

Supplementary Table 6. Studies reporting the association between the De Ritis ratio and disease severity and survival status in COVID-19 patients using hazard ratios.

First author, year, country	Study design	N	Age (Years)	Gender (M/F)	OR	(95% CI)	Outcome
Davidov-Derevynko Y, 2020, Israel (21)	R	324	59	232/92	2.95	1.4-6.15	Mortality
Liu Z, 2021, China (24)	R	1,788	59	913/826	3.348	1.57-7.139	Mortality
Zinellu A, 2021, Italy (25)	R	105	72	35/70	2.46	1.05-5.73	Mortality
Domjanovic J, 2022, Croatia (42)	R	65	57	22/43	3.83	1.57-9.35	Mortality
Fu Y, 2022, China (45)	R	4,371	64	NR	1.04	1.01-1.07	Mortality

Legend: M, male; F, female; NR, not reported; OR, odds ratio; CI, confidence interval; R, retrospective.
