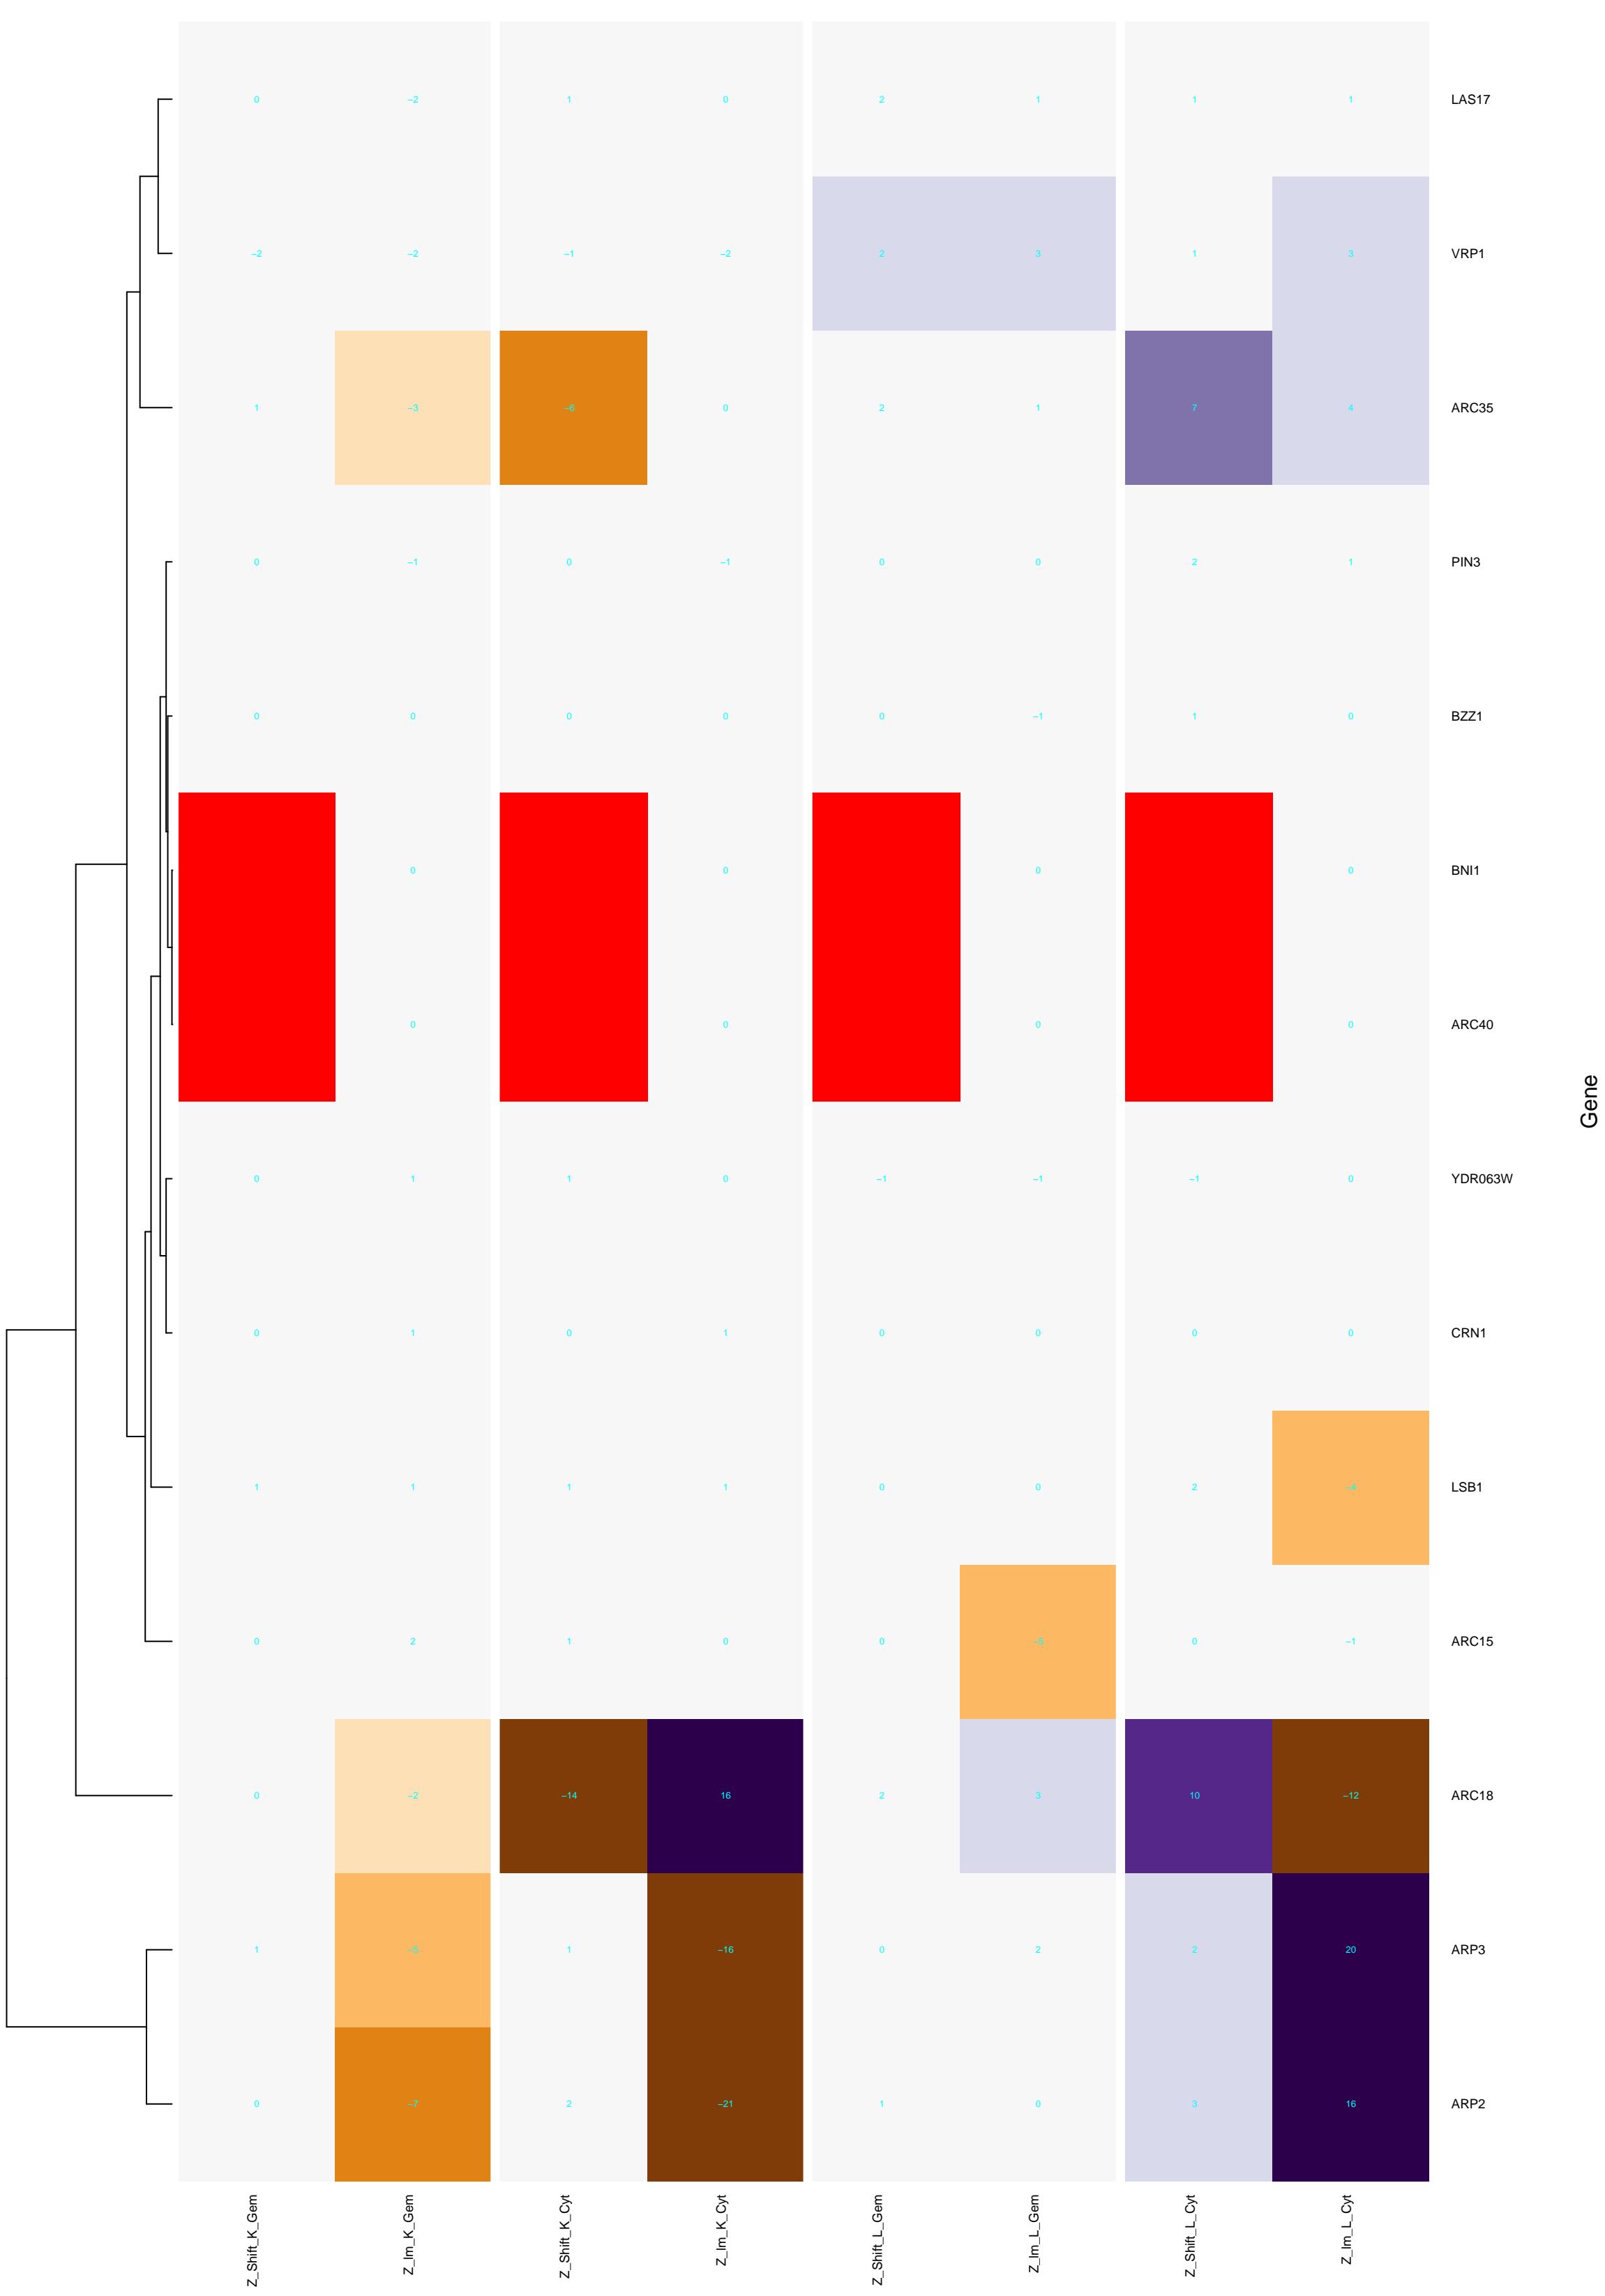

## actin filament capping

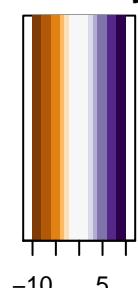

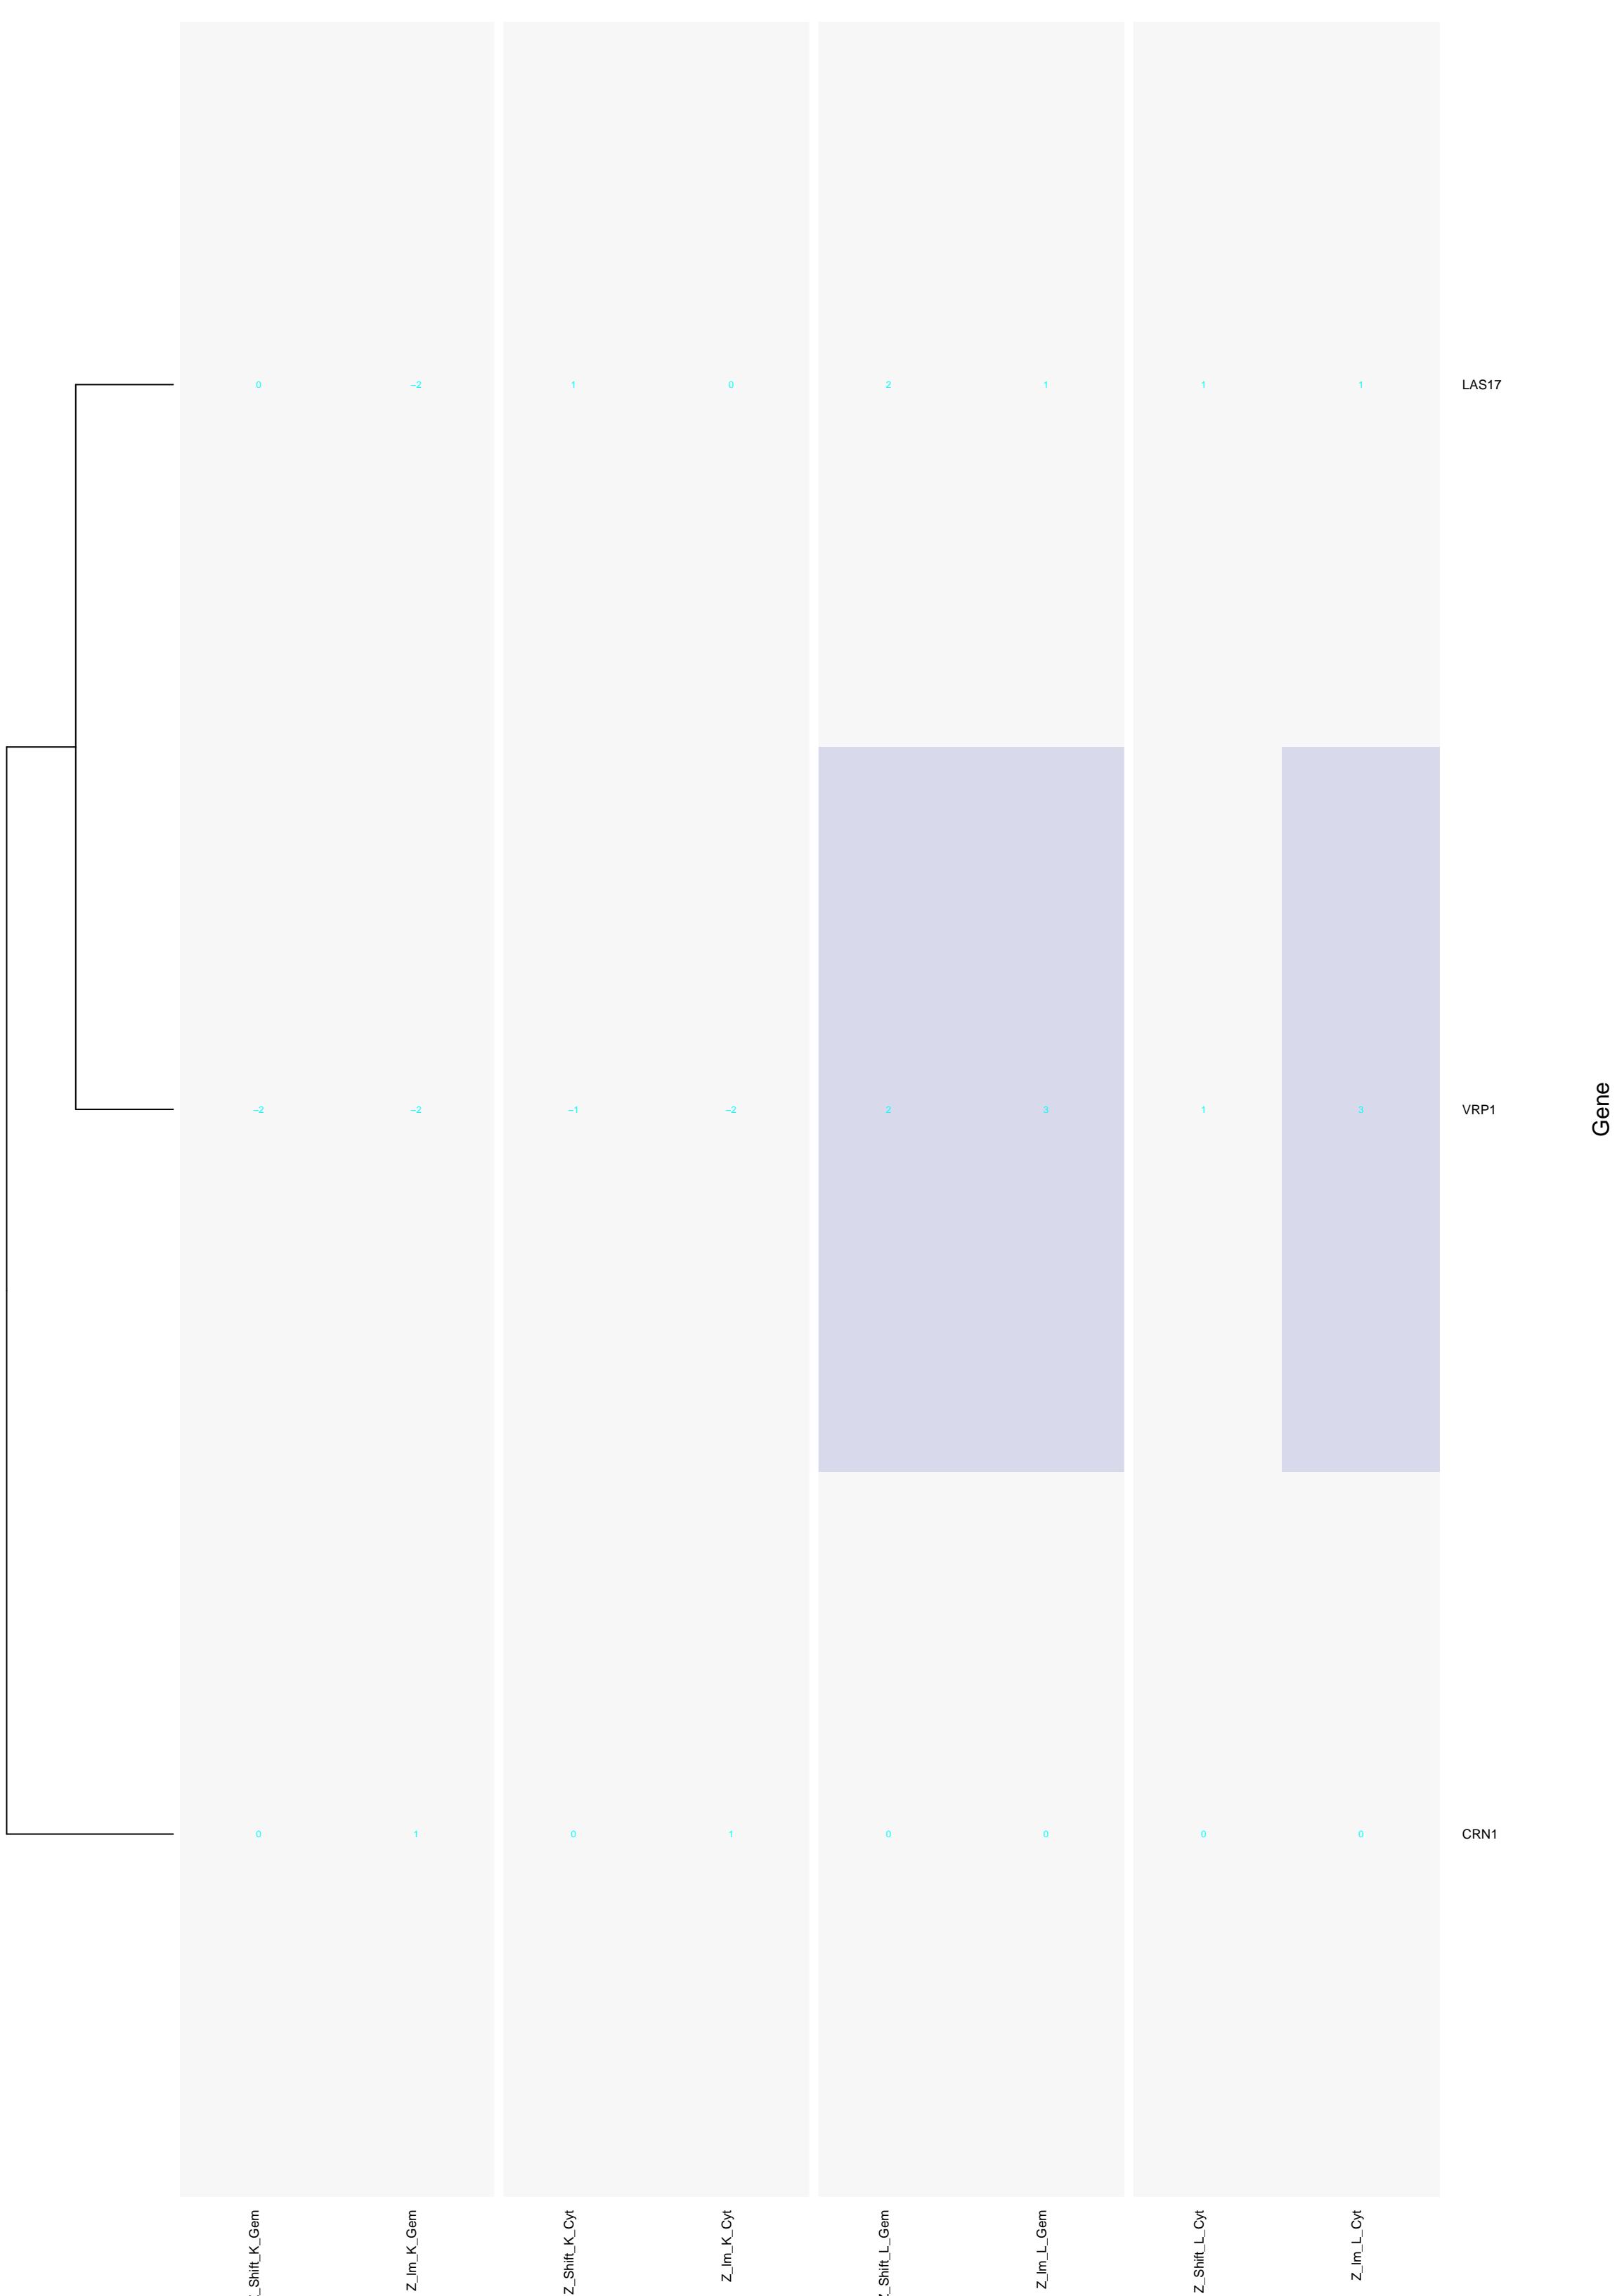

## actin nucleation

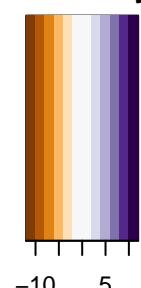

Color Key

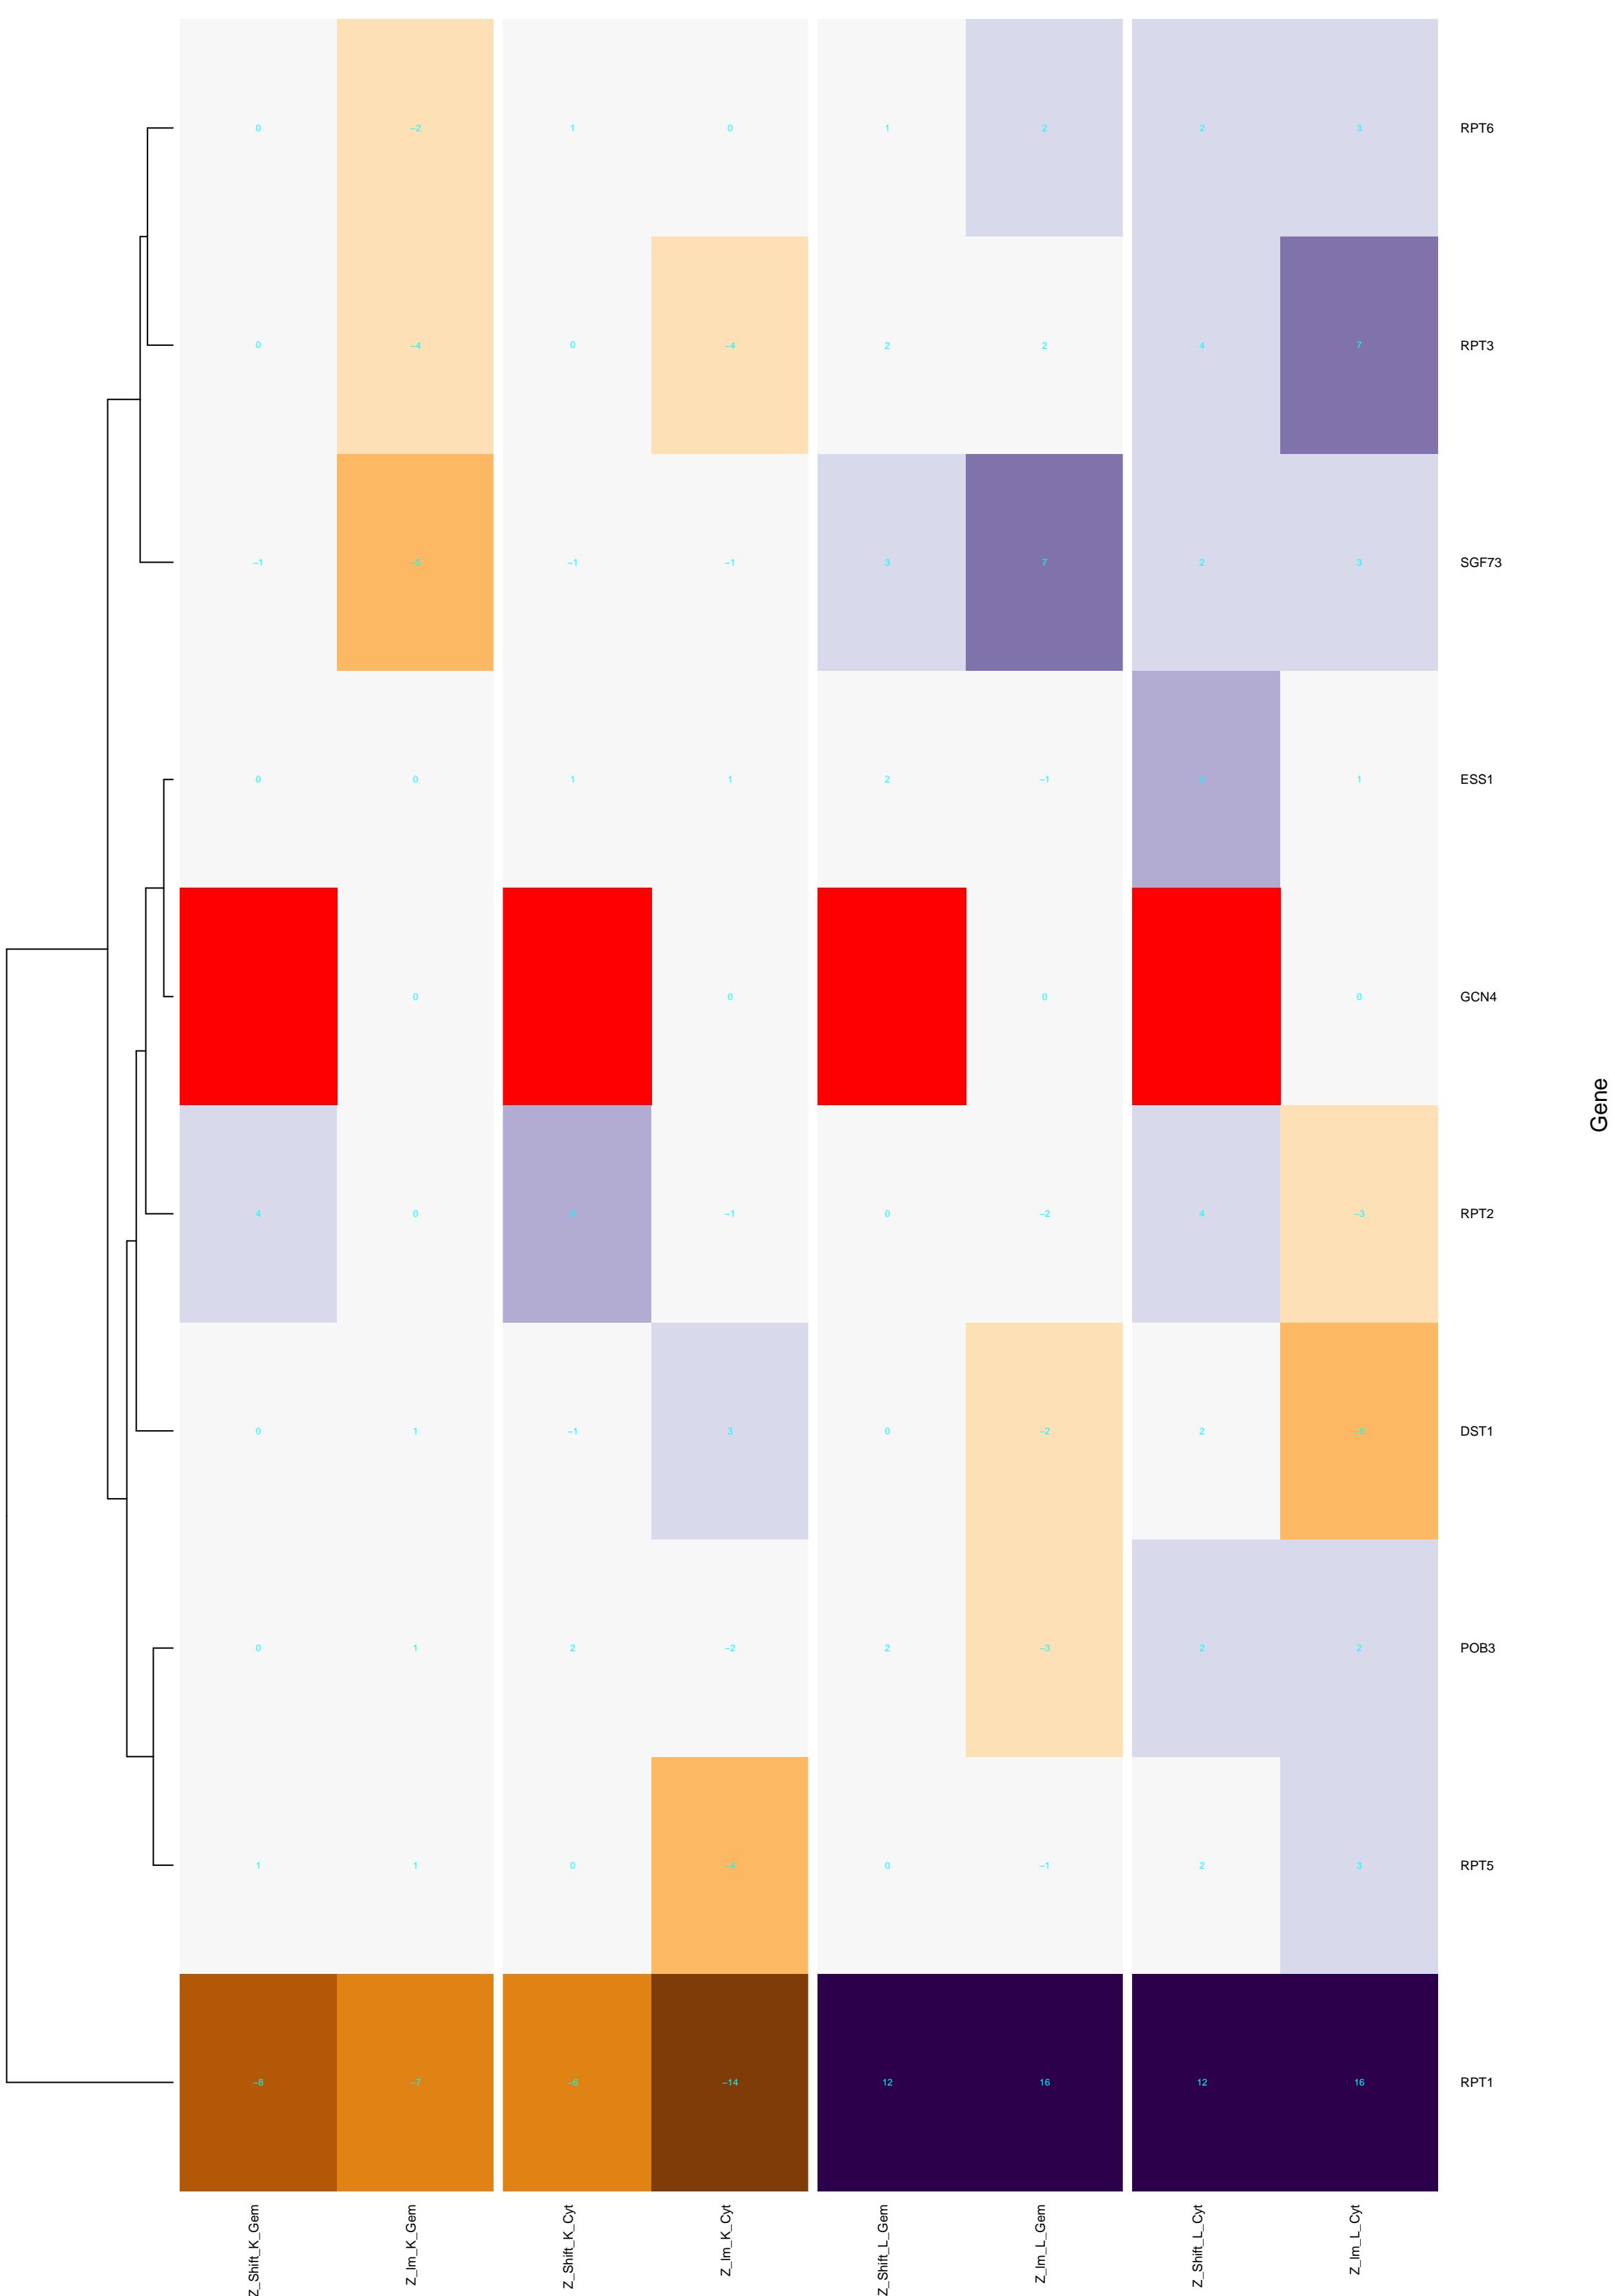

## positive regulation of actin nucleation

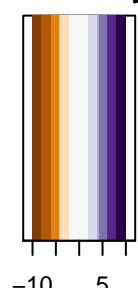

Color Key

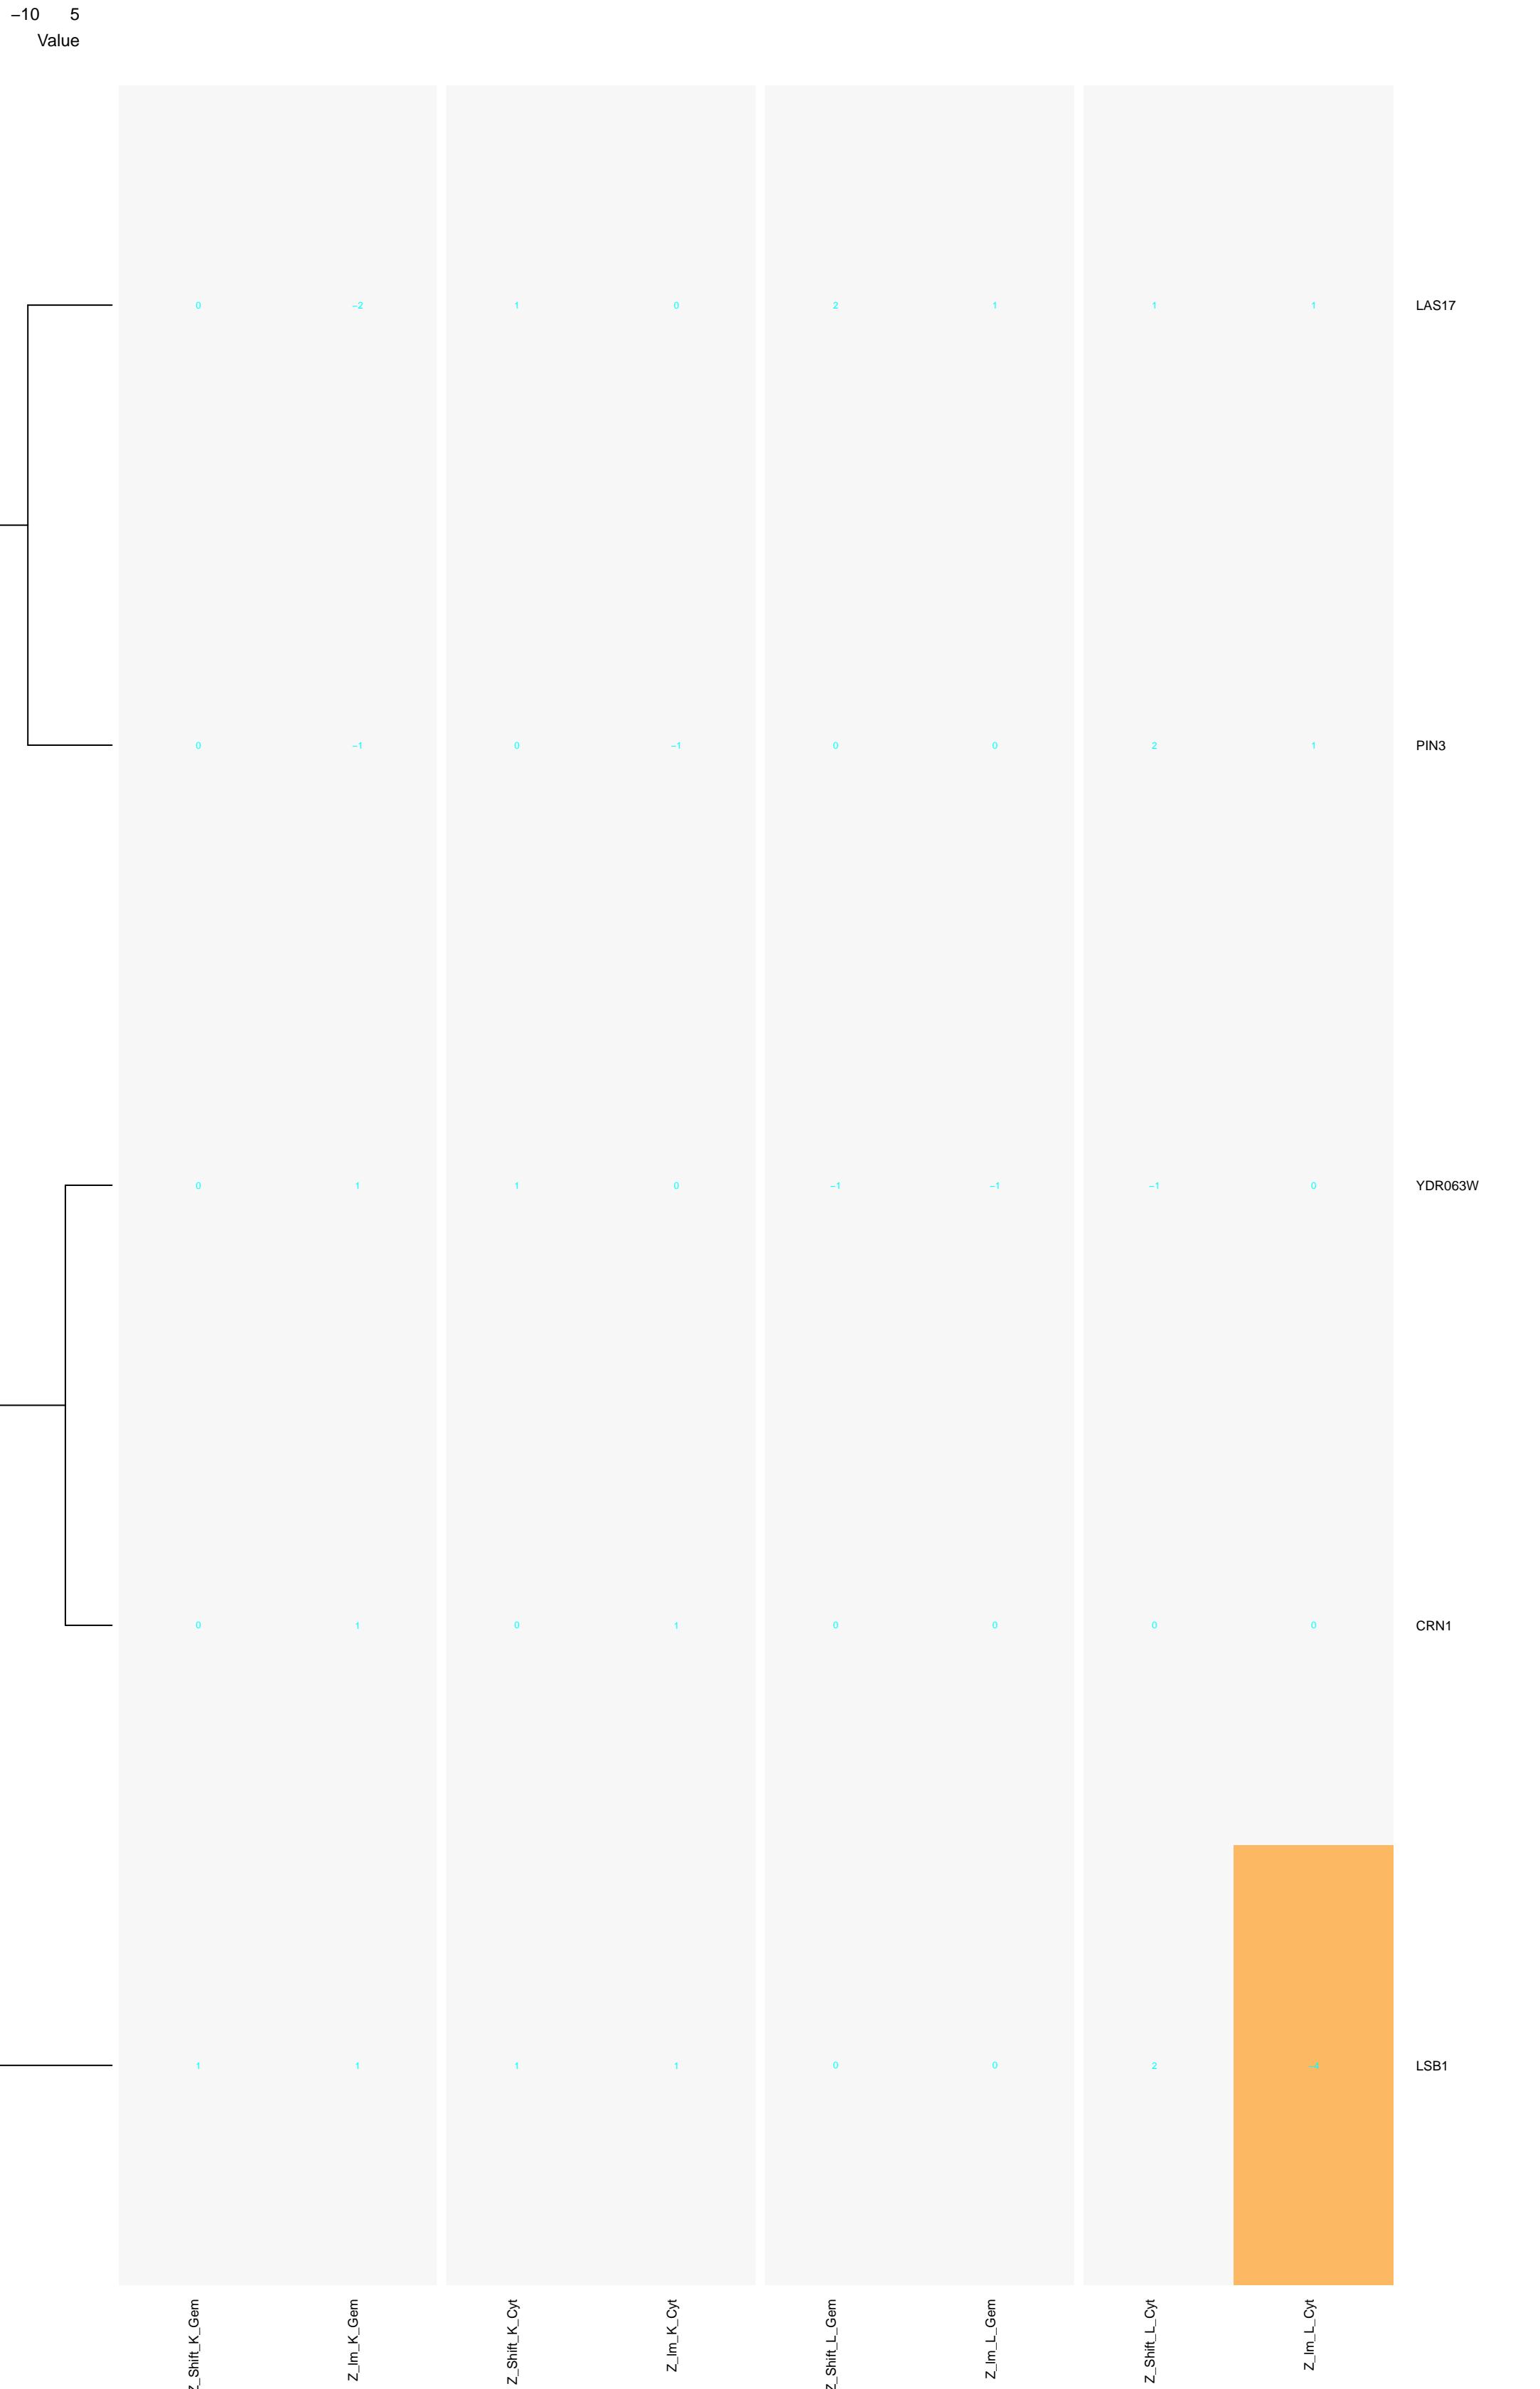

# Regulation of RNA polymerase II transcriptional preinitiation complex assembly

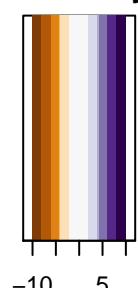

Color Key

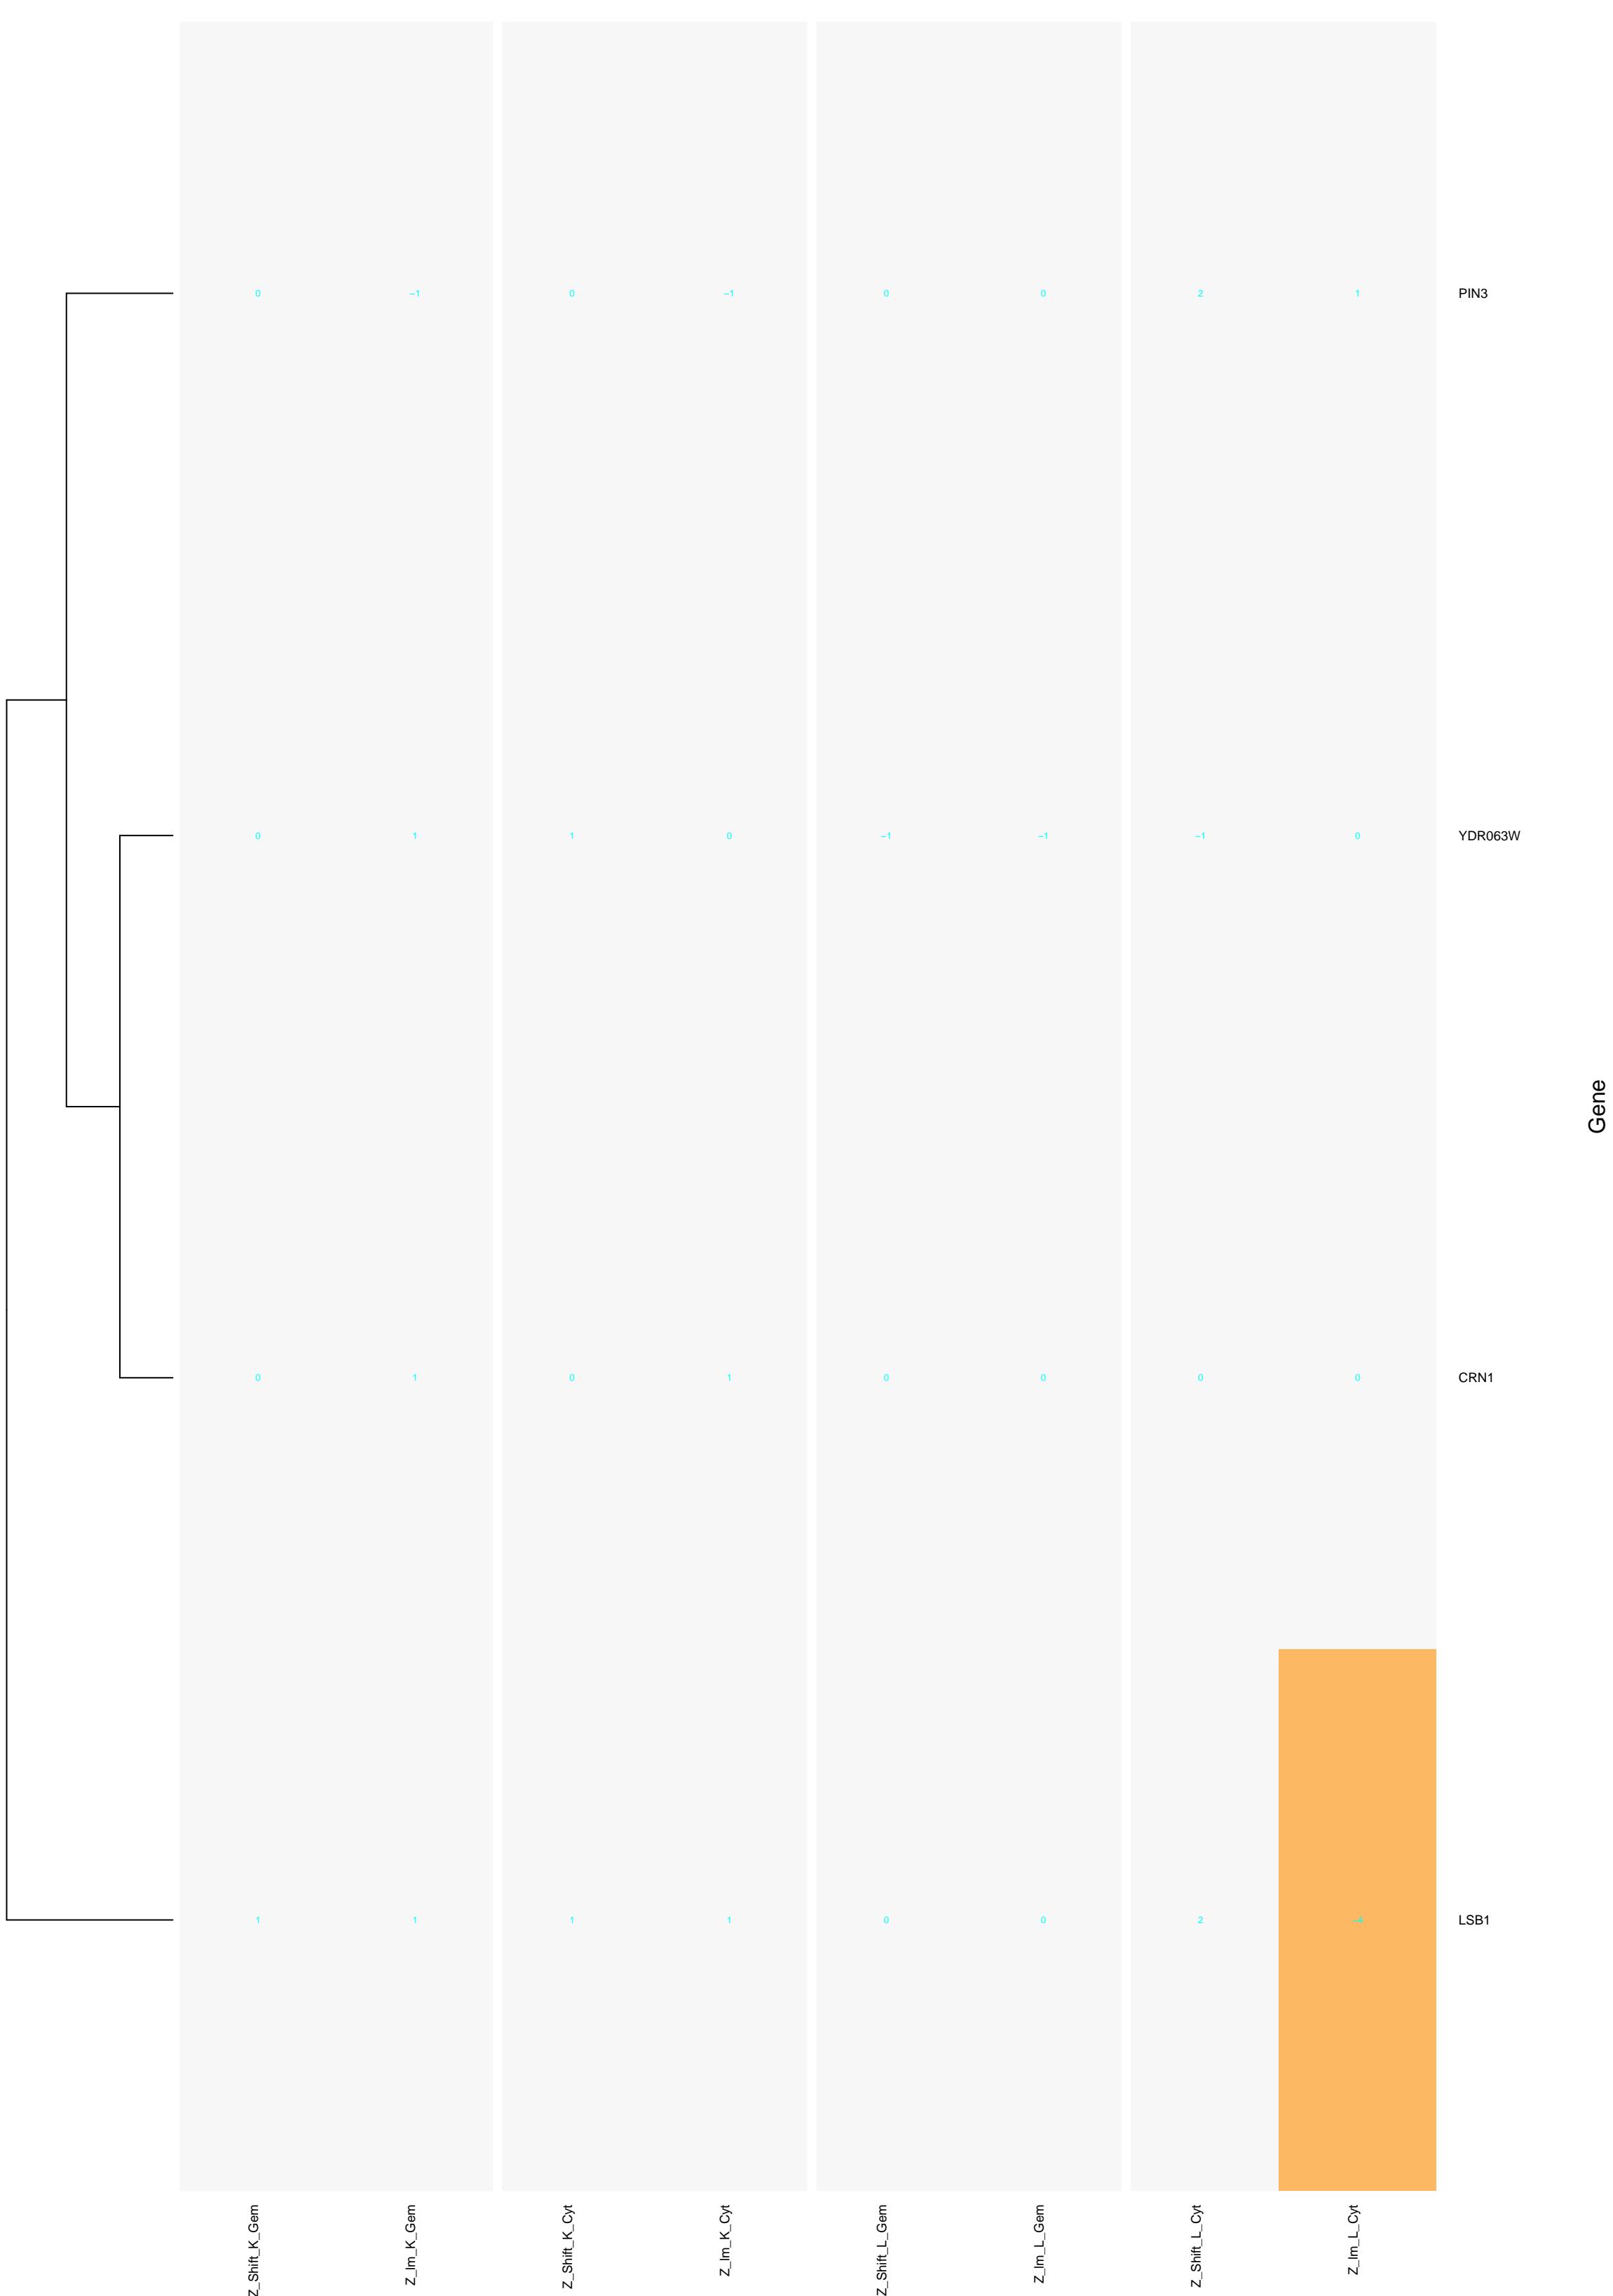

## regulation of Arp2/3 complex-mediated actin nucleation

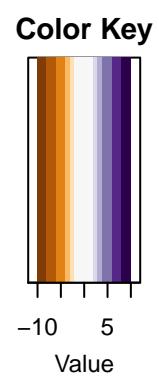

Color Key

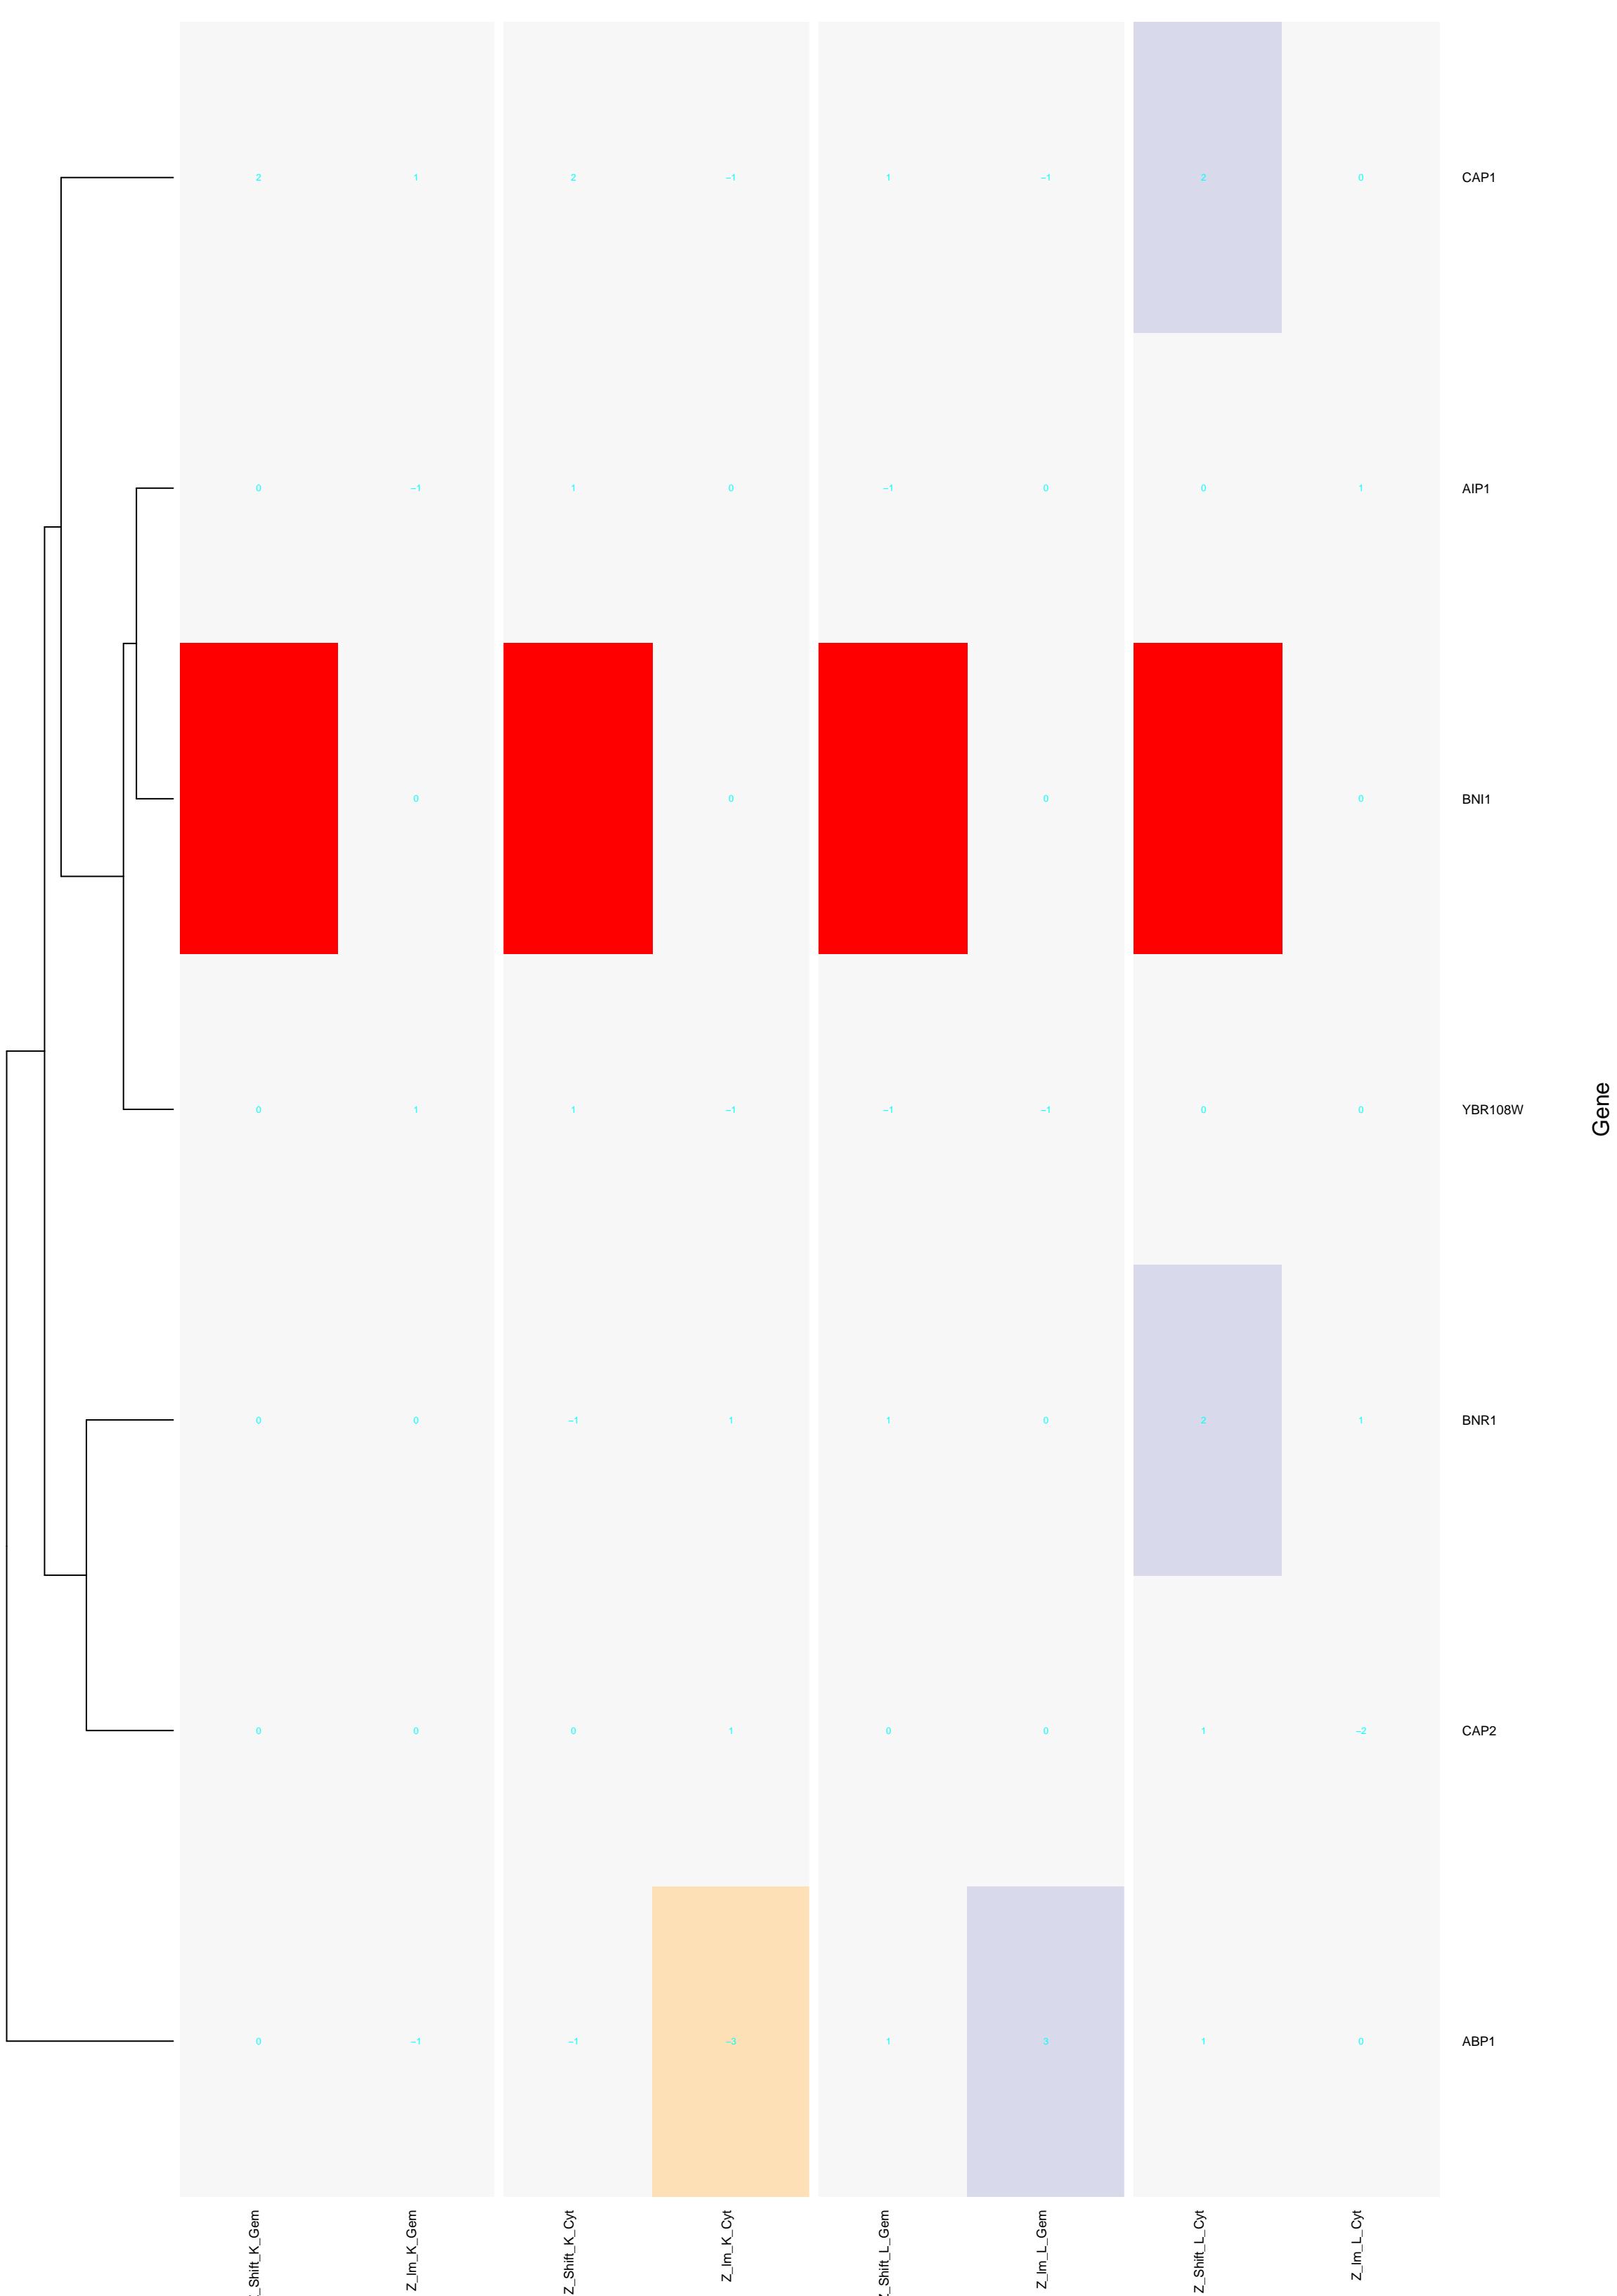

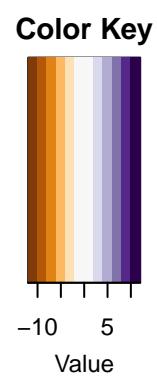

## negative regulation of actin nucleation

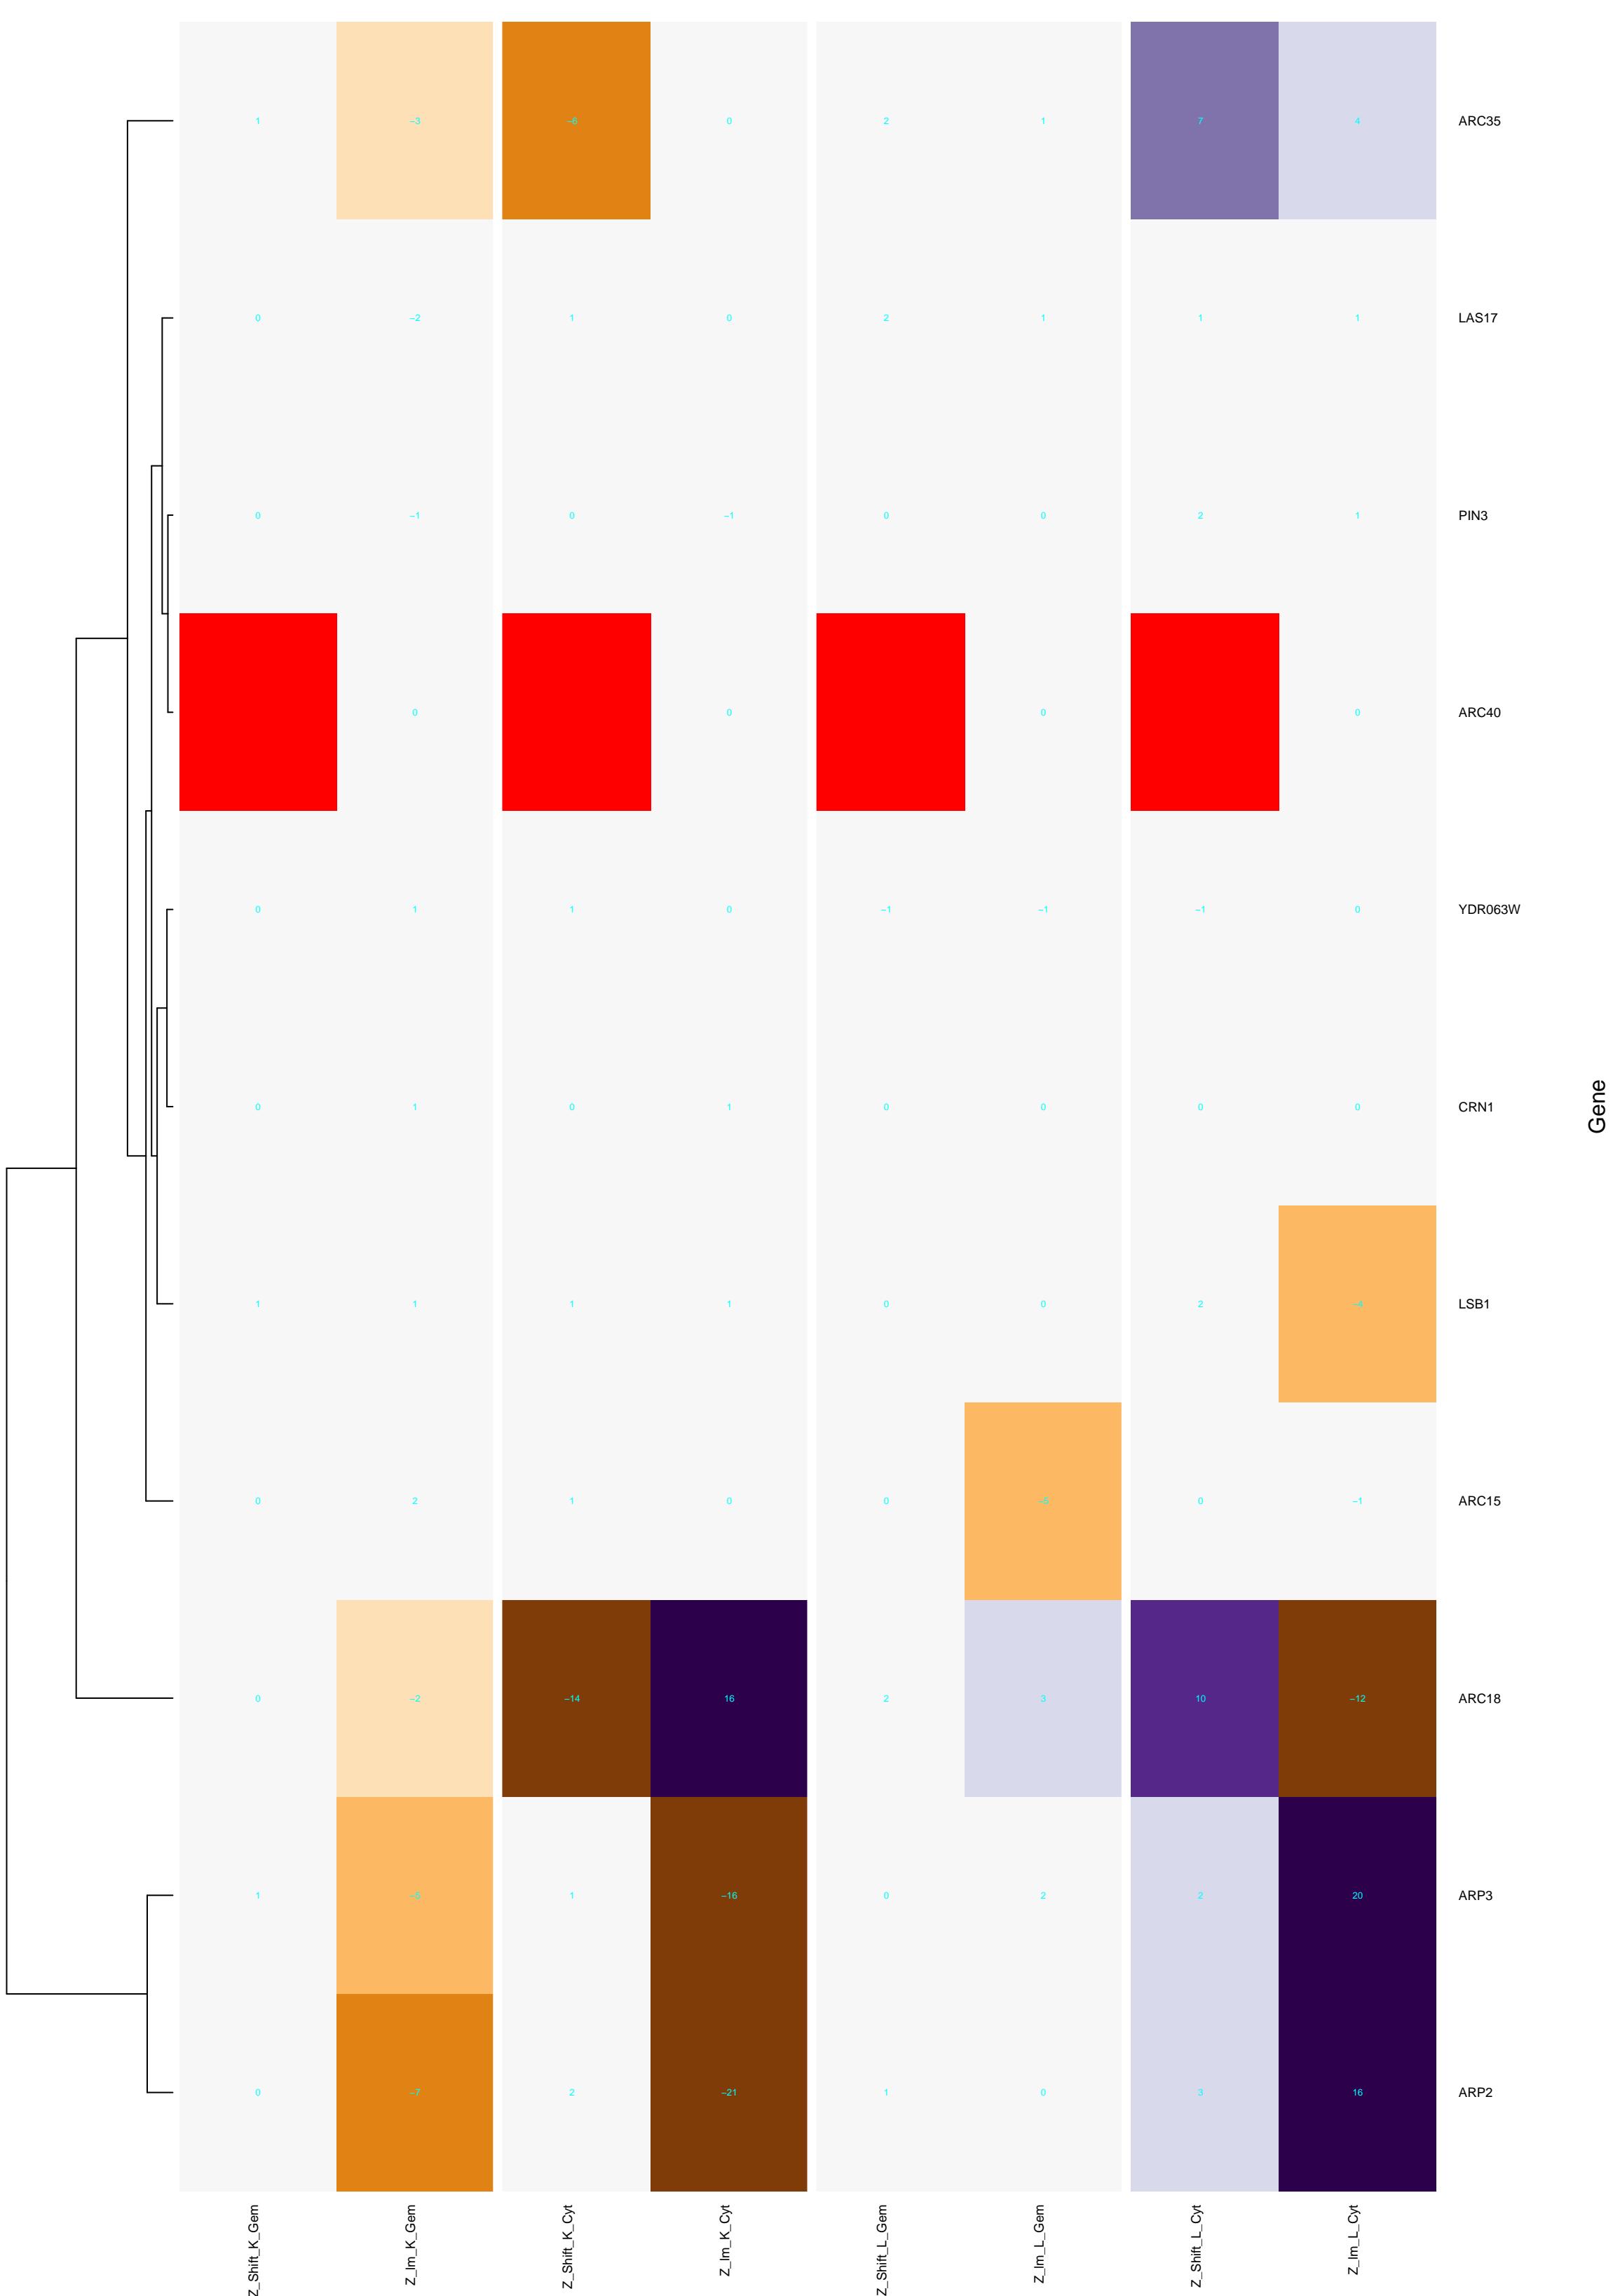

## barbed-end actin filament capping

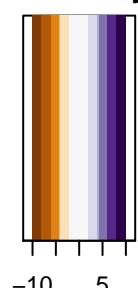

## Arp2/3 complex–mediated actin nucleation

Color Key

## negative regulation of Arp2/3 complex-mediated actin nucleation
