Note: “+” represents the individual amounts less than 1% in the total quantity; “++” represents the individual amounts more than 1% and less than 10% in the total quantity; “+++” represents the individual amounts more than 10% and less than 20% in the total quantity; “++++” represents the individual amounts more than 20% in the total quantity; “-” represents no species under this sampling event. Species with a yellow background do not participate in the analysis of community dissimilarity.
