

membrane organization

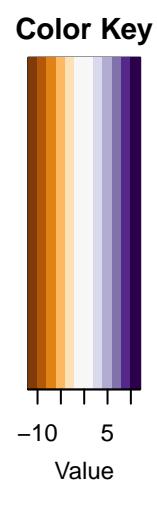

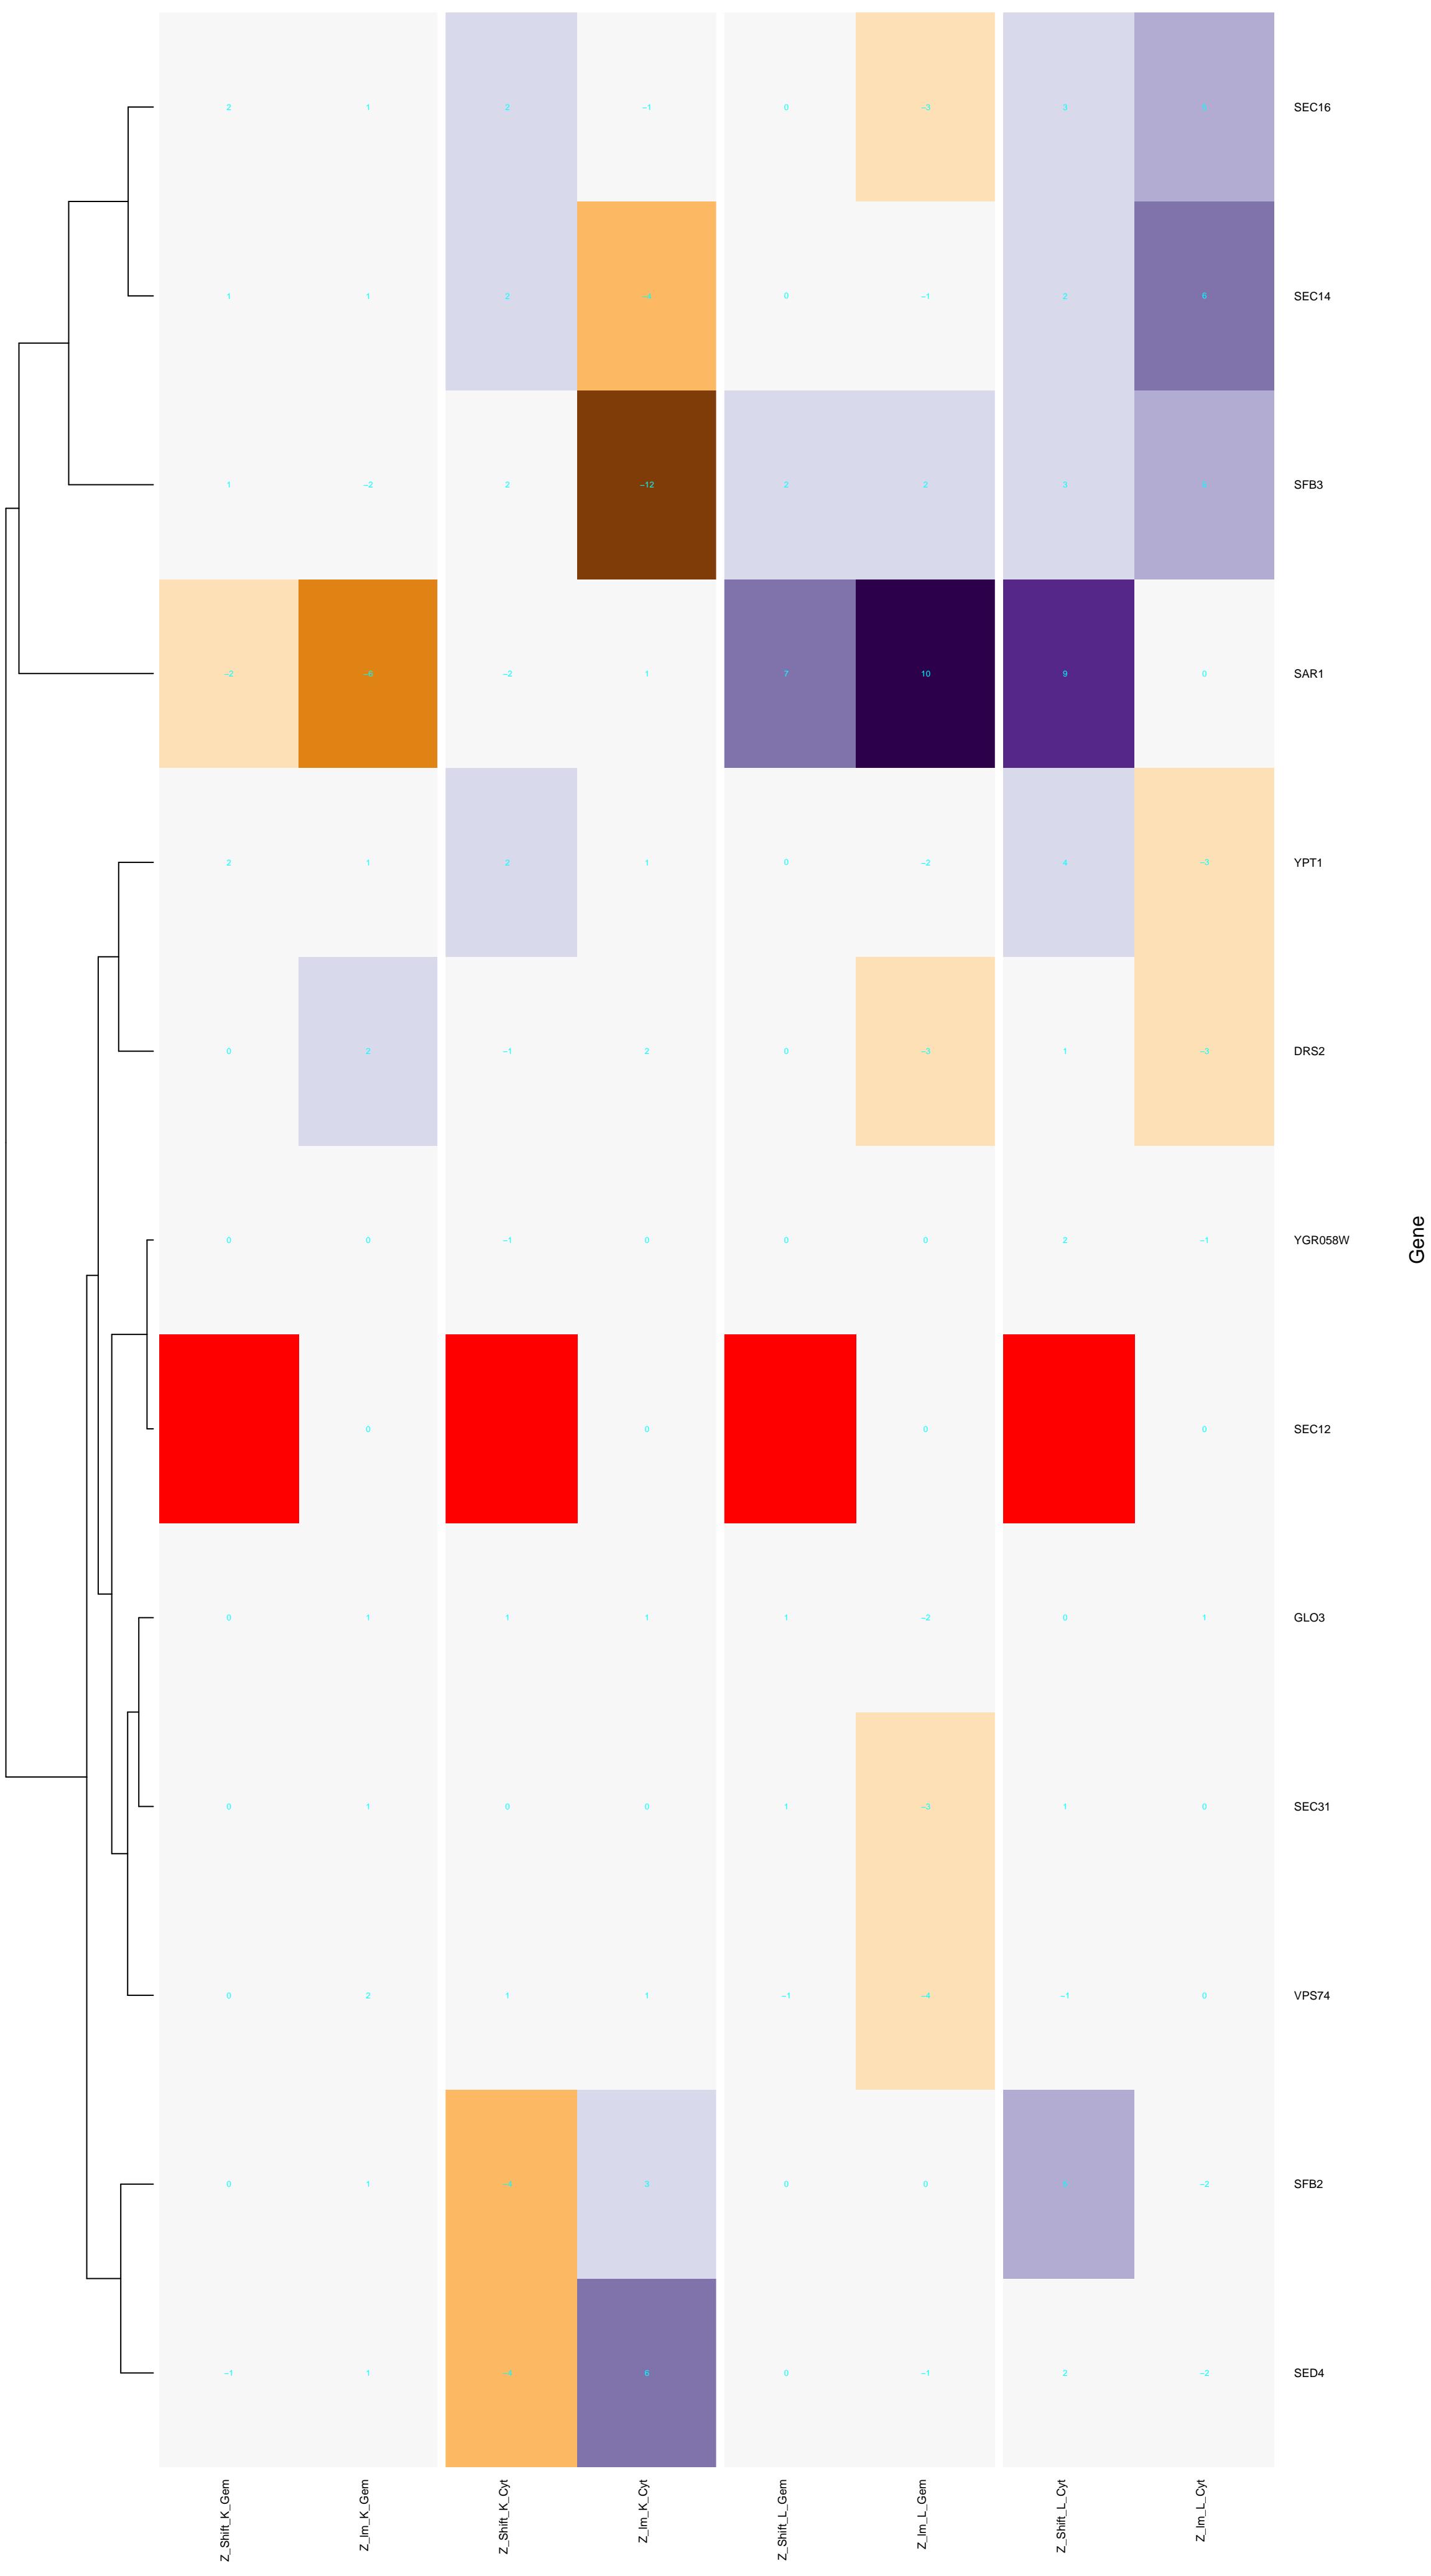

membrane budding

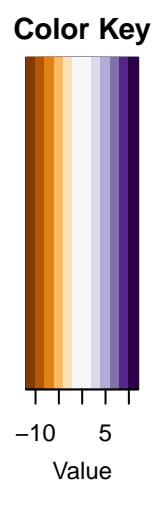

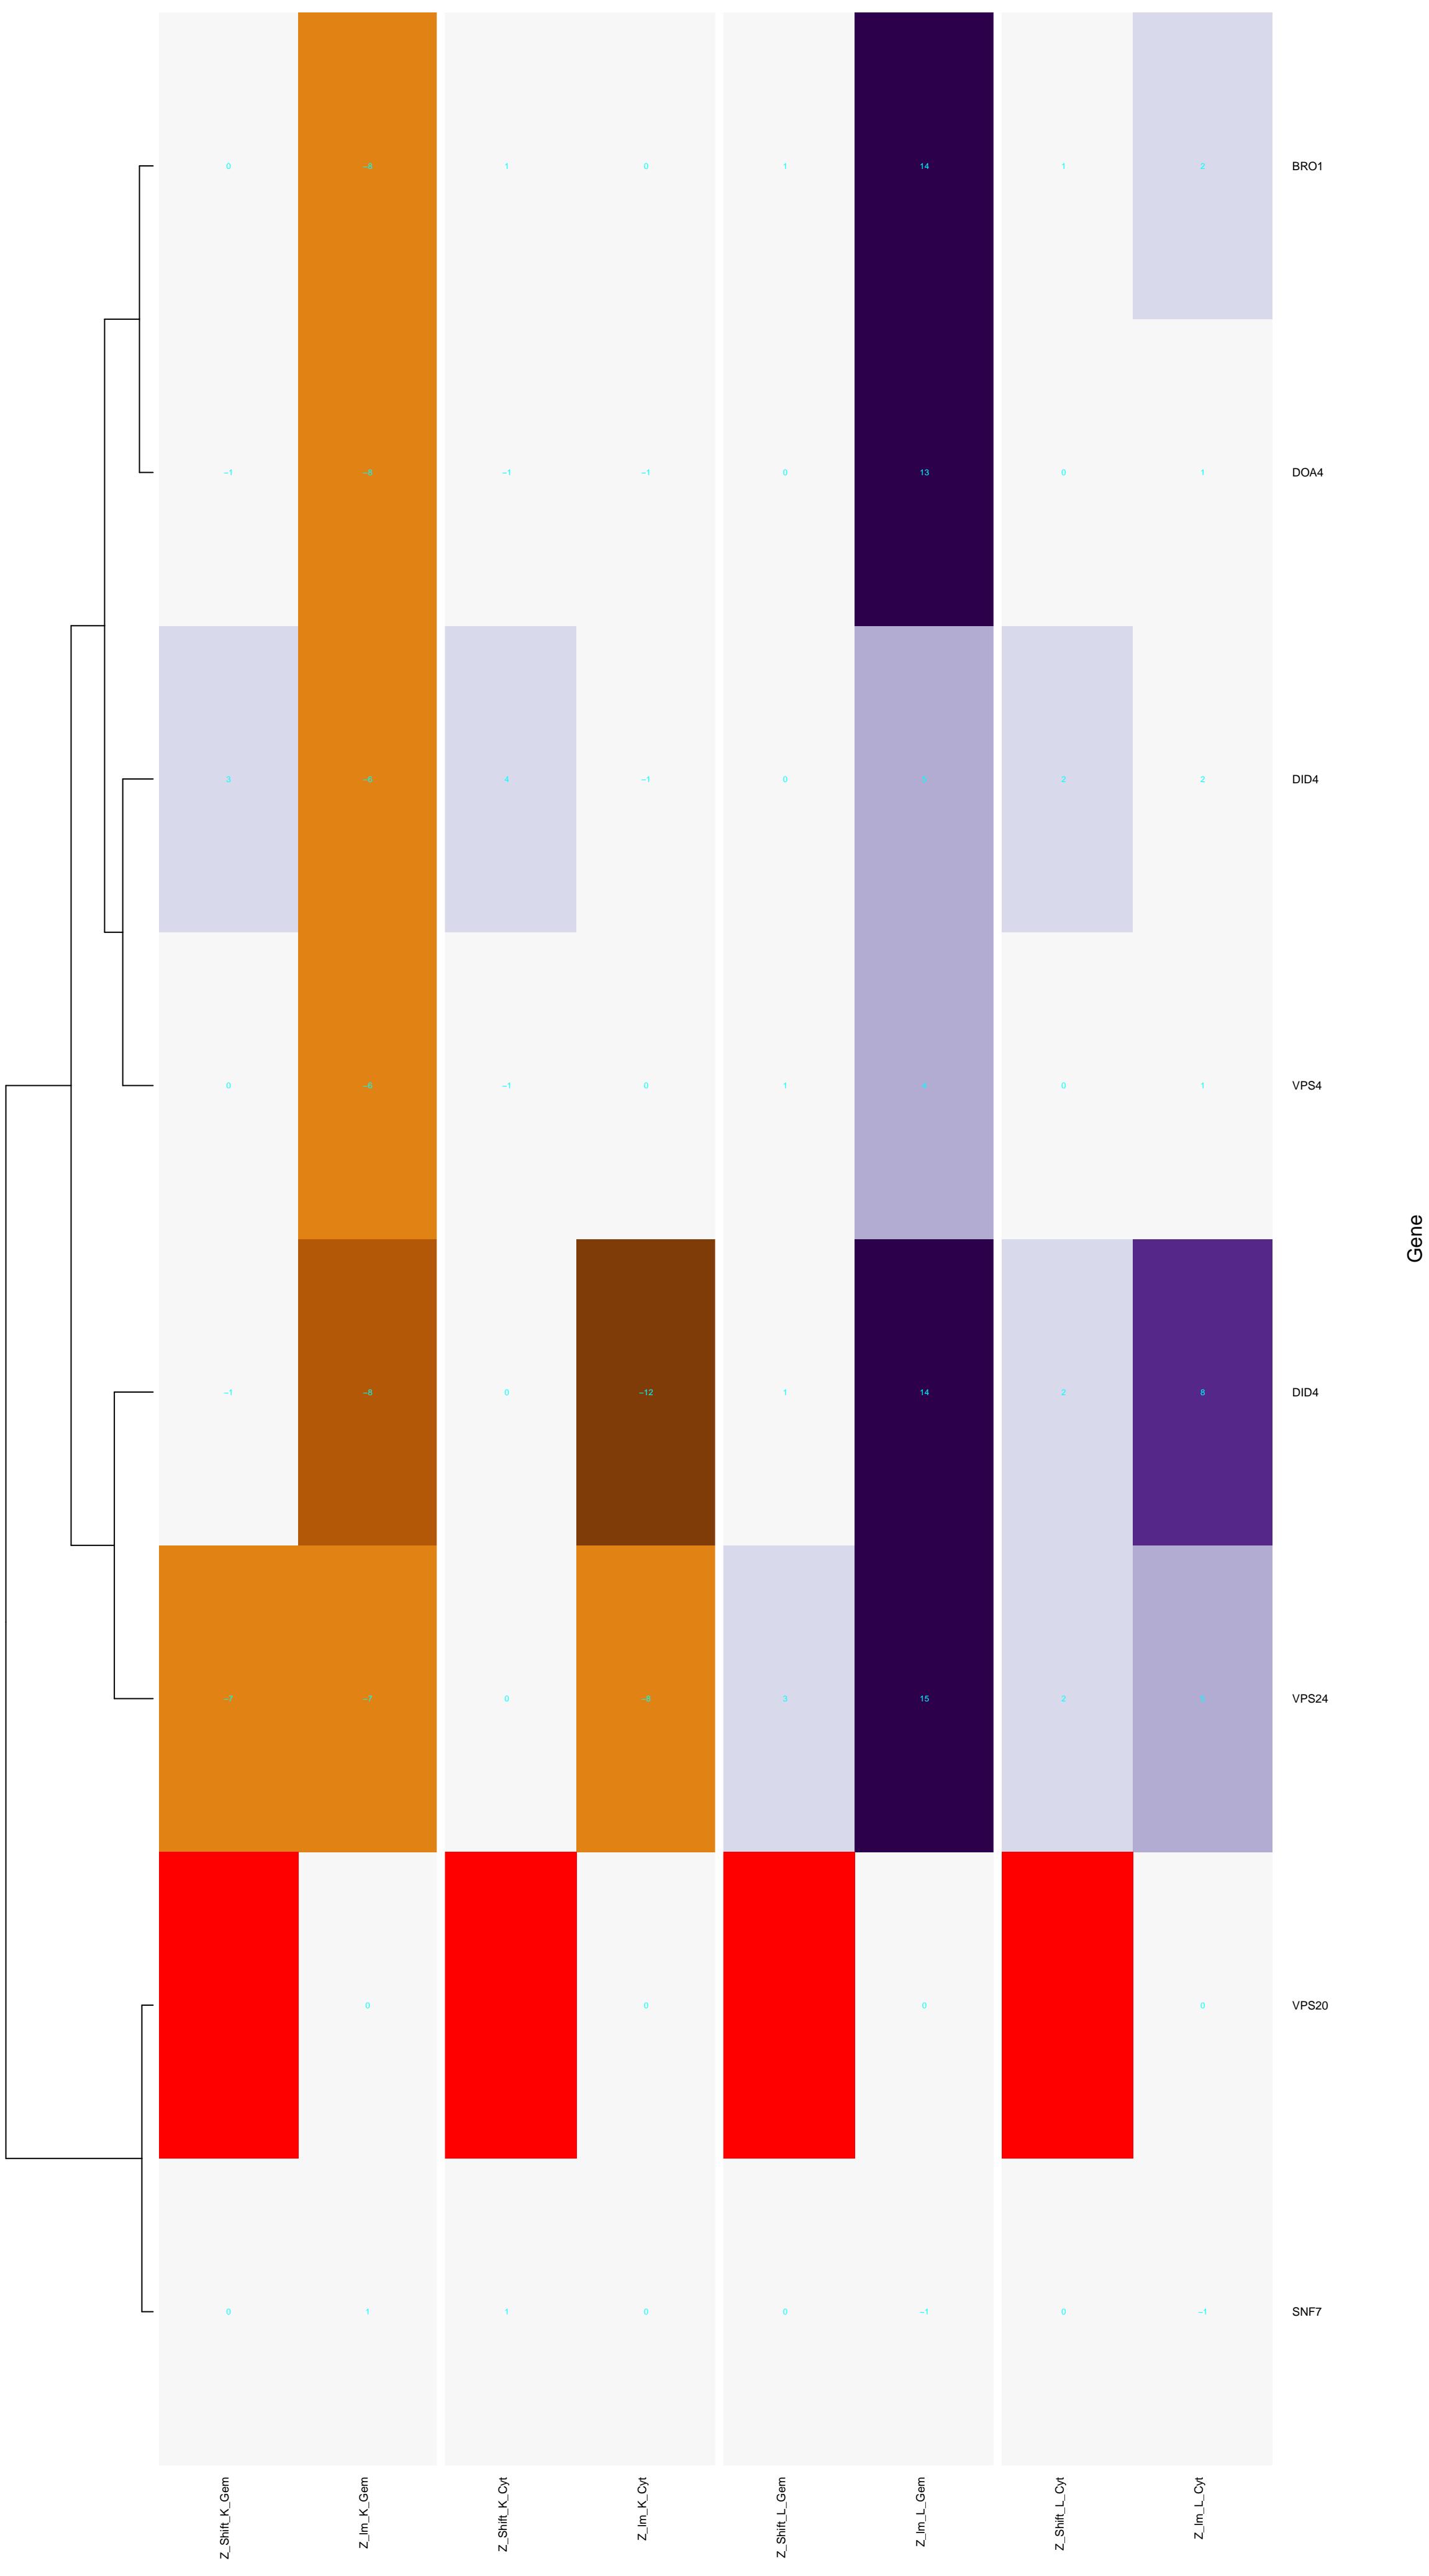

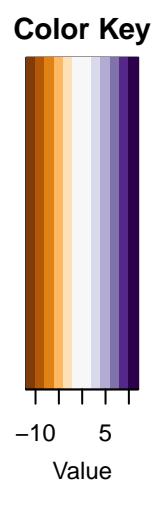

Golgi vesicle budding

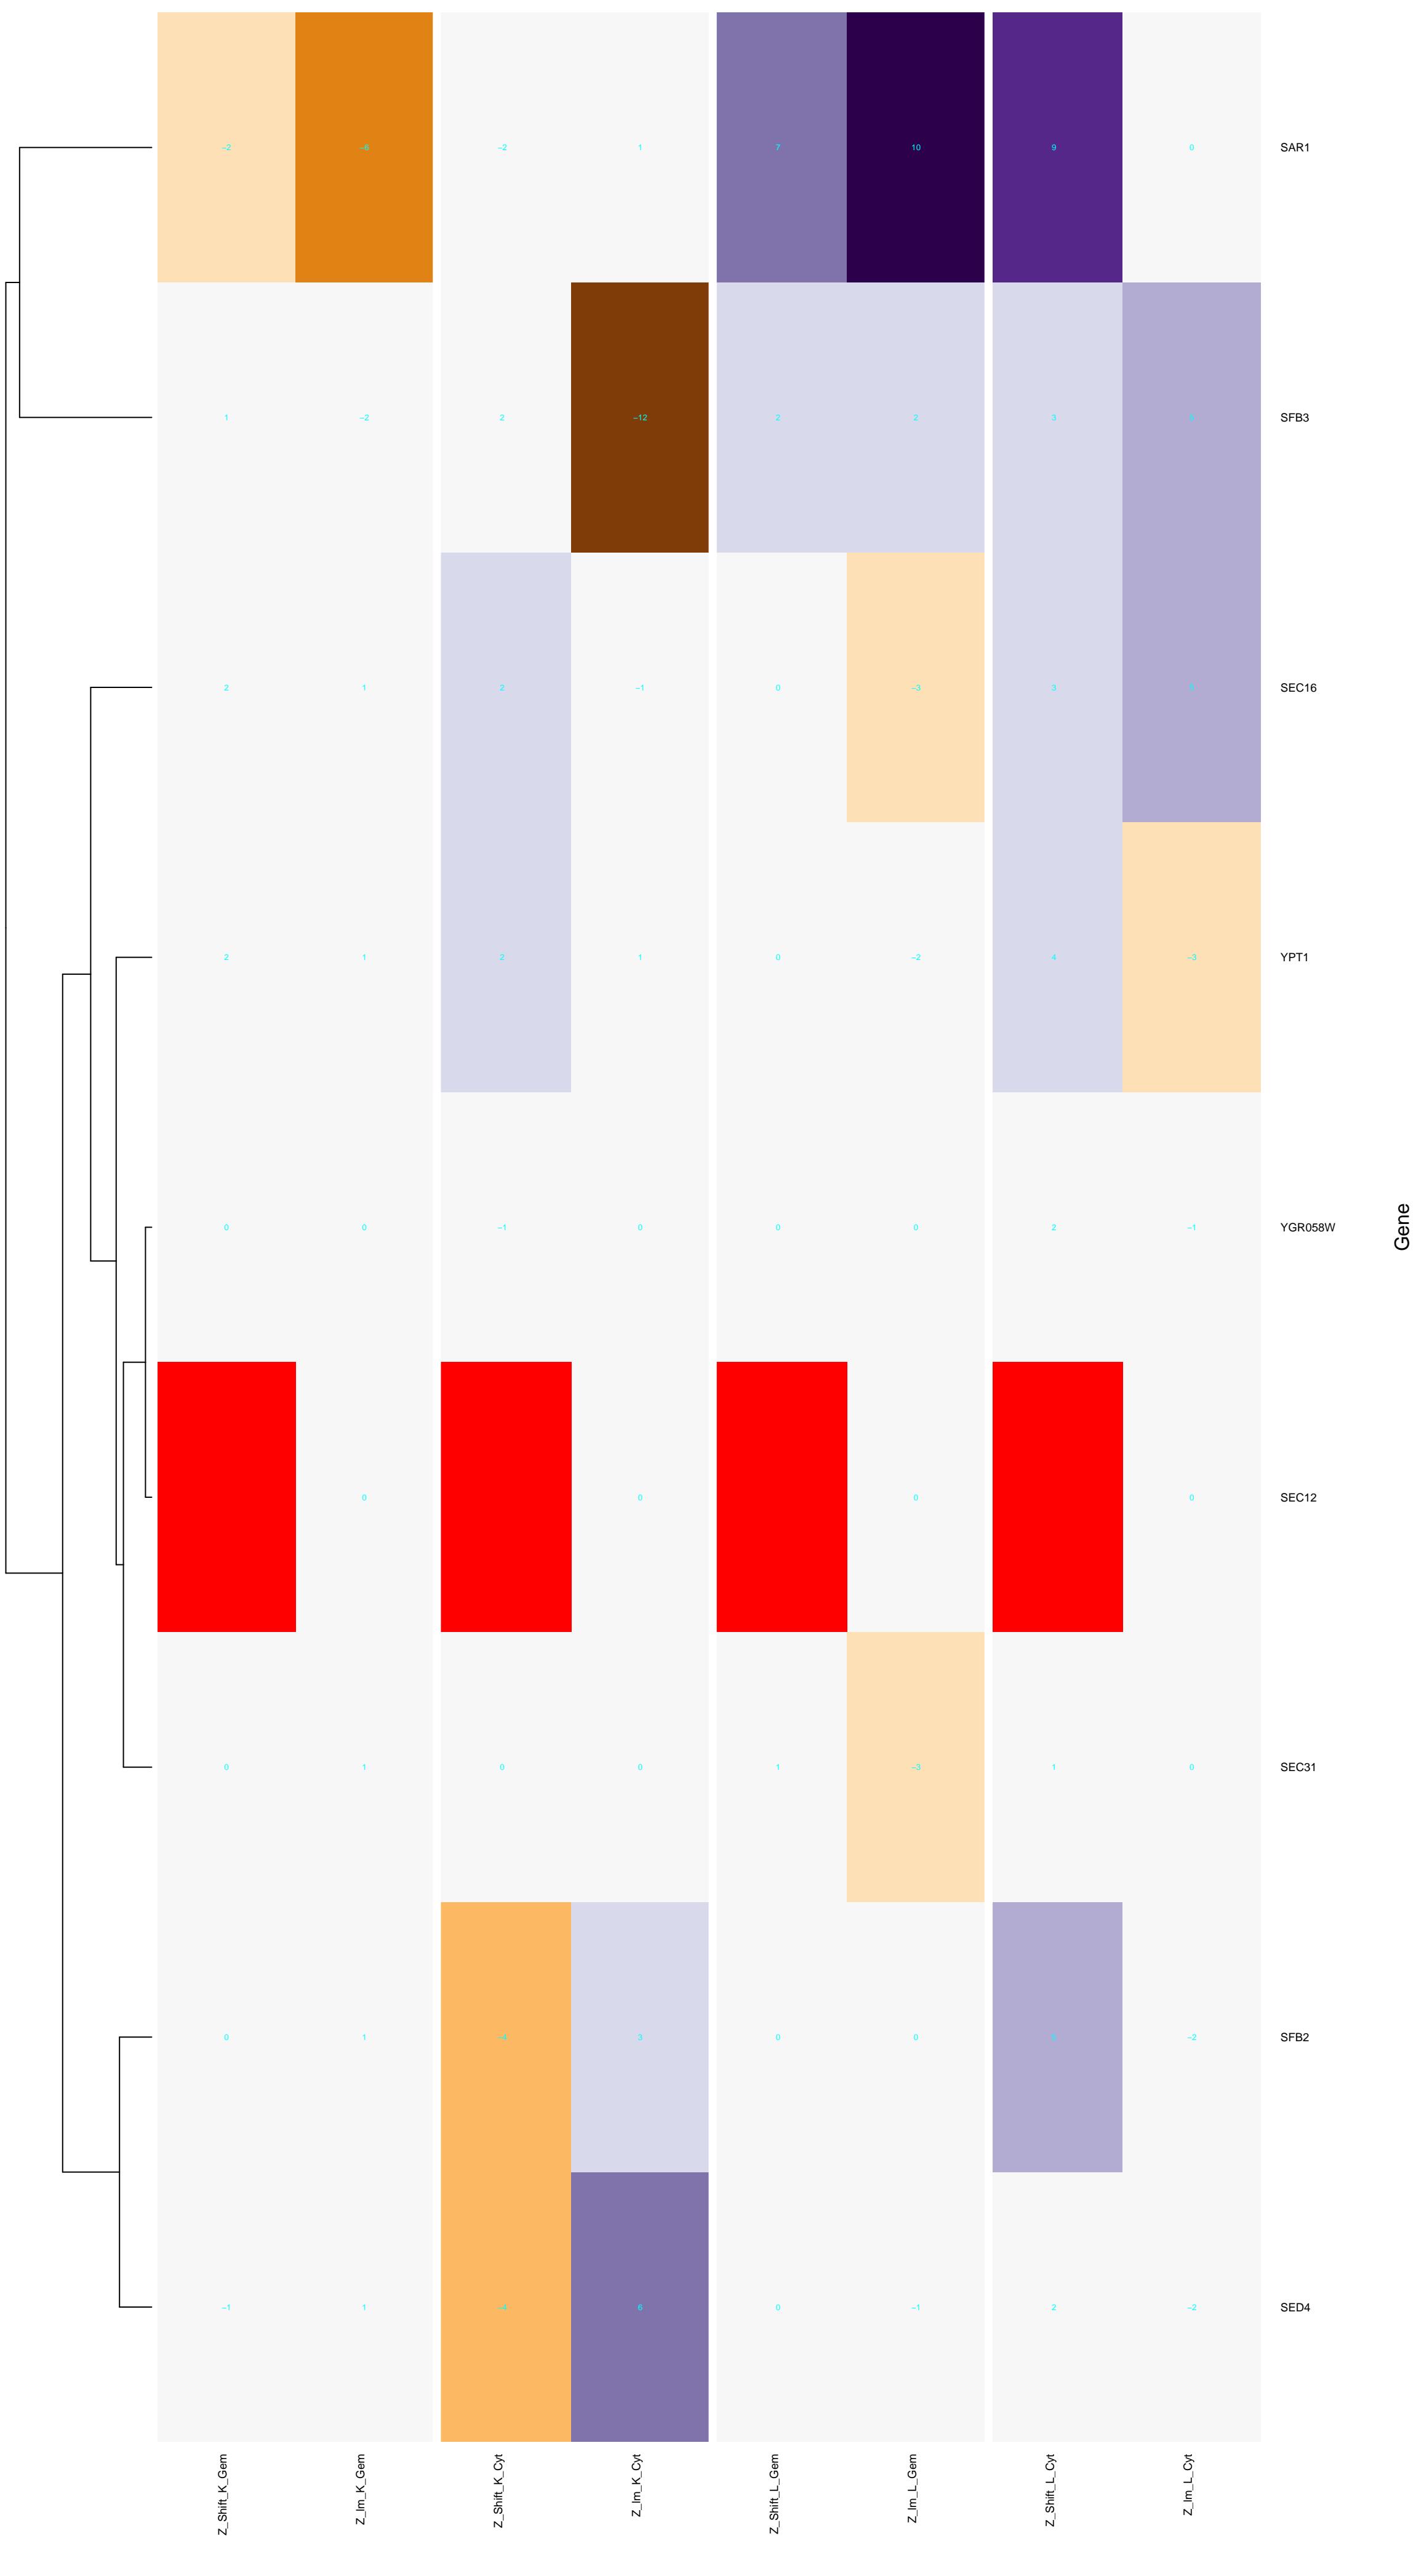

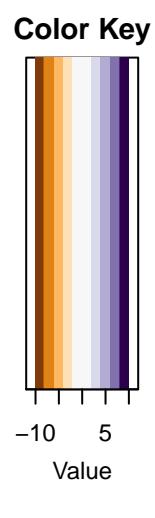

intraluminal vesicle formation

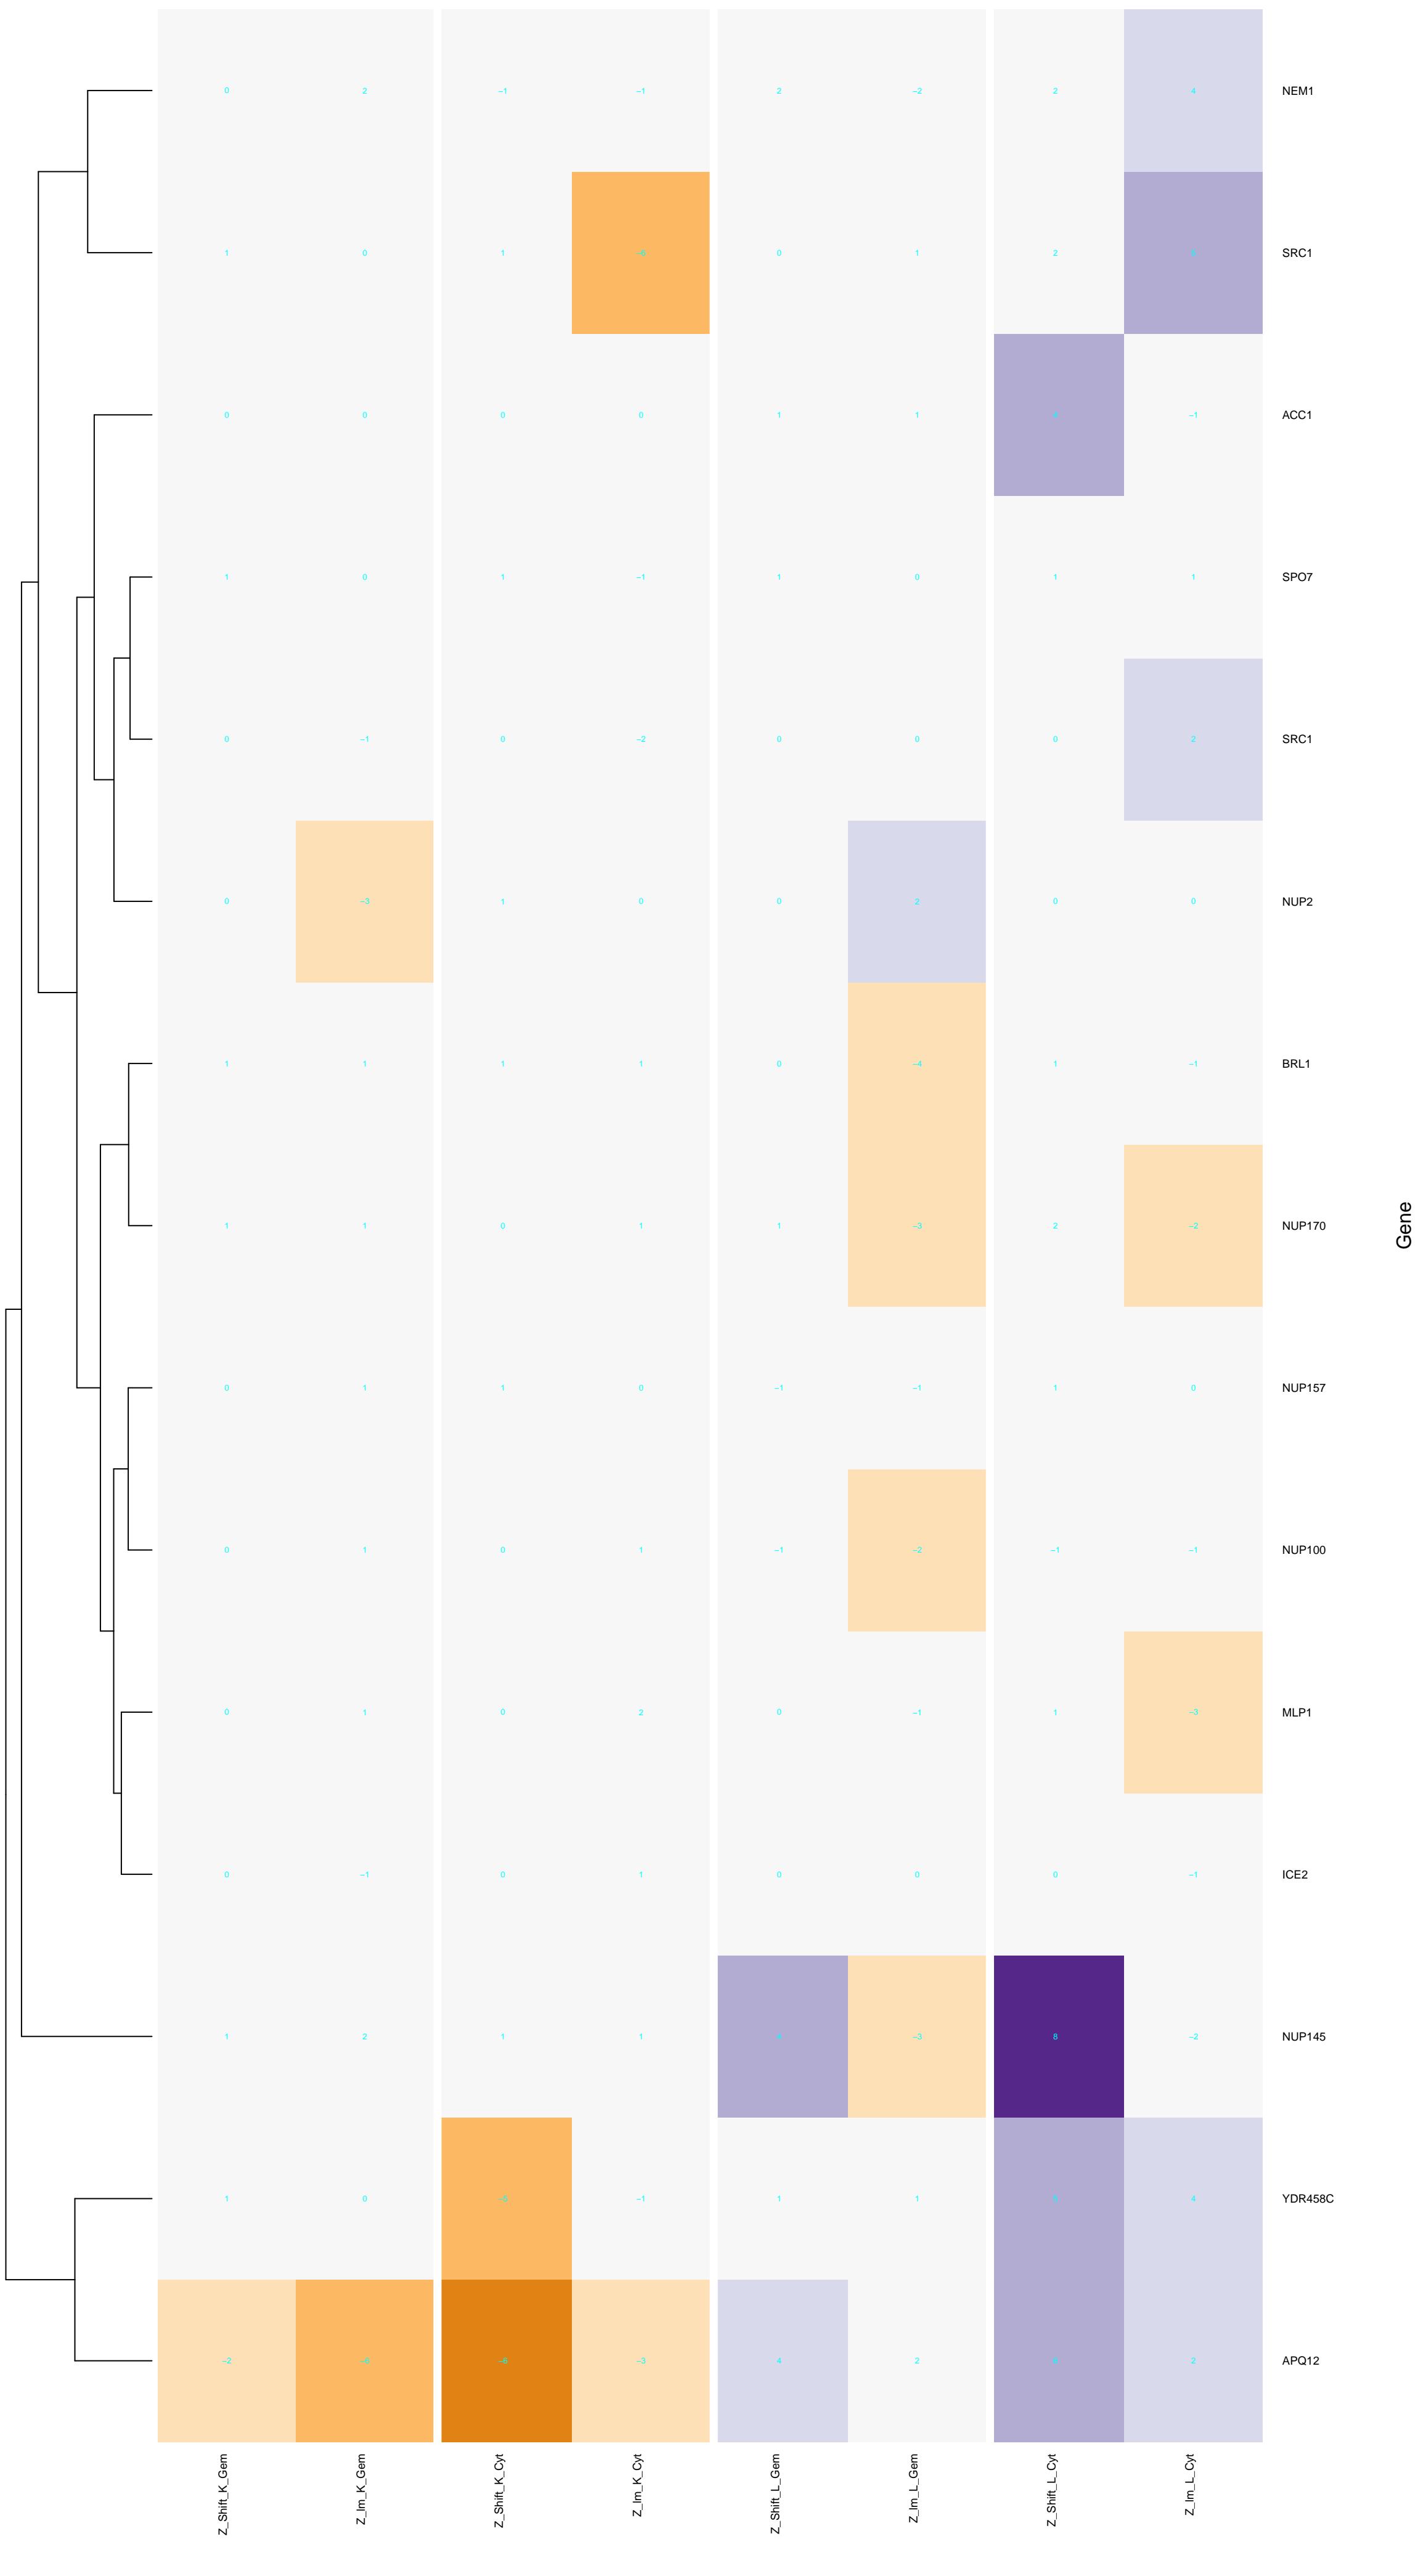

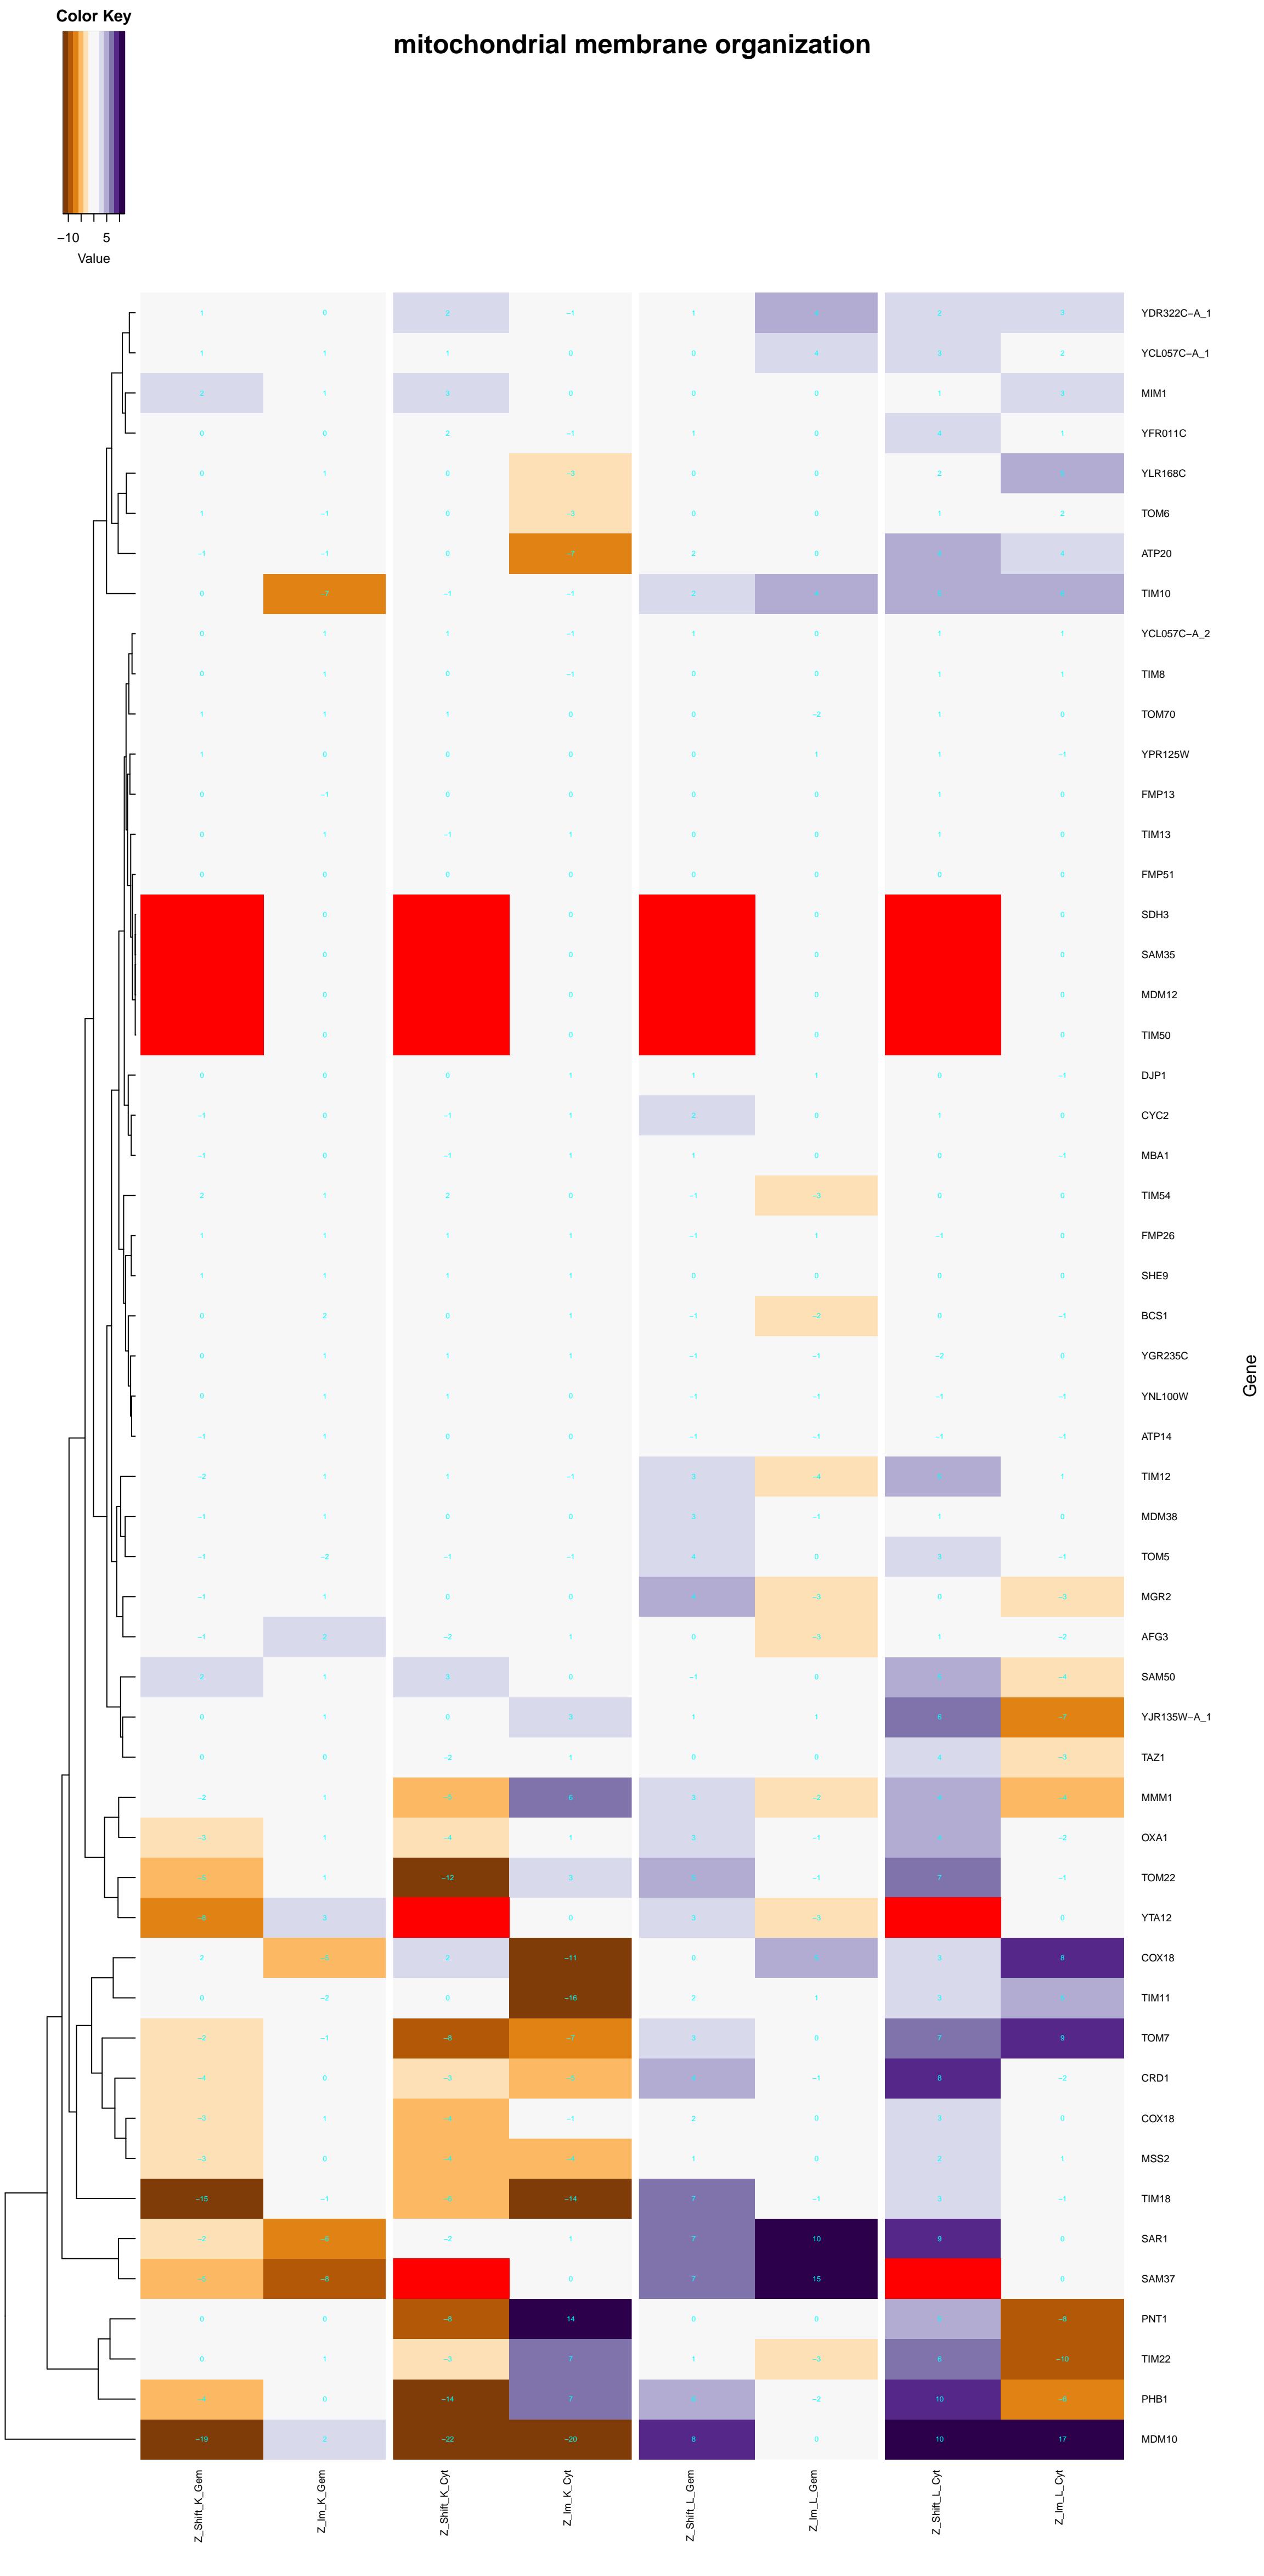

COPII-coated vesicle budding

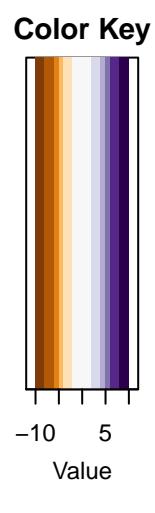

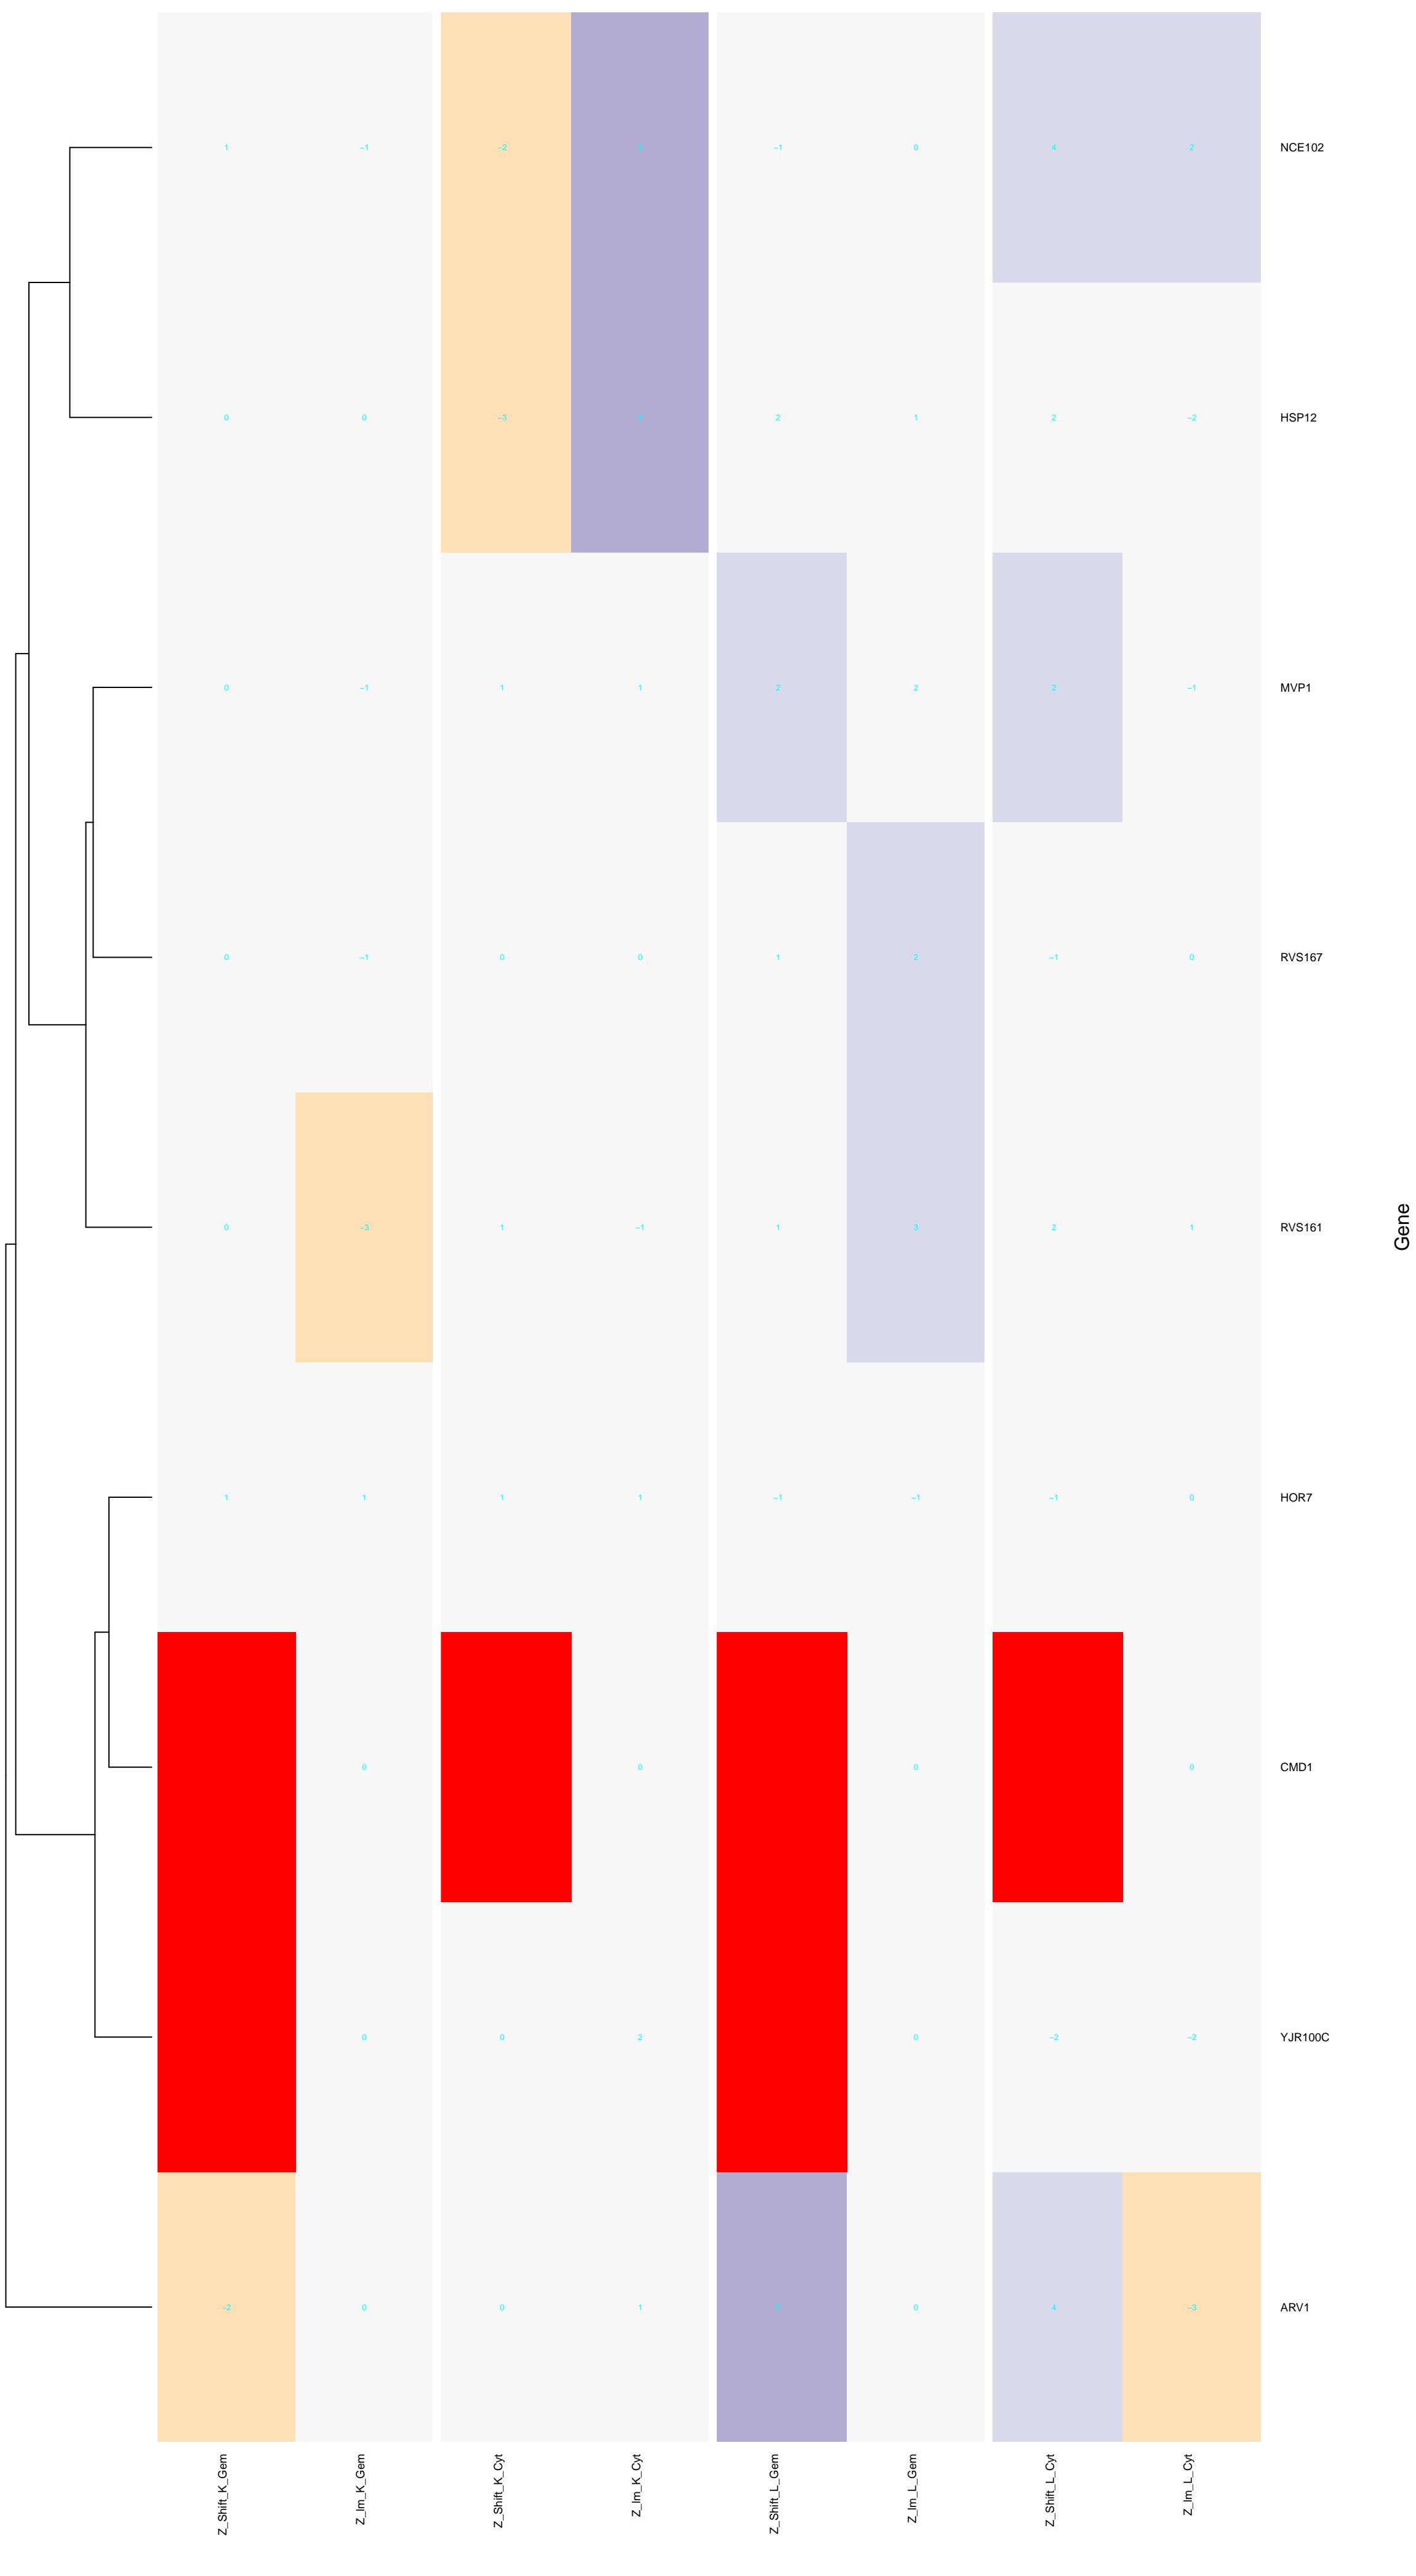

nuclear envelope organization

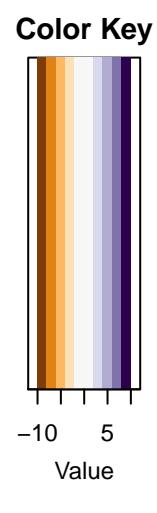

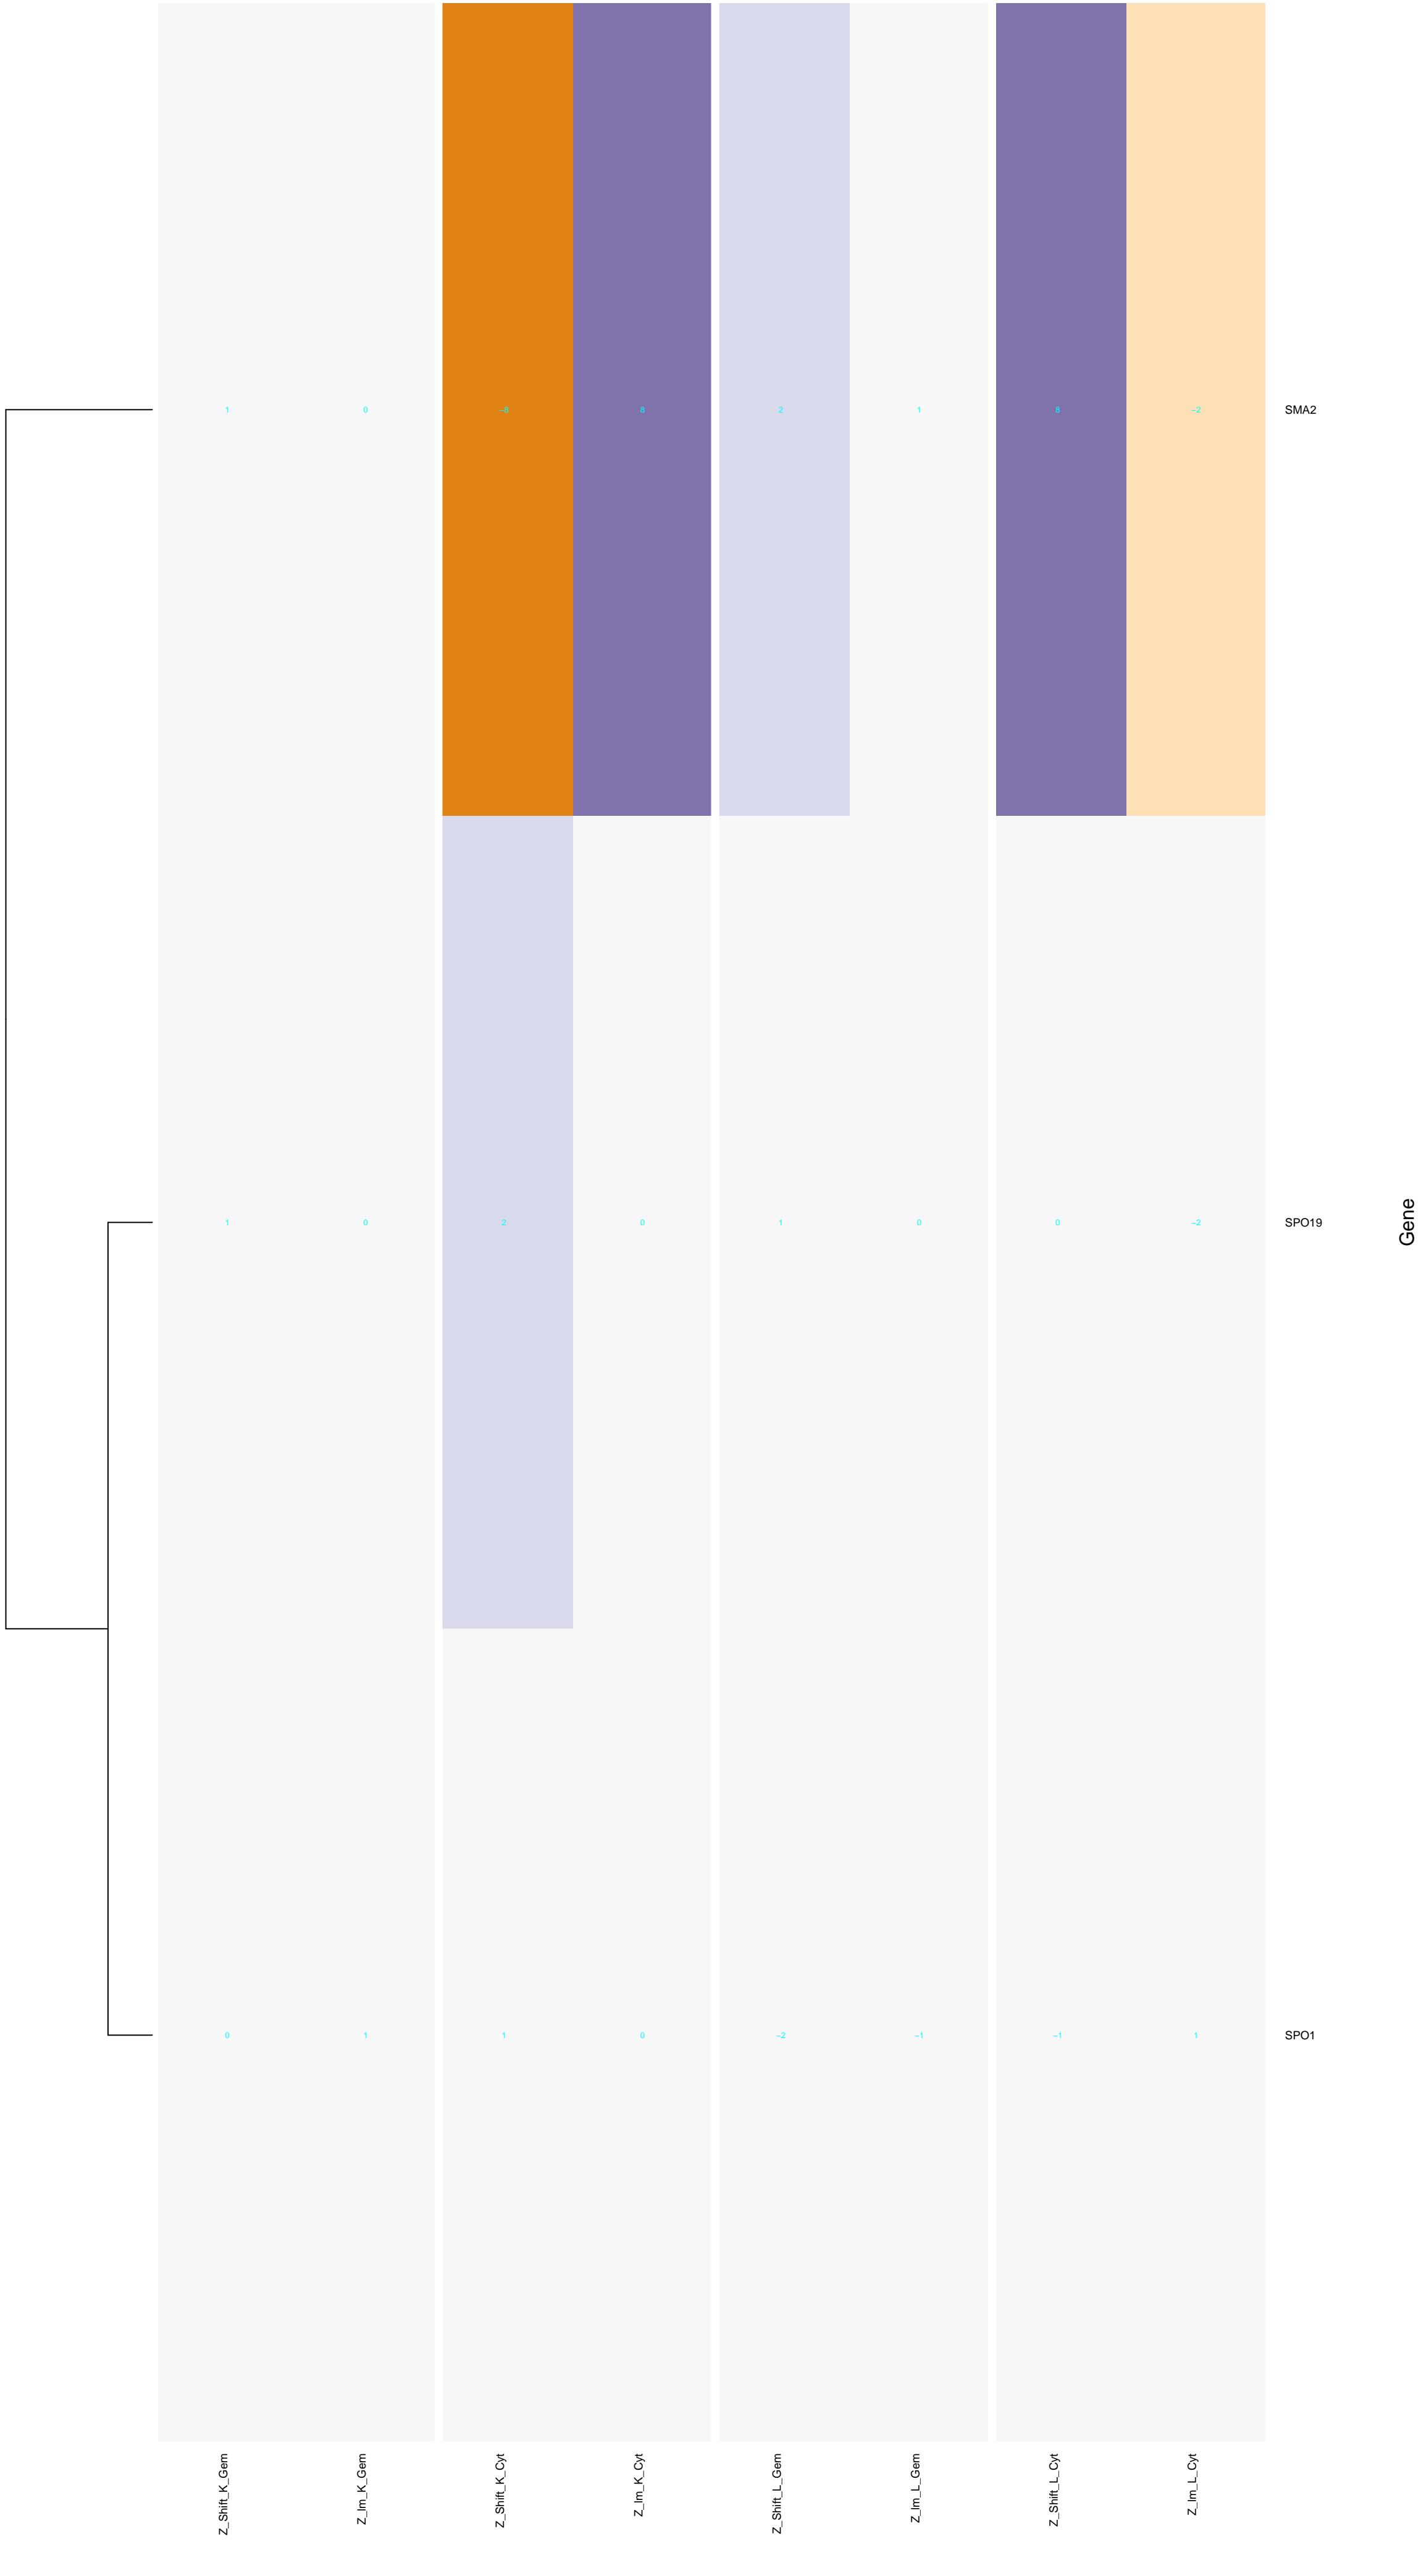

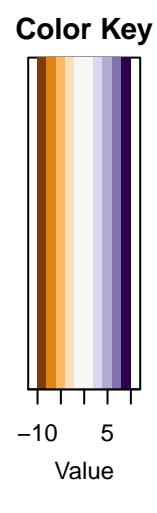

plasma membrane organization

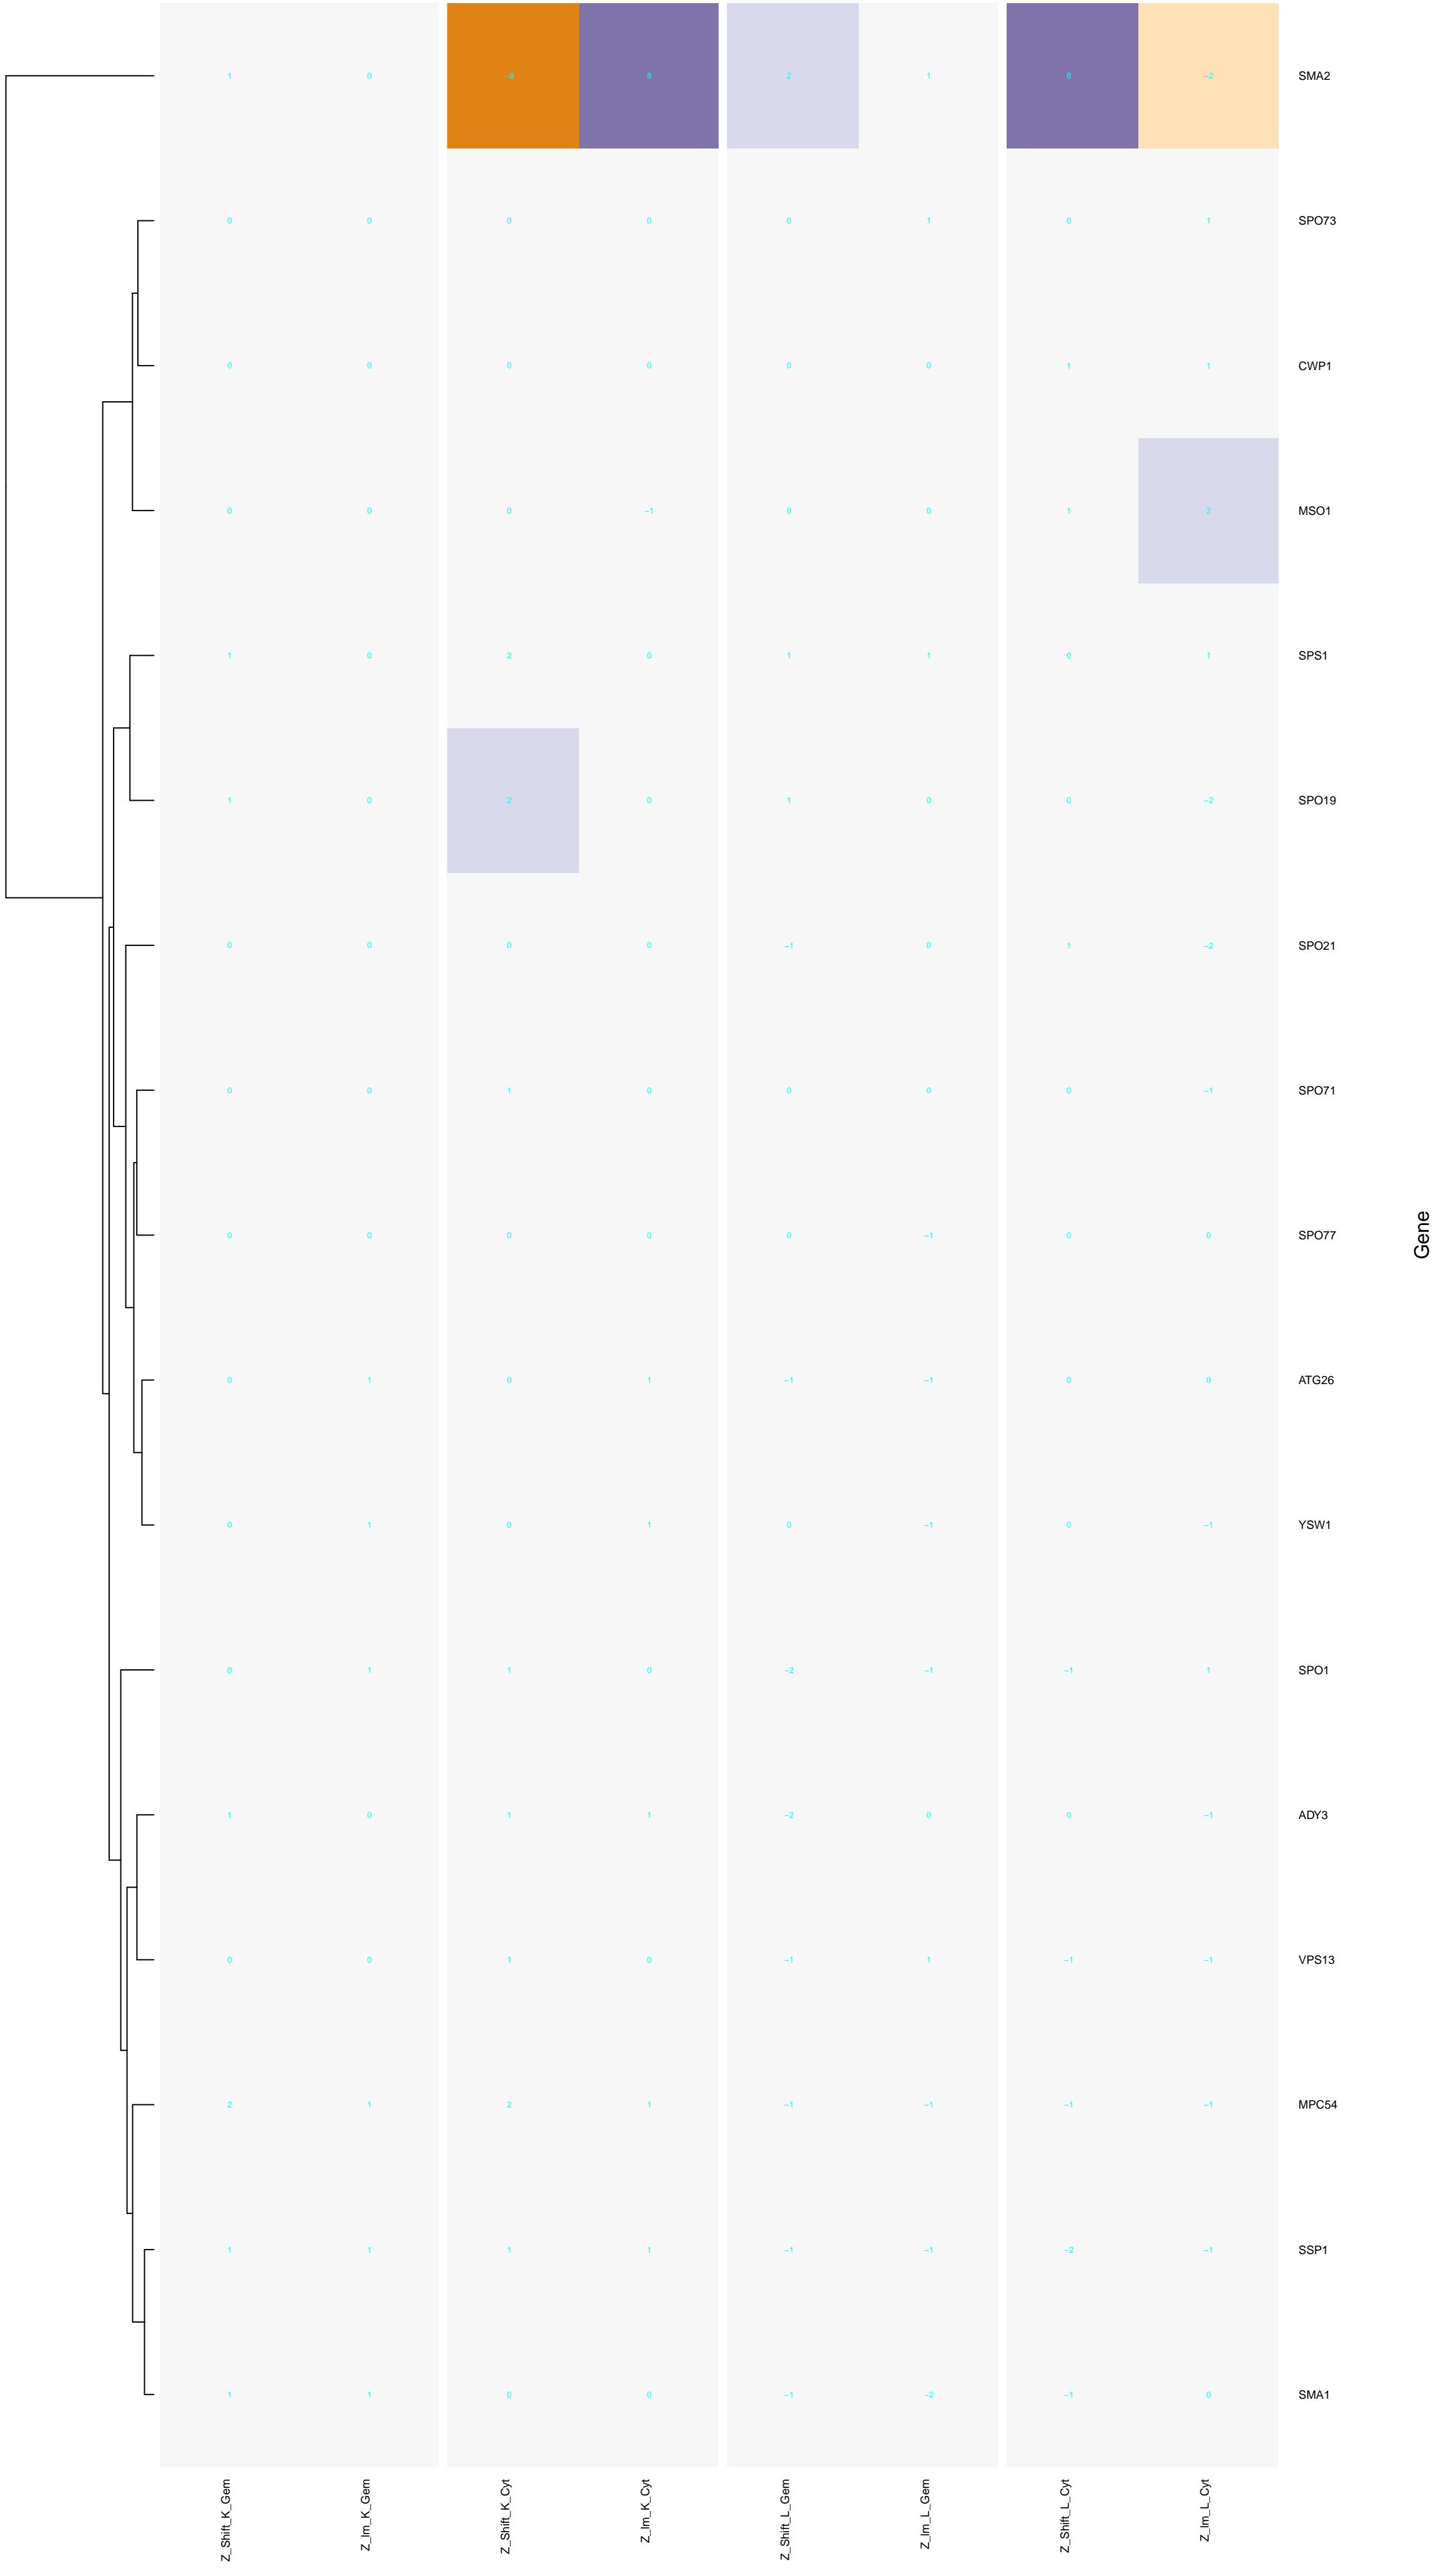

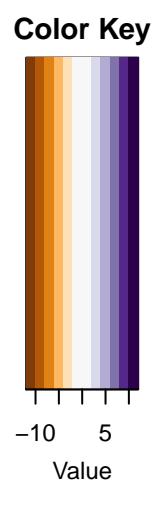

spore membrane bending pathway

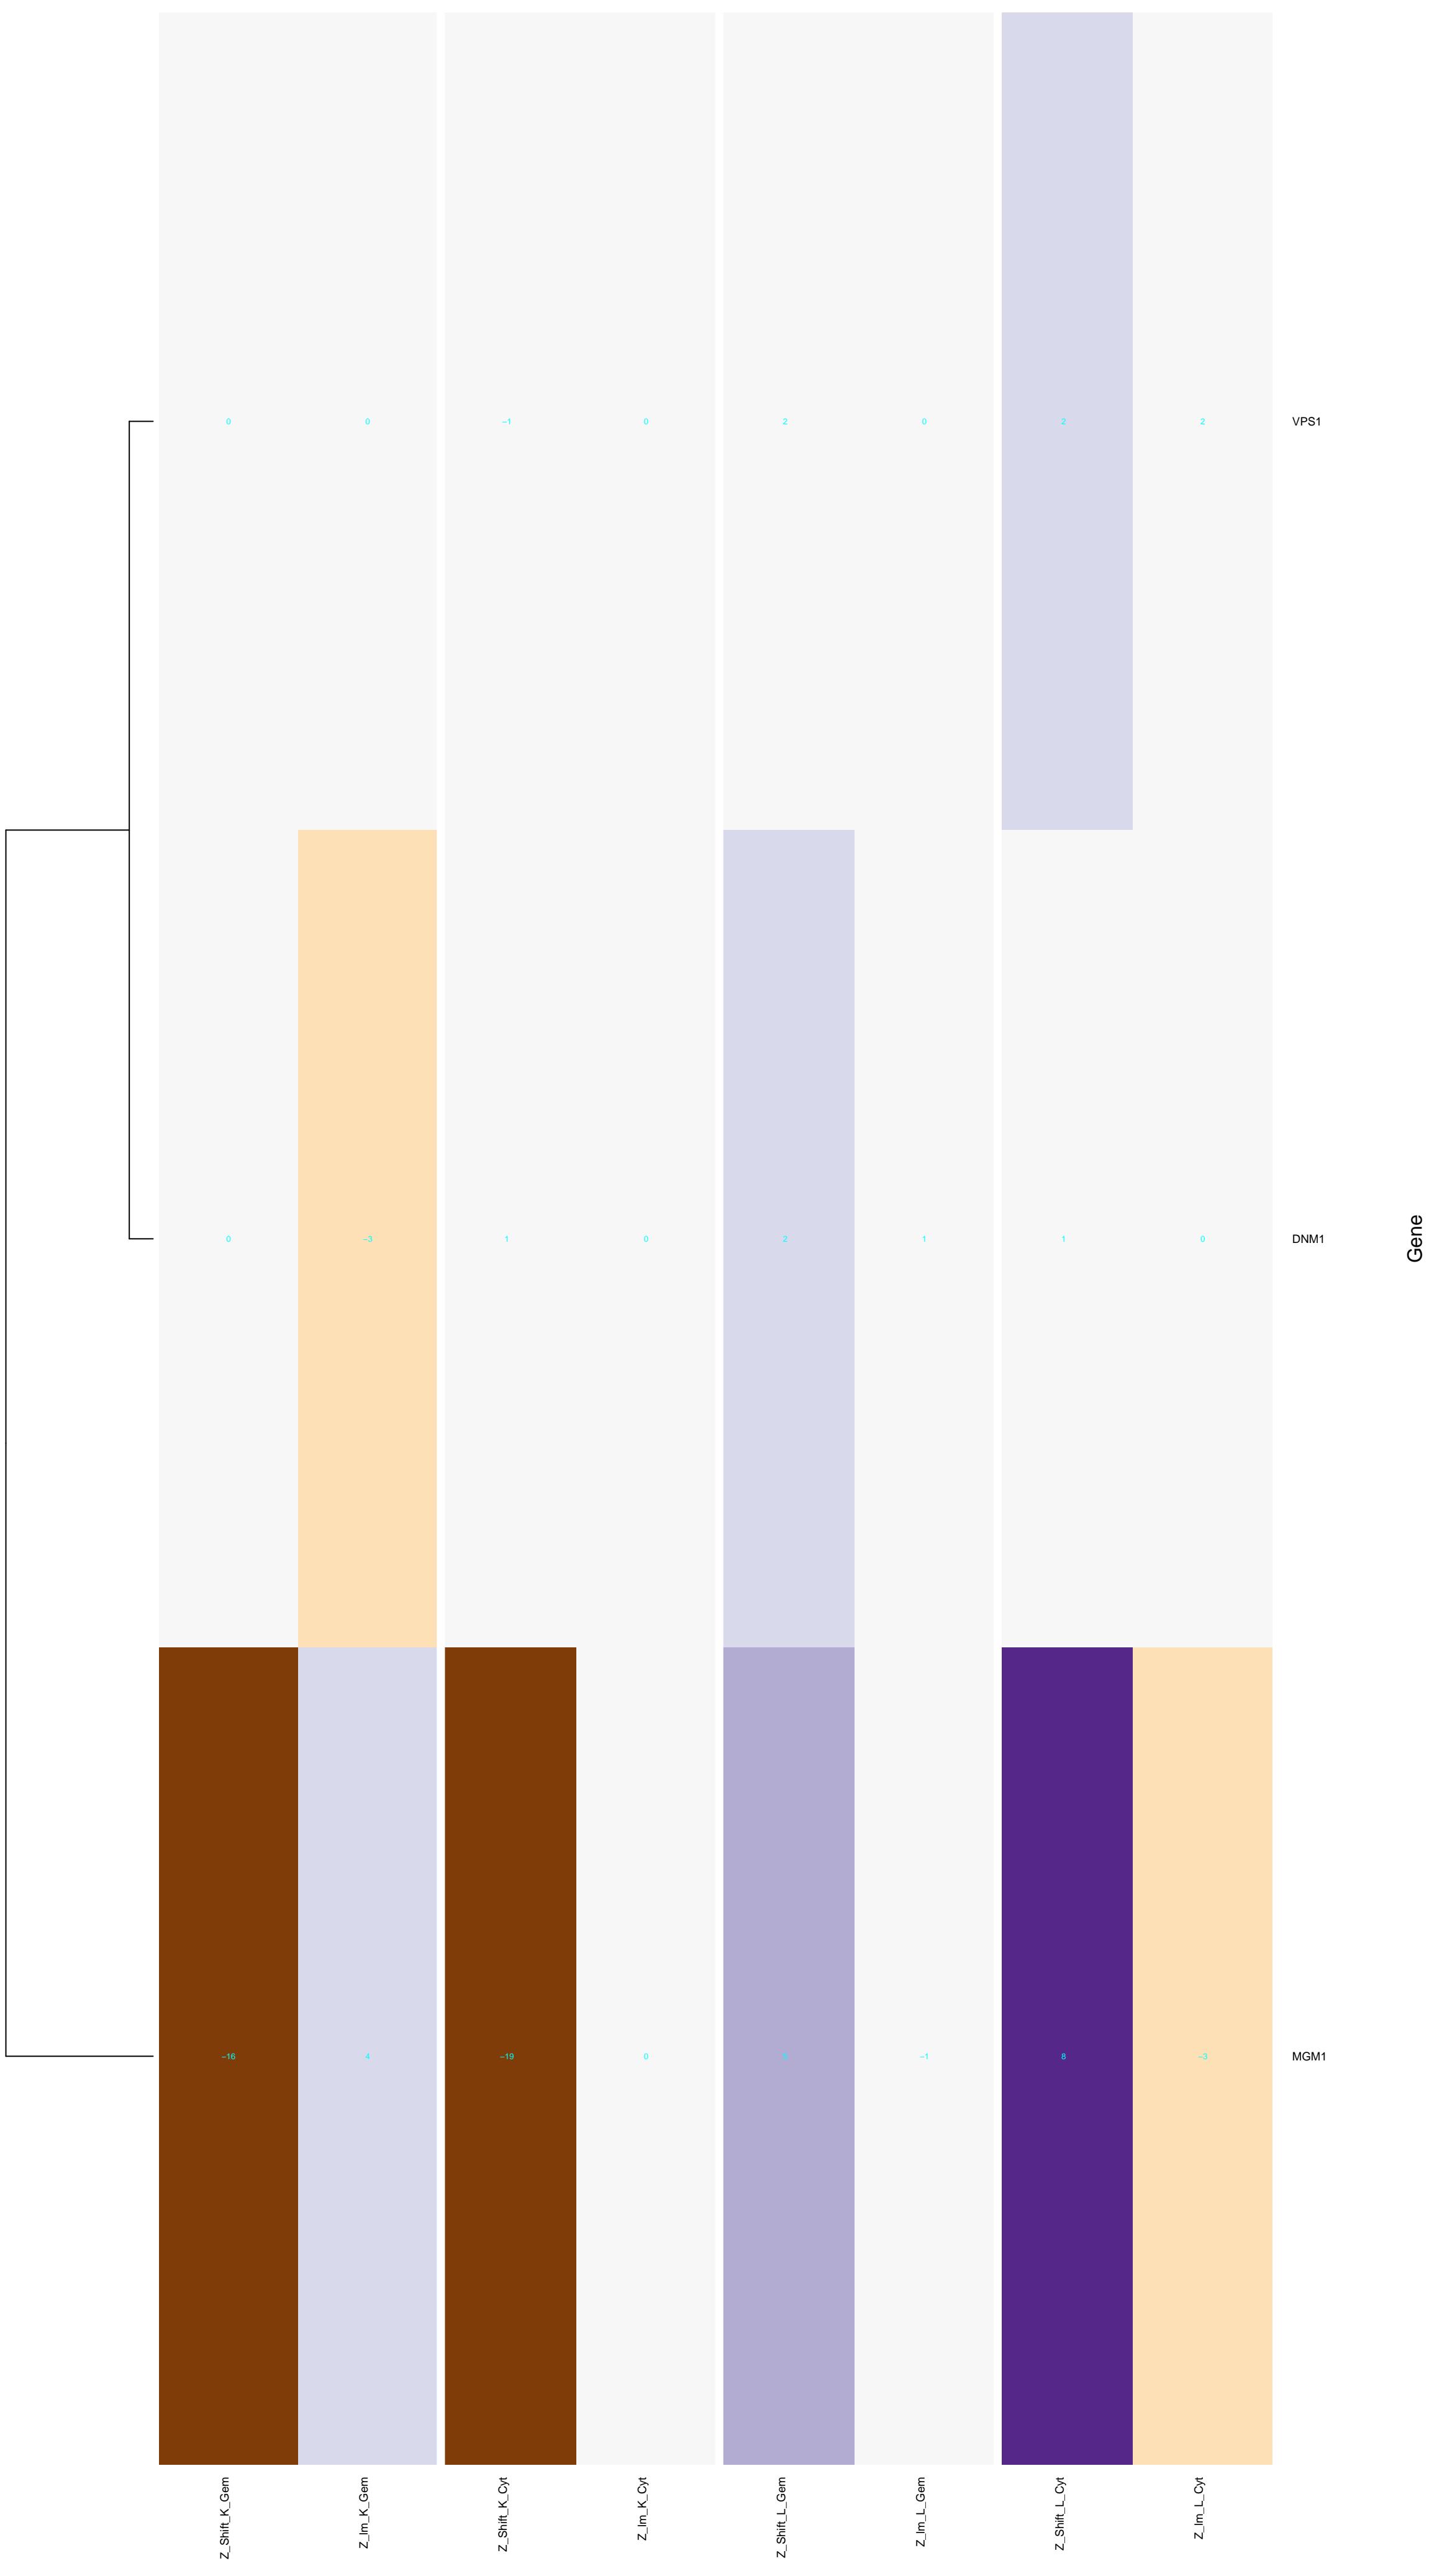

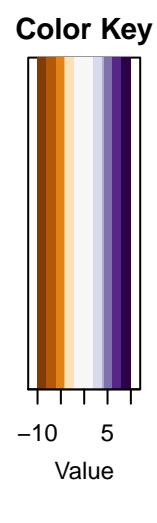

membrane assembly

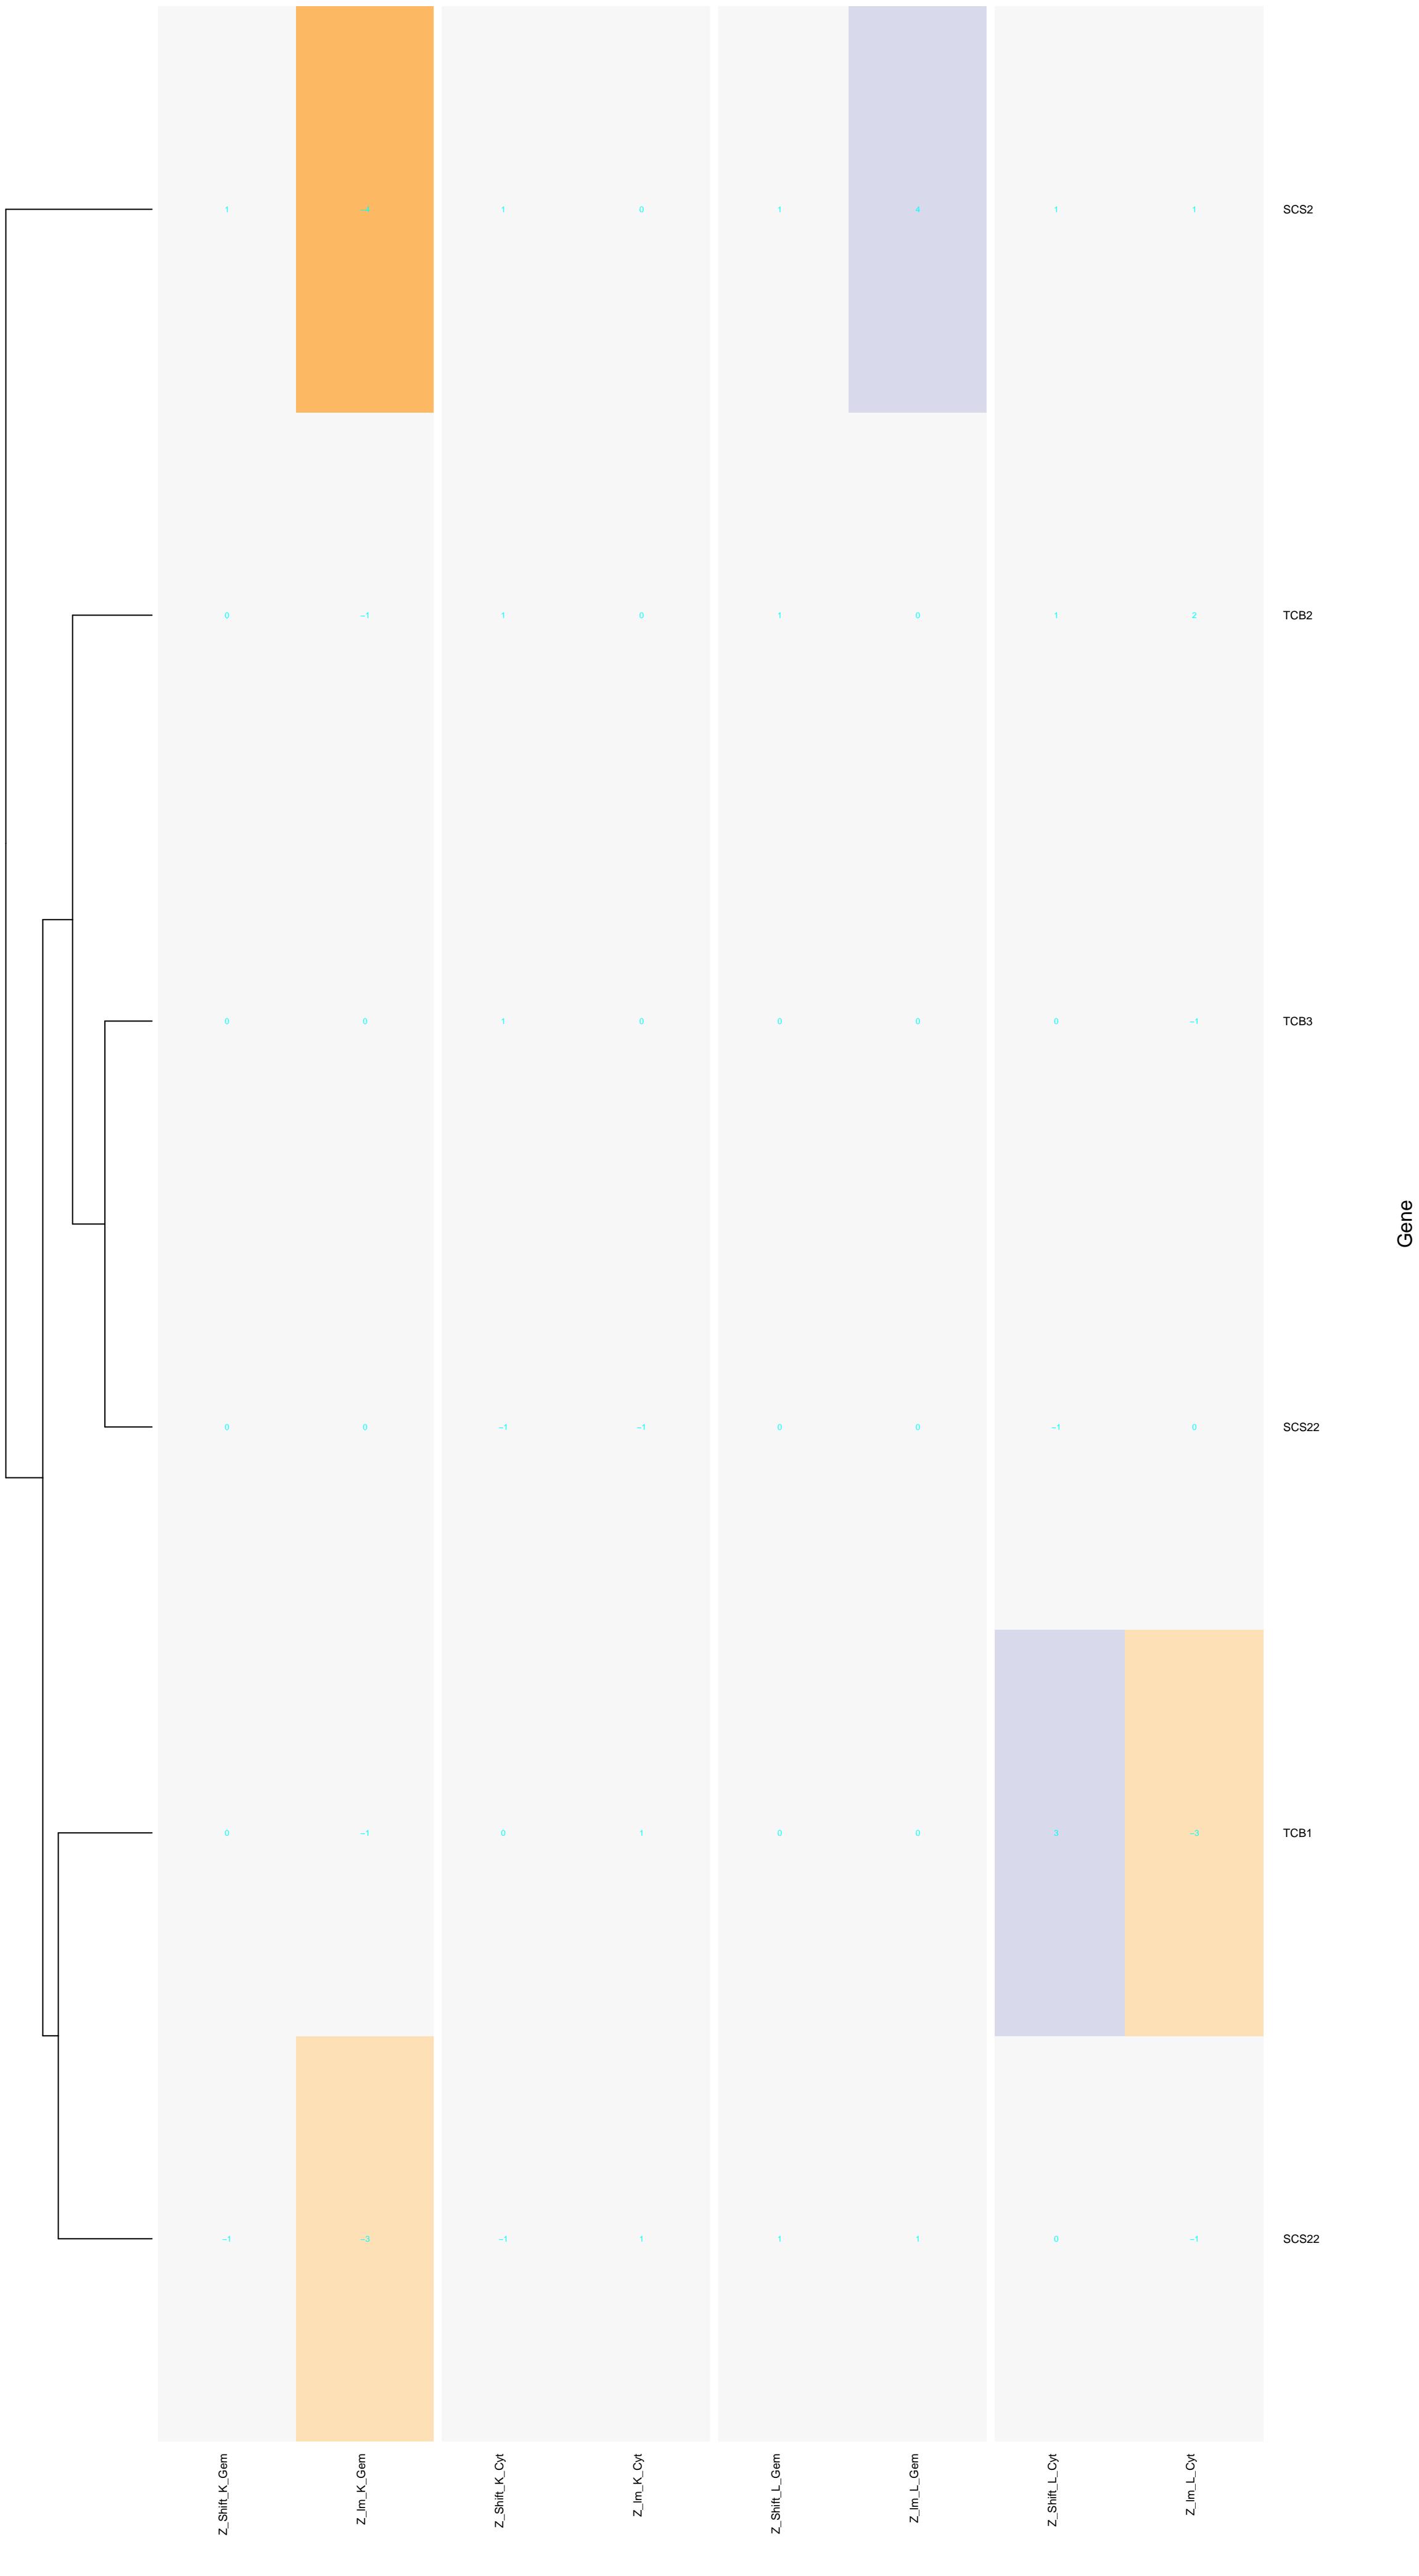

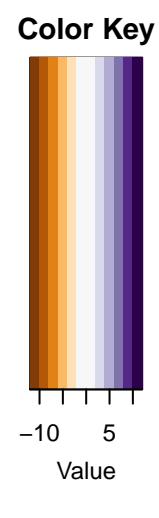

membrane fission

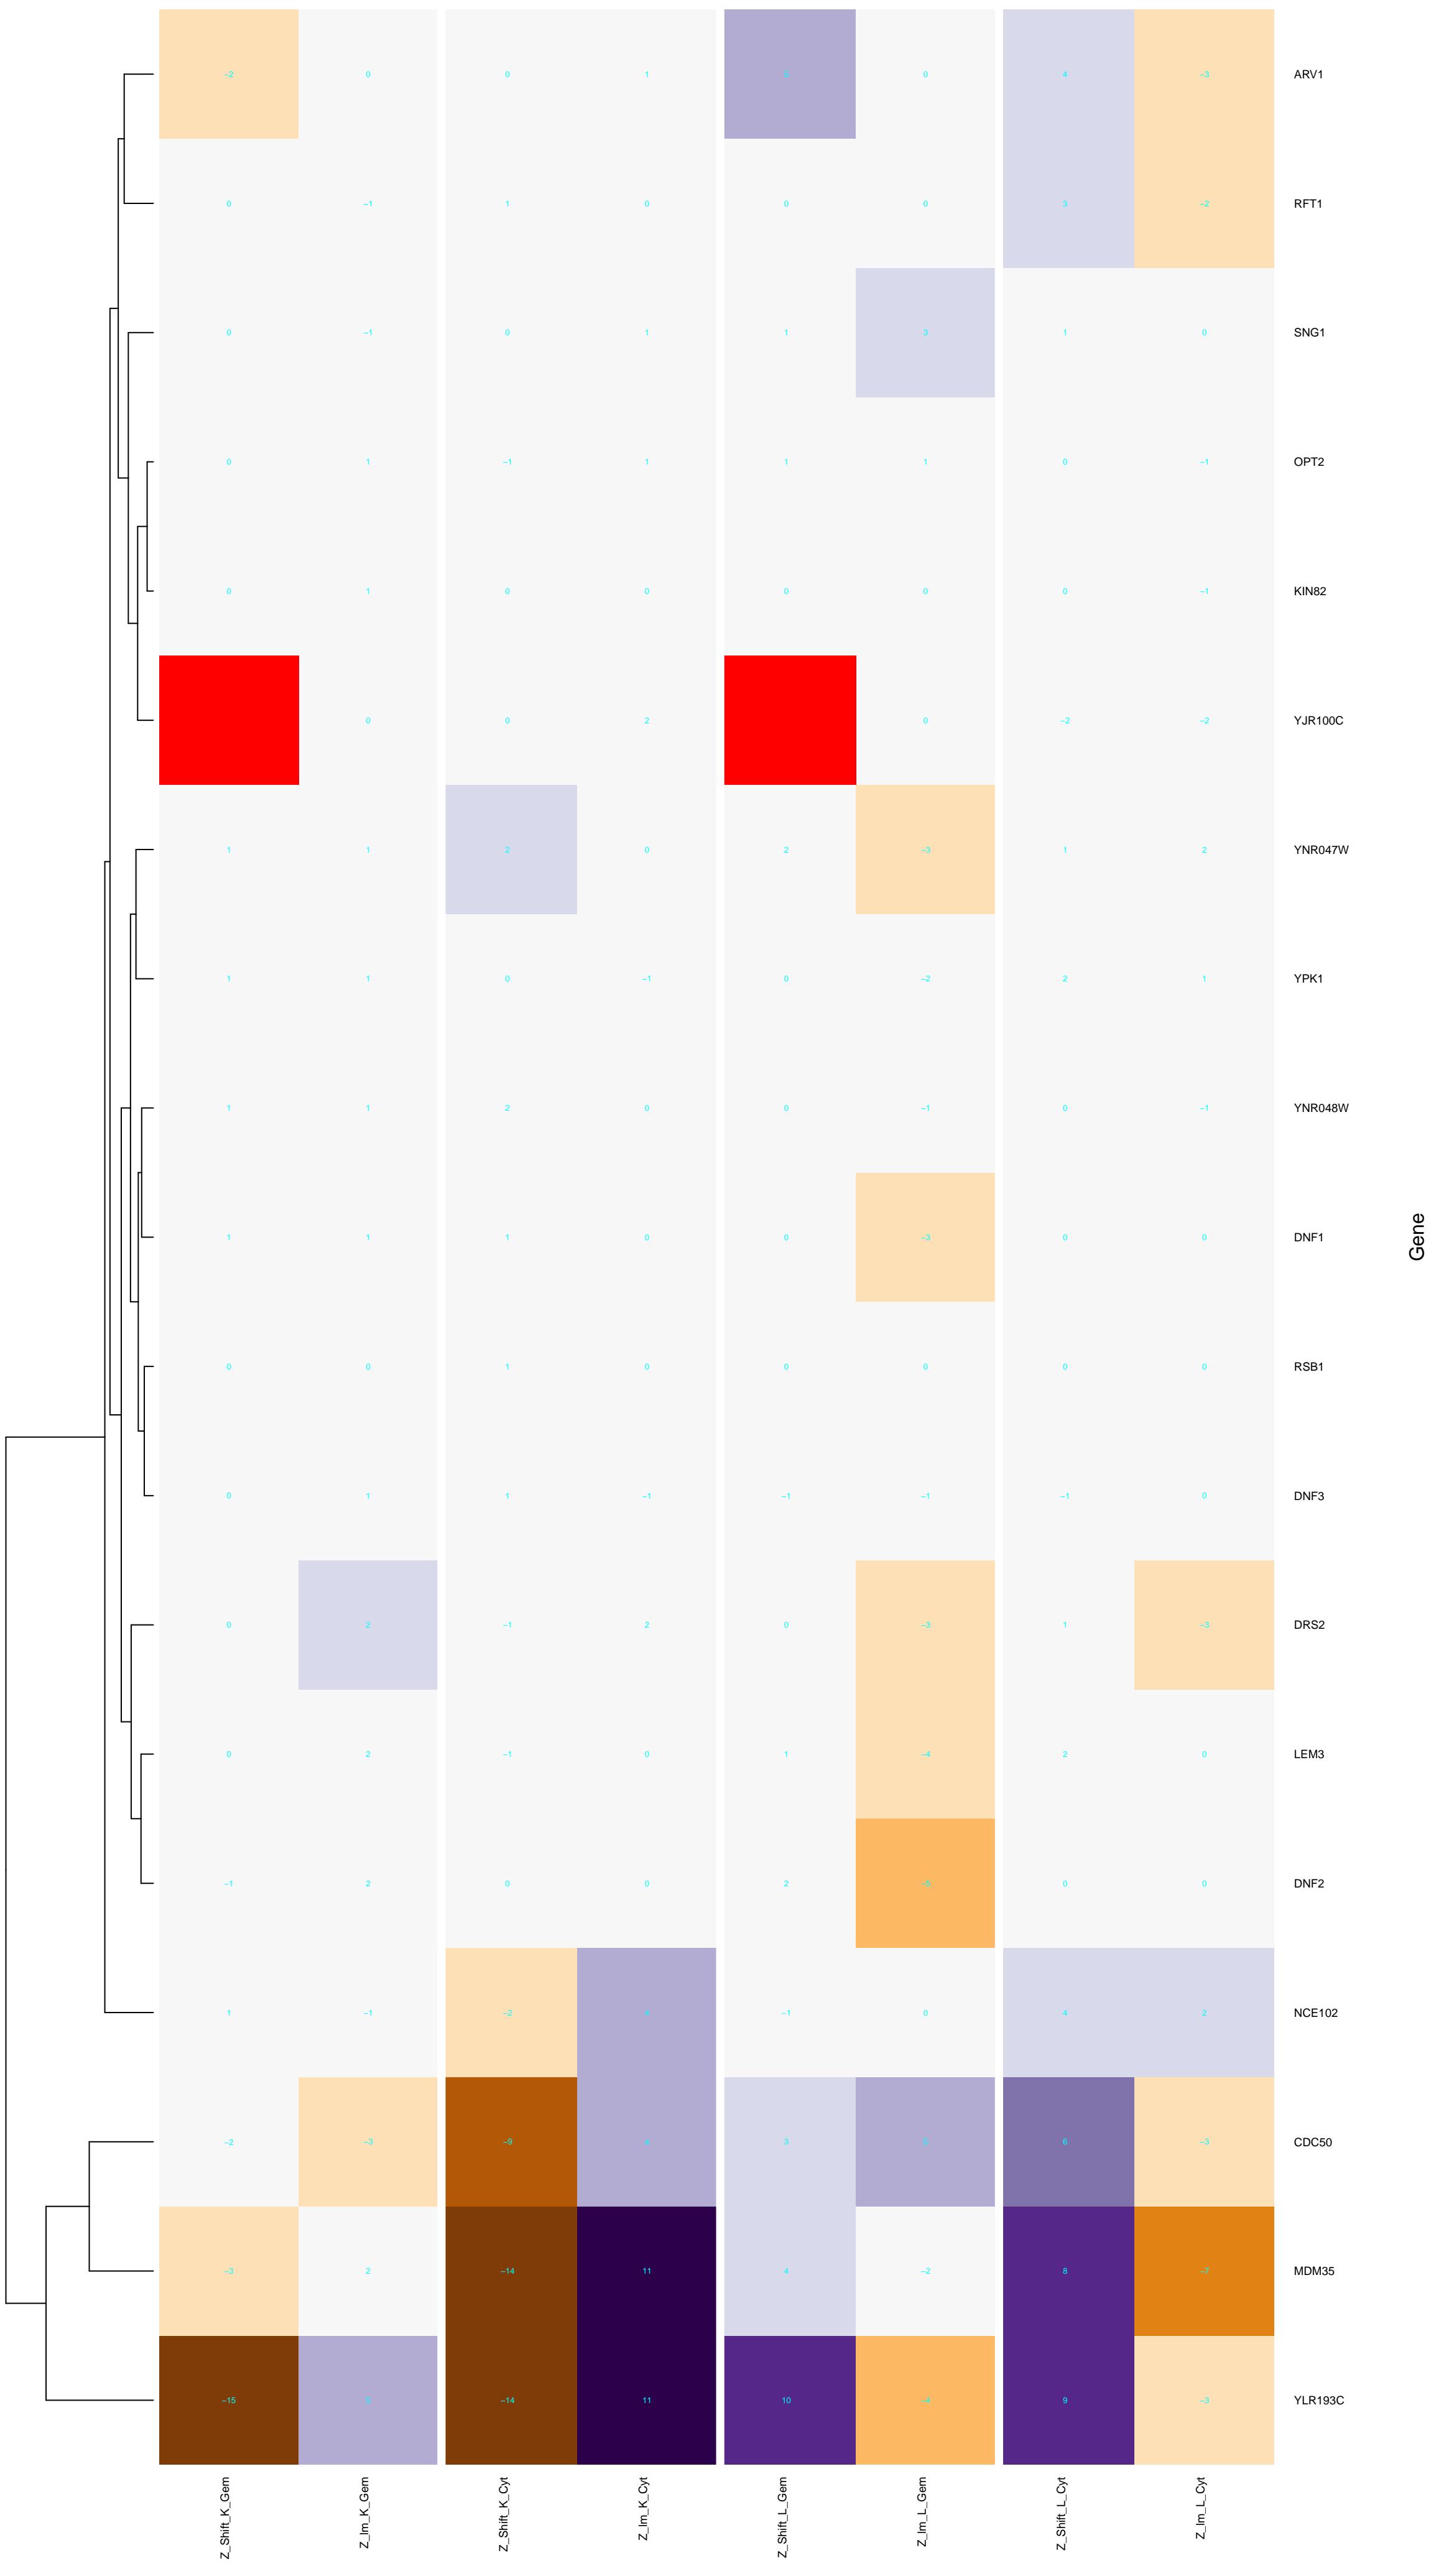

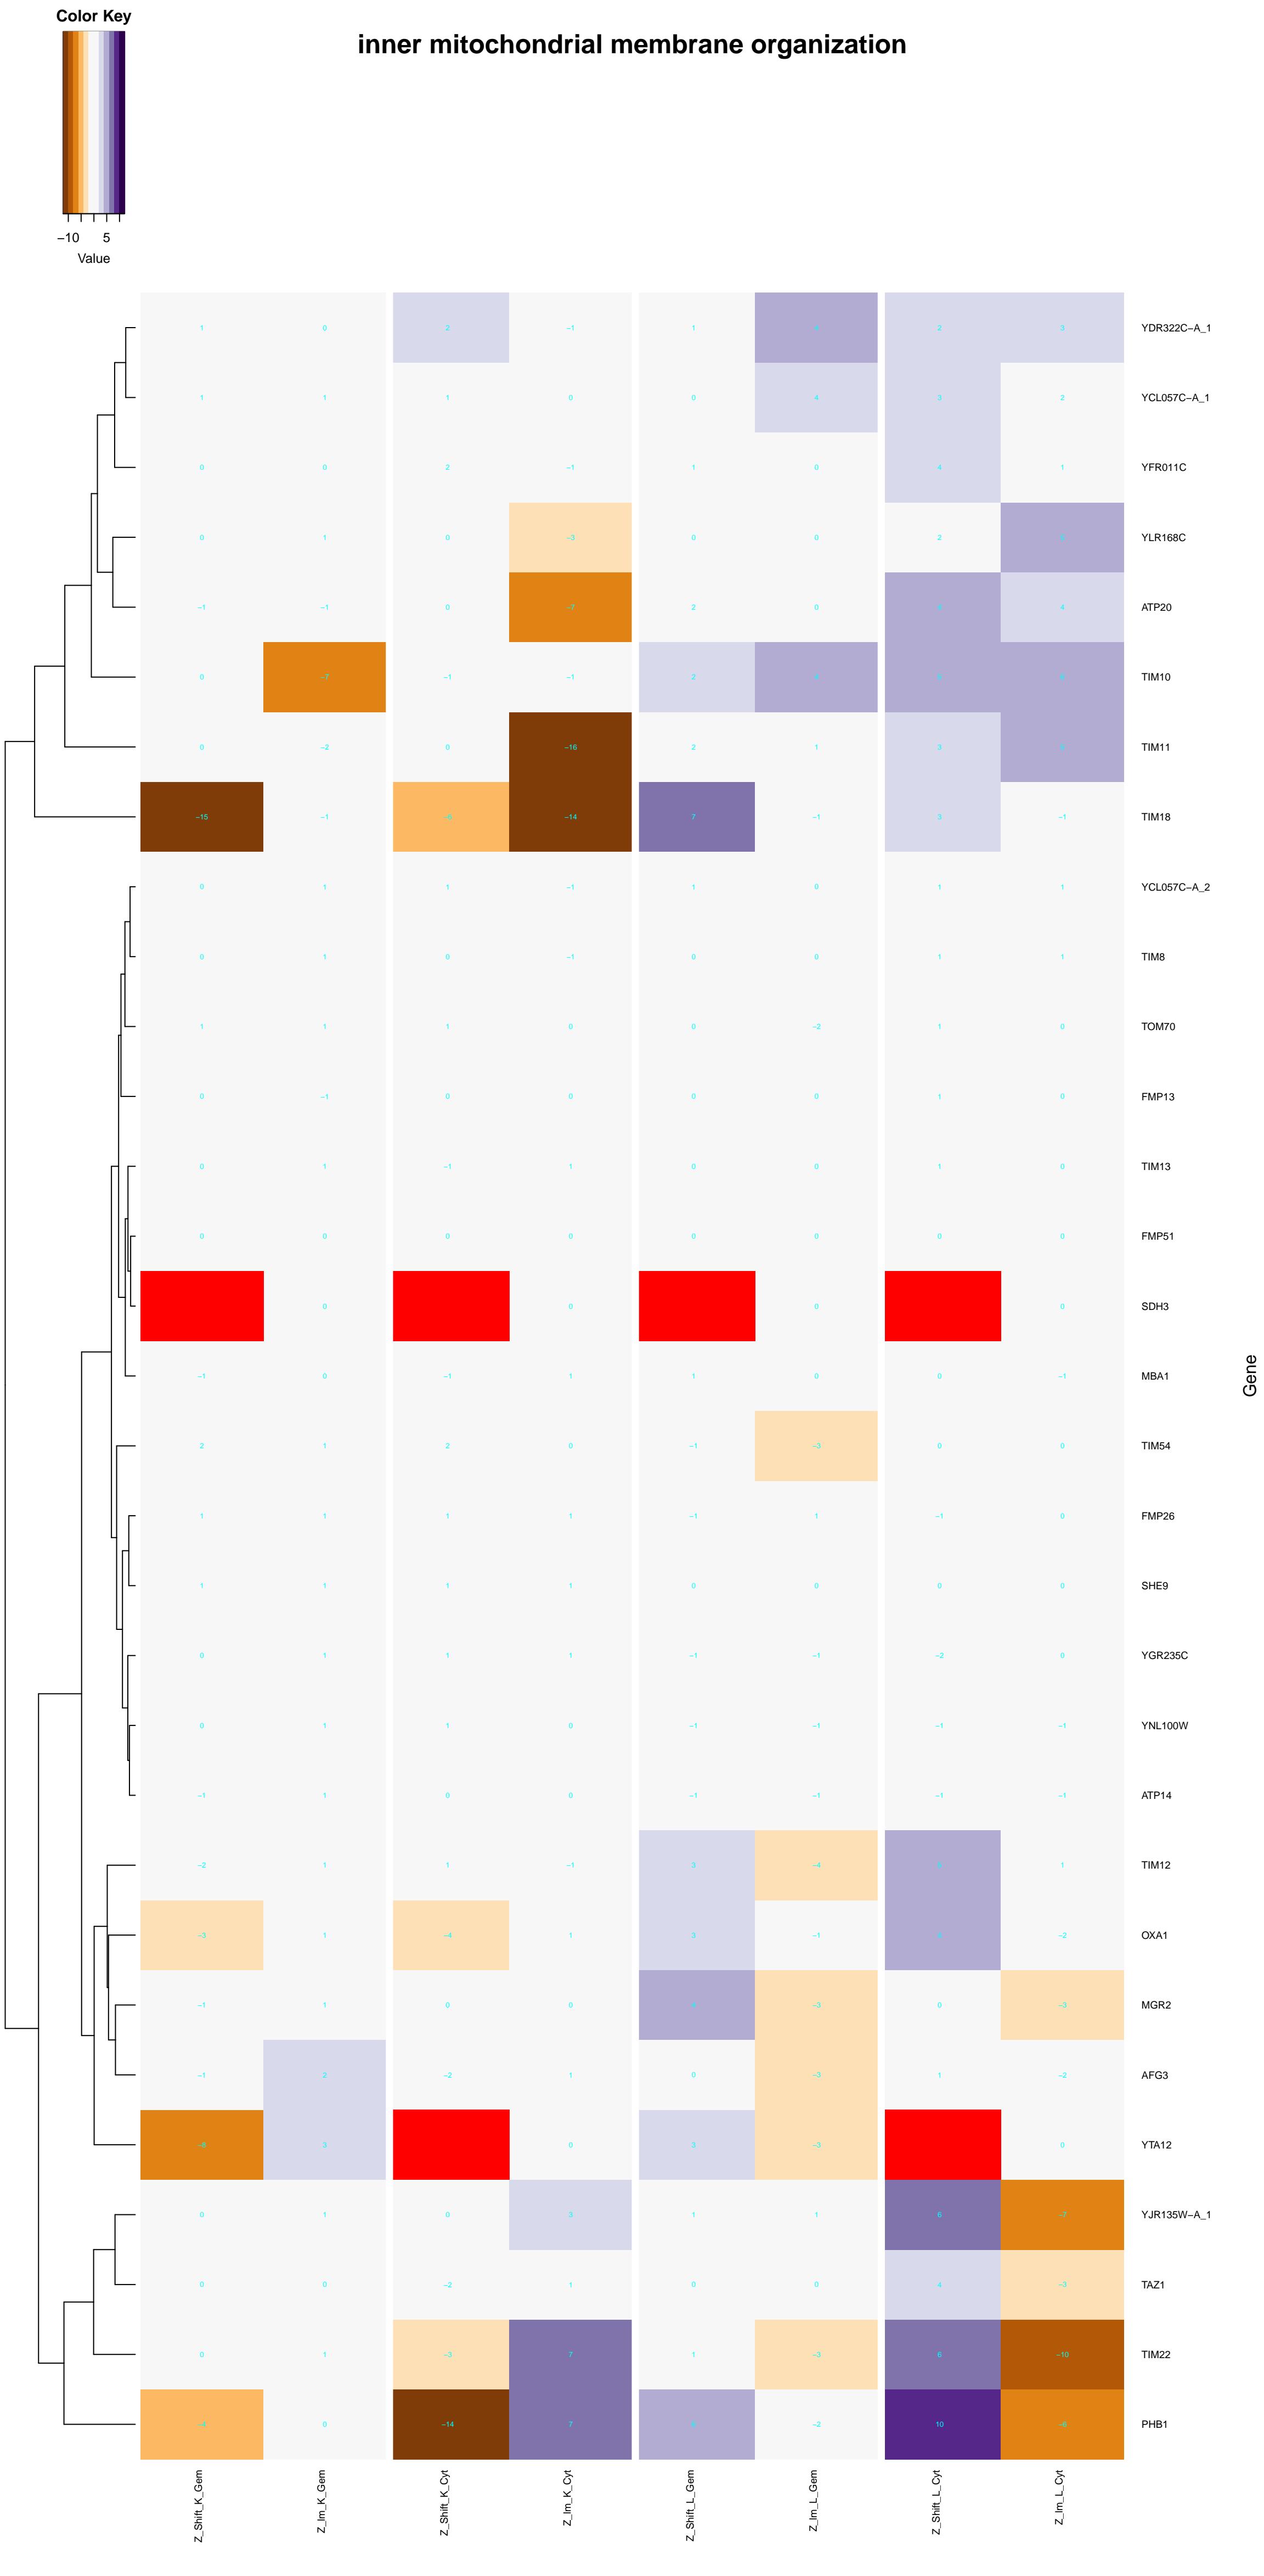

endoplasmic reticulum membrane organization

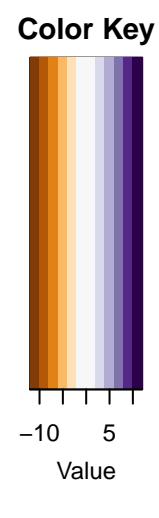

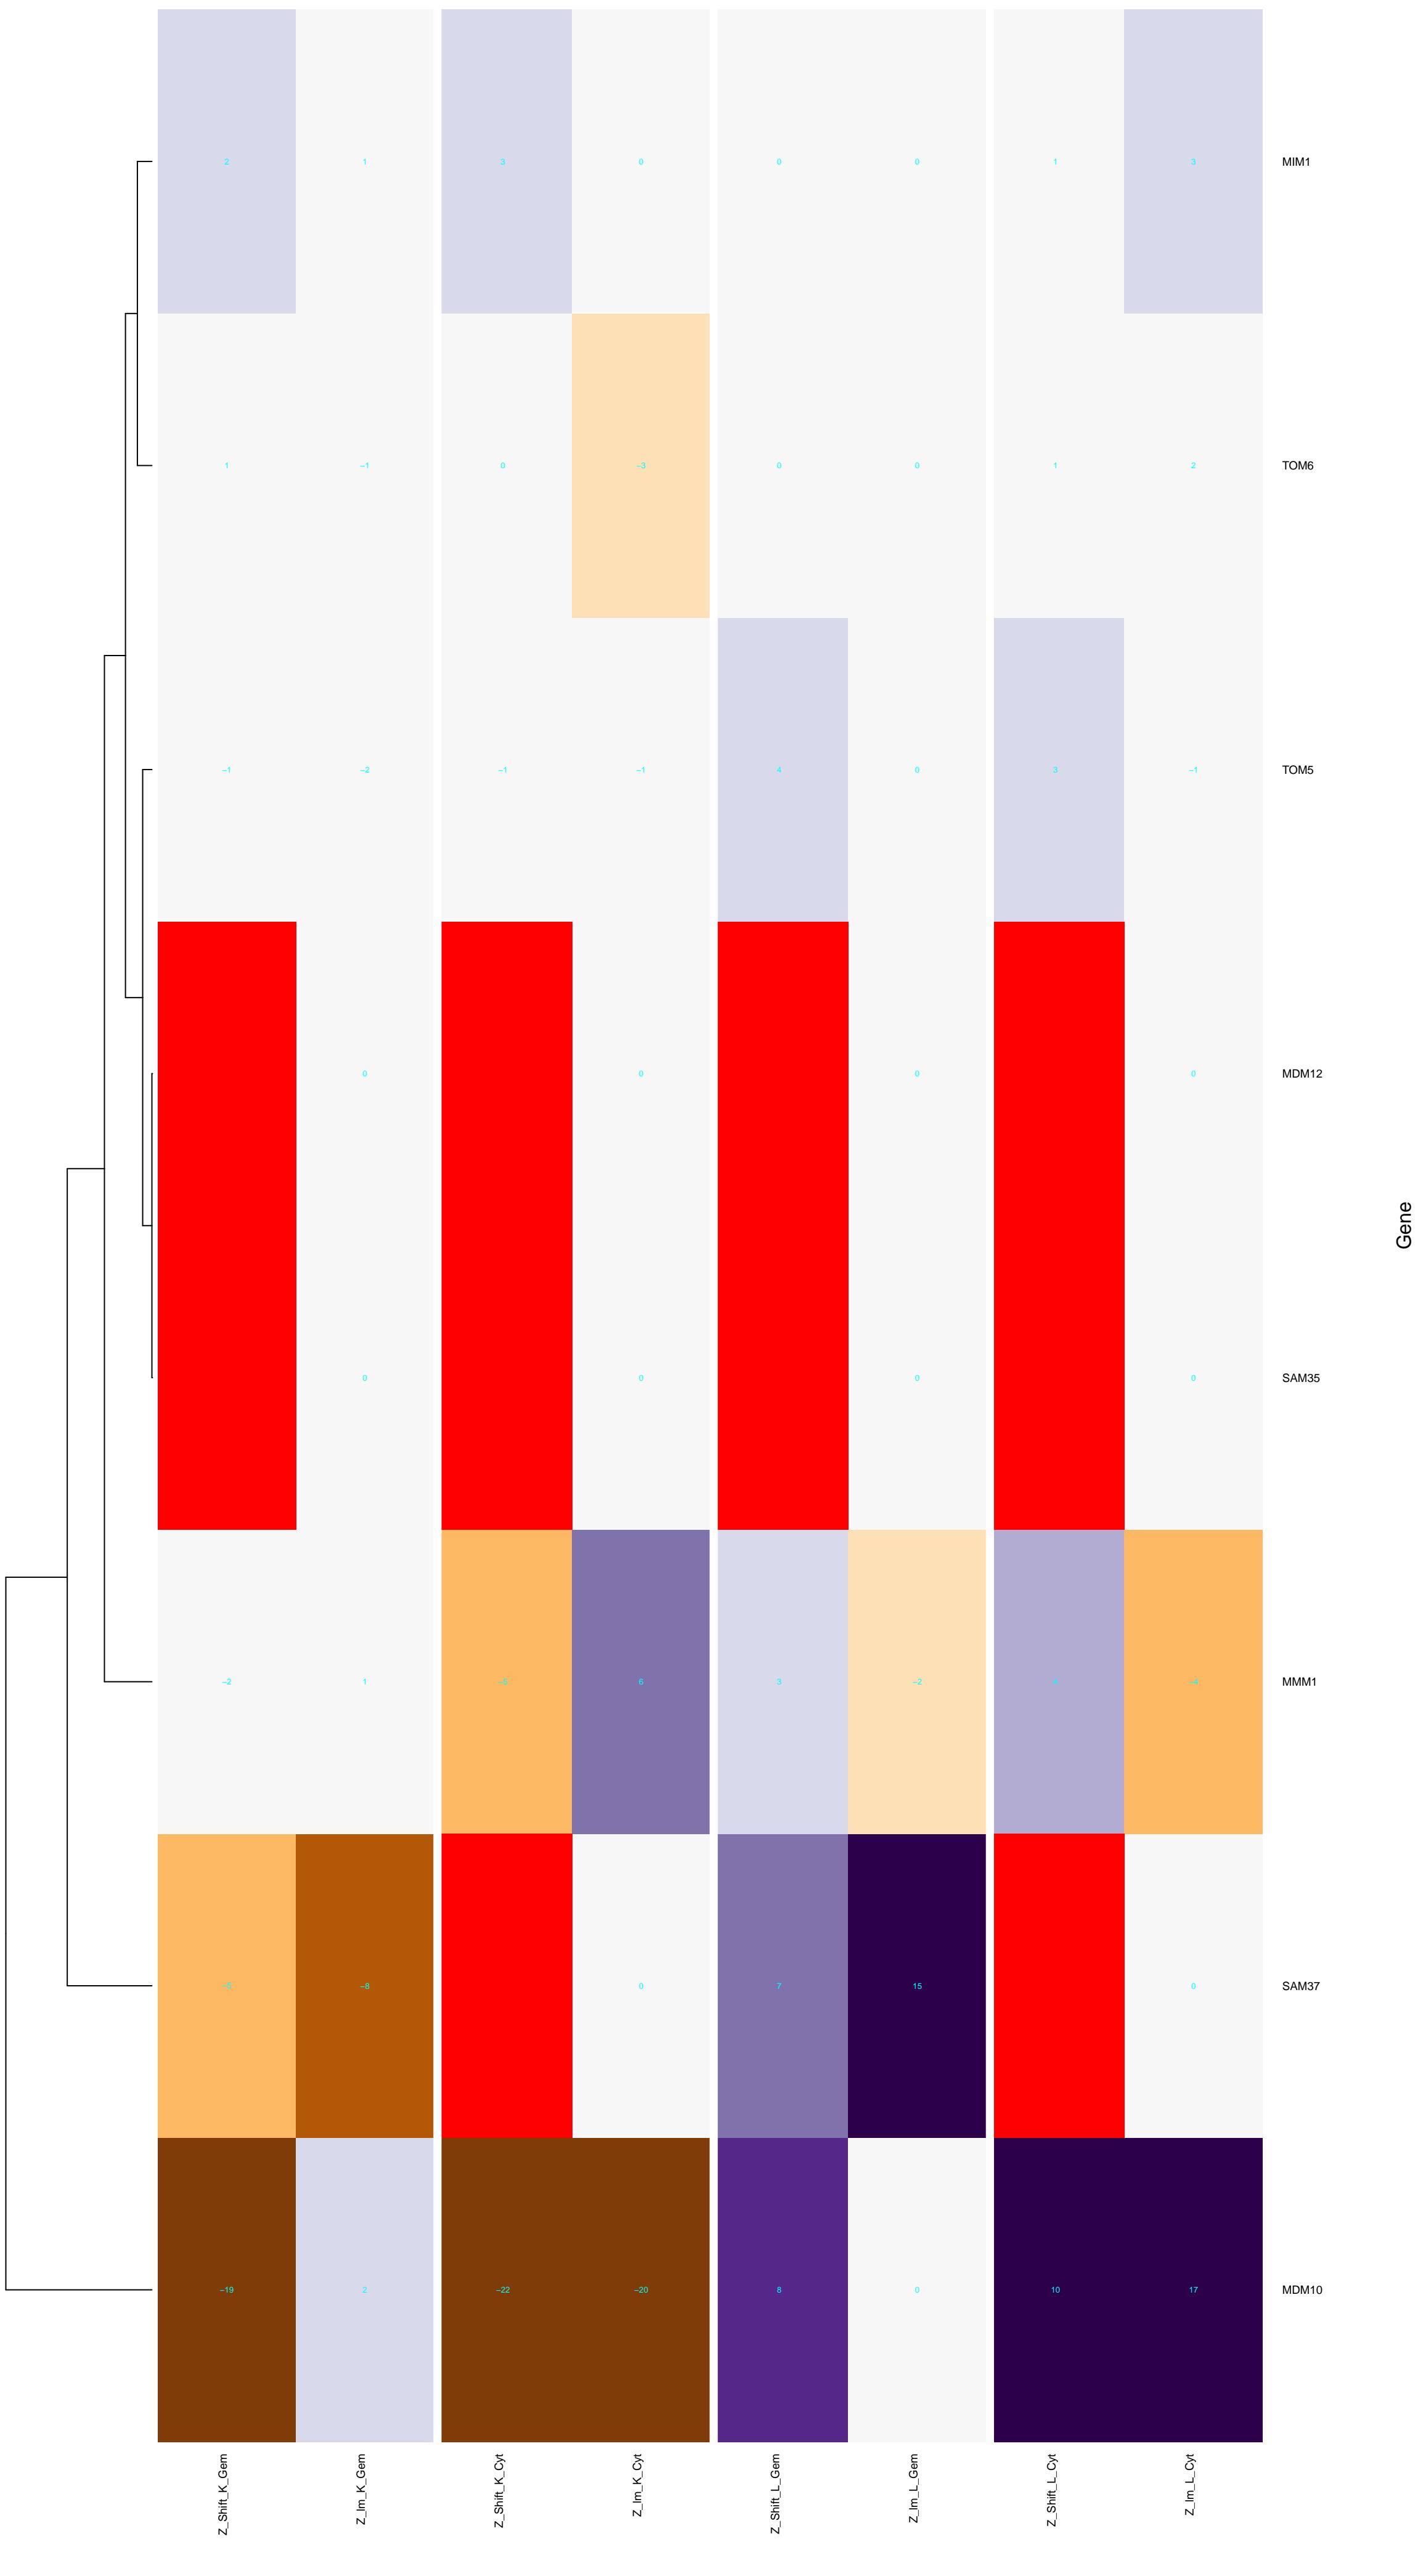

regulation of membrane lipid distribution

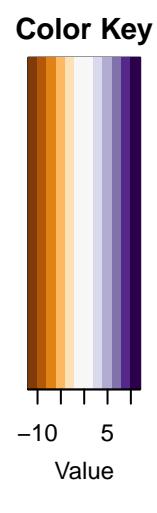

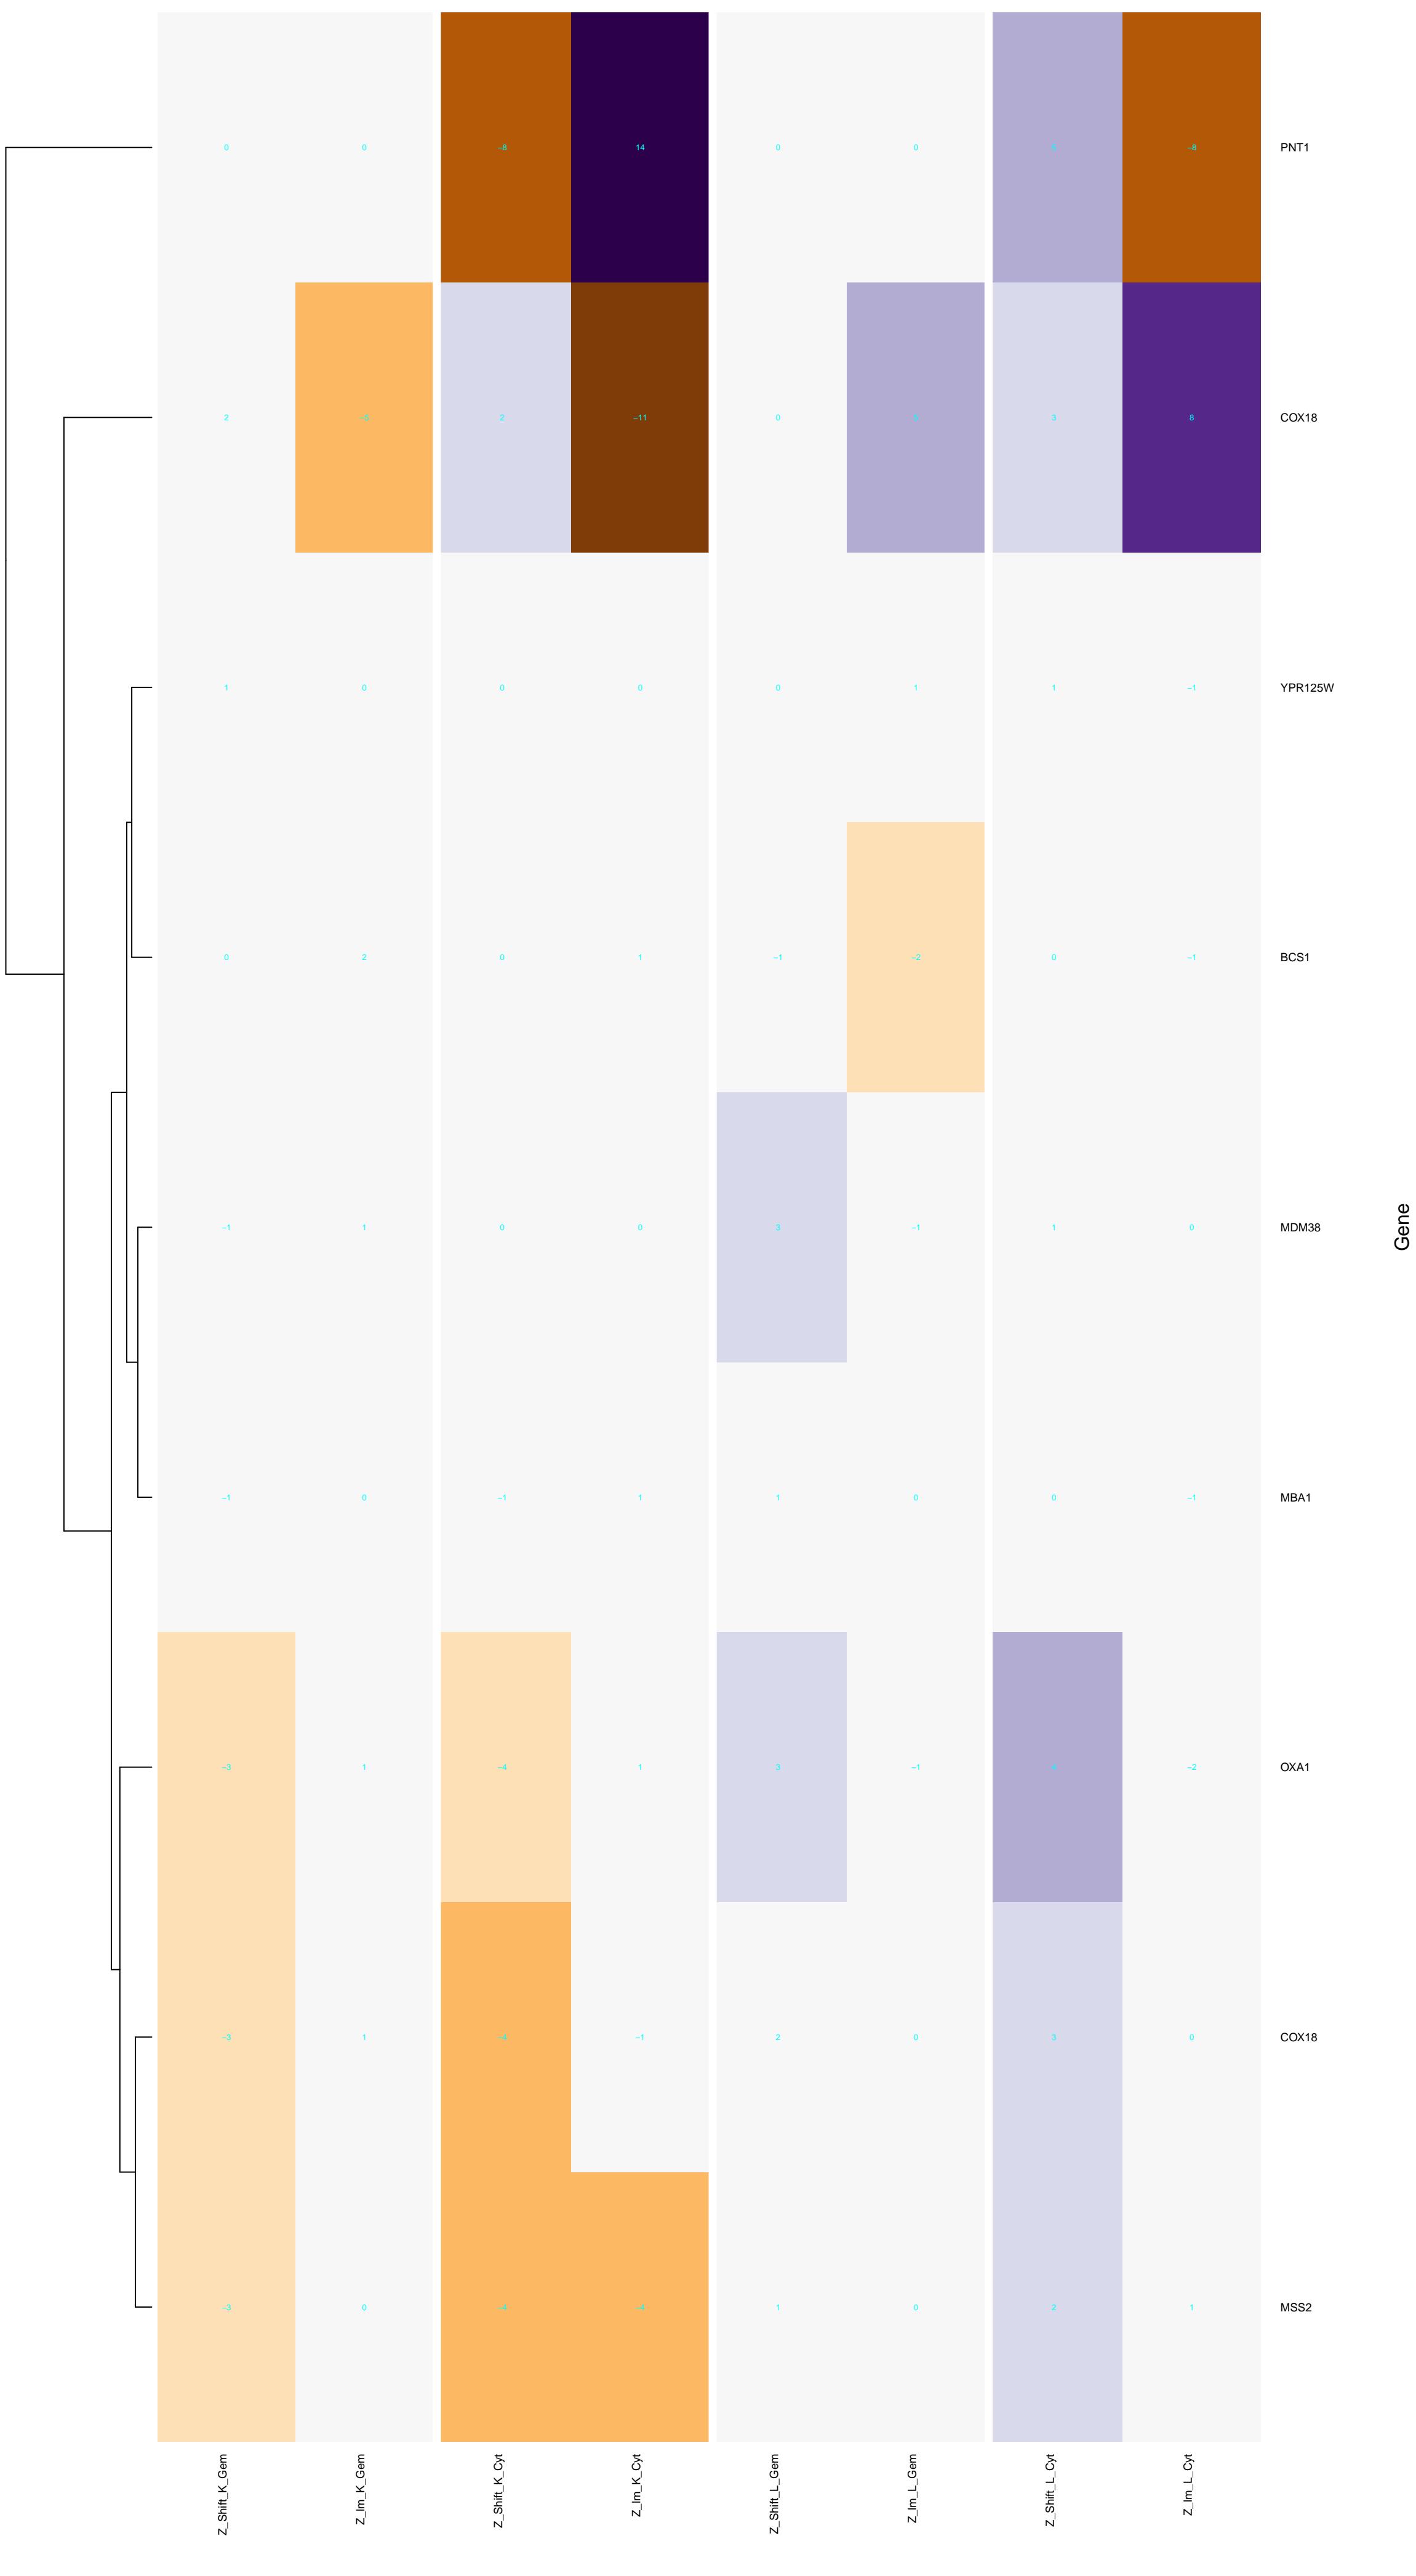

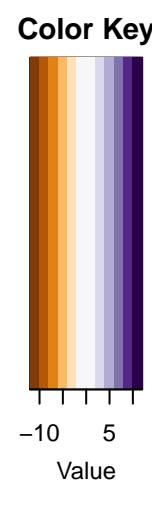

outer mitochondrial membrane organization

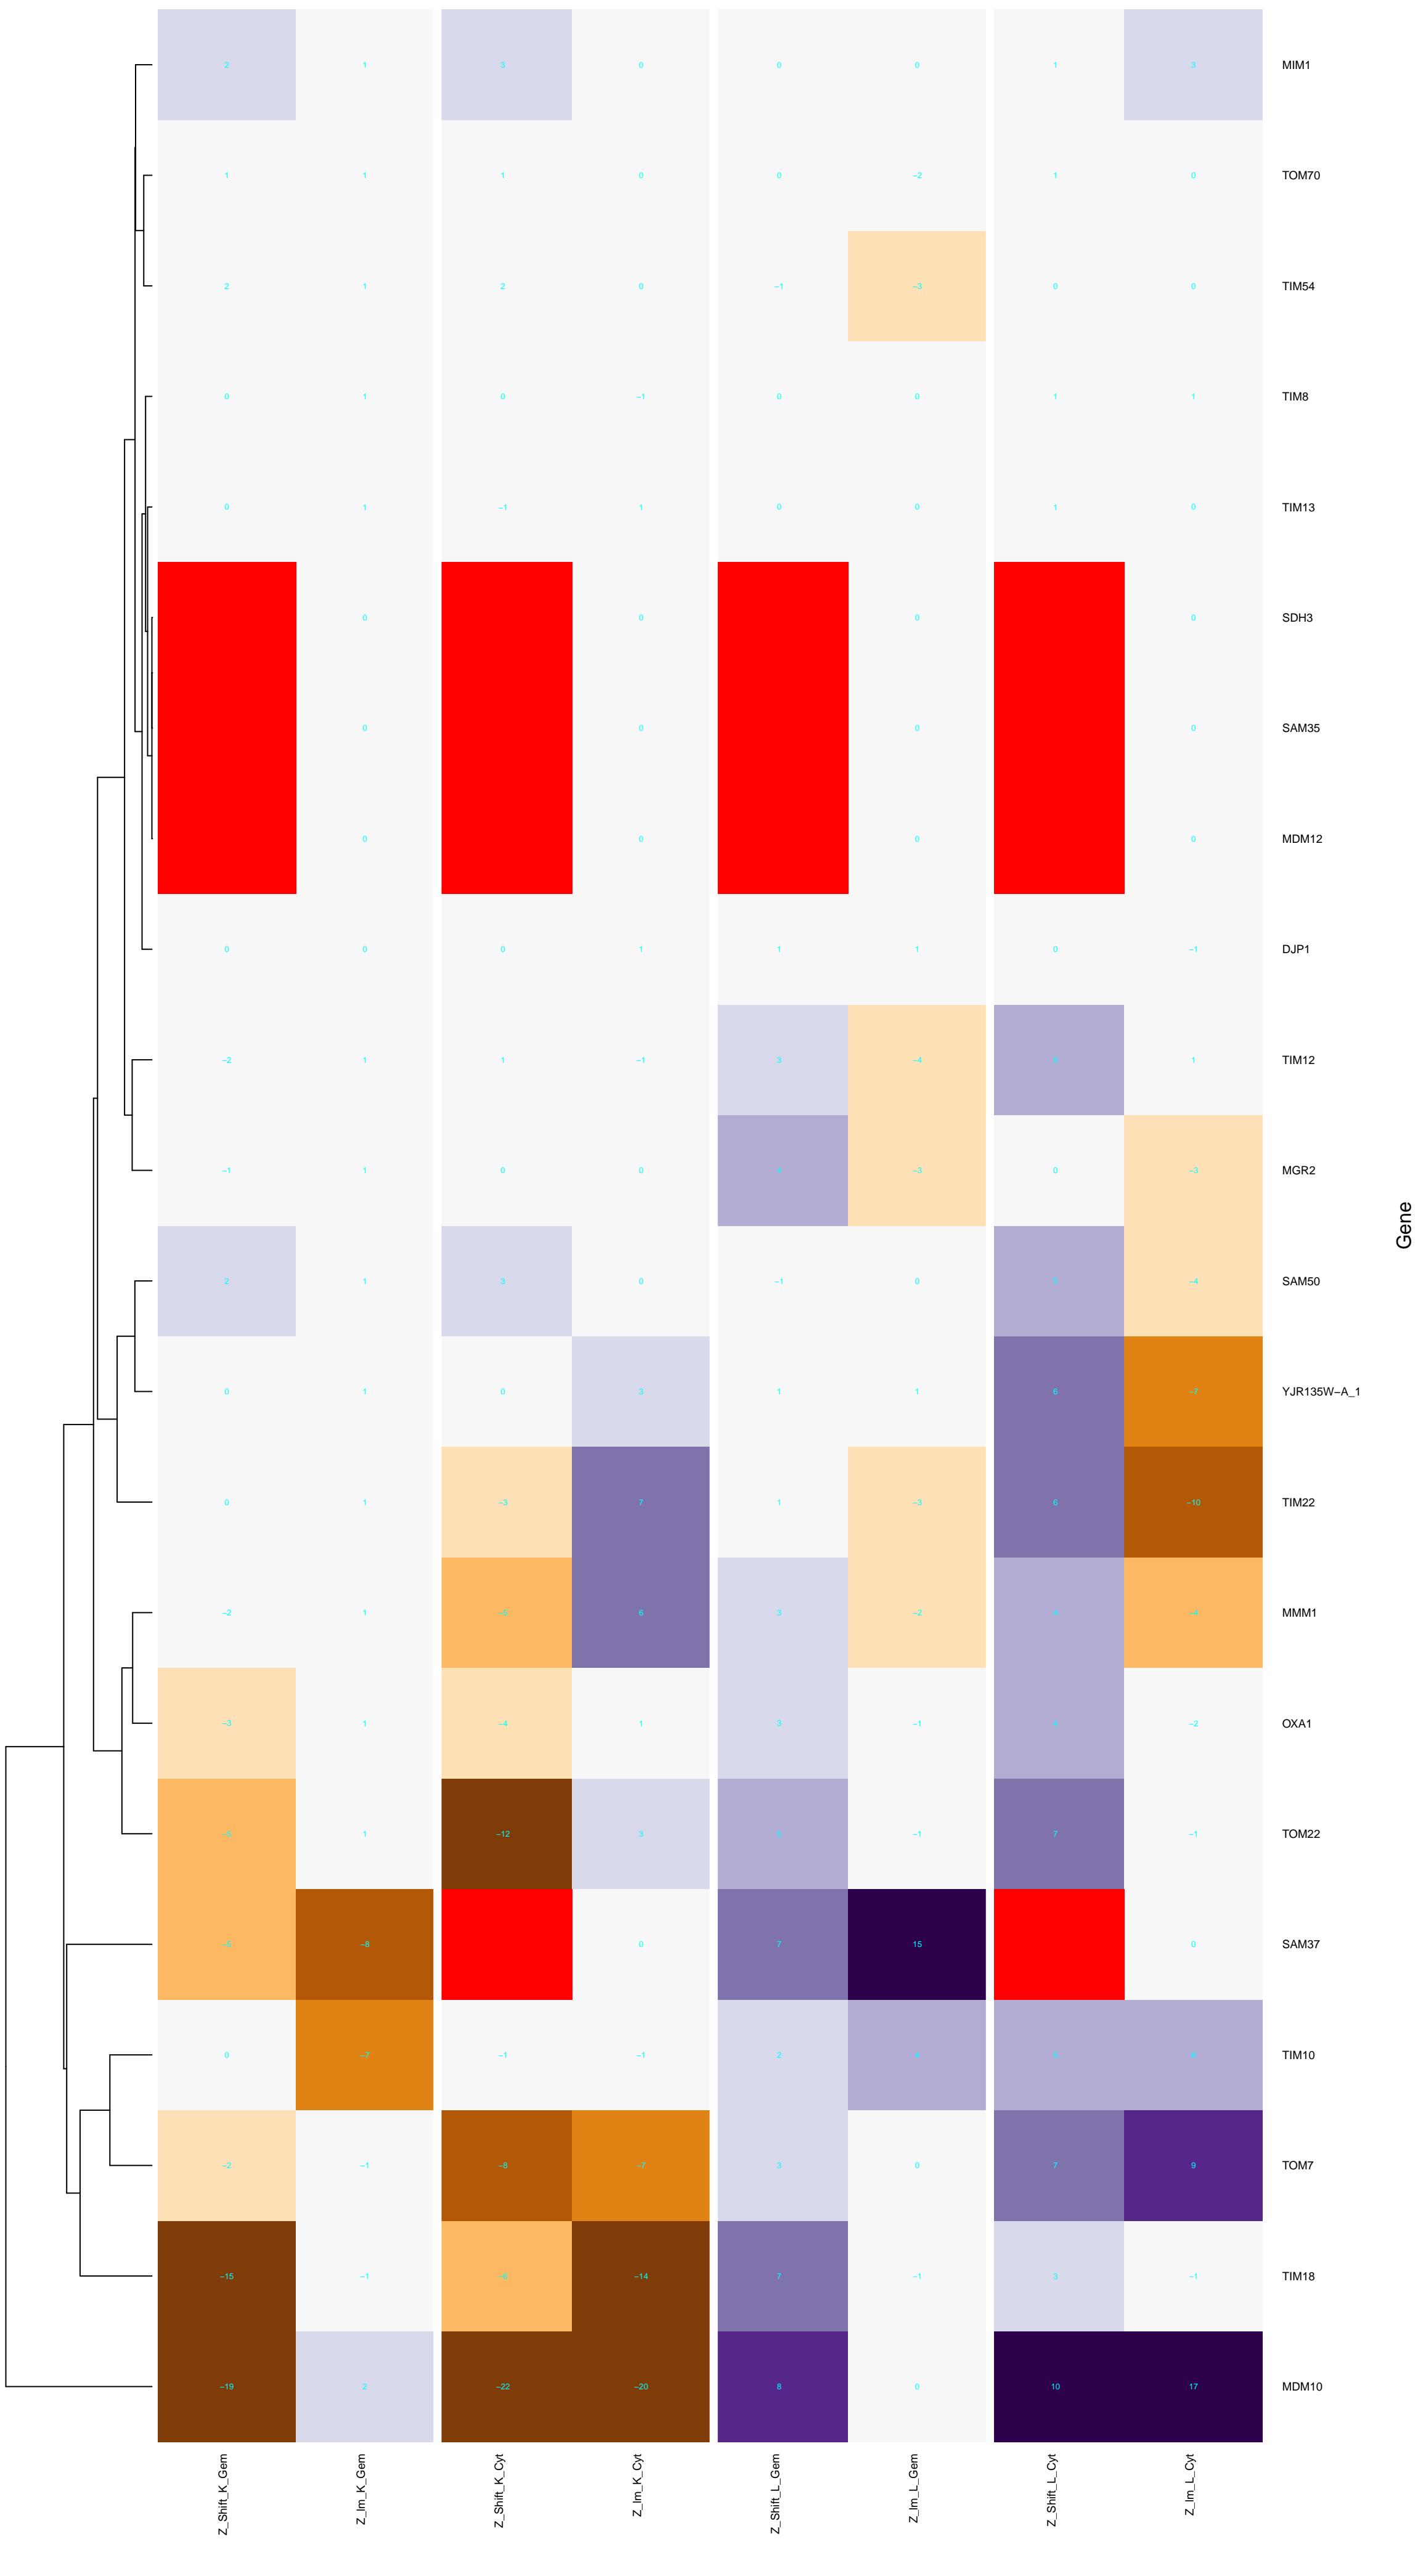

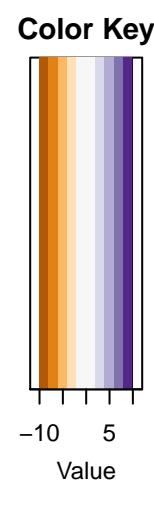

protein insertion into mitochondrial membrane

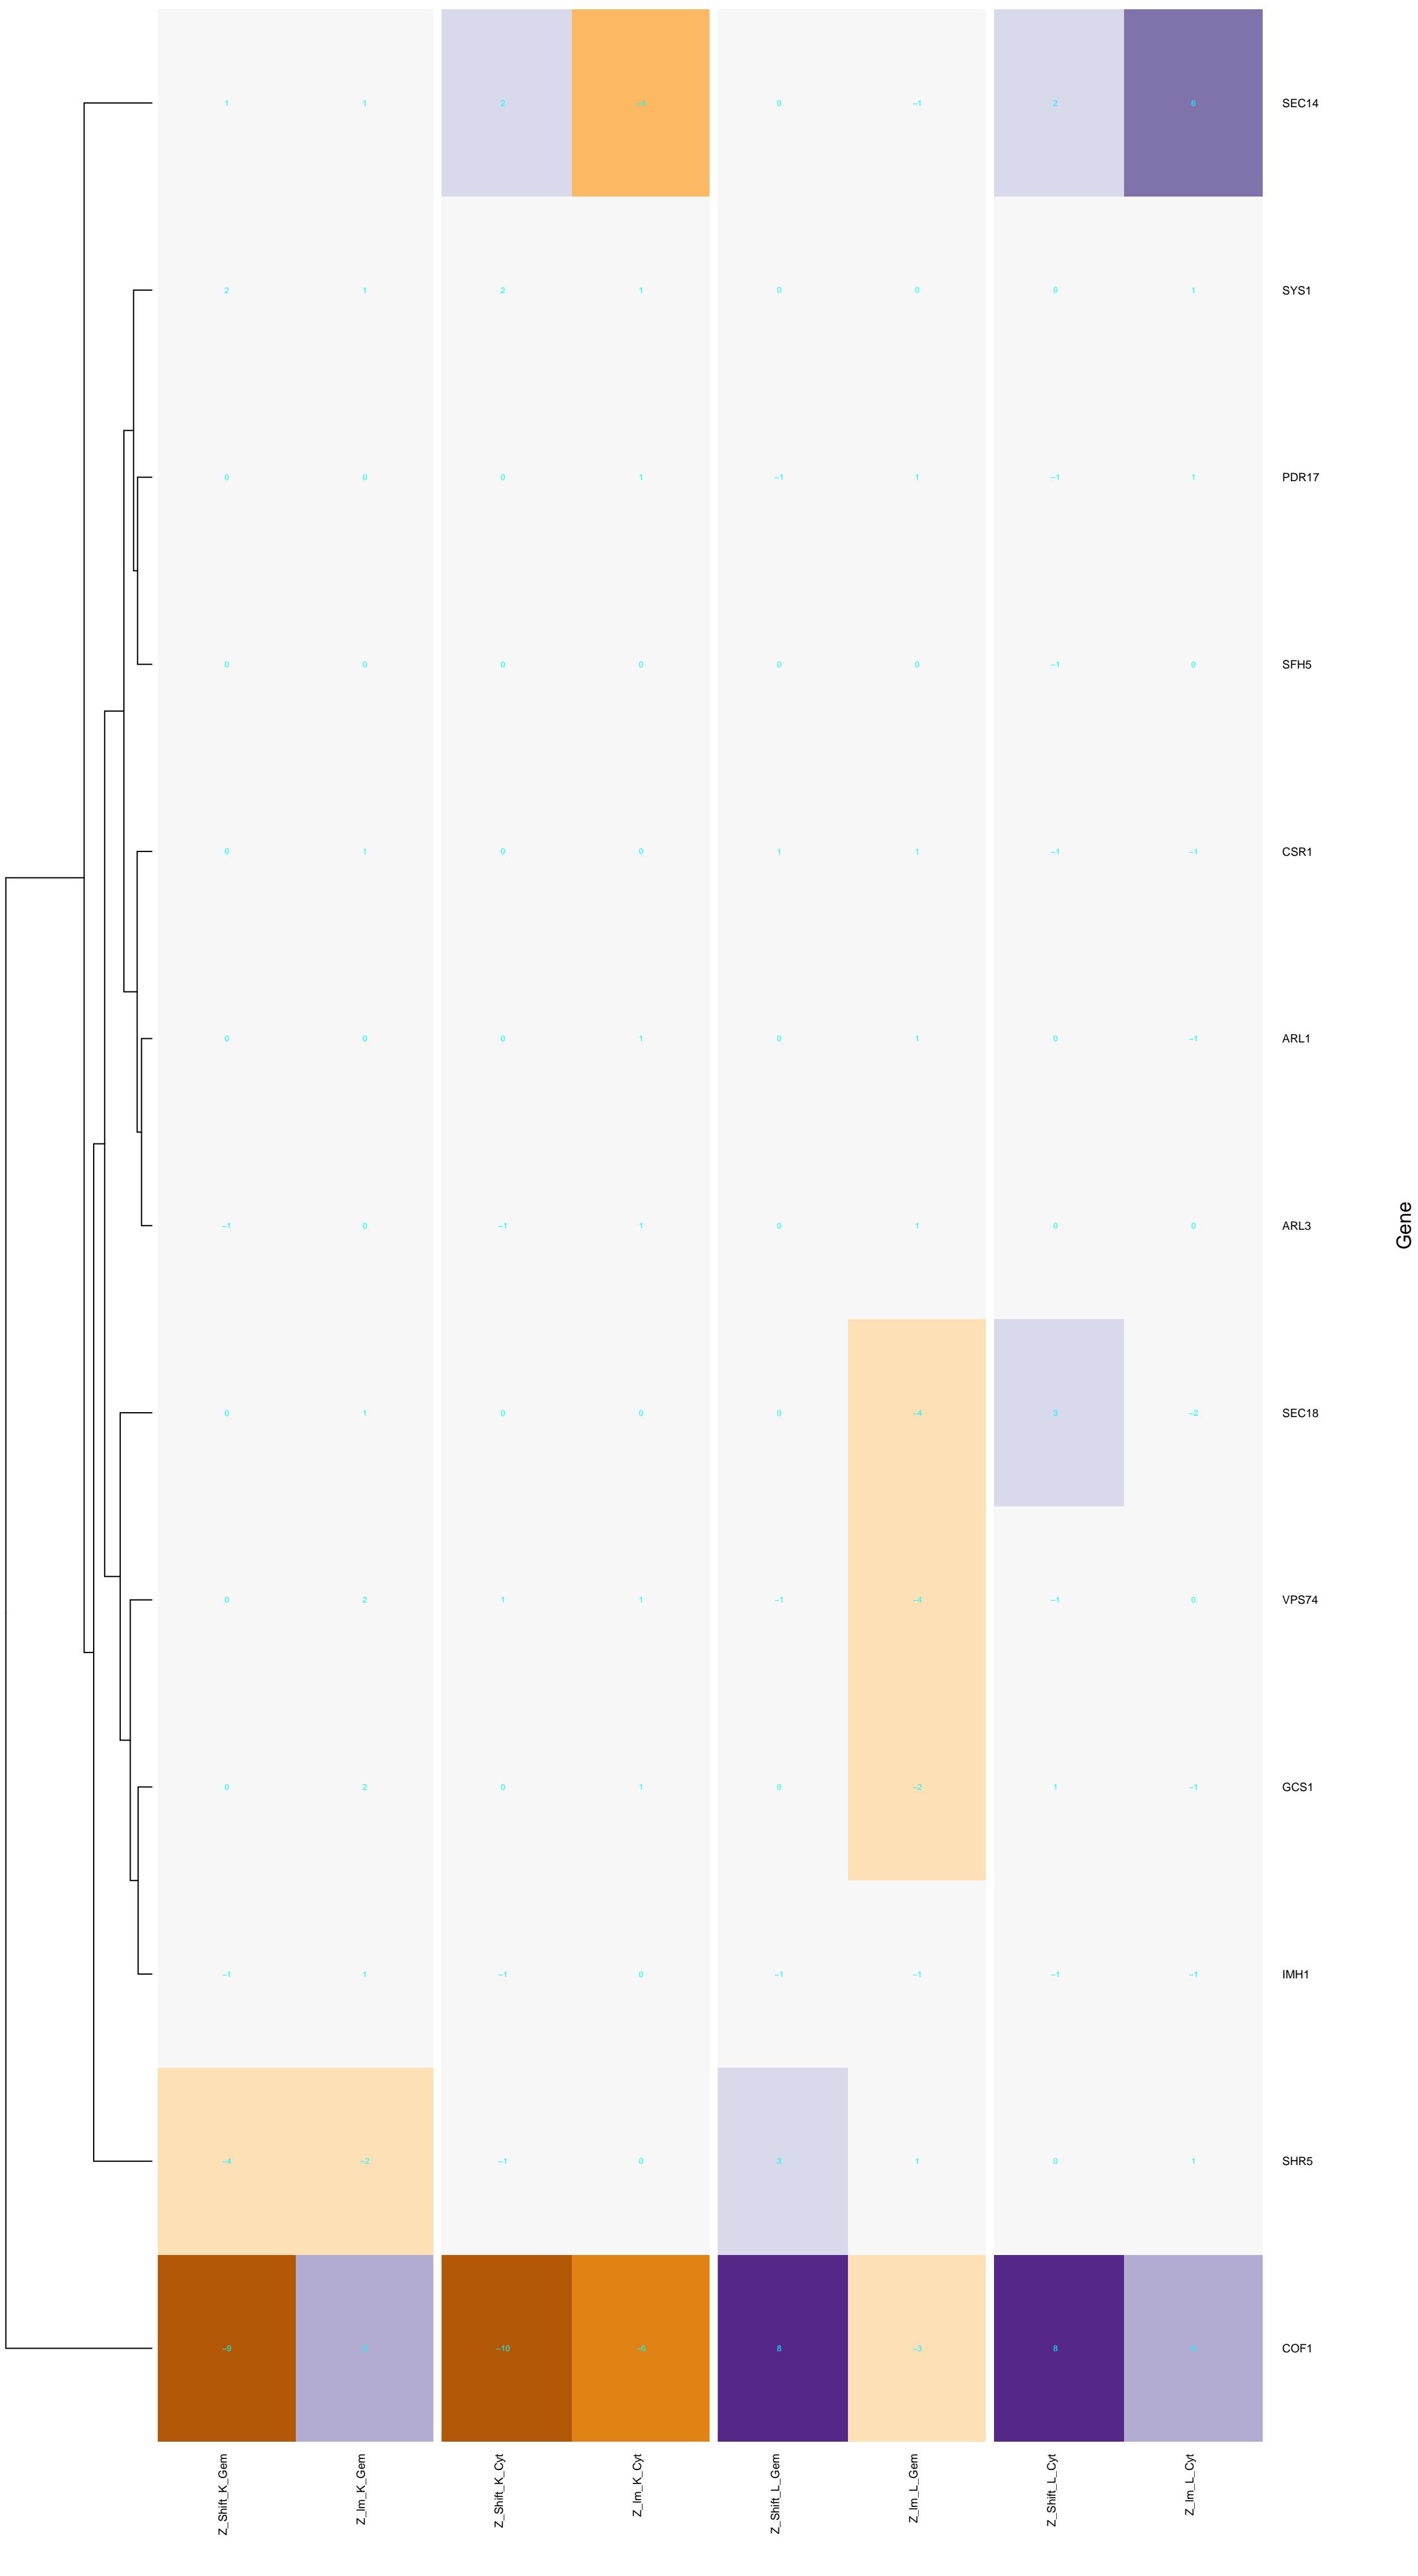

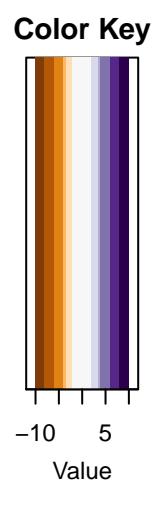

establishment of protein localization to mitochondrial membrane

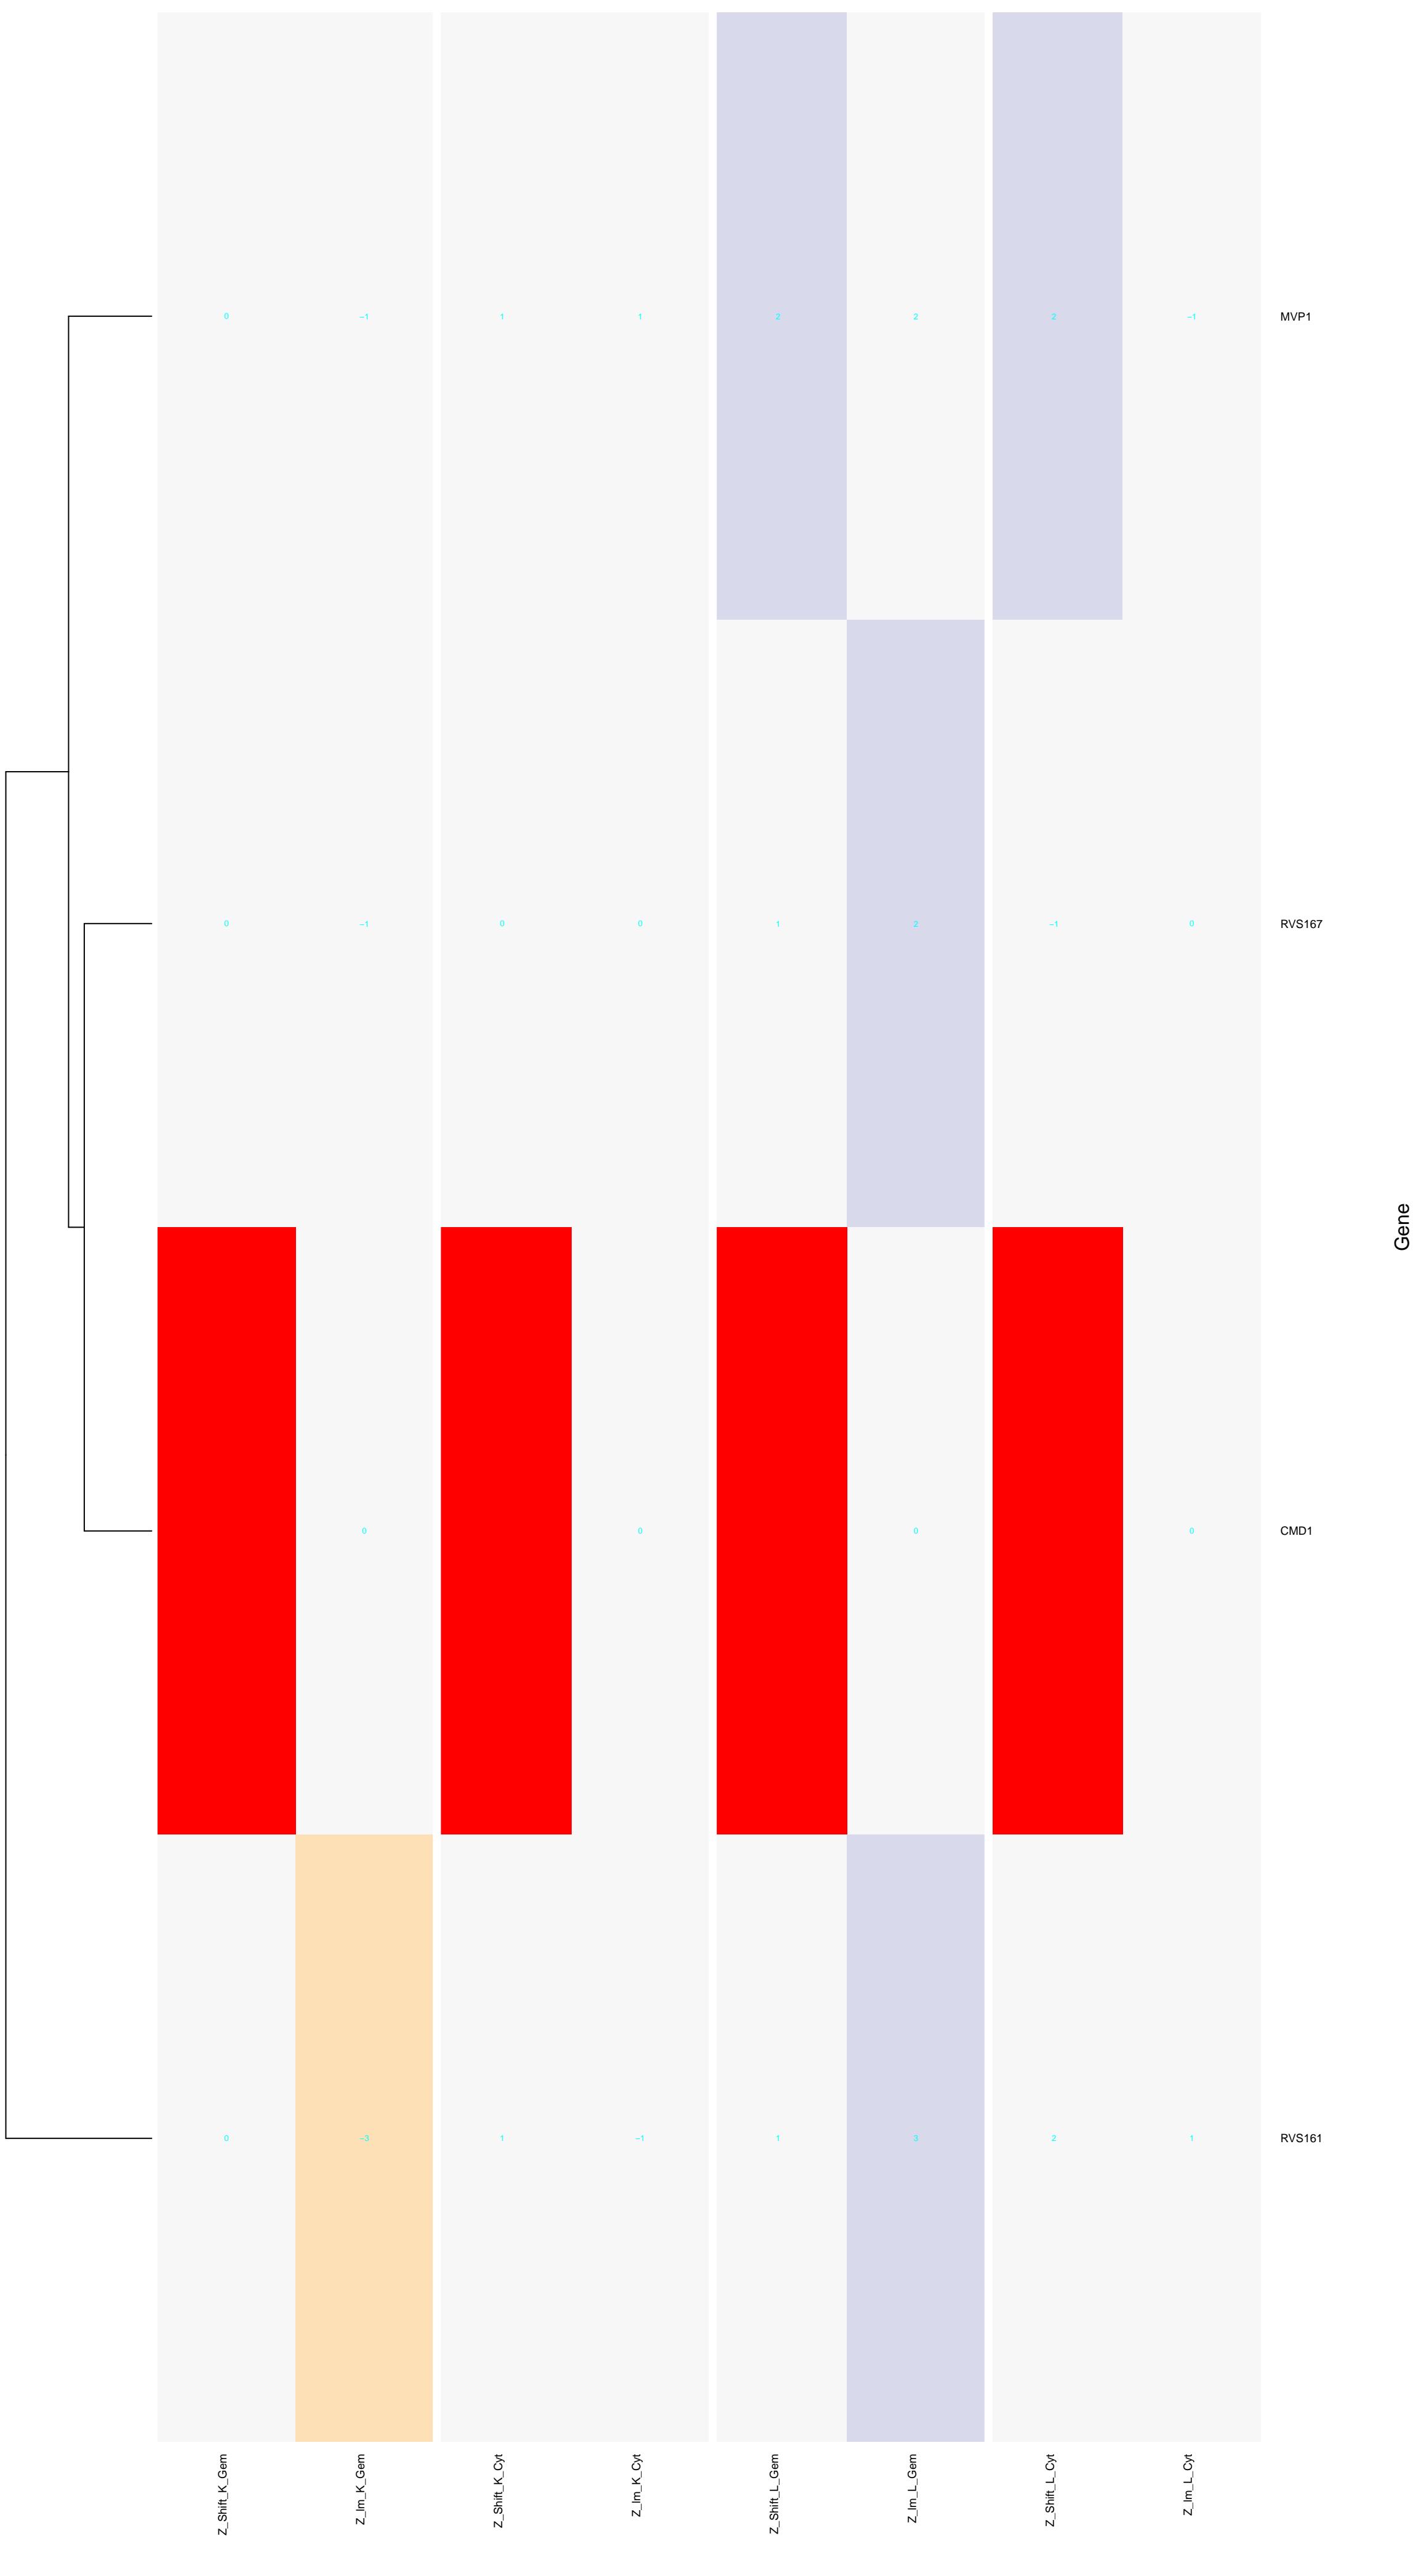

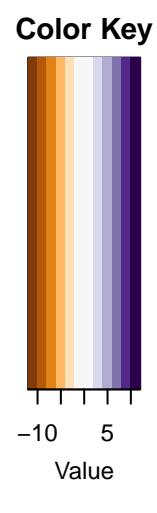

protein localization to plasma membrane

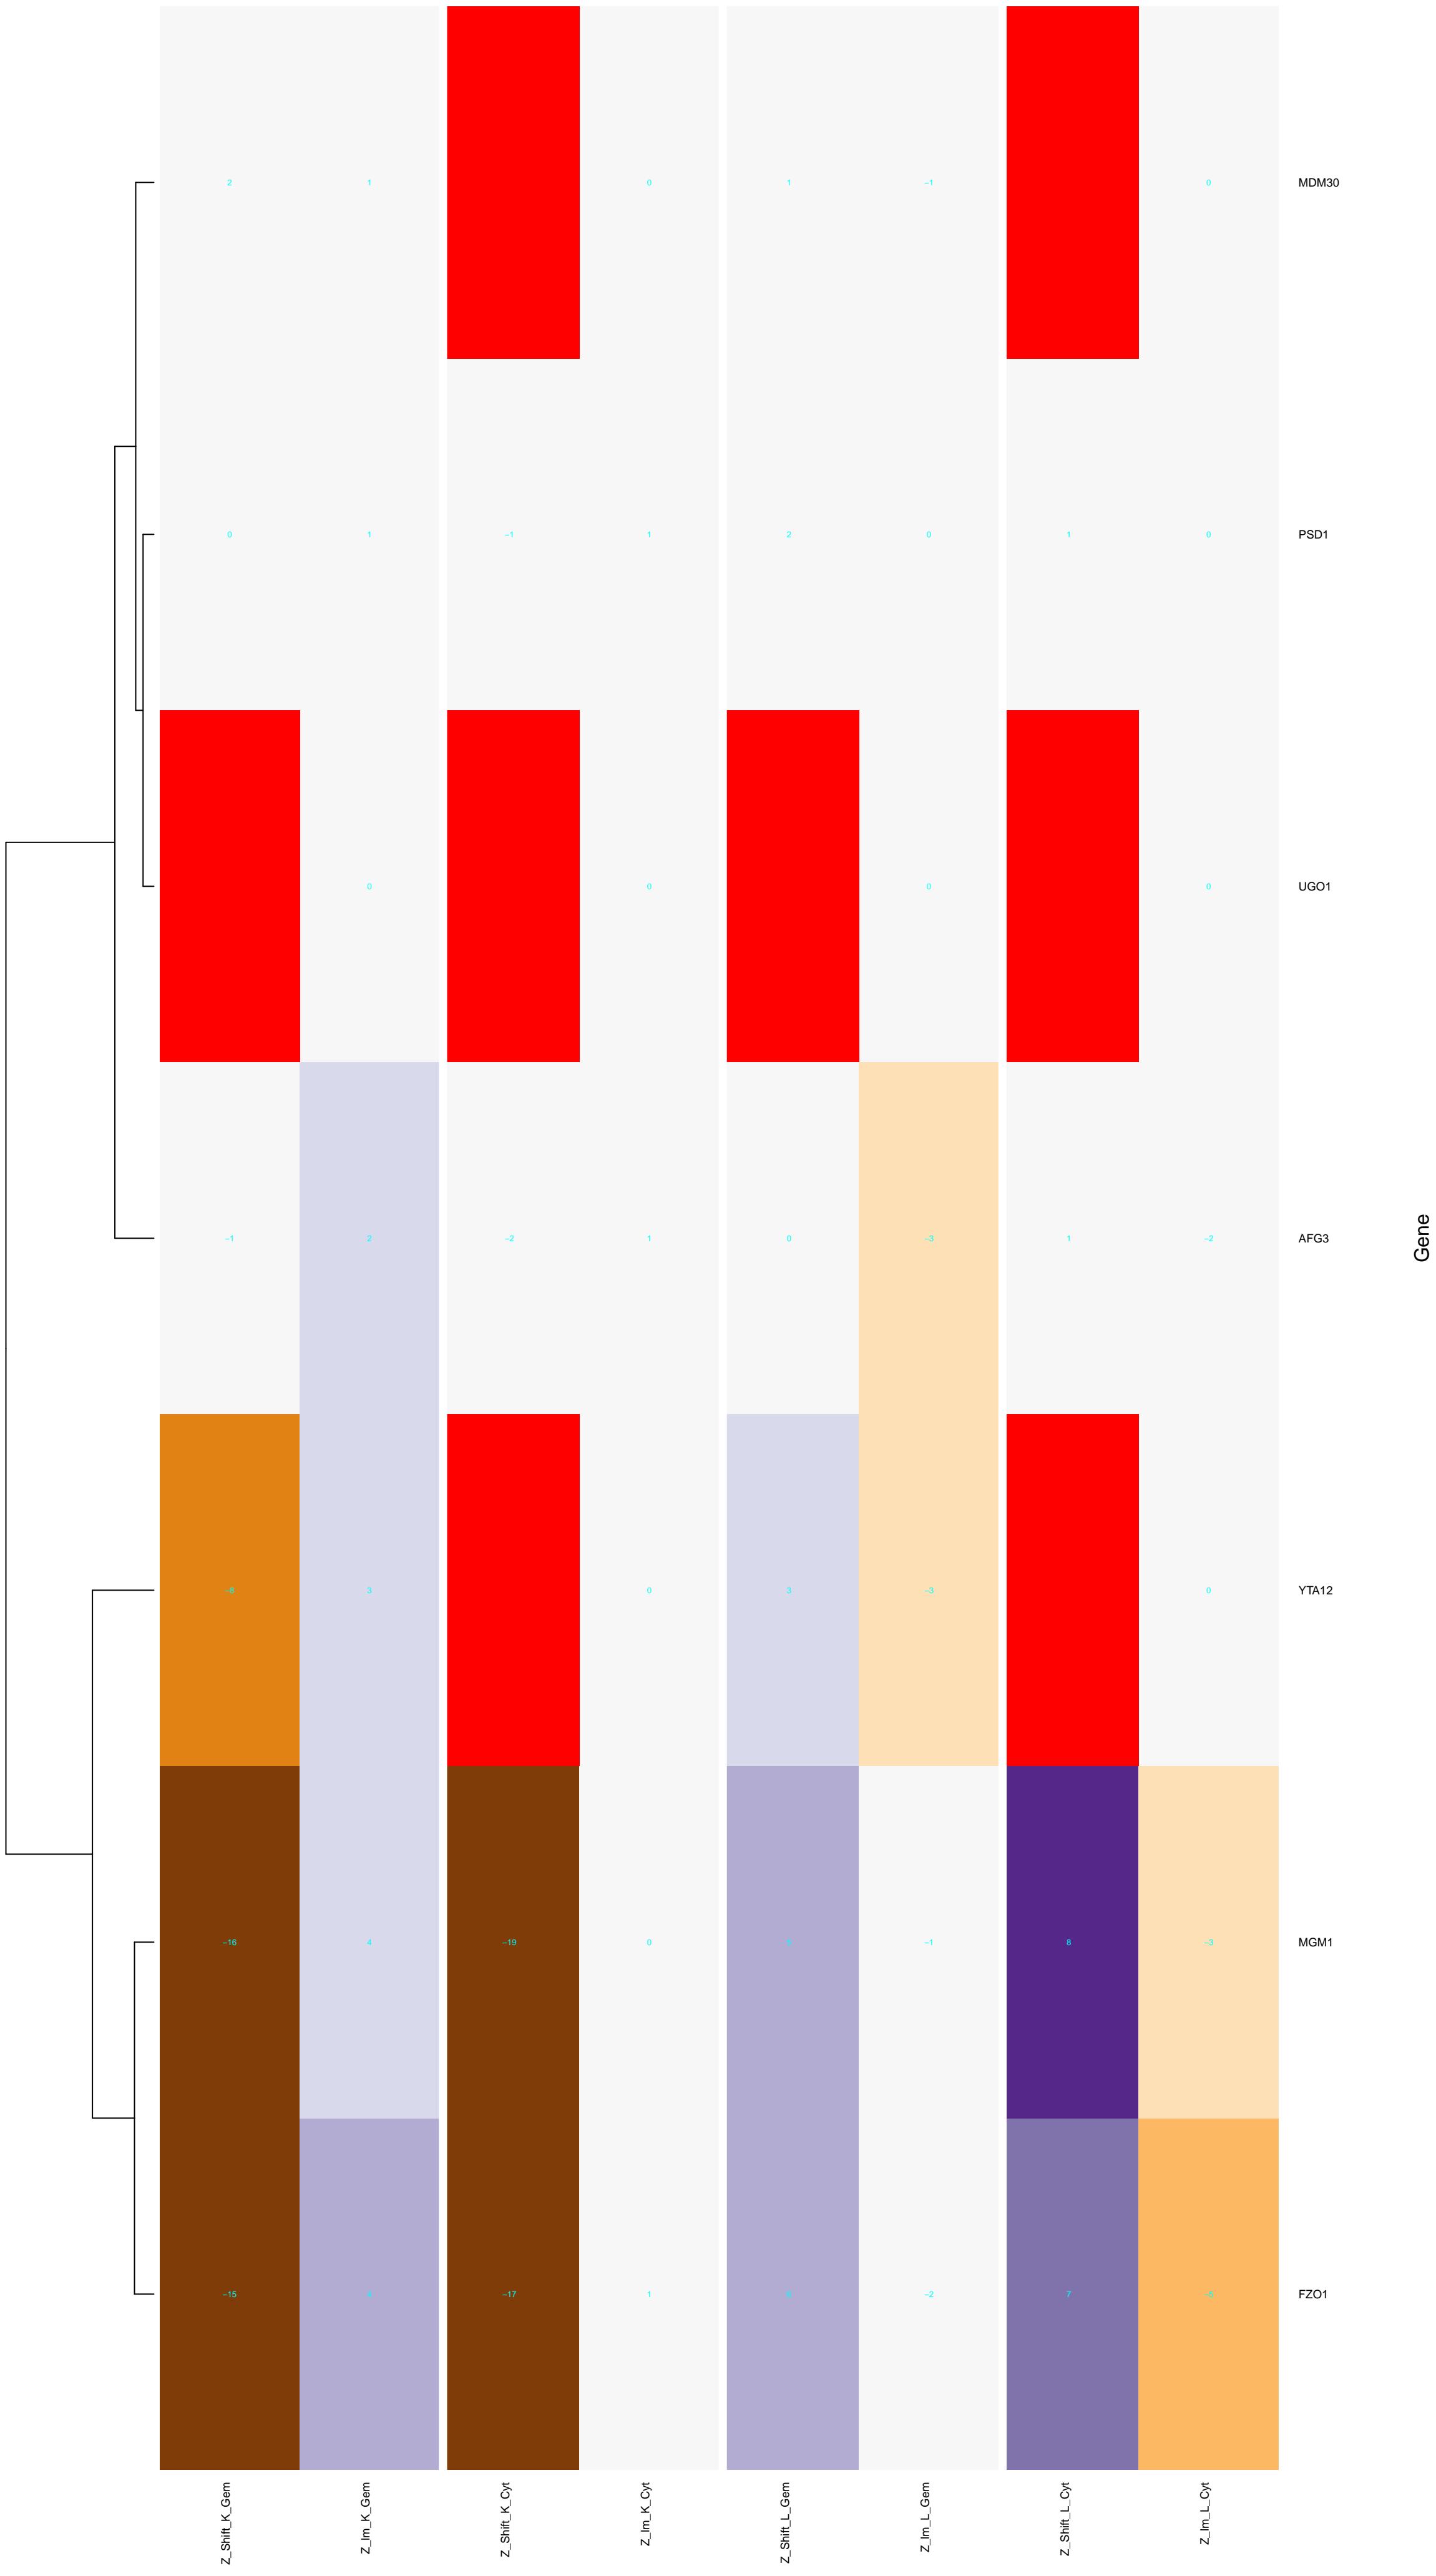

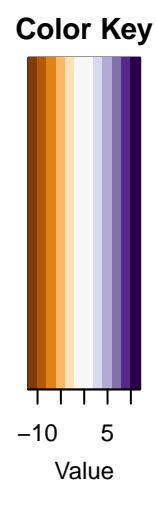

plasma membrane tubulation

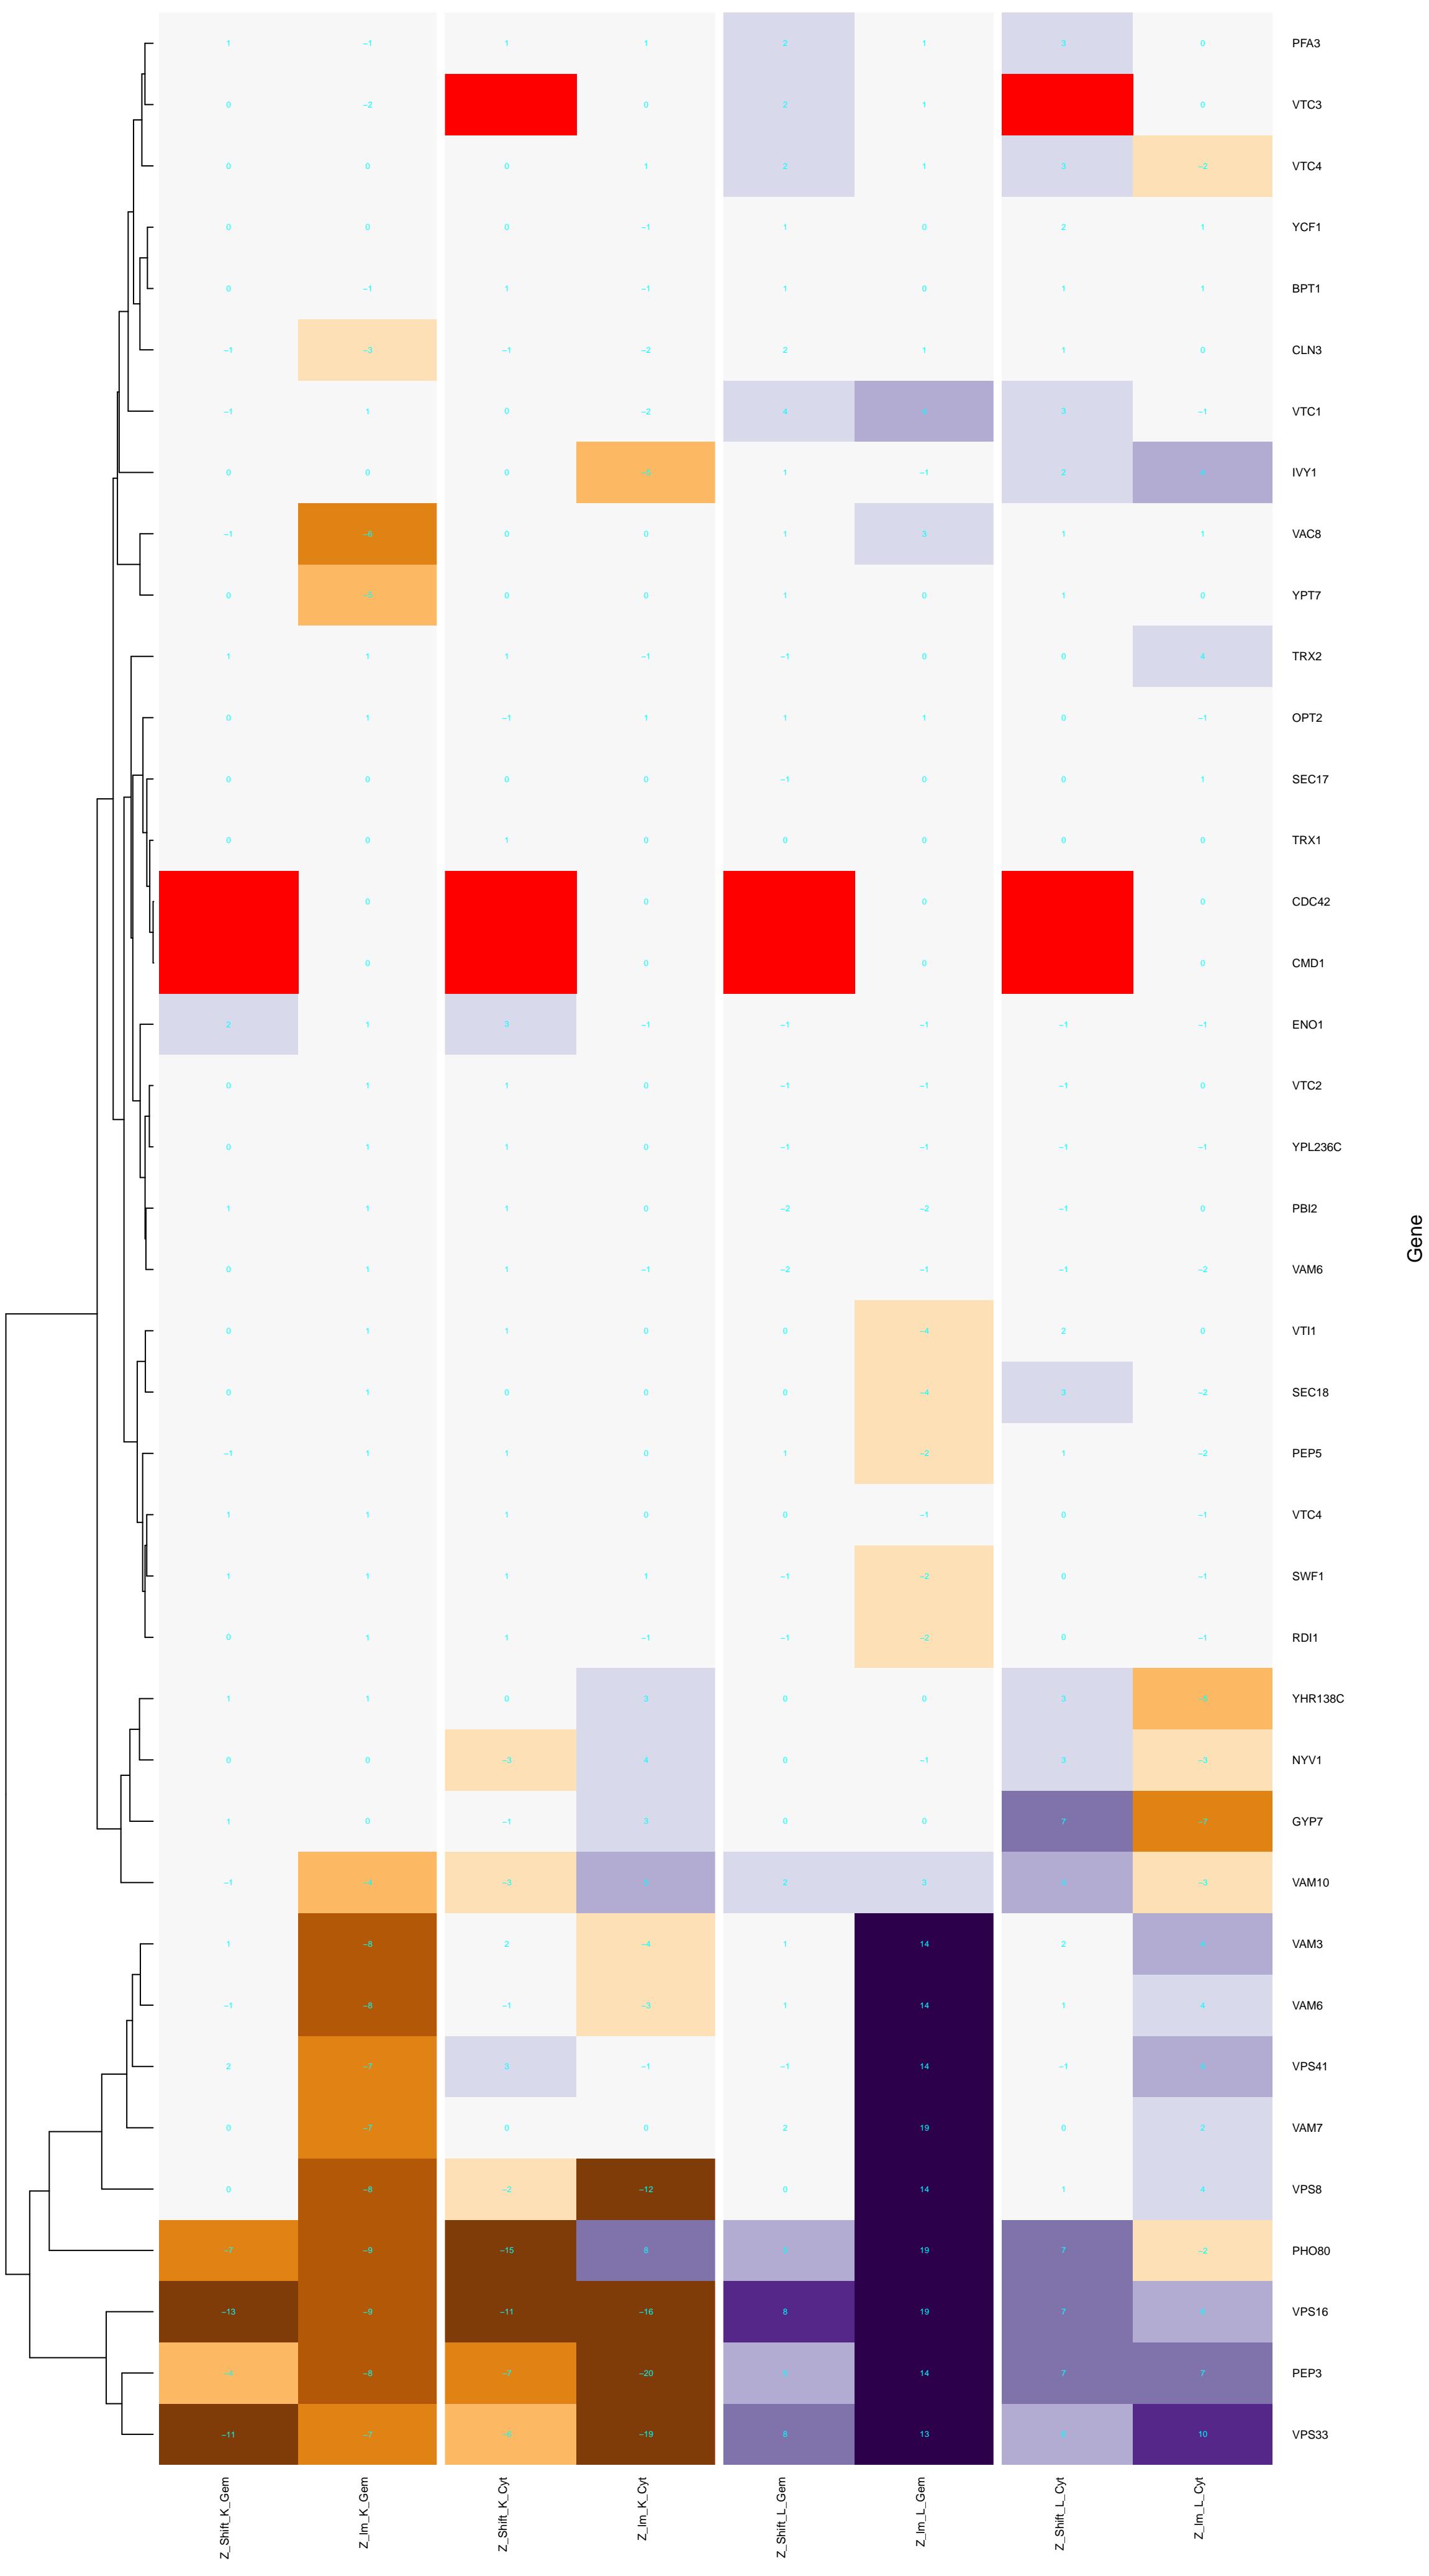

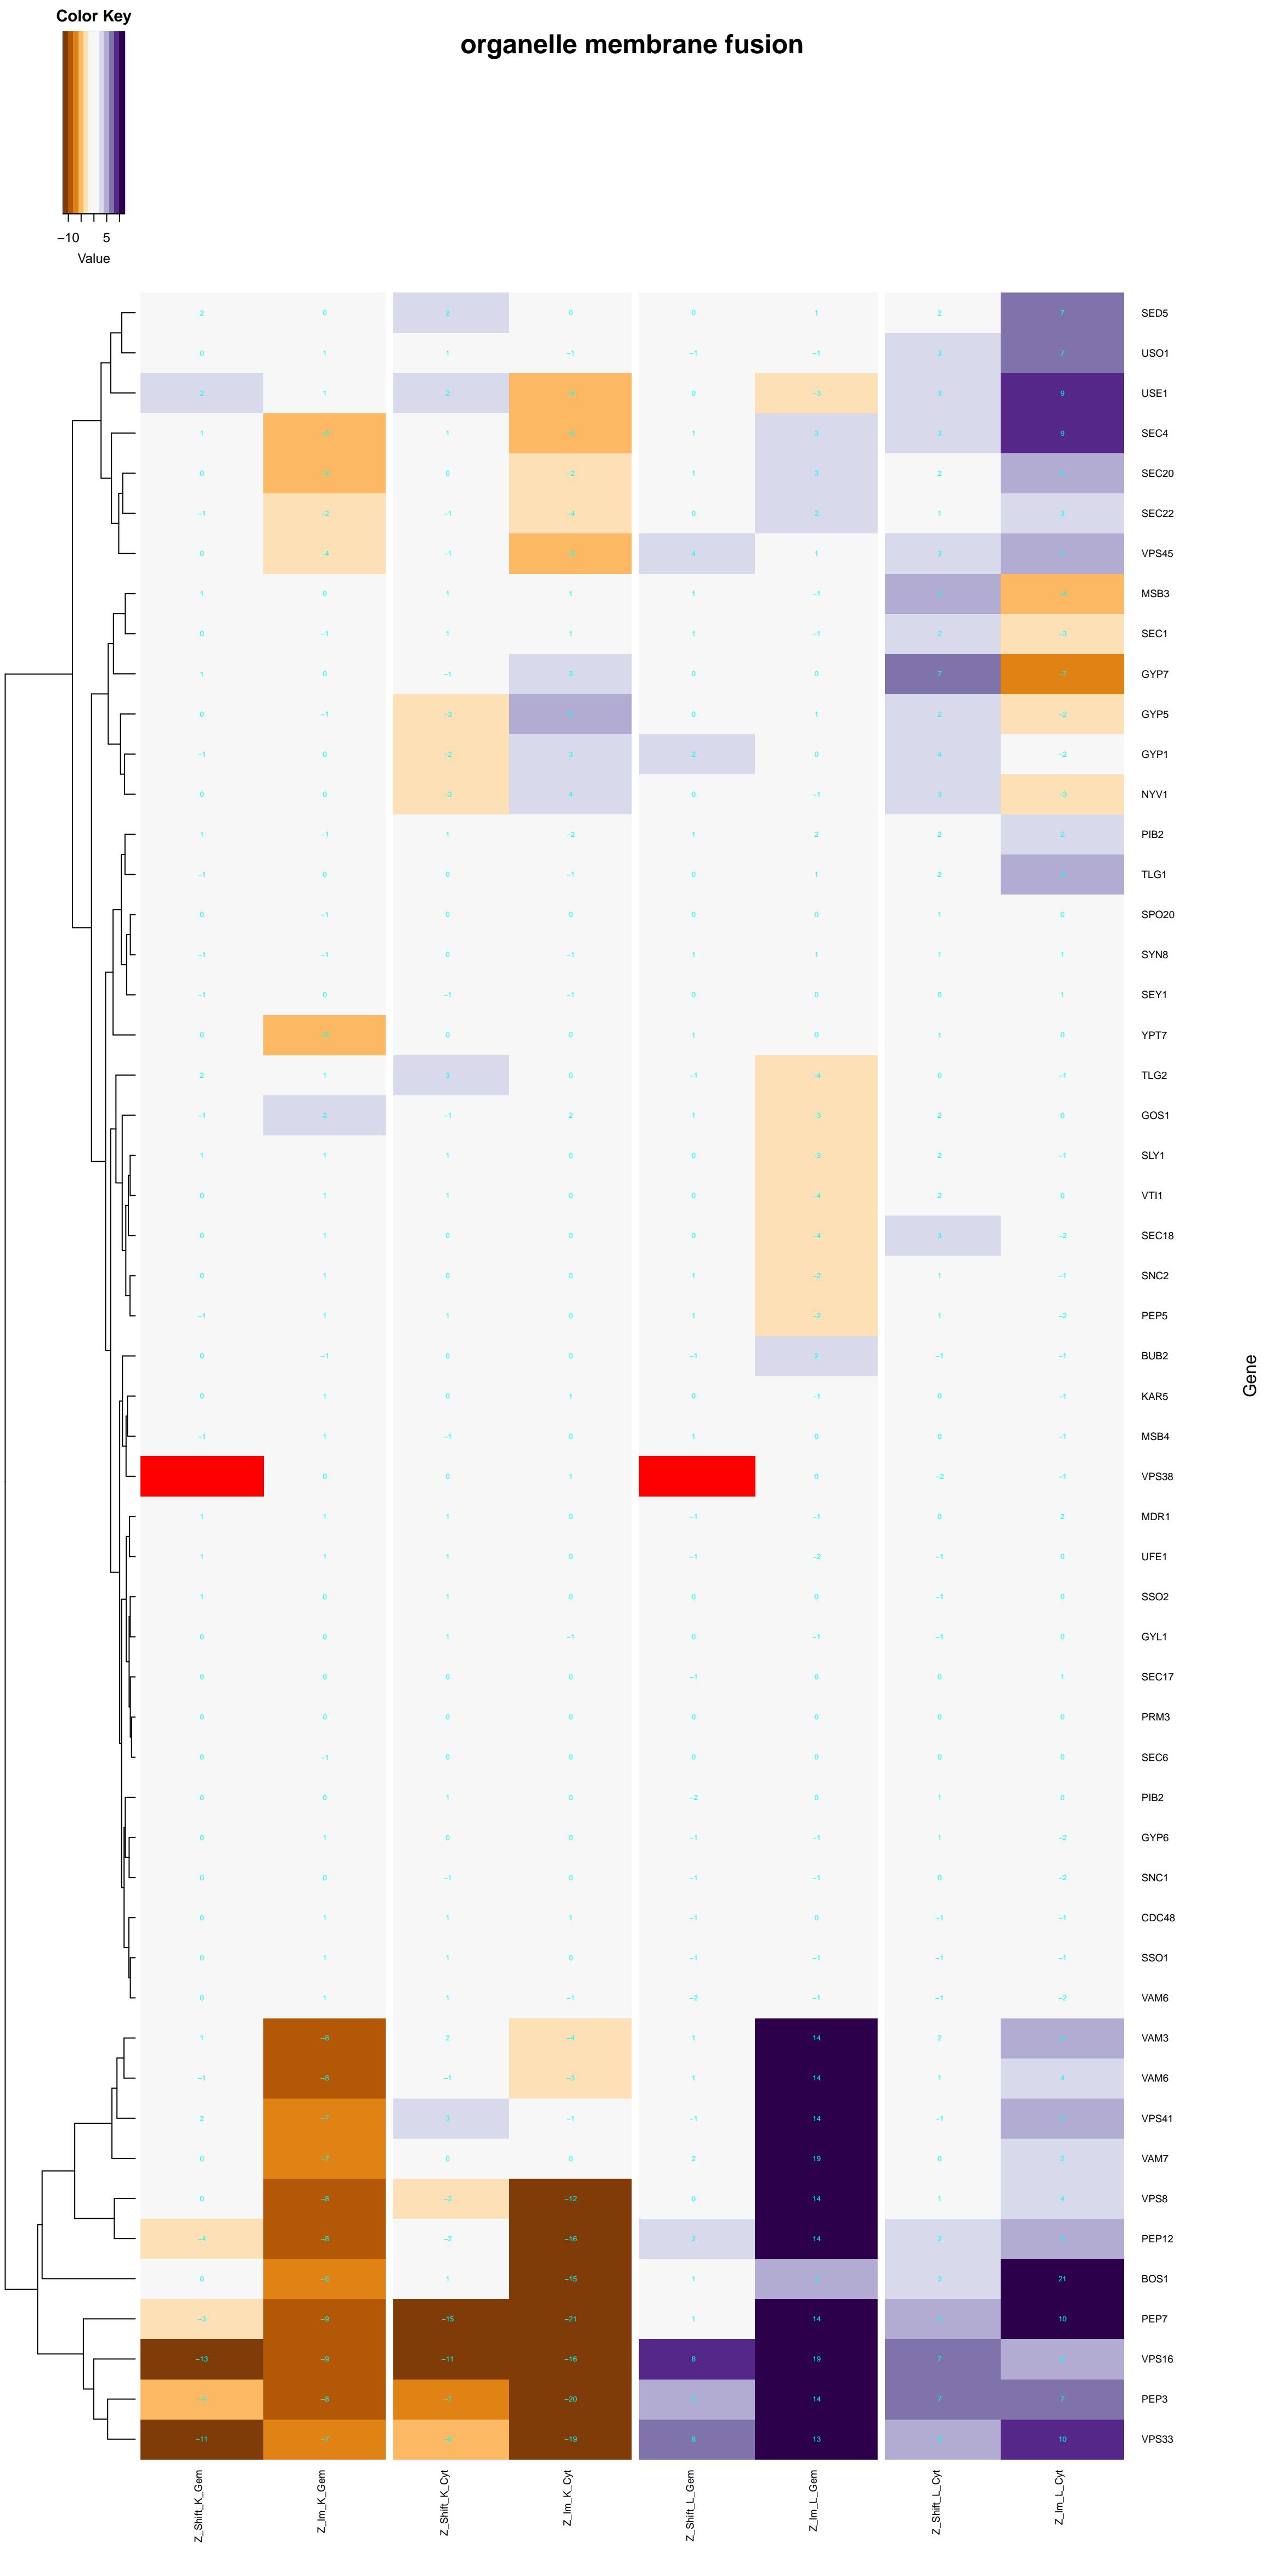

mitochondrial fusion

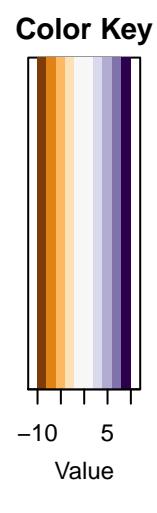

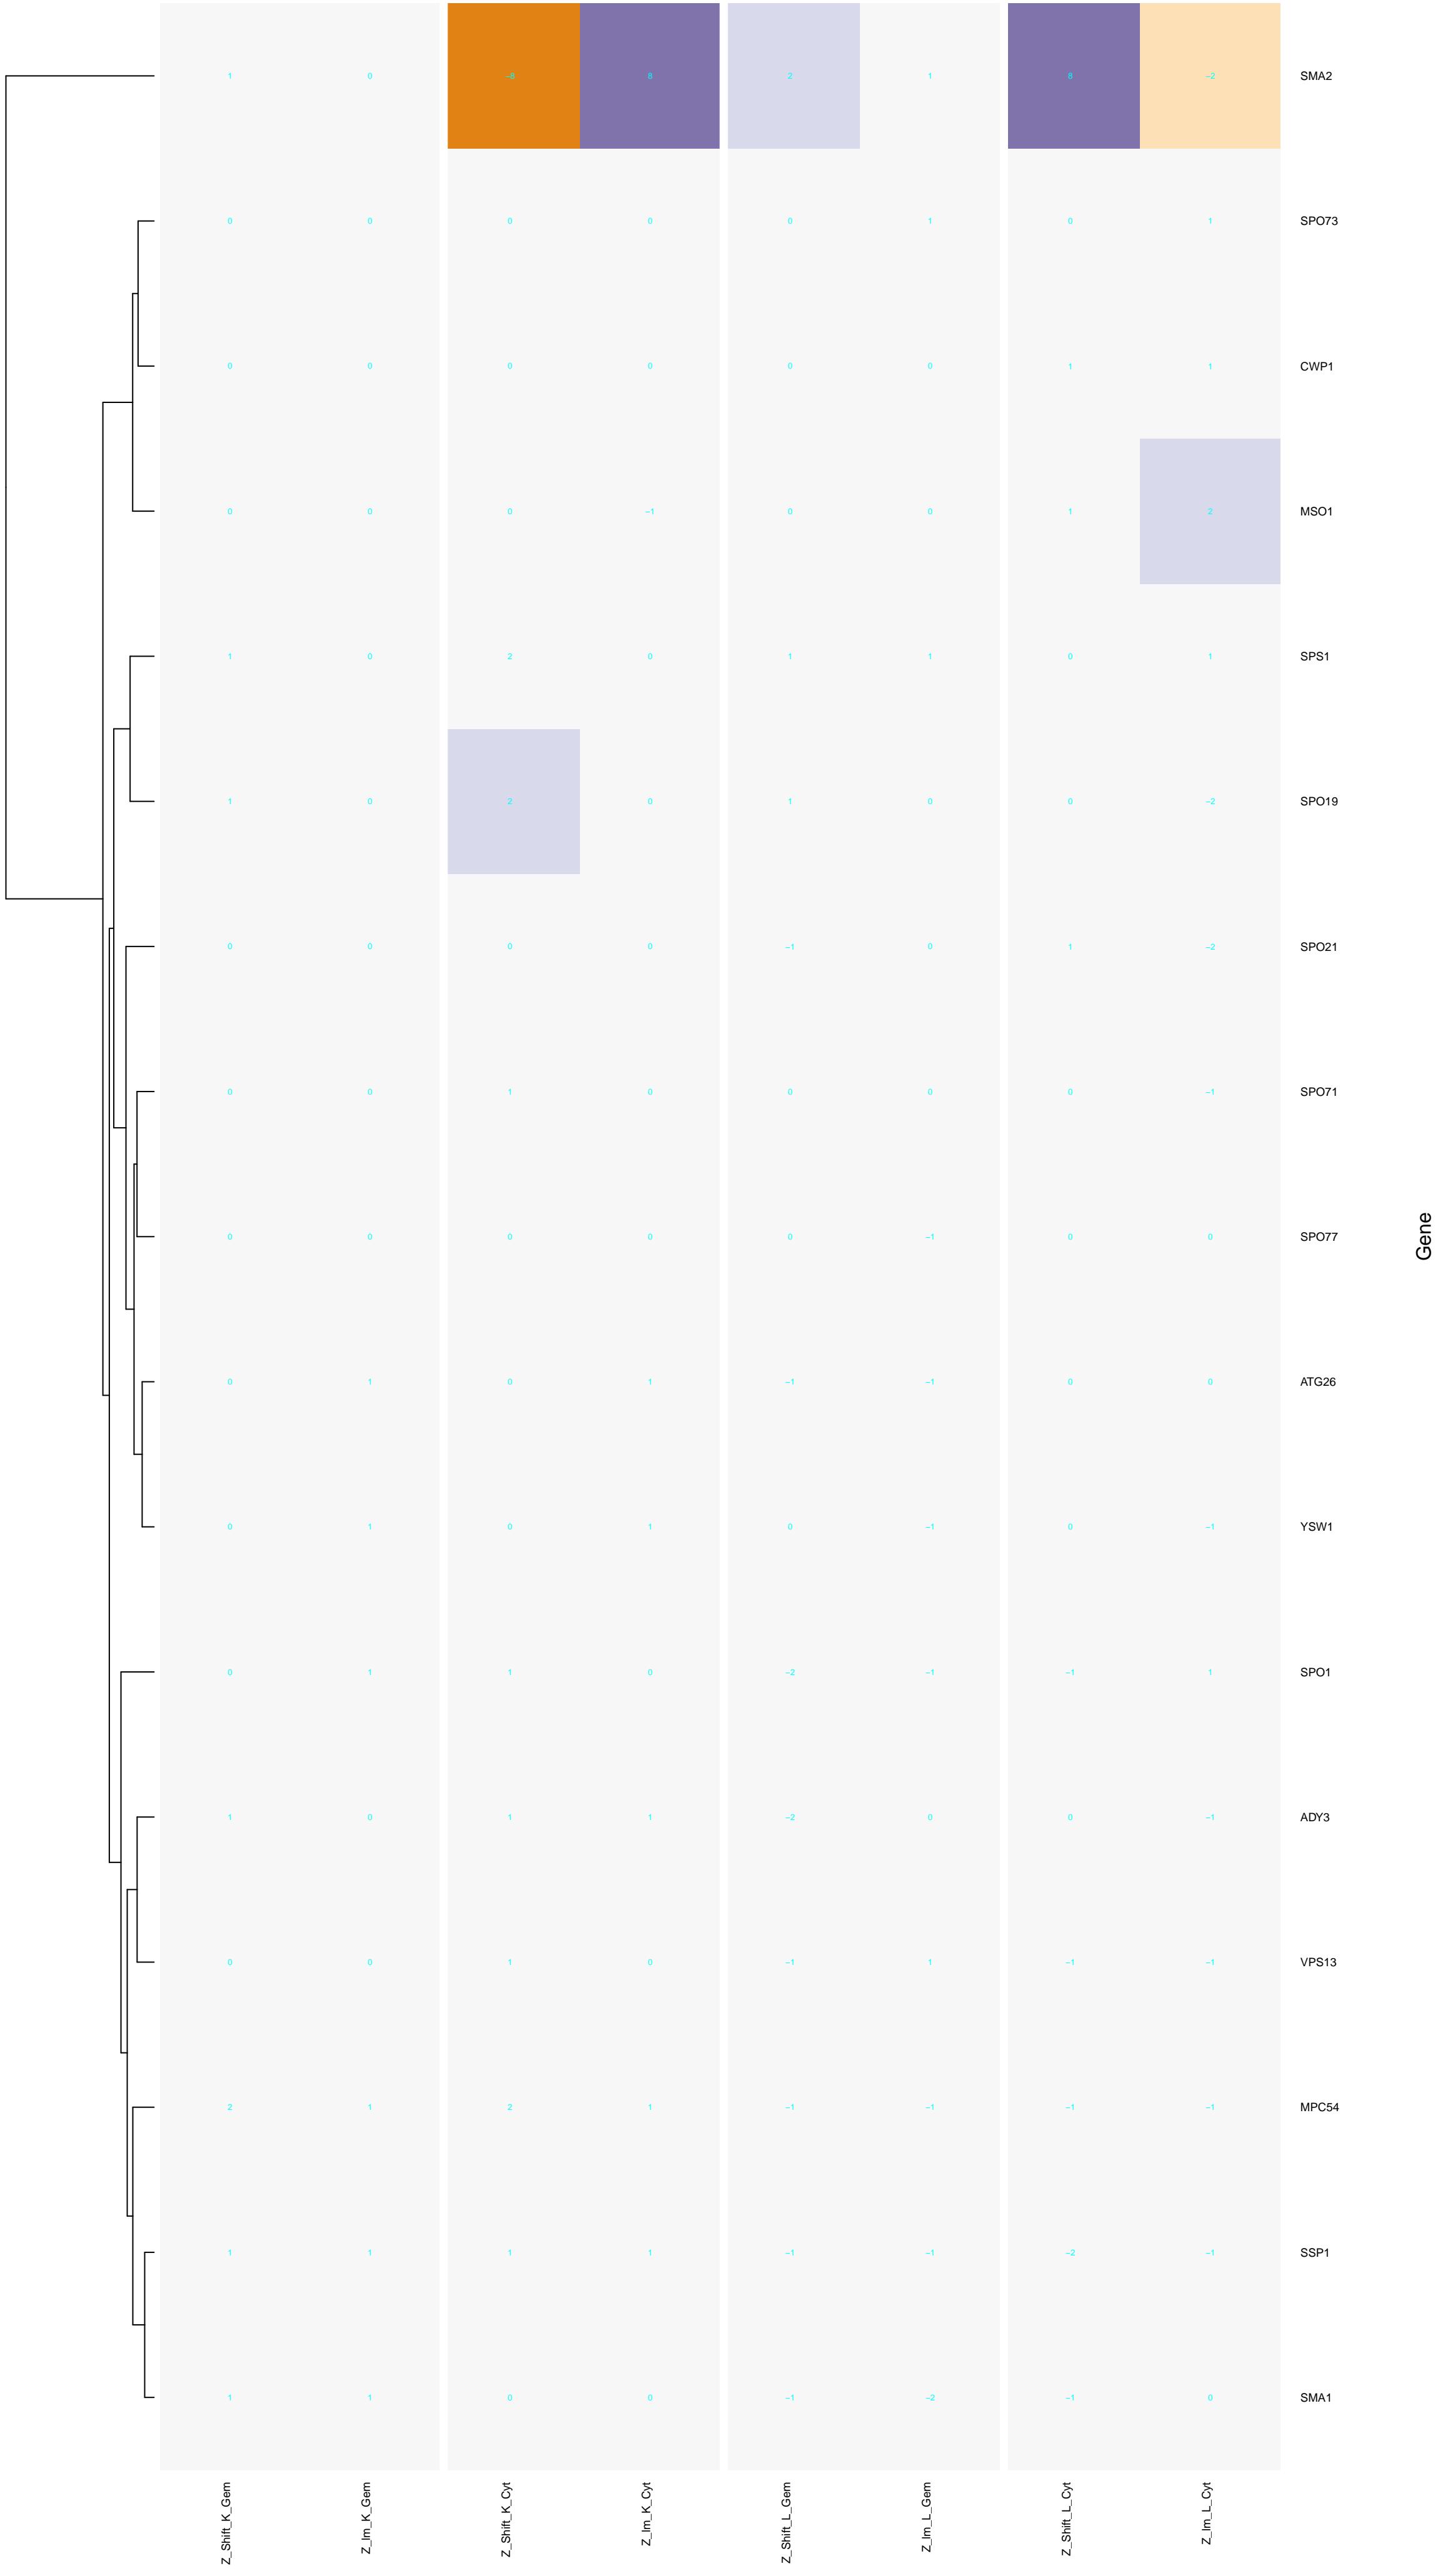

vacuole fusion, non-autophagic

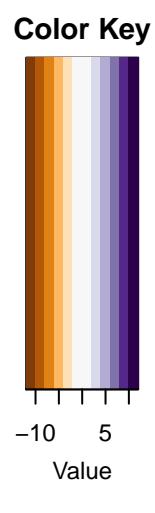

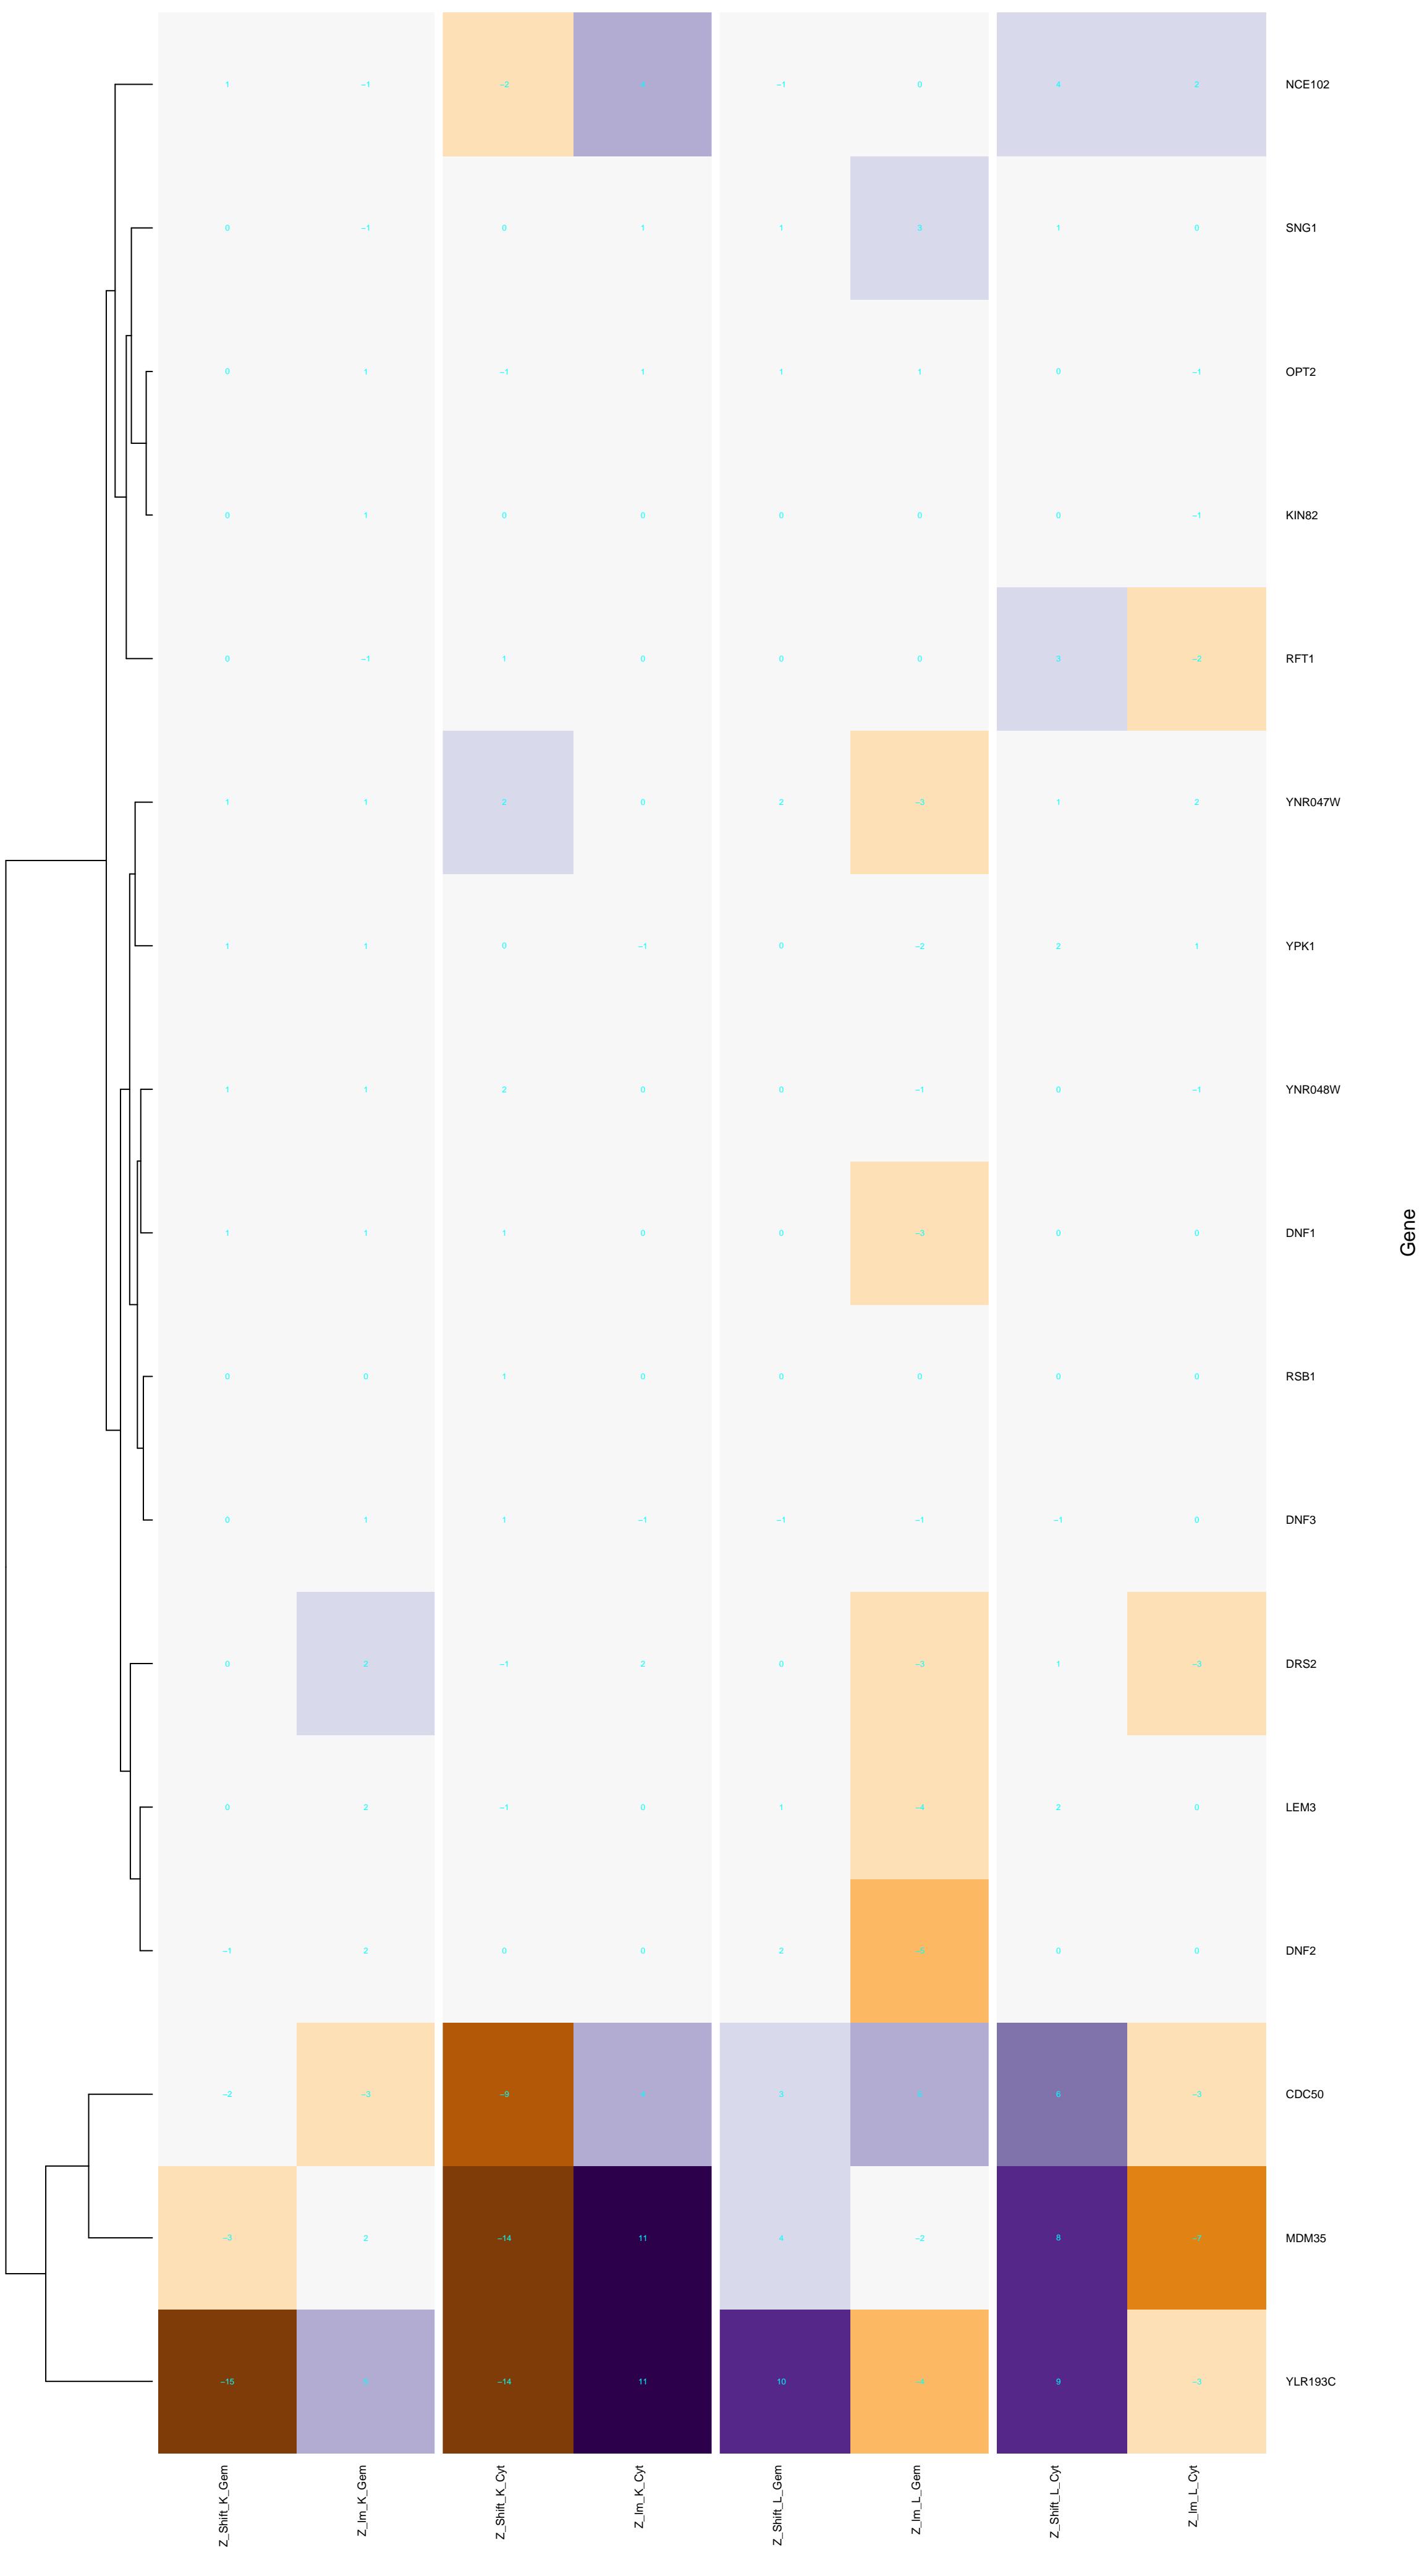

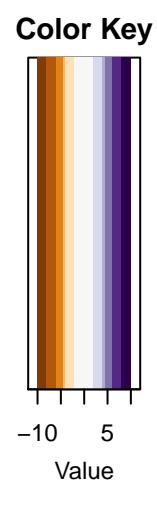

ascospore-type prospore membrane assembly

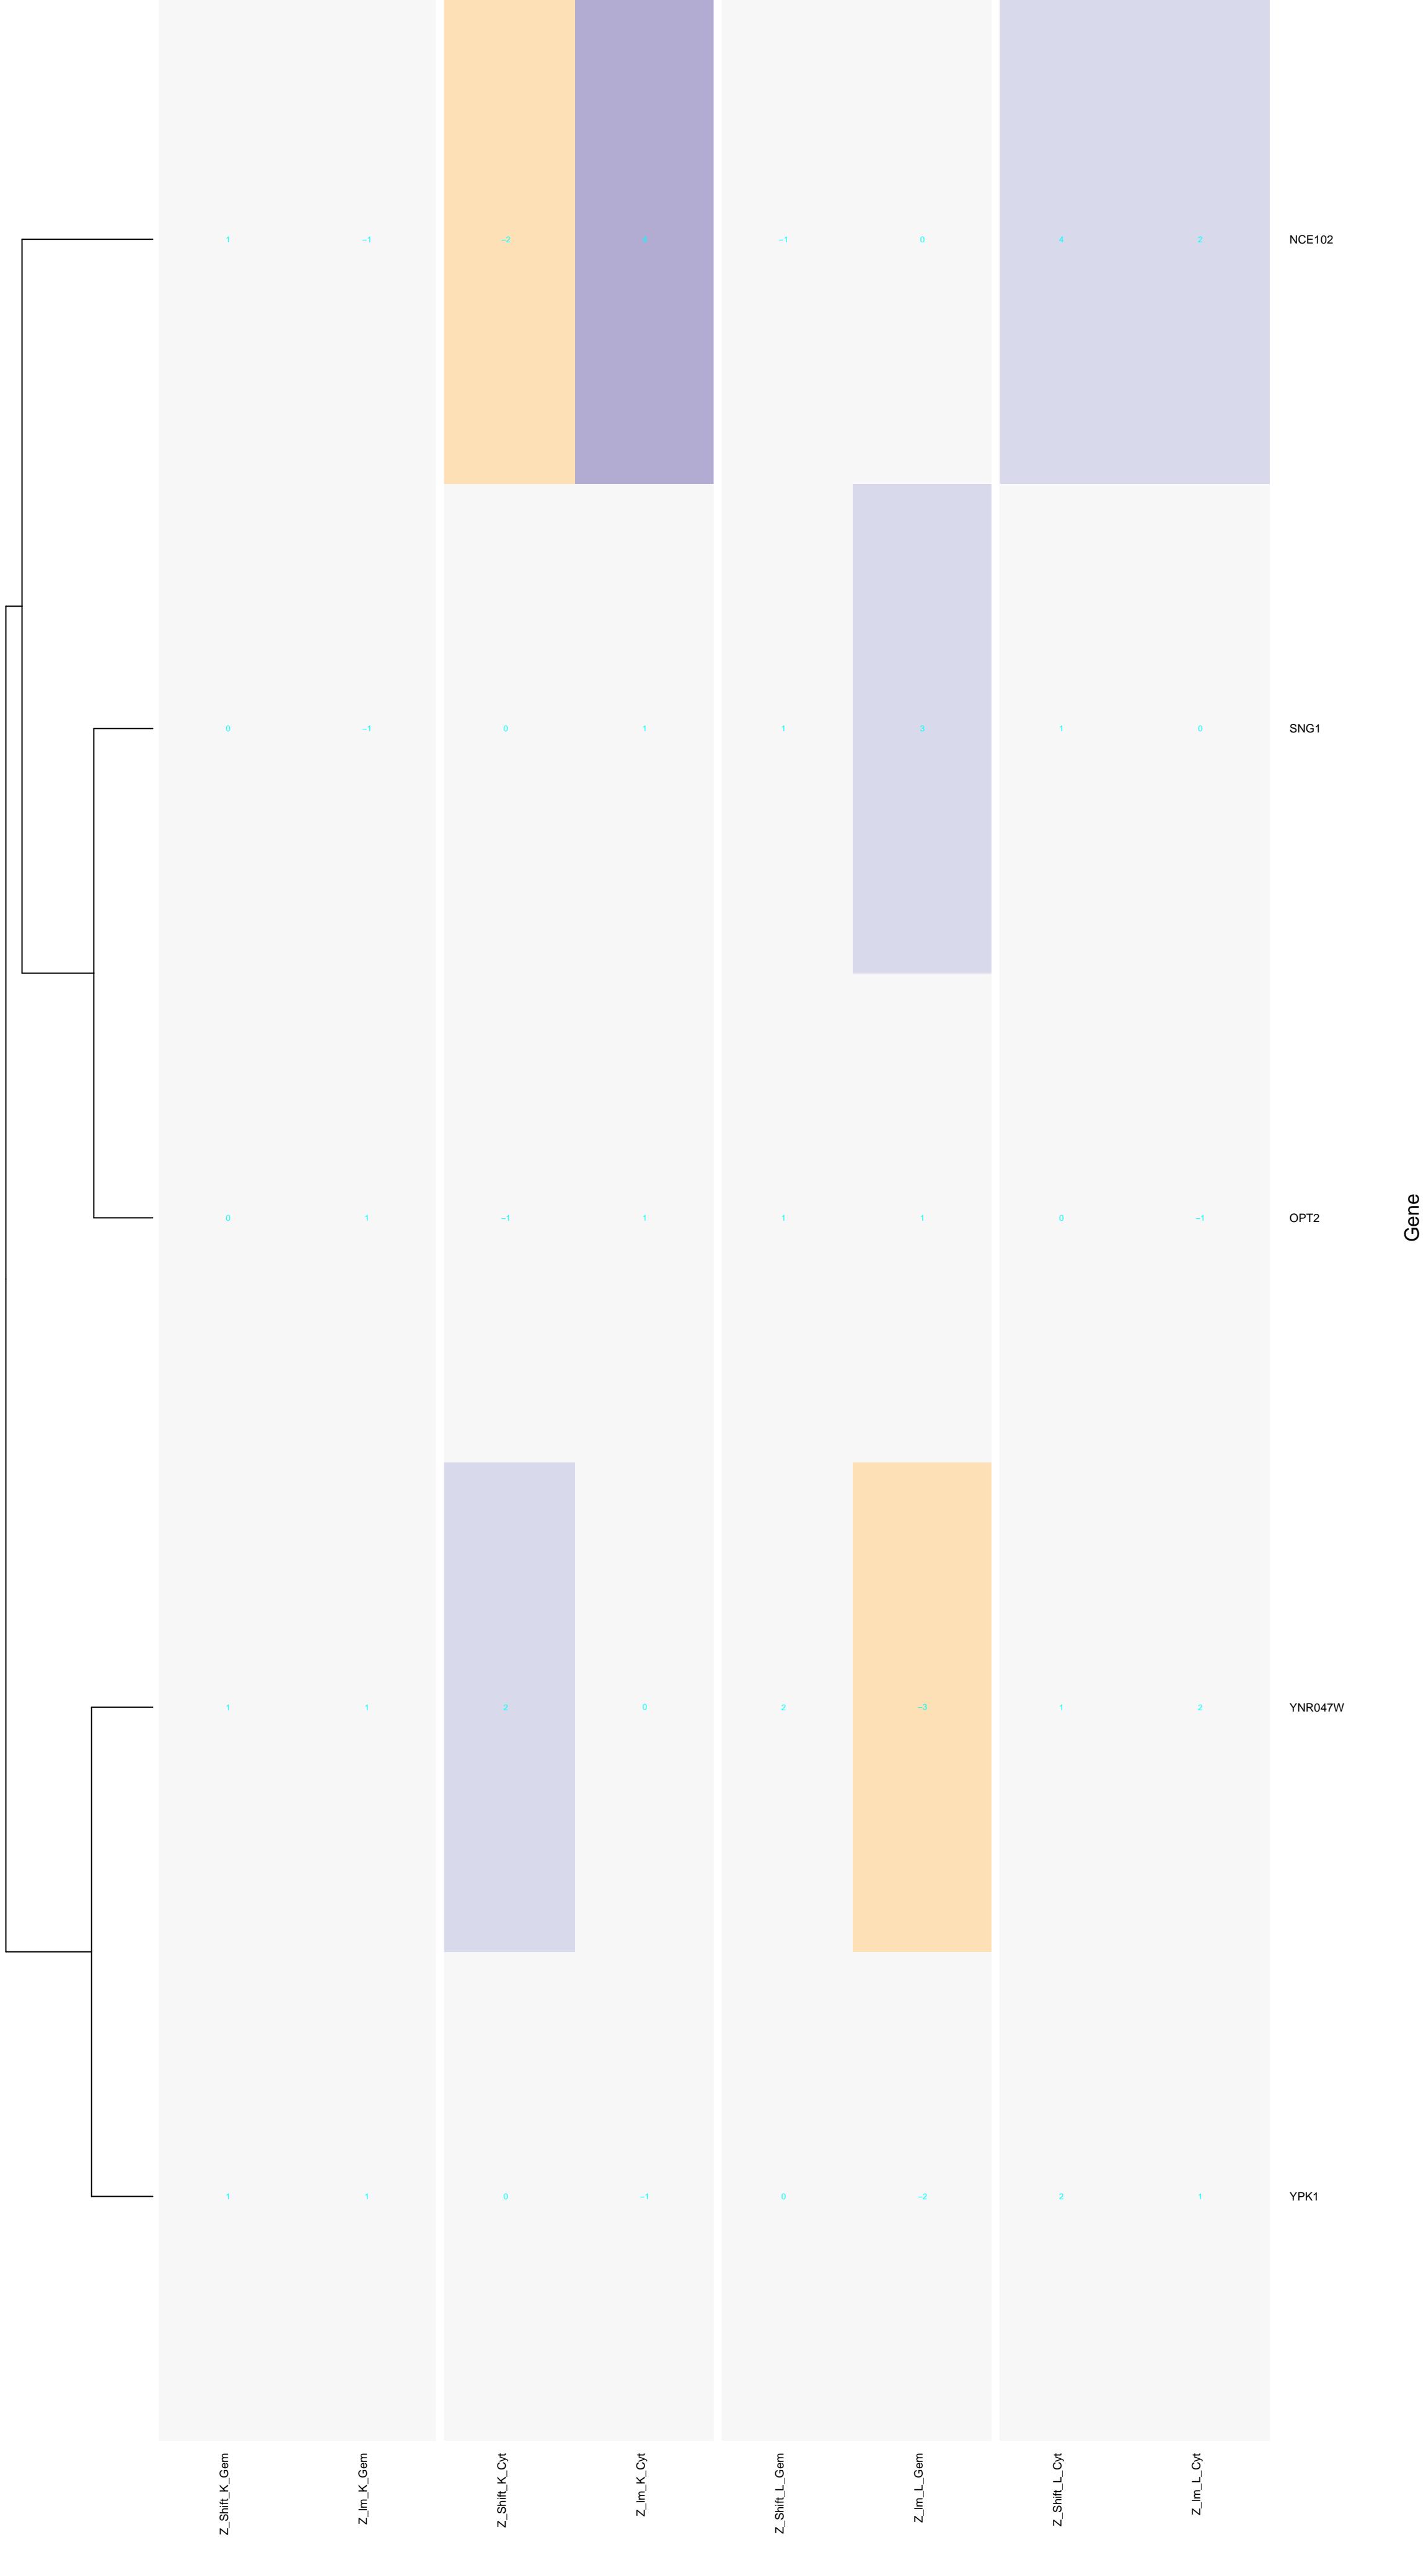

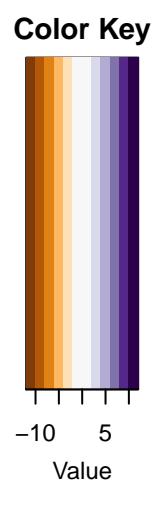

lipid translocation

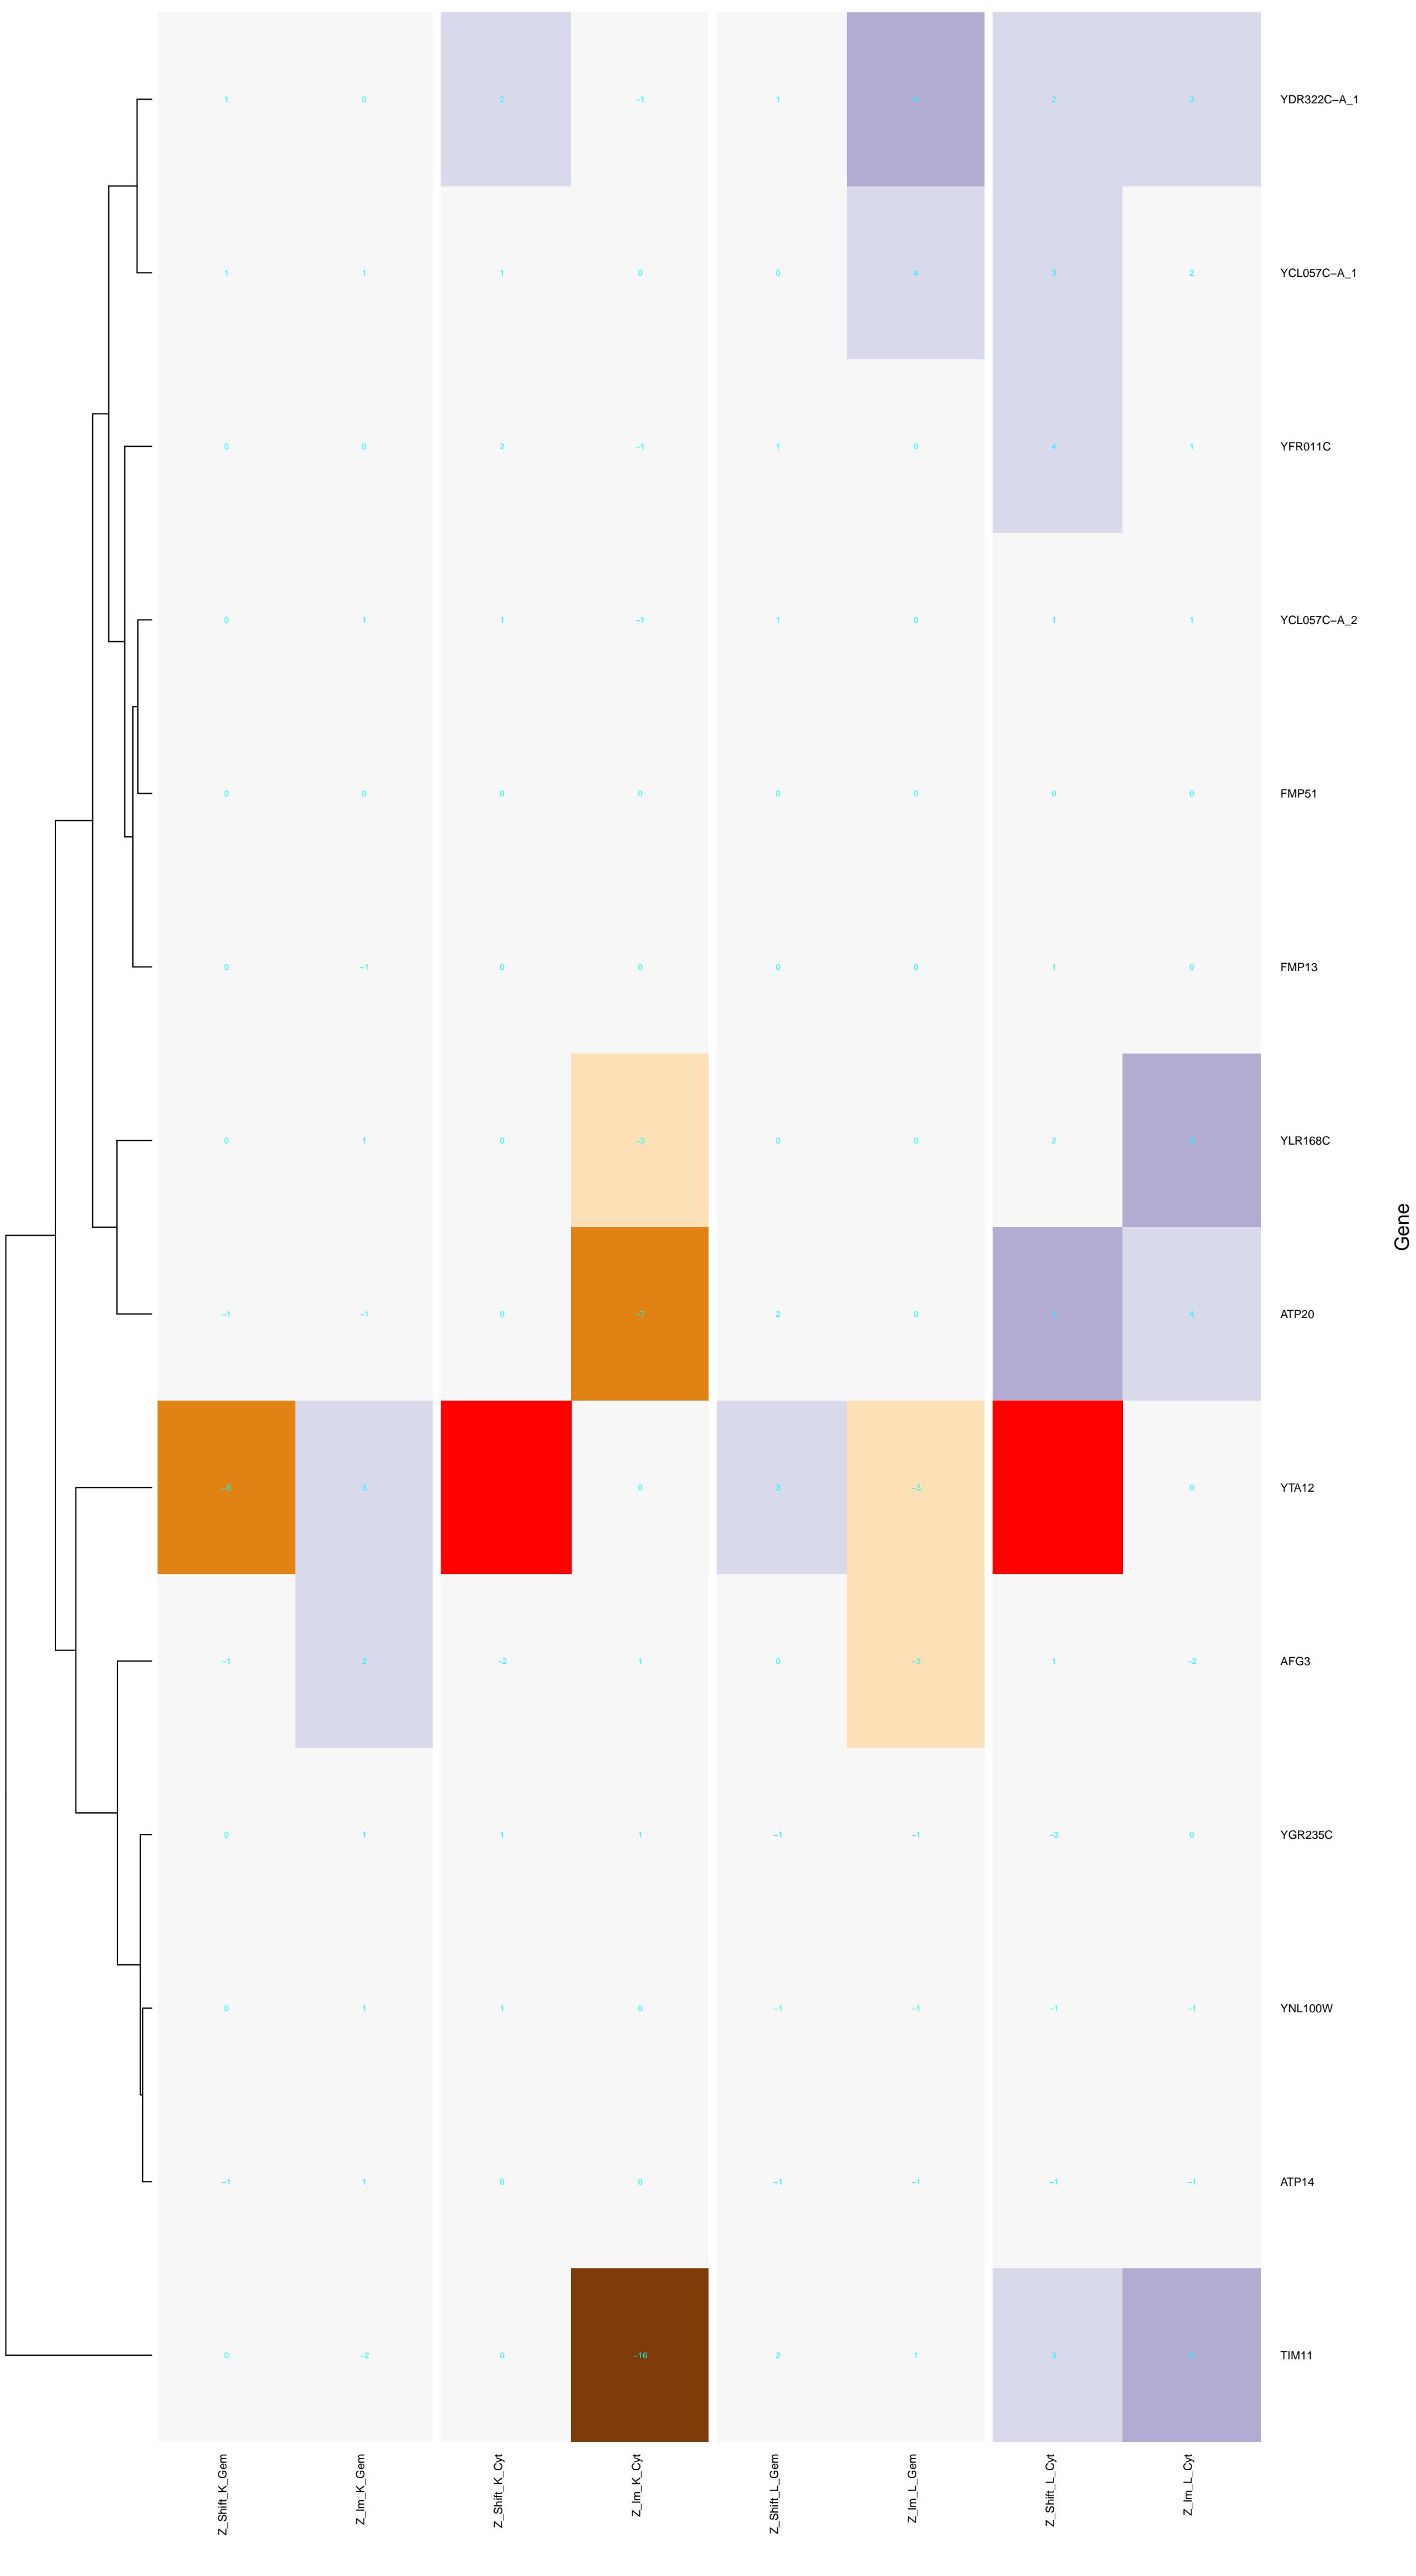

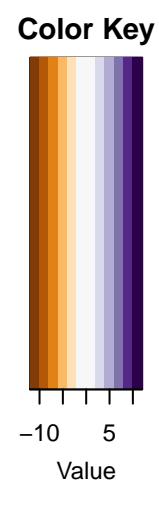

regulation of phospholipid translocation

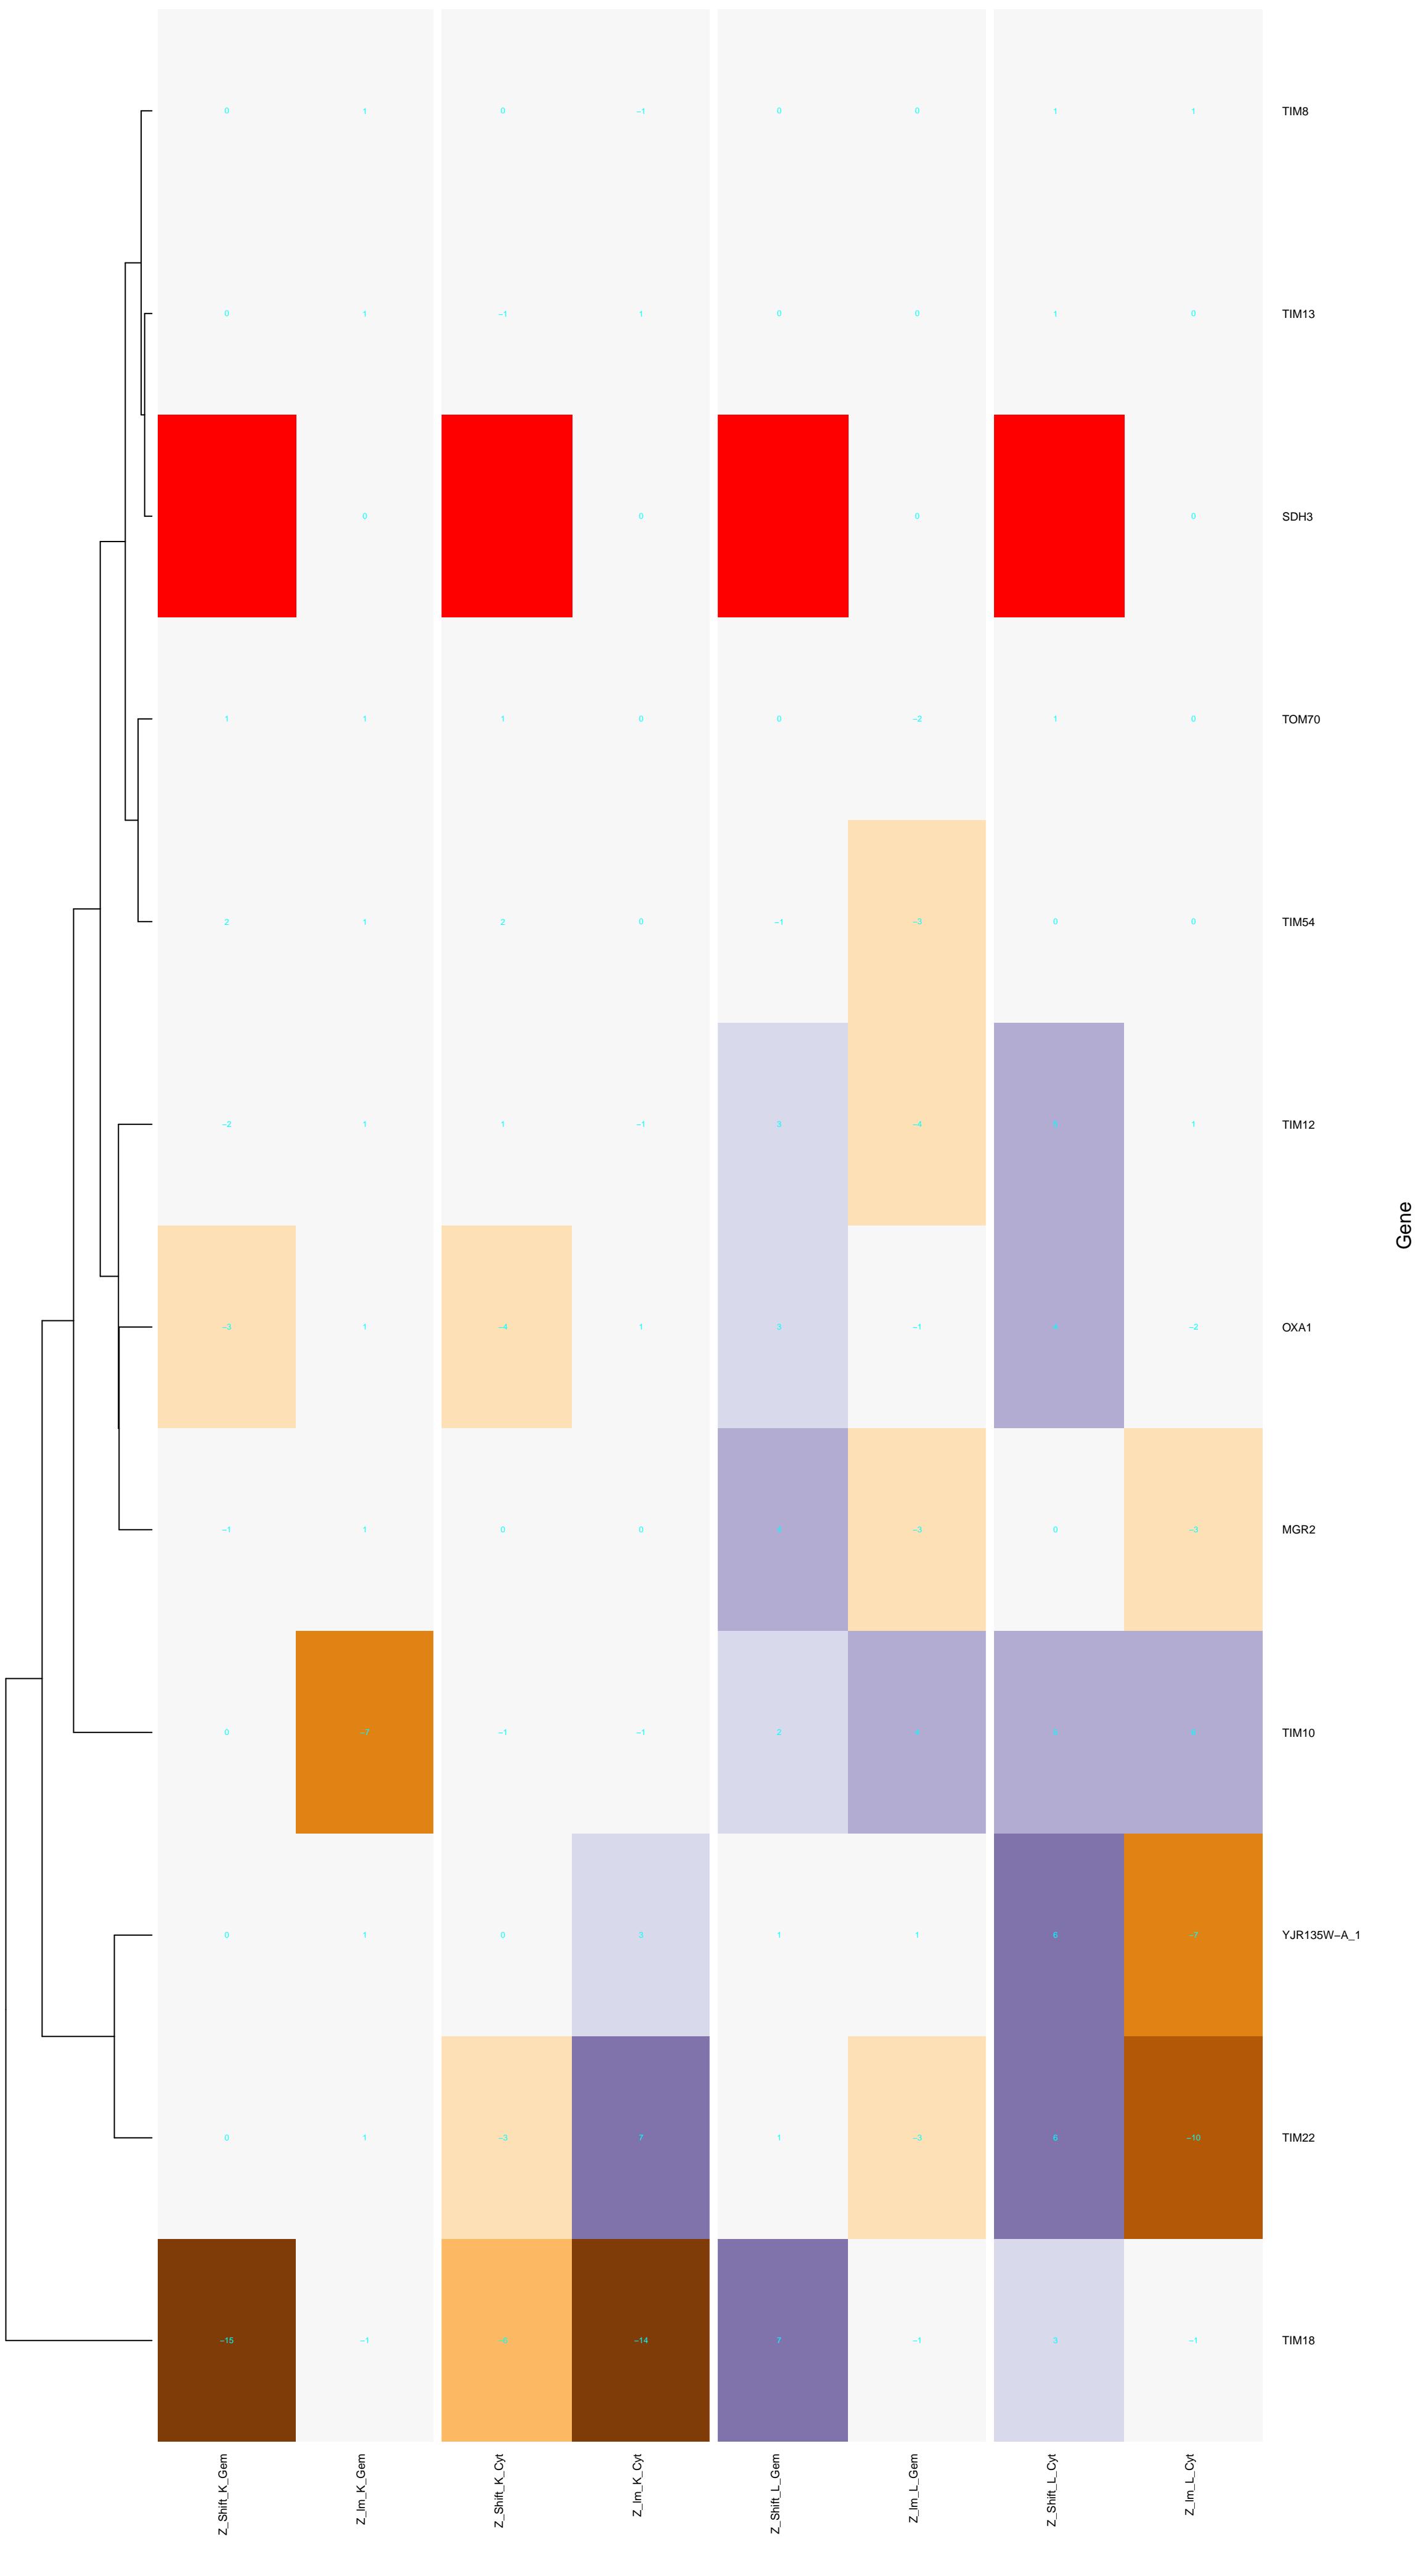

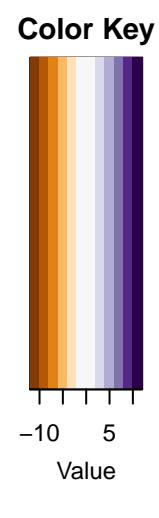

cristae formation

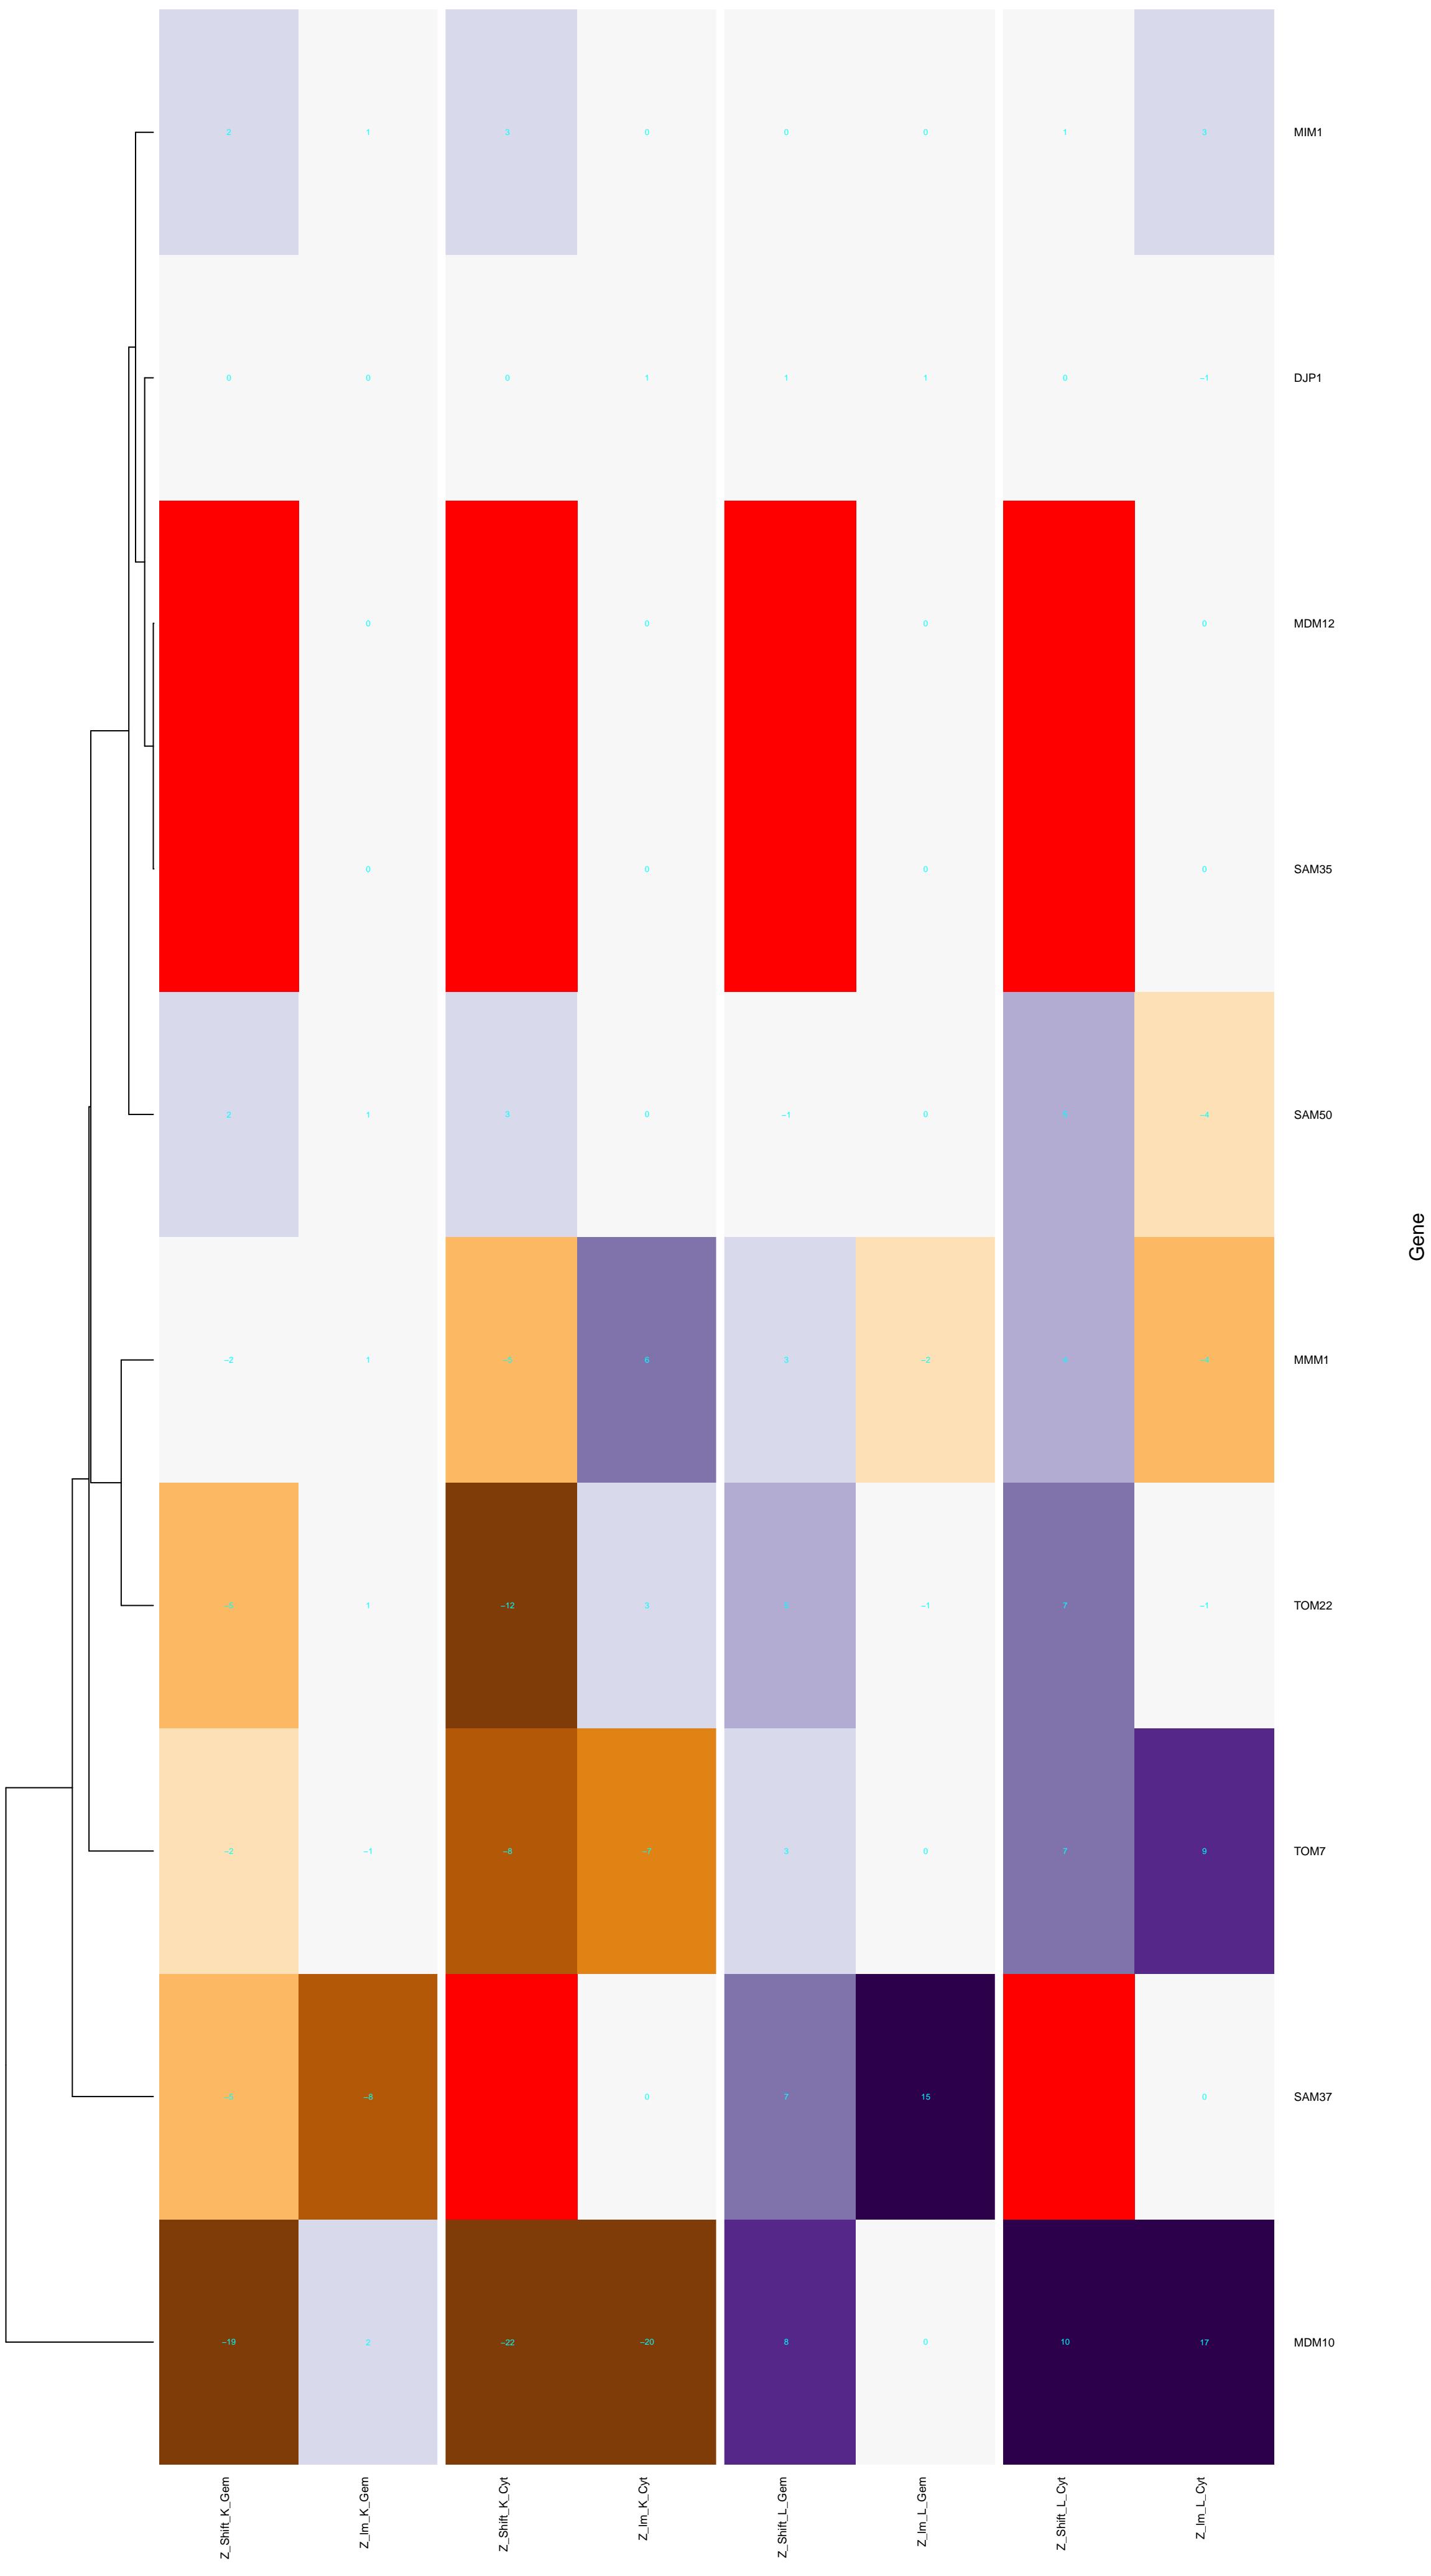

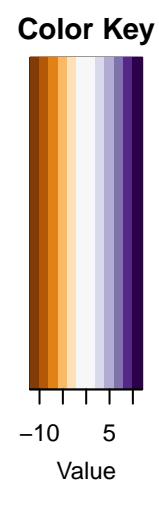

protein import into mitochondrial inner membrane

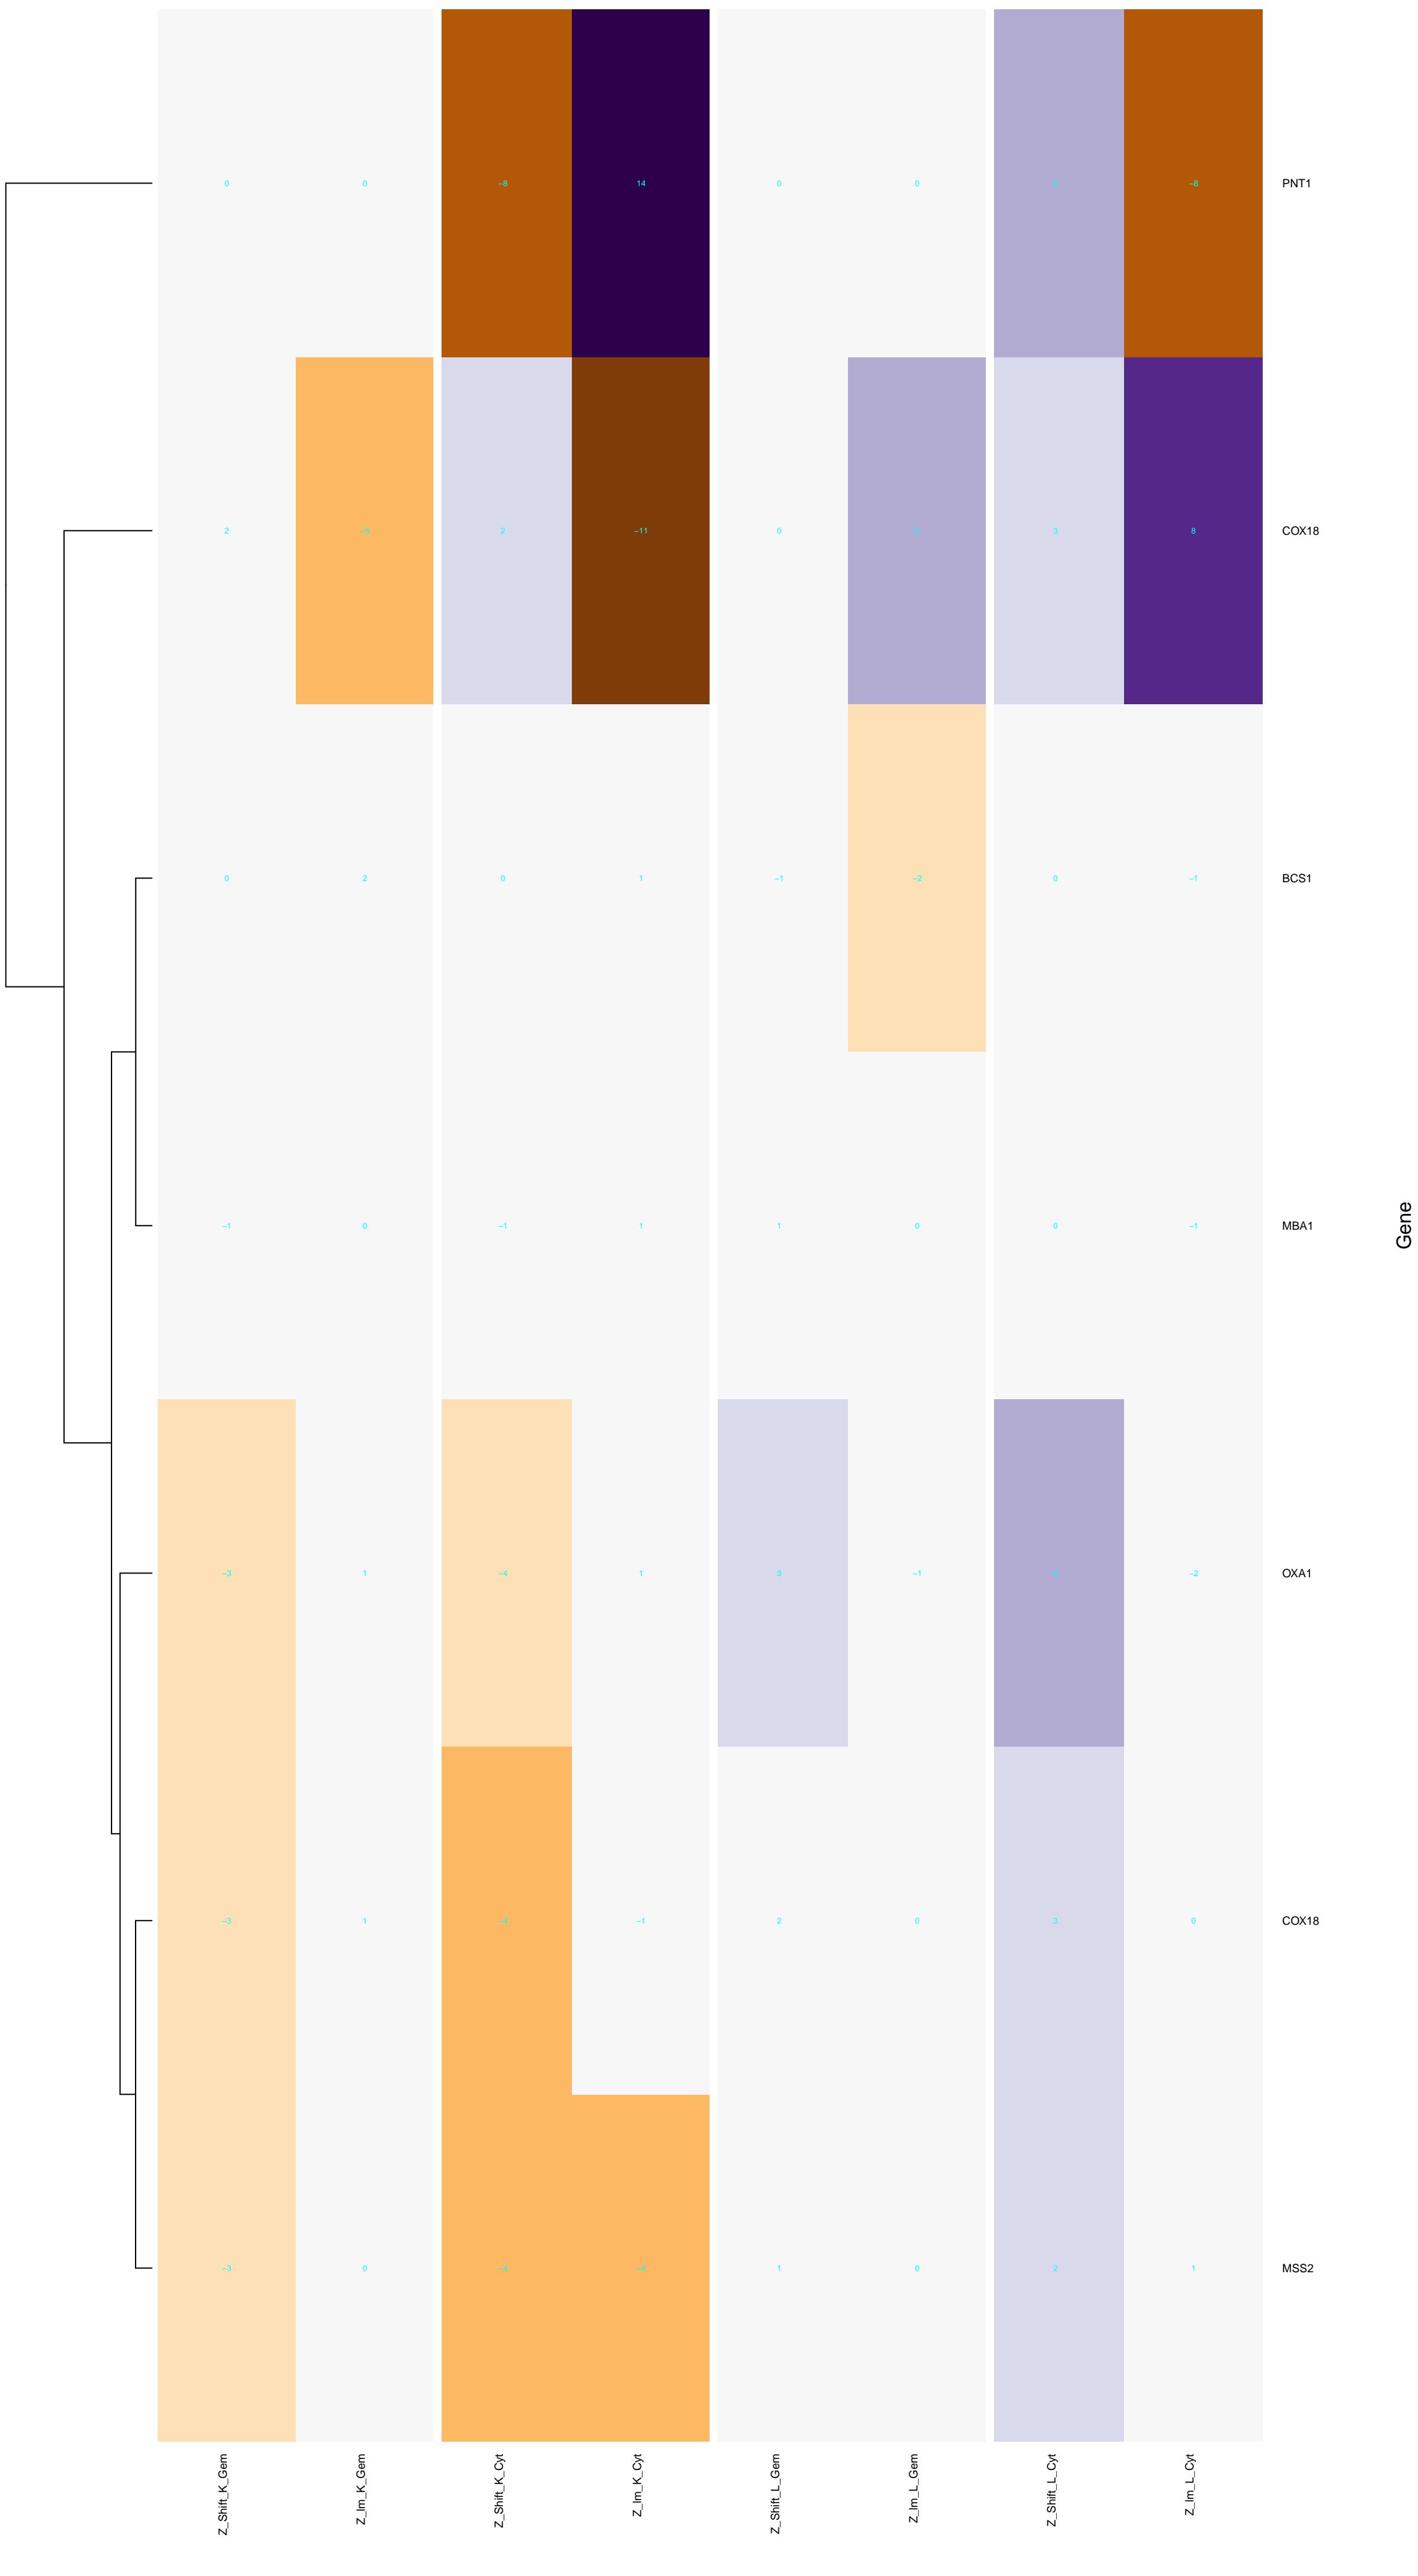

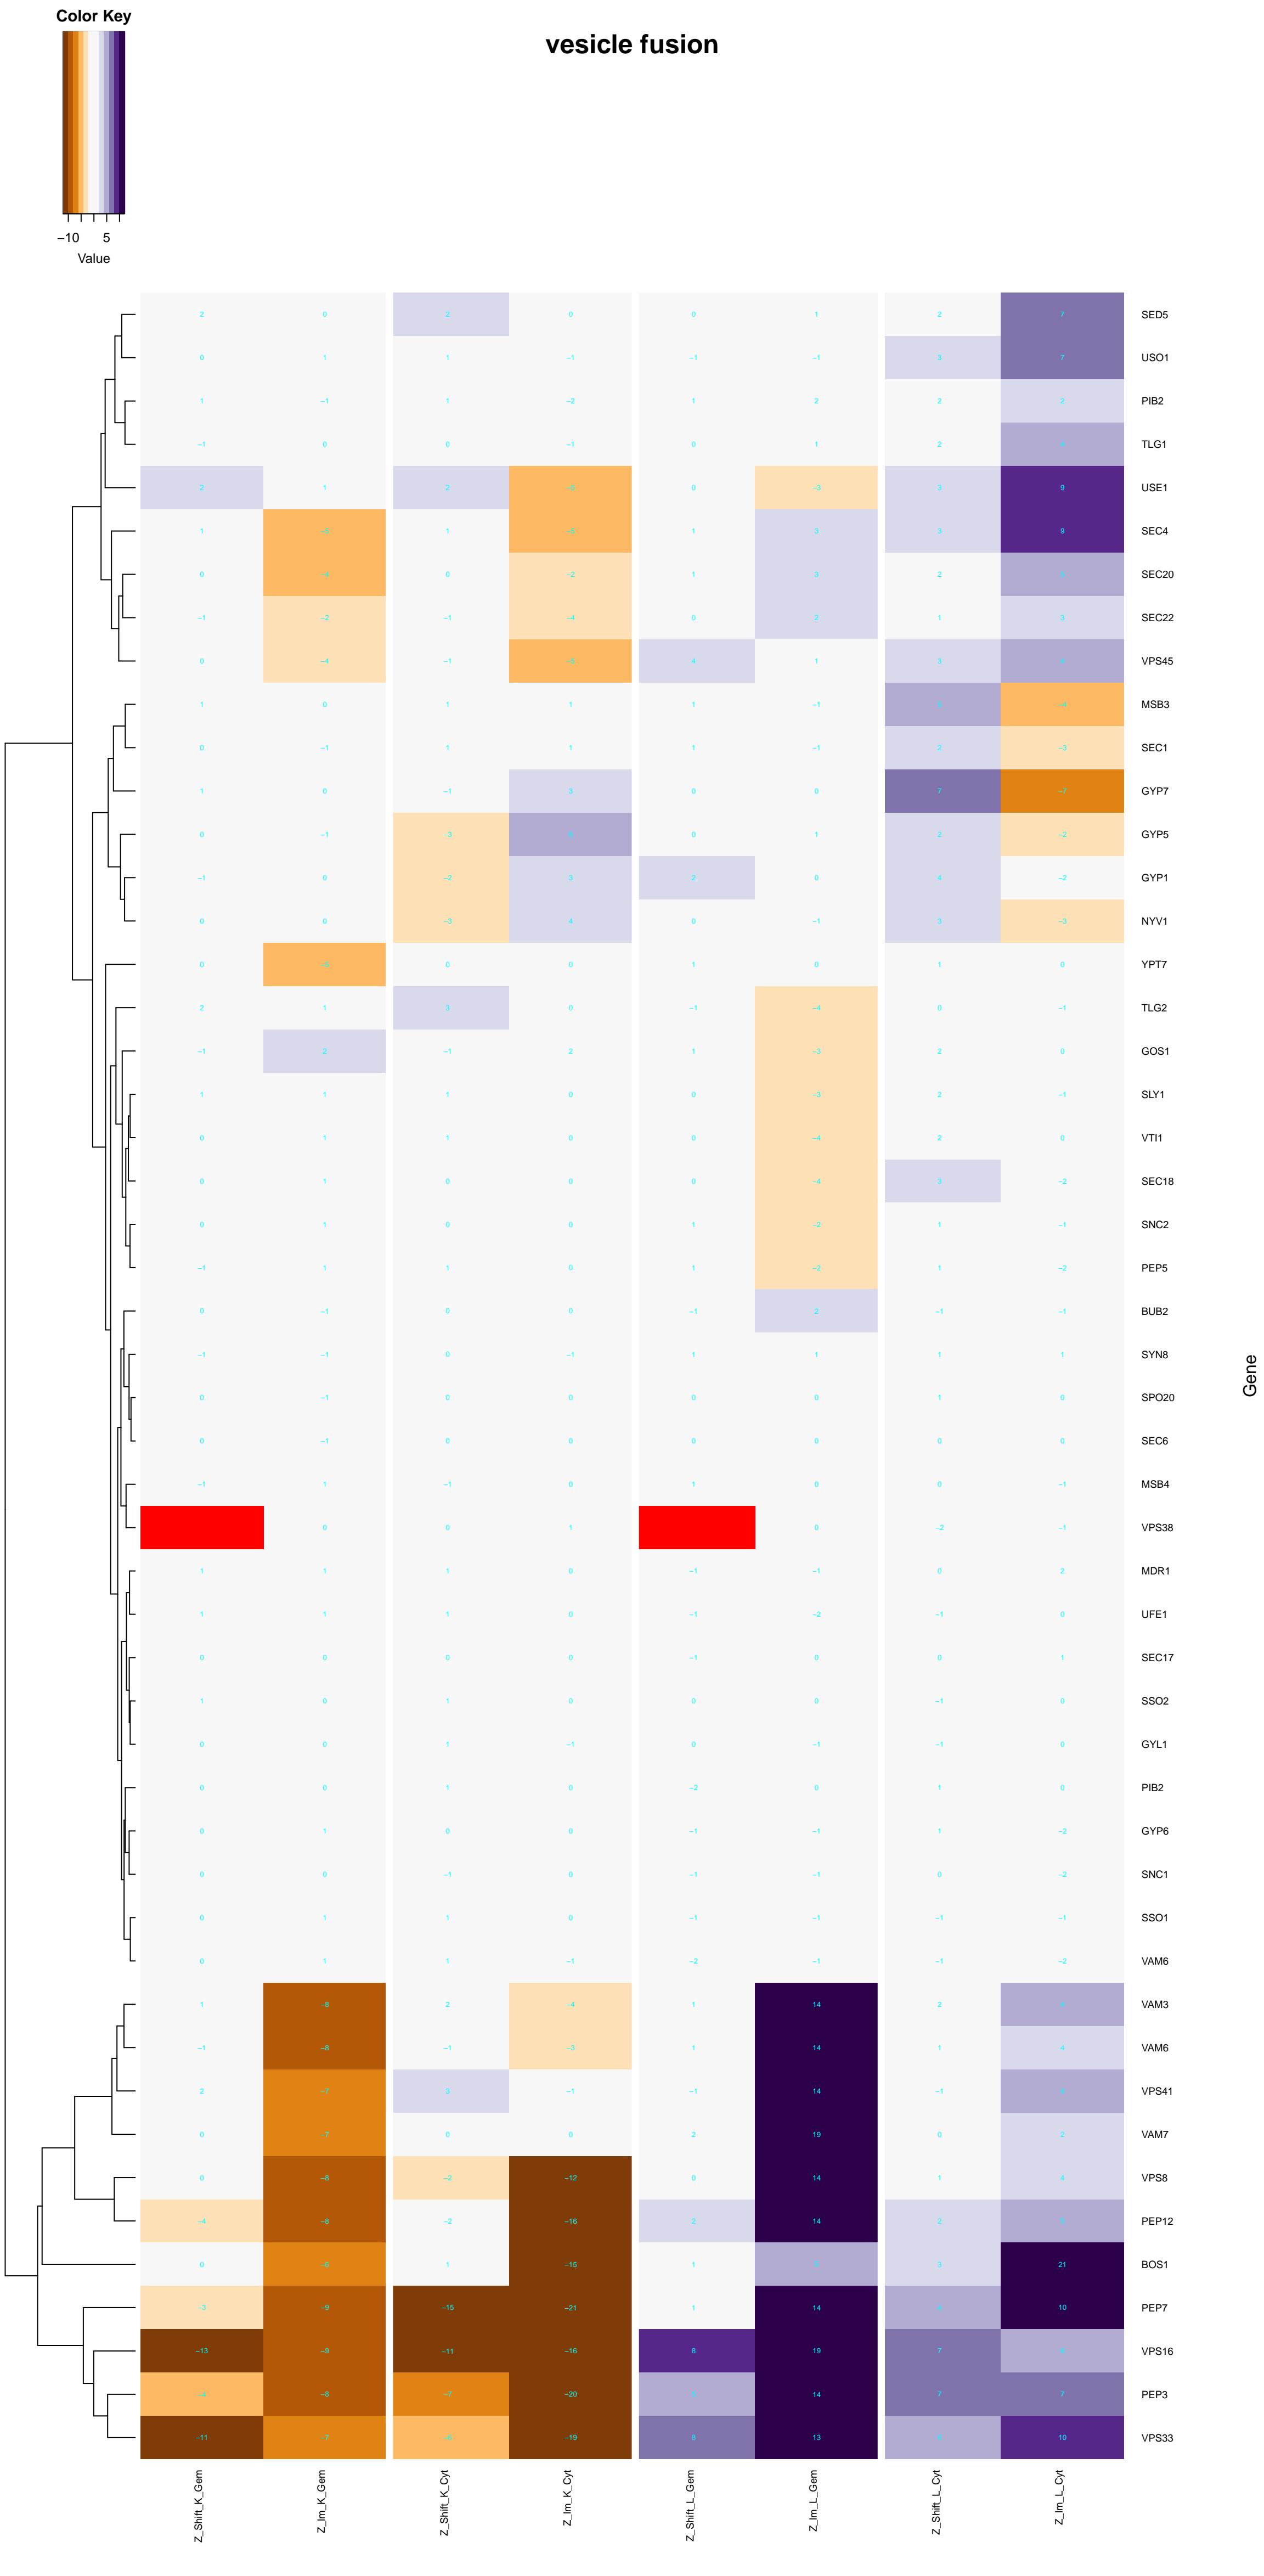

protein import into mitochondrial outer membrane

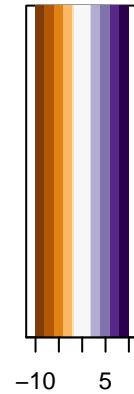

protein insertion into mitochondrial membrane from inner side

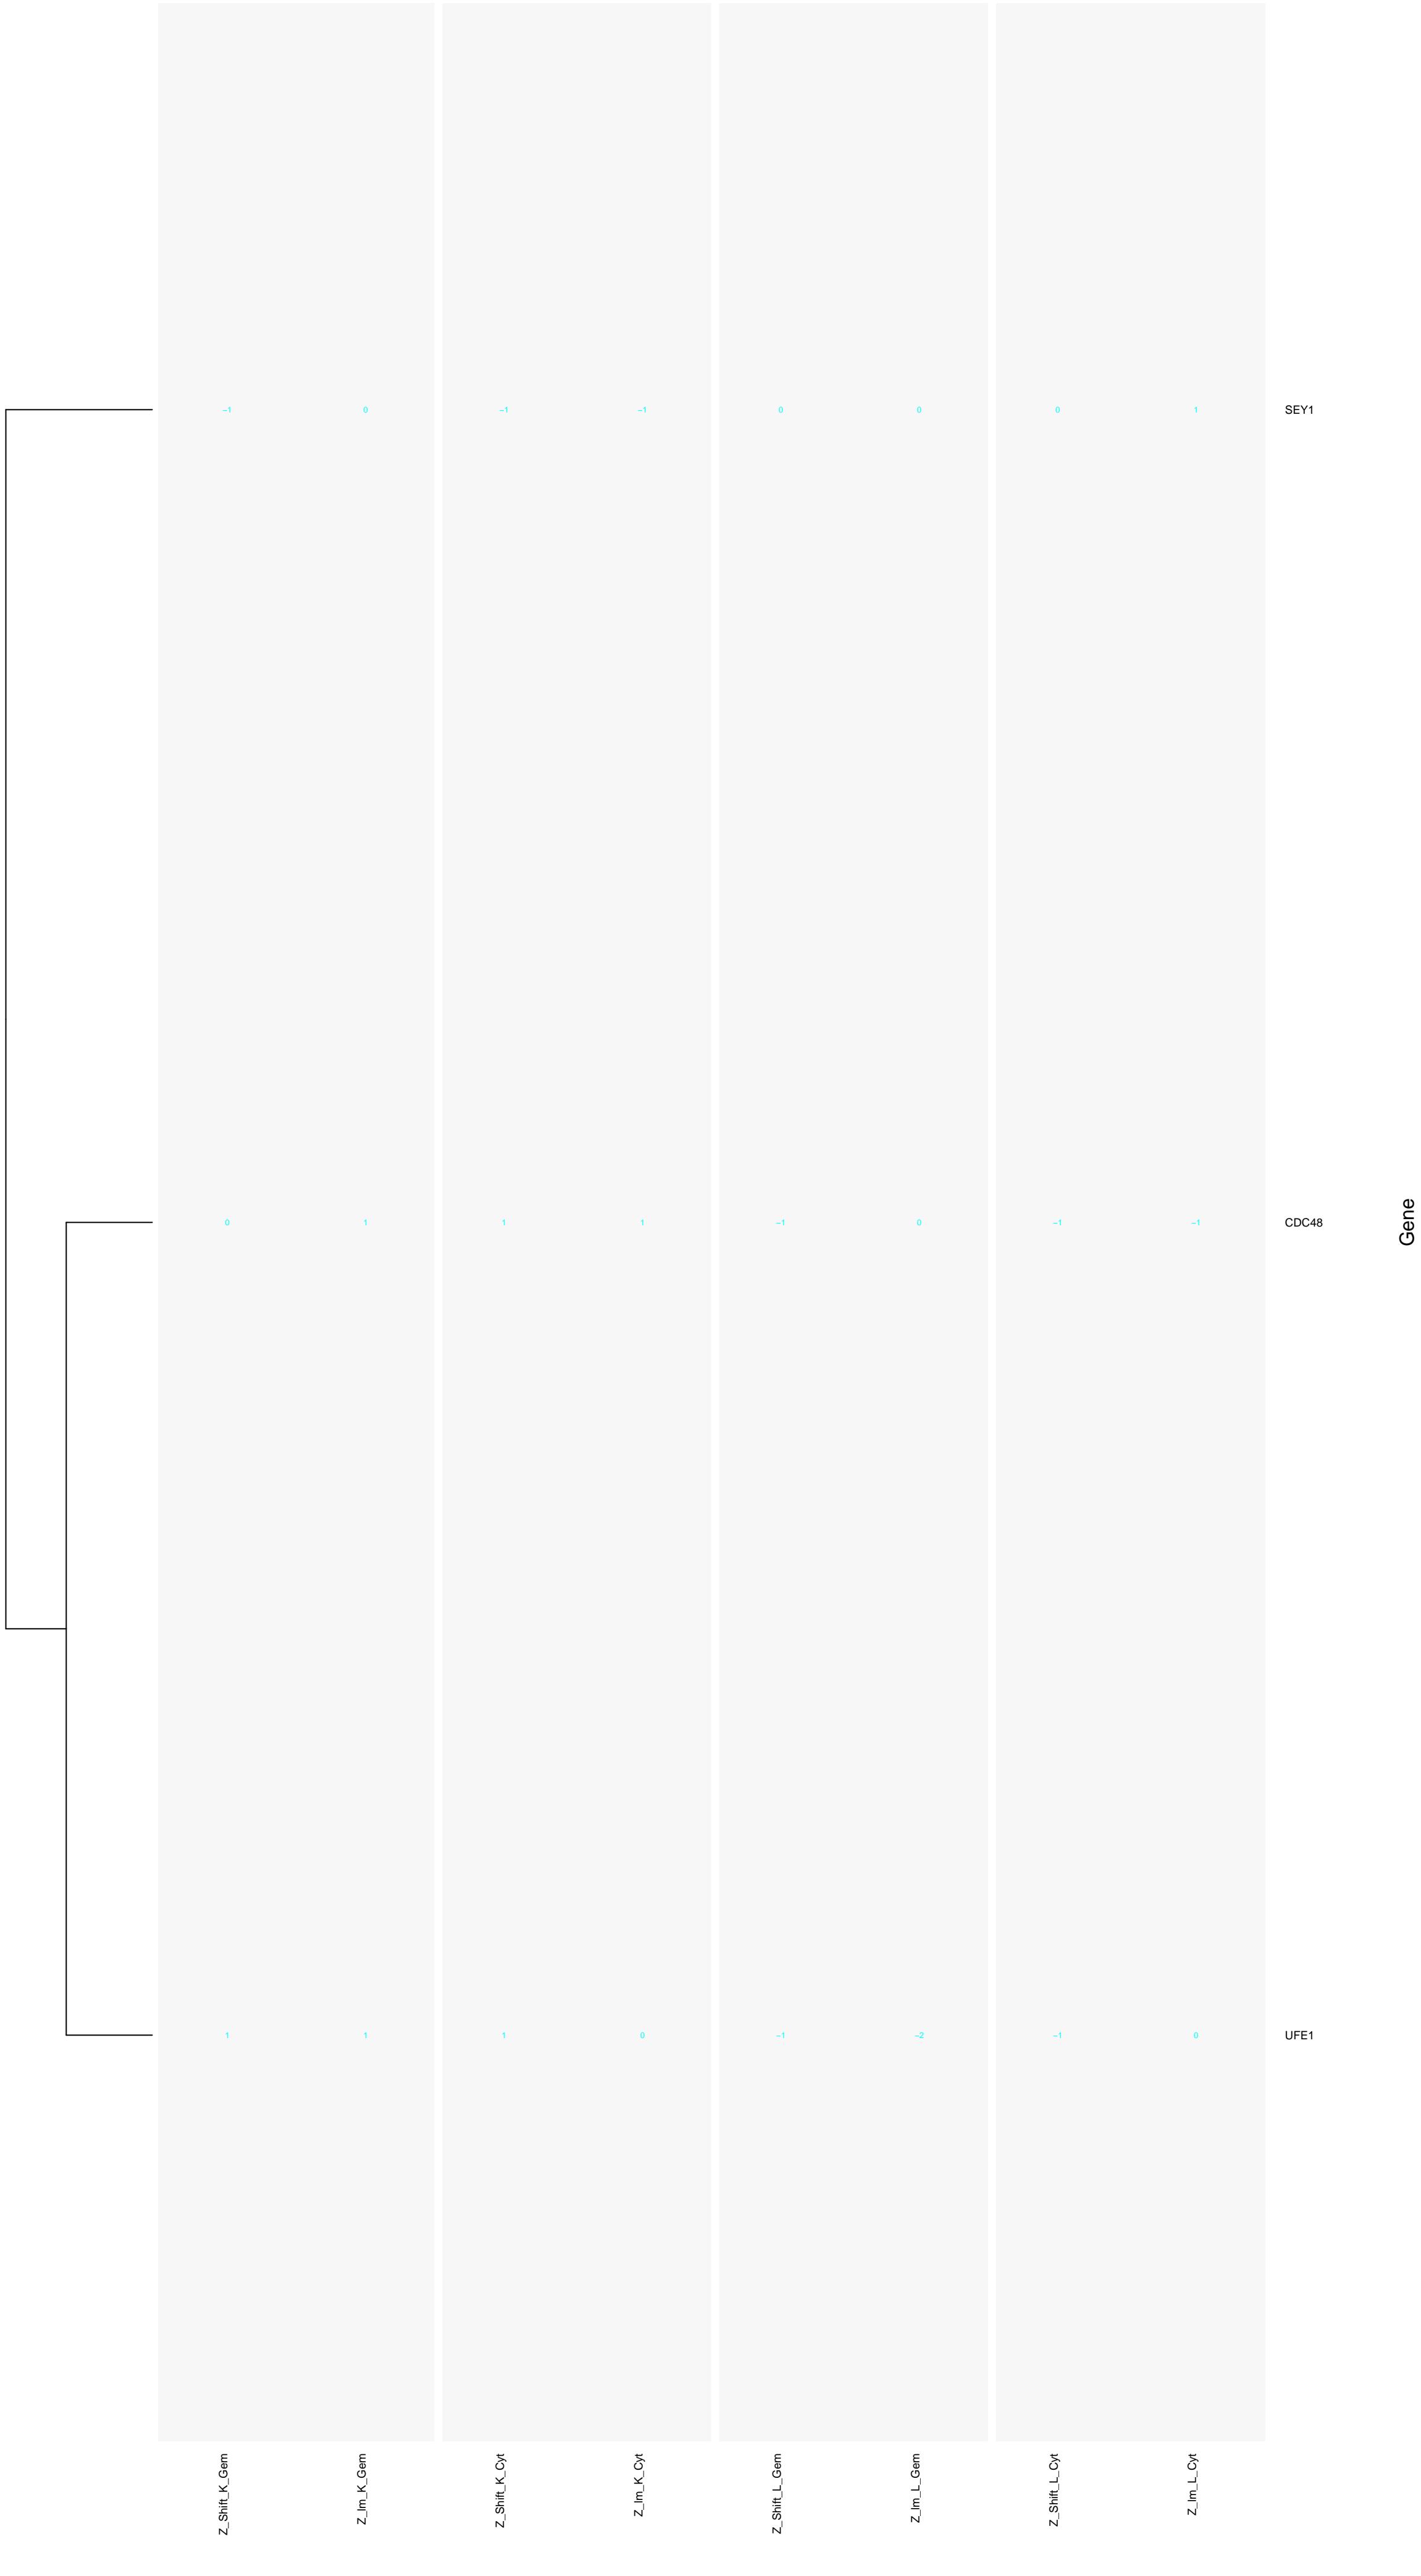

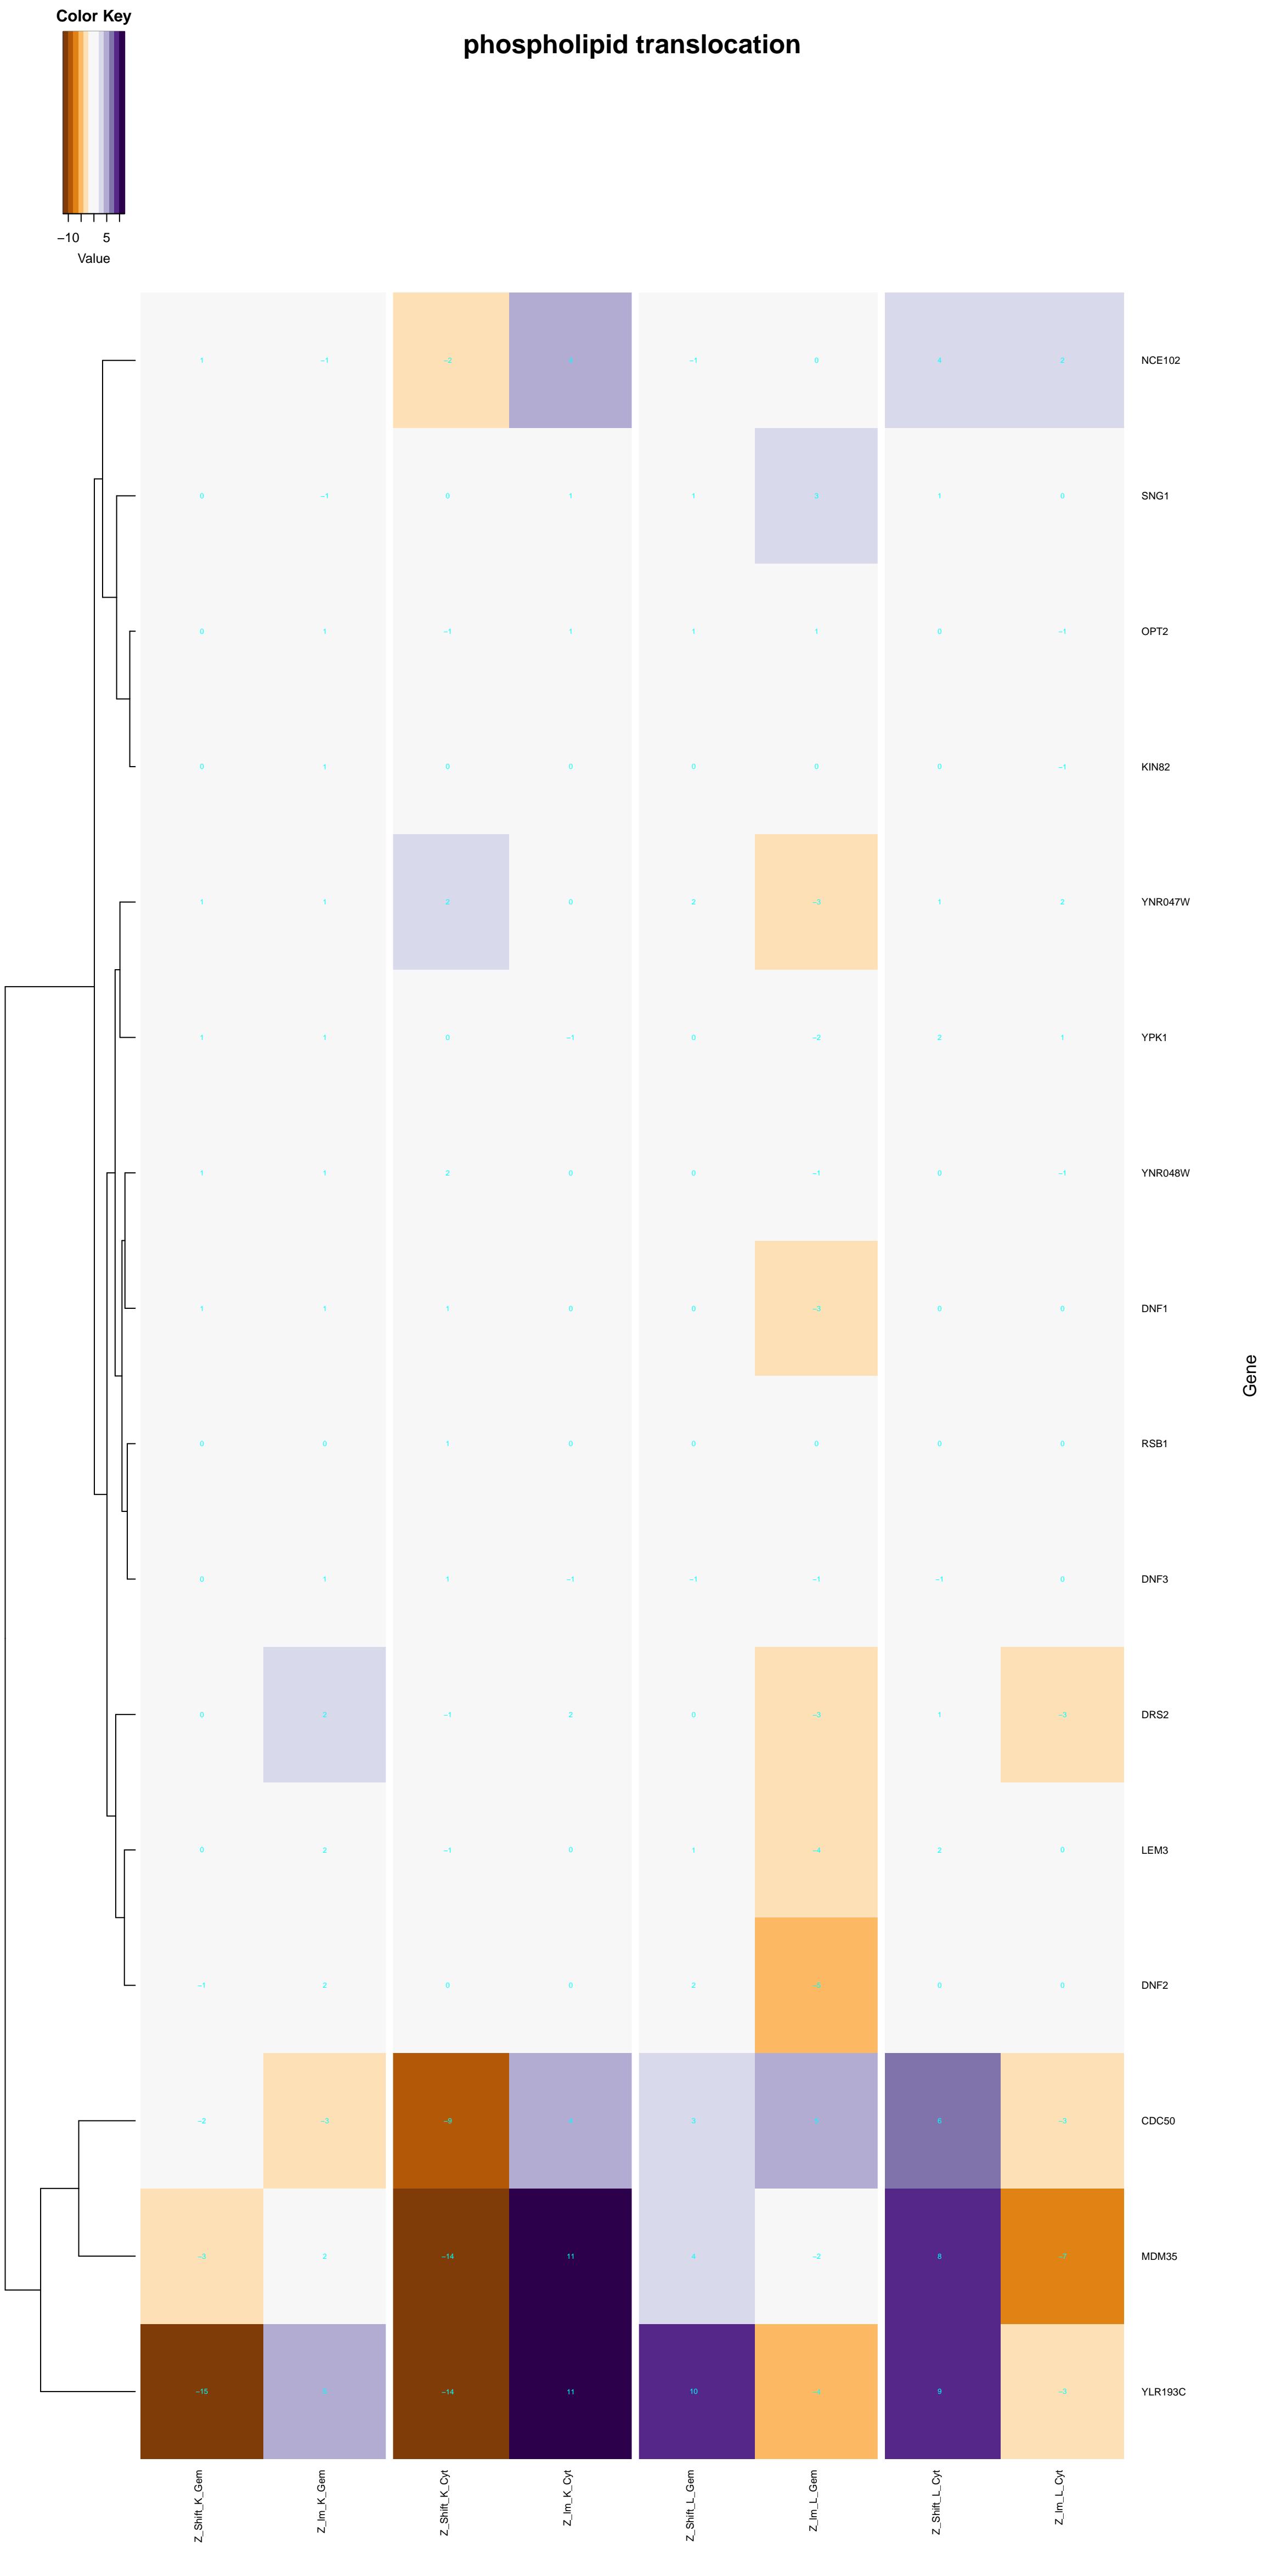

Color Key

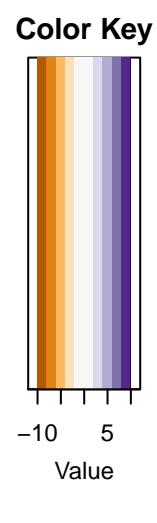

Value

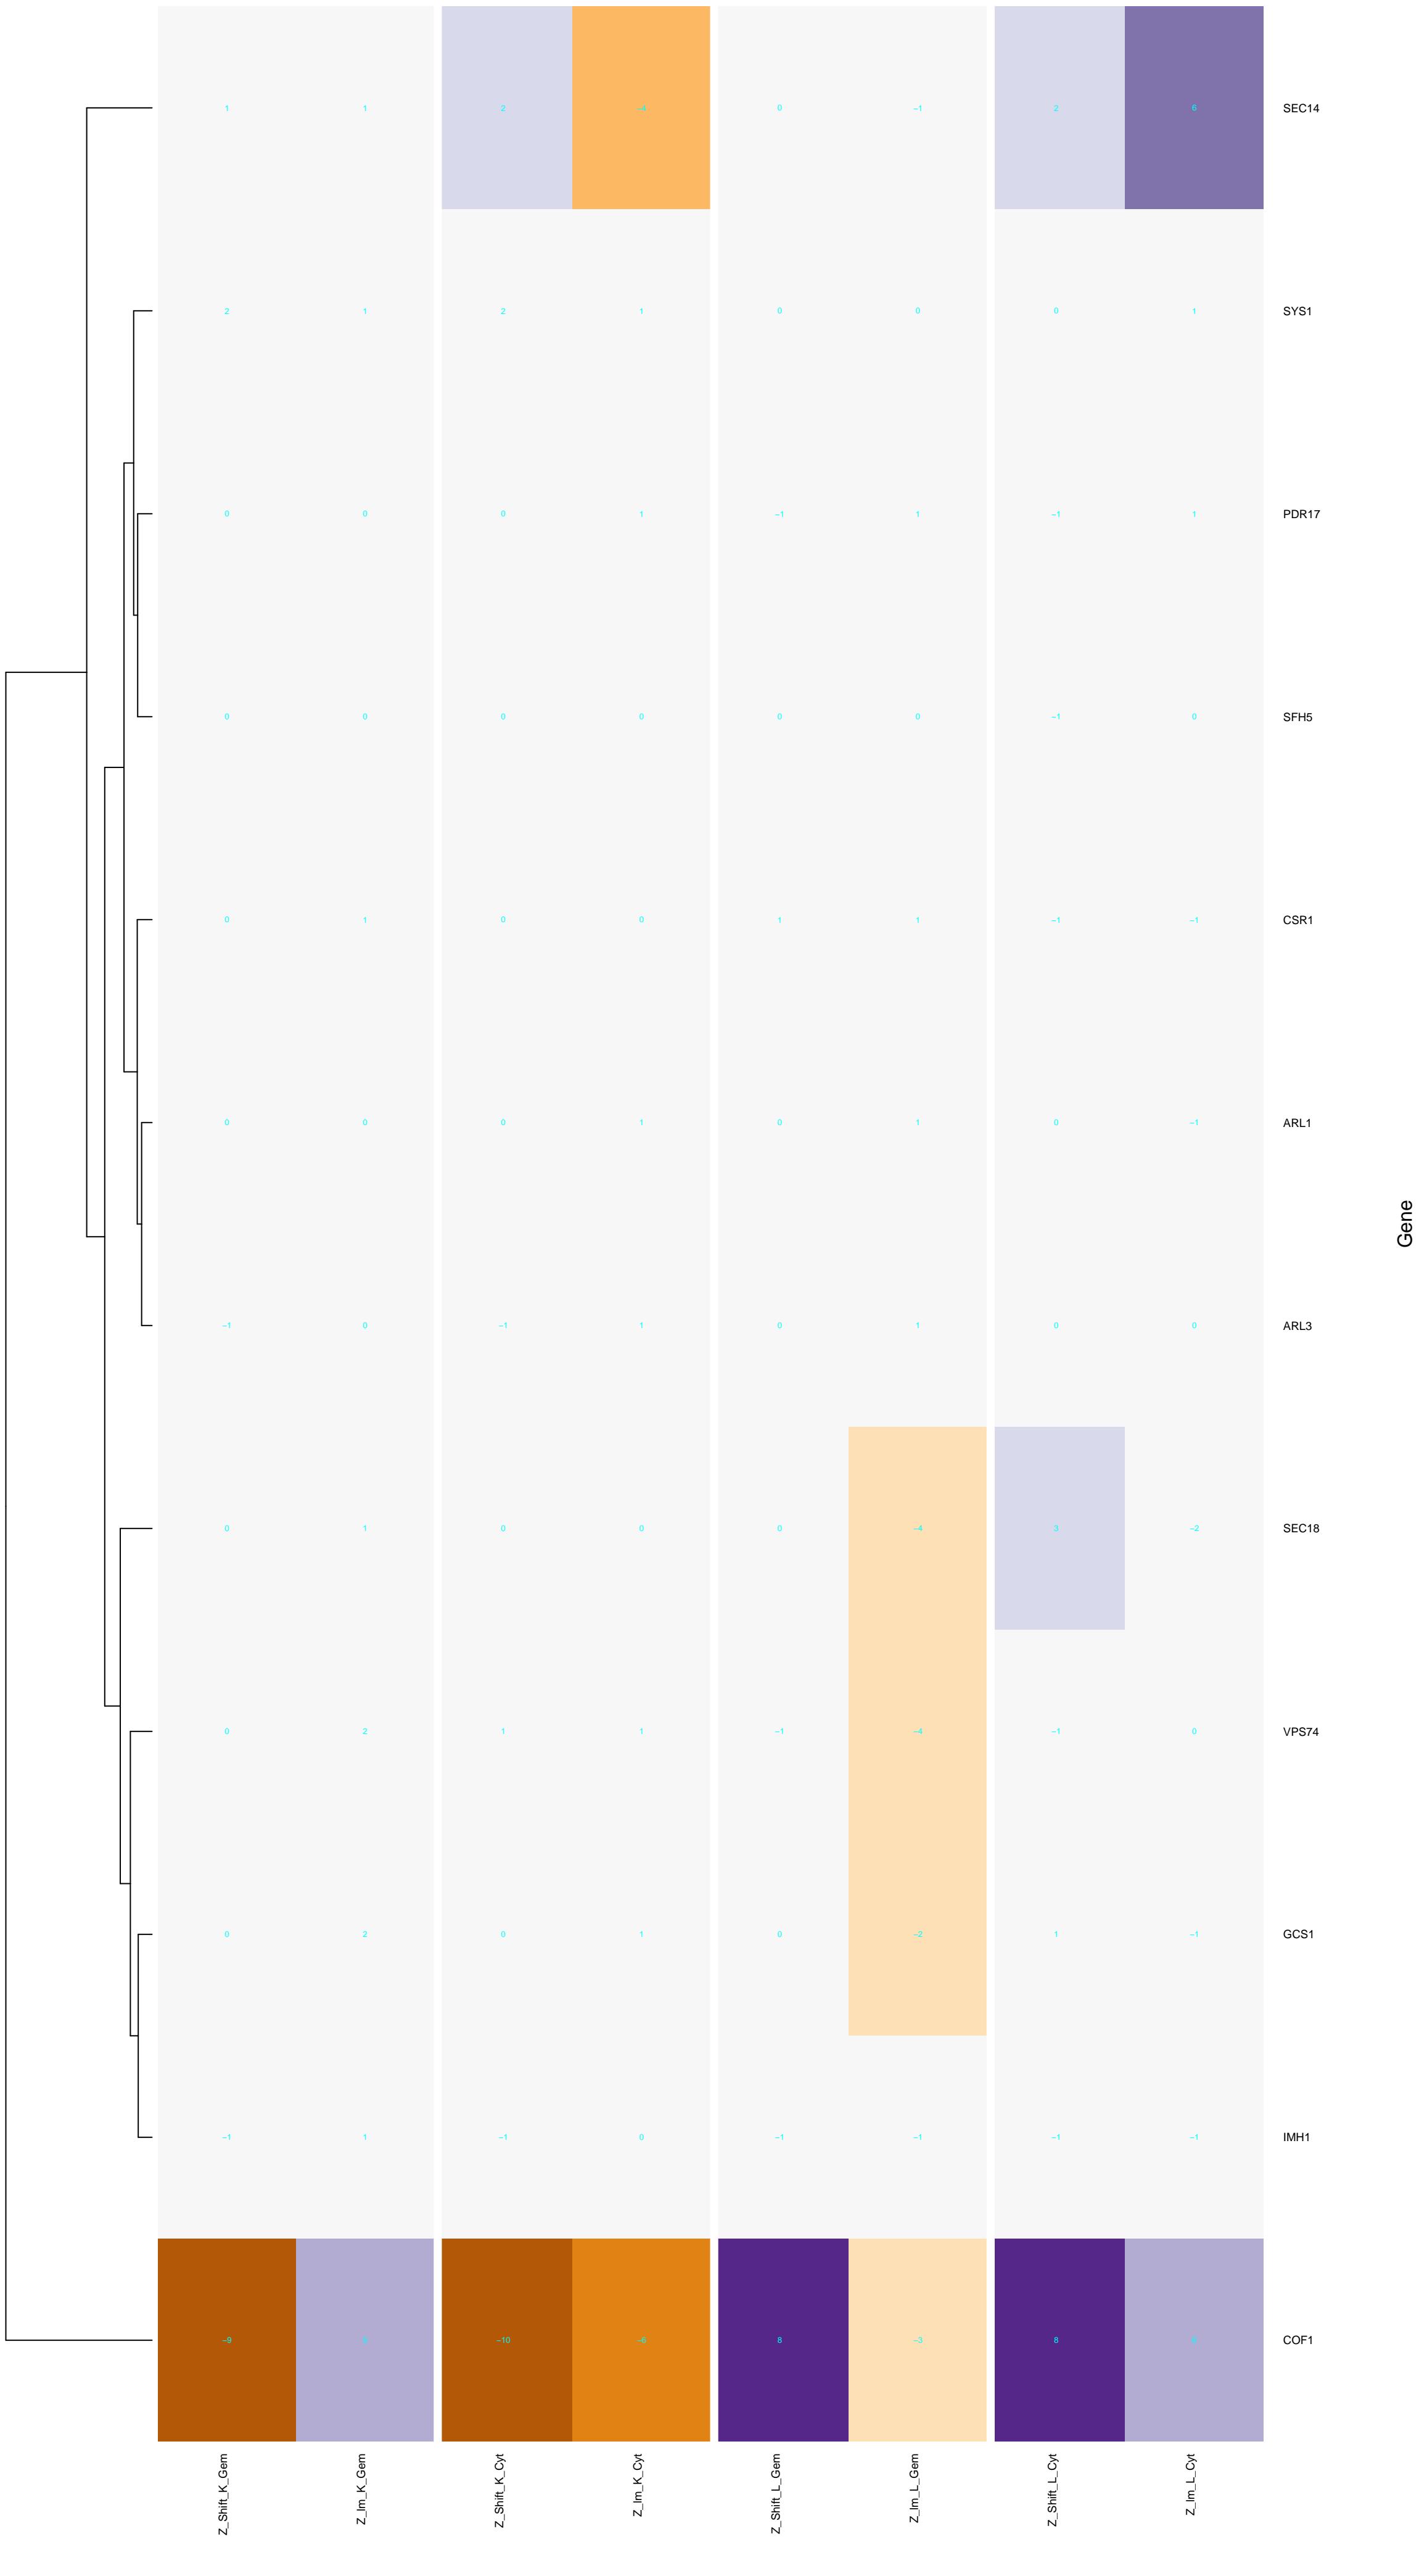

endoplasmic reticulum membrane fusion

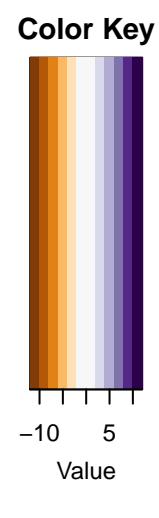

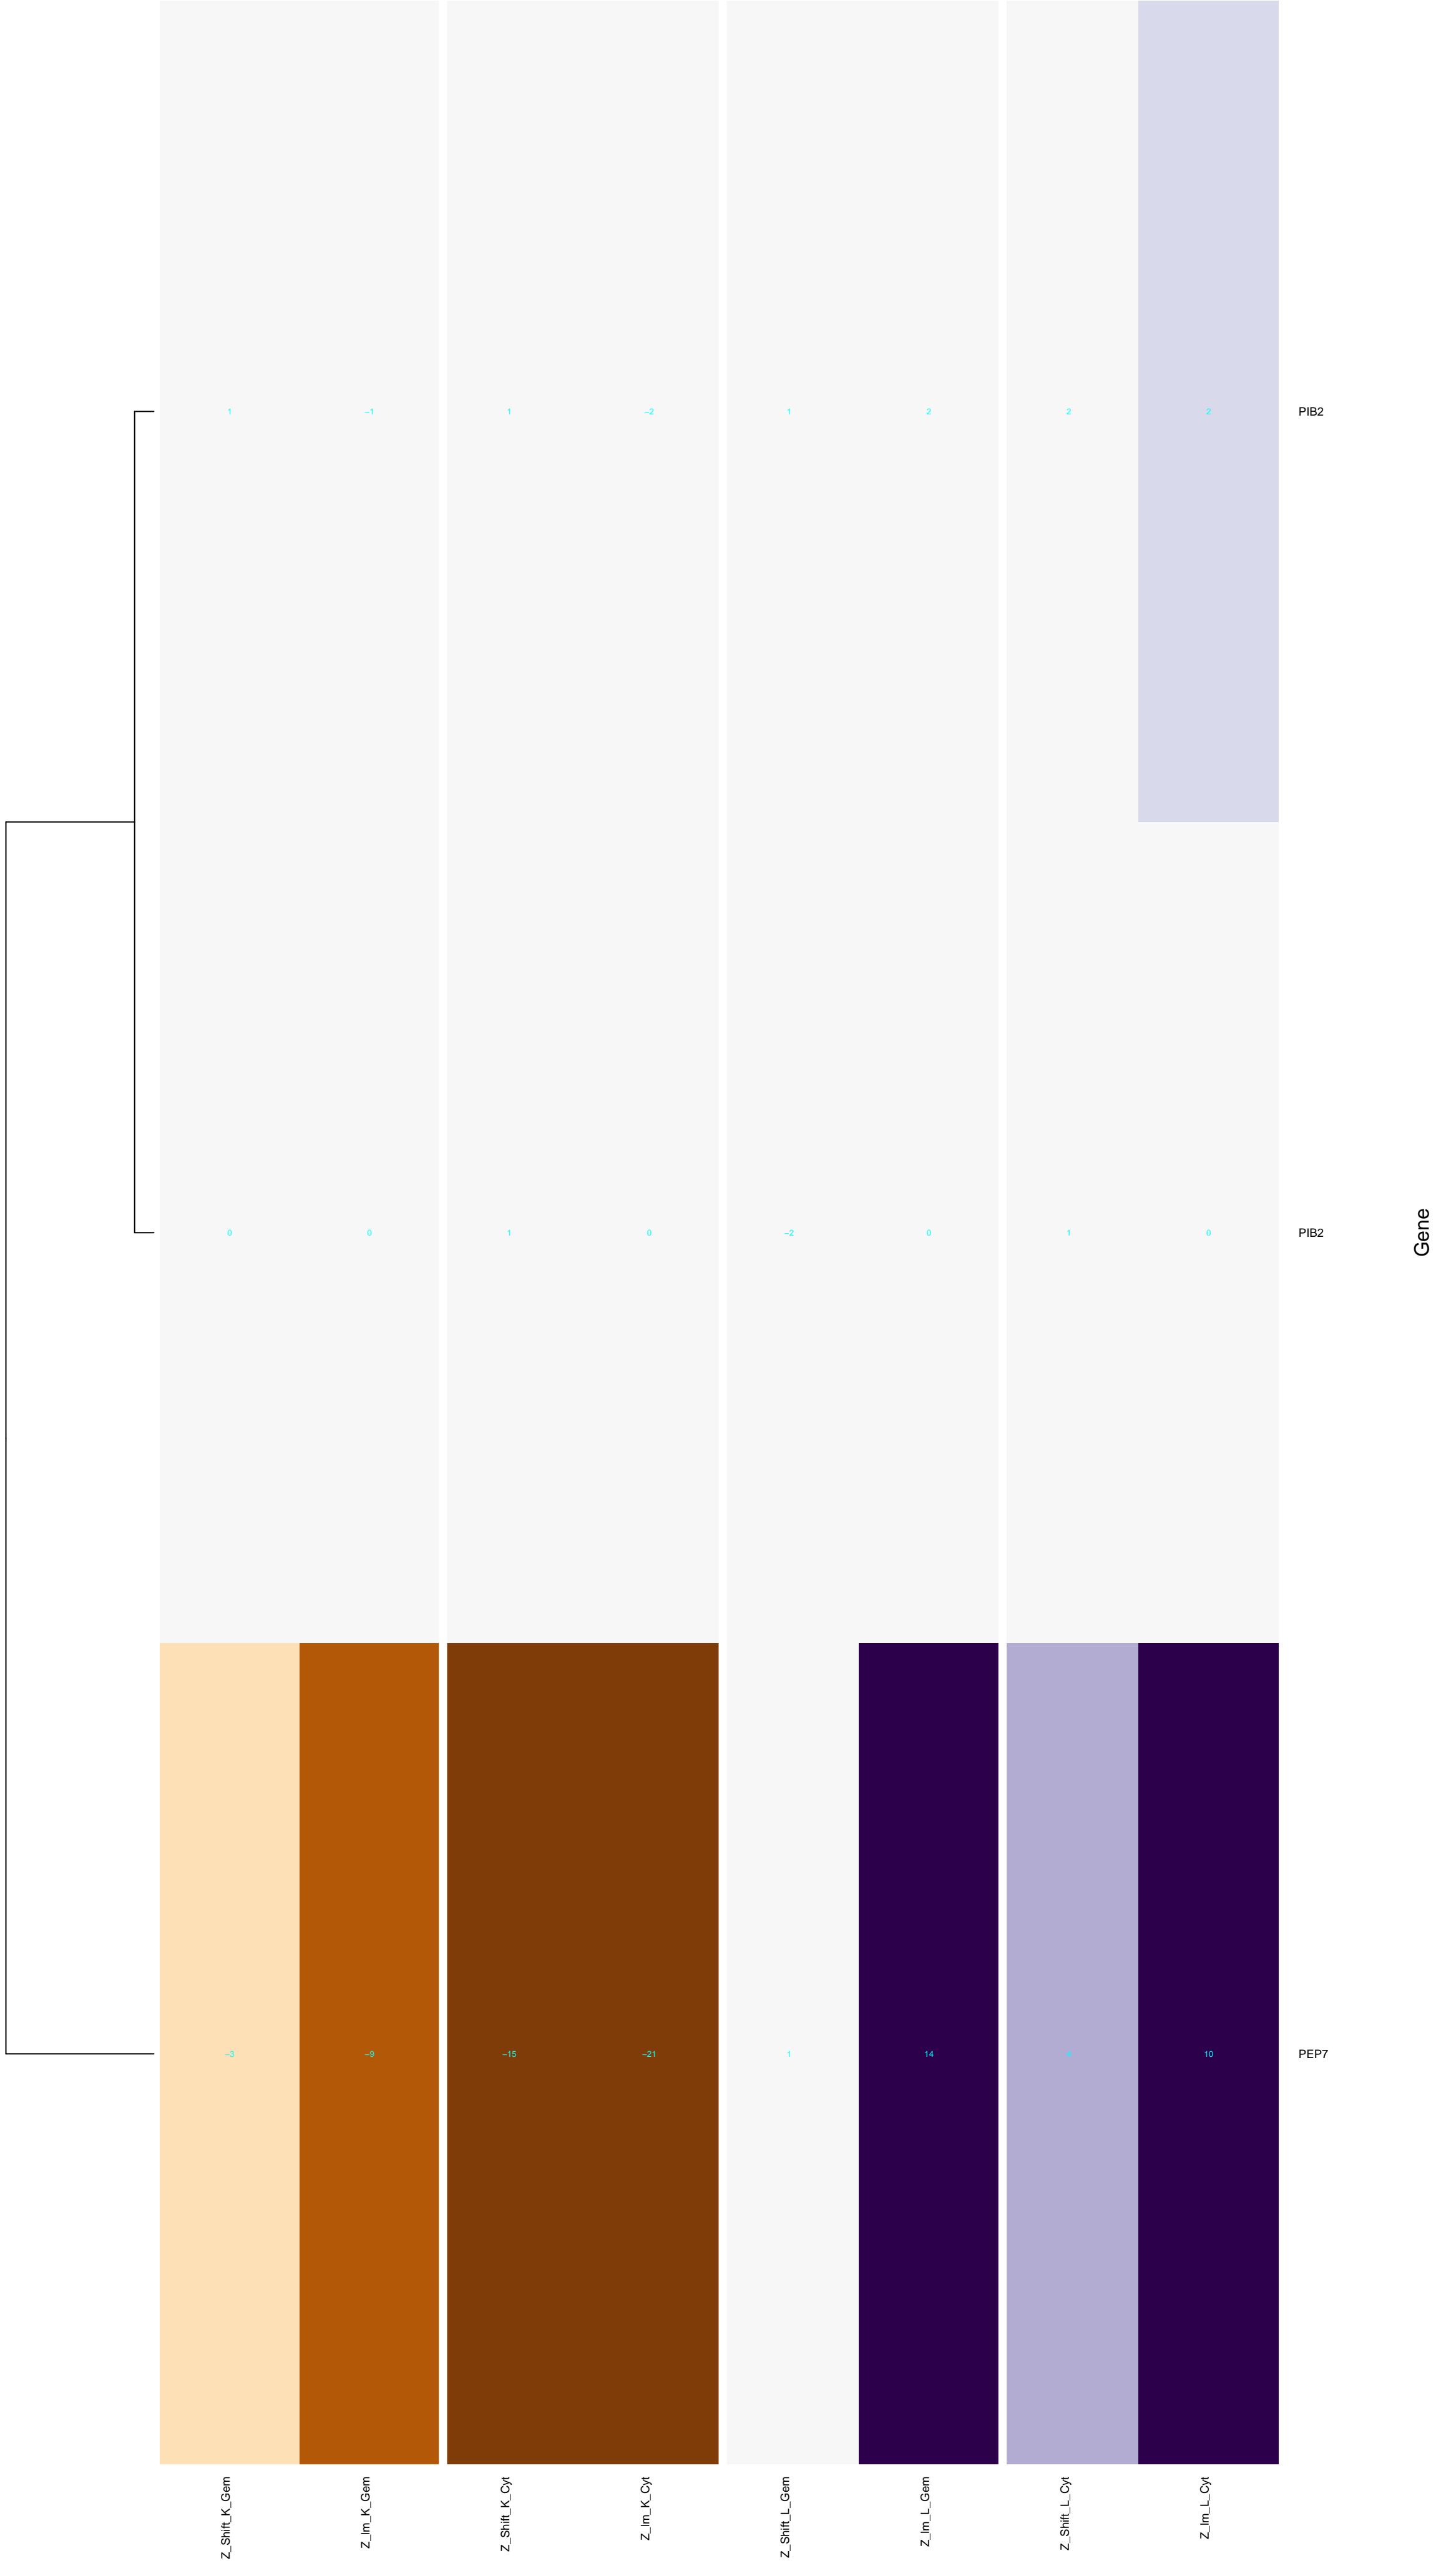

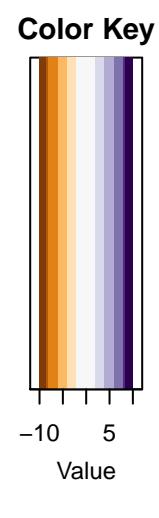

Golgi to plasma membrane protein transport

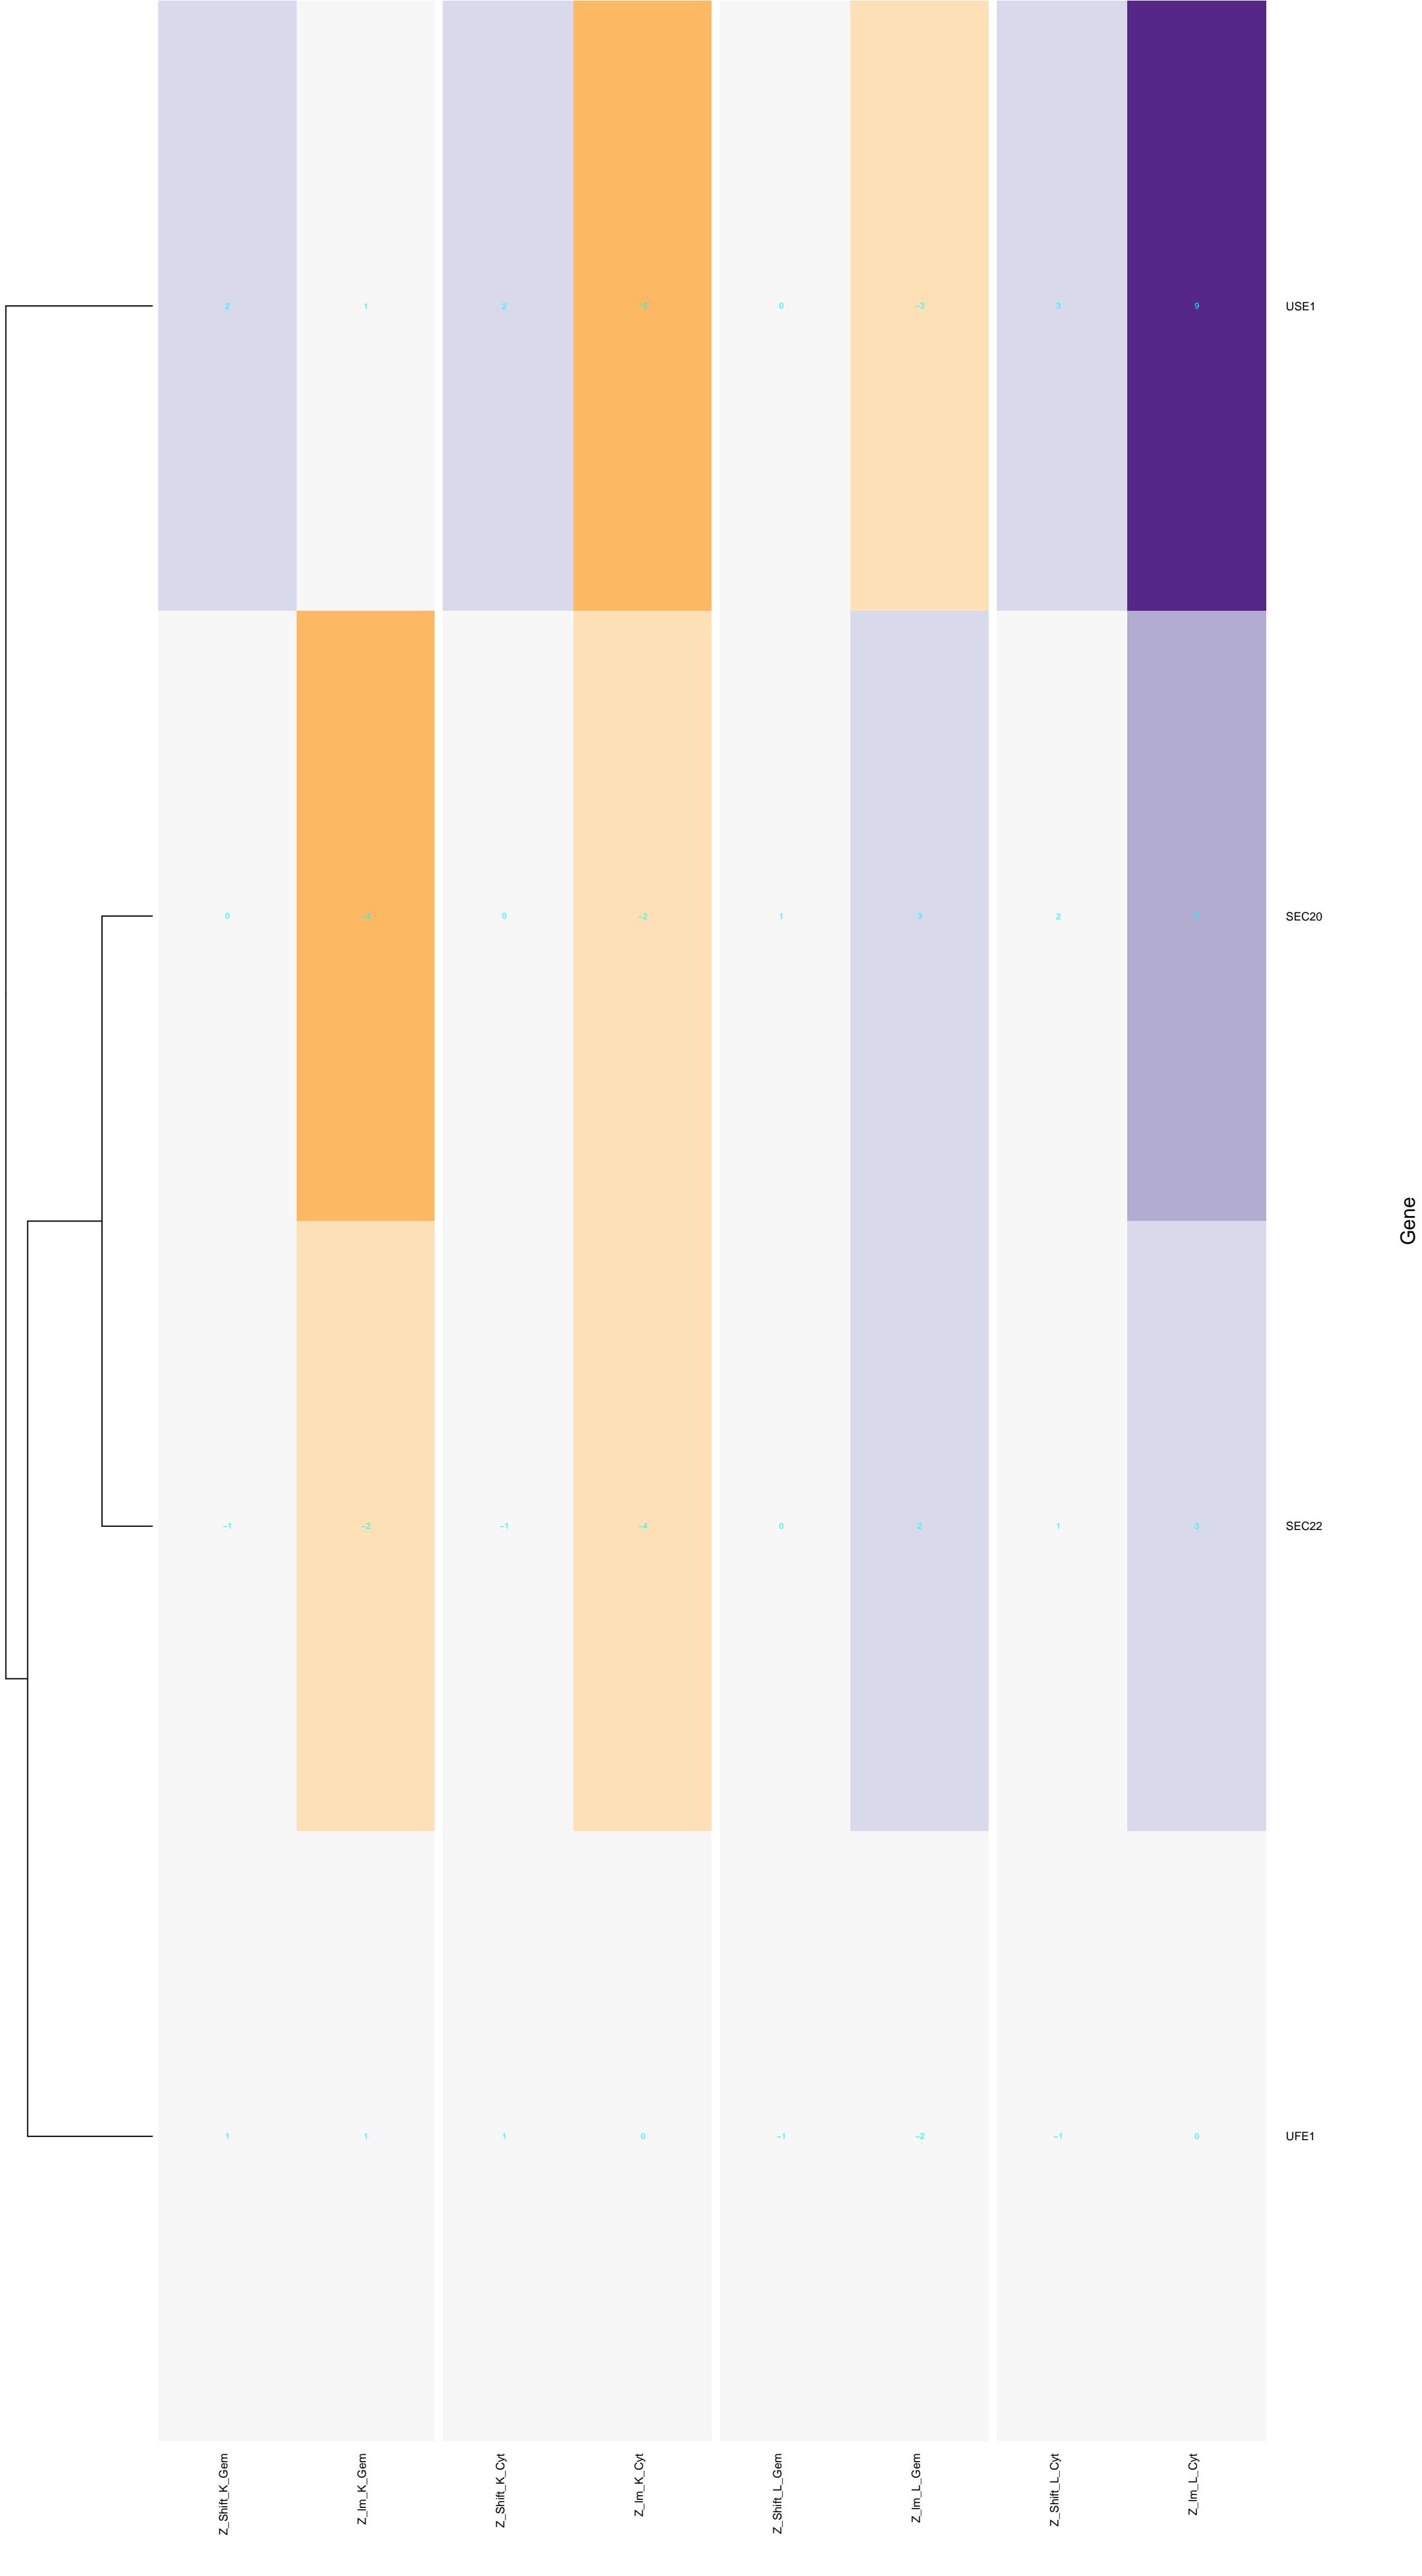

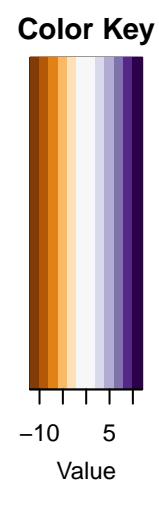

endosomal vesicle fusion

vesicle fusion with endoplasmic reticulum

vesicle fusion with Golgi apparatus
