**Figure S1.** Relative percentage of inorganic elements in influent (a-c), sludge (d-f), and effluent (g-i) in 7 WWTPs. Different letters indicate statistically different (Kruskal-Wallis test; Dunn's test,  $p < 0.05$ ).

**Figure S2.** Correlation analysis among elements in influent (a), effluent (upper triangular) and sludge (lower triangular) (b).

**Figure S3.** Relationship of sludge retention time and elemental removal efficiency in seven WWTPs.

**Table S1.** Performance of each WWTP during the sampling days.

| WWTPs | Treatment process   | Performance parameters   | Jun 03 | Jun 05 | Jun 08 | Jan 04 | Jan 06 | Jan 08 |
|-------|---|--|--------|--------|--------|--------|--------|--------|
| W1    | primary sedimentation, oxidation ditches, secondary sedimentation, UV disinfection                      | Daily process capacity ( $\times 10^4 \text{ m}^3 \cdot \text{d}^{-1}$ ) | 11.4   | 10.6   | 12.0   | 6.1    | 7.2    | 6.6    |
|       |   | Daily activated sludge production (t)                                    | 248.4  | 256.7  | 240.2  | 265.2  | 252.6  | 249.0  |
|       |   | Daily excess sludge production (t)                                       | 20.6   | 24.9   | 26.9   | 20.7   | 22.7   | 18.3   |
| W2    | primary sedimentation, oxidation ditches, secondary sedimentation, UV disinfection                      | Daily process capacity ( $\times 10^4 \text{ m}^3 \cdot \text{d}^{-1}$ ) | 9.1    | 8.8    | 9.4    | 9.5    | 9.4    | 9.4    |
|       |   | Daily activated sludge production (t)                                    | 111.3  | 106.6  | 108.0  | 128.9  | 144.6  | 139.6  |
|       |   | Daily excess sludge production (t)                                       | 7.7    | 7.2    | 8.5    | 11.2   | 12.2   | 14.7   |
| W3    | primary sedimentation, A <sup>2</sup> /O or oxidation ditches, secondary sedimentation, UV disinfection | Daily process capacity ( $\times 10^4 \text{ m}^3 \cdot \text{d}^{-1}$ ) | 9.2    | 9.8    | 9.8    | 9.2    | 9.0    | 8.5    |
