

Supplementary Materials: Investigating Multiple Household Water Sources and Uses with a Computer-Assisted Personal Interviewing (CAPI) Survey

Morgan C. MacDonald, Mark Elliott, Terence Chan, Annika Kearton, Katherine F. Shields, Jamie Bartram and Wade L. Hadwen

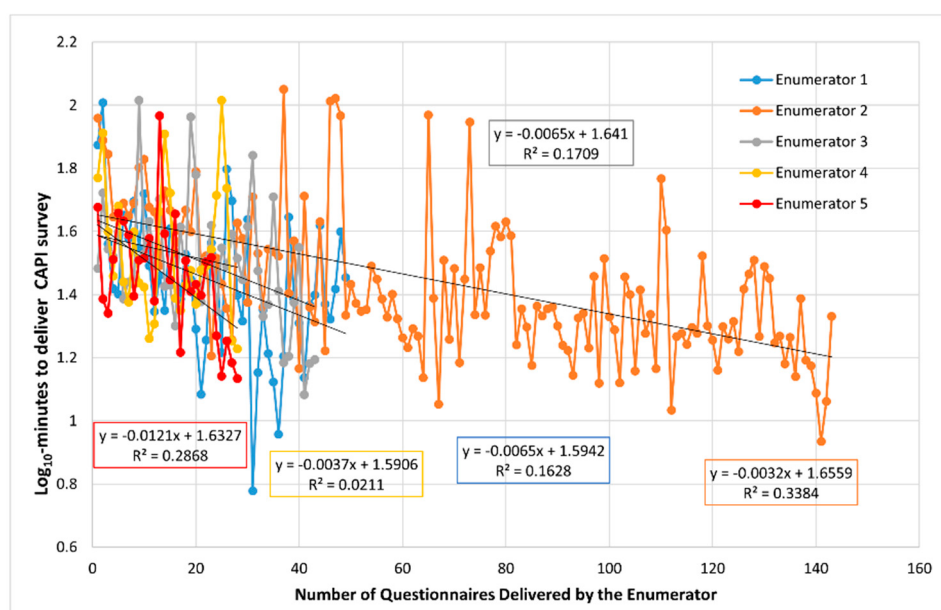

Figure S1. Relationship between CAPI survey duration and enumerator experience for individual enumerators.

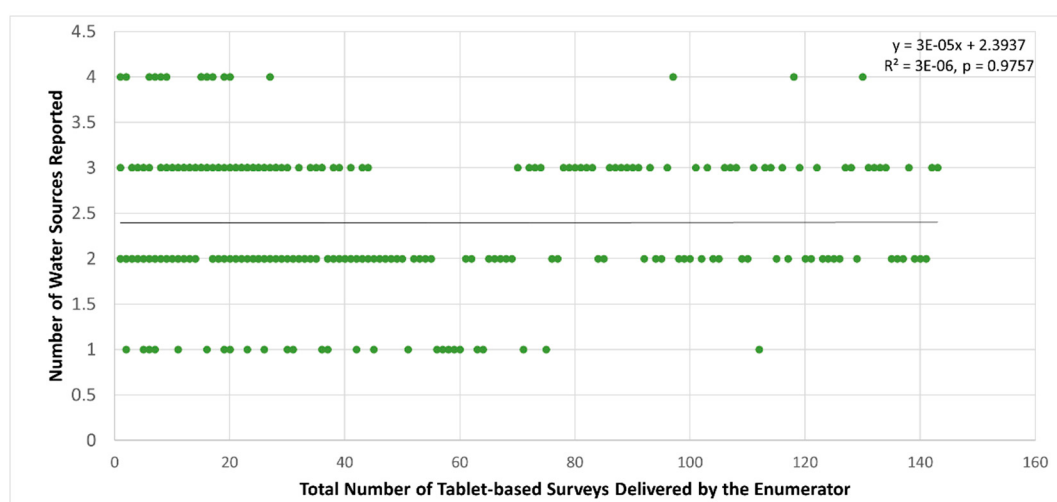

Figure S2. No significant relationship between number of water sources reported and enumerator experience.

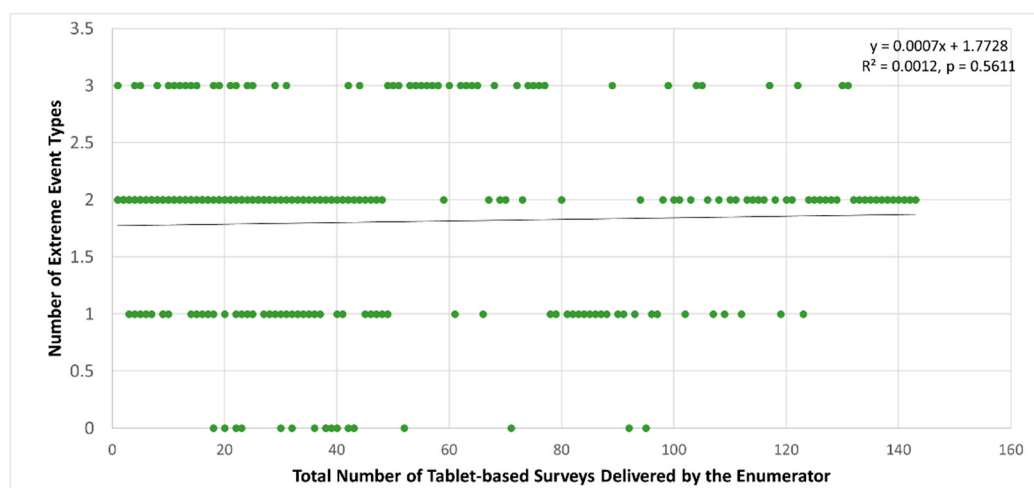

Figure S3. No significant relationship between number of extreme event types reported and enumerator experience.
