I found messy code in Figure 13b (page 1639) in my published paper in *Symmetry* [1]. A correct figure is provided here.

**Figure 13.** (a) Simulated UV and CD spectra of (SiH\(_2\))\(_{13}\) with a dihedral angle of P-140°, (b) simulated \(g_{\text{CD}}\) as a function of the dihedral angle in H-(SiH\(_2\))\(_{13}\)-H, (c) photoexcitation energies (singlet and triplet states) of H-(SiH\(_2\))\(_{13}\)-H as a function of the dihedral angle.
