

Table S1: Factors leading to ECMO Implantation.

| Category                           |                                                                                                                                                                                          |
|------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Respiratory problem / lung failure | <ul style="list-style-type: none"> <li>❖ ARDS</li> <li>❖ Pneumonia (viral/bacterial/aspiration)</li> <li>❖ Pulmonary hypertension</li> <li>❖ Underlying cardiac diagnosis</li> </ul>     |
| Cardiac failure                    | <ul style="list-style-type: none"> <li>❖ Intractable arrhythmia</li> <li>❖ Myocarditis</li> </ul>                                                                                        |
| Sepsis                             | <ul style="list-style-type: none"> <li>❖ Hospital-acquired infections (postoperative infection, catheter-associated infection)</li> <li>❖ Out of hospital-acquired infections</li> </ul> |
| Postcardiotomy ECMO                | <ul style="list-style-type: none"> <li>❖ Failure to wean from CPB</li> <li>❖ Stunned myocardium</li> <li>❖ Low cardiac output syndrome</li> </ul>                                        |
| eCPR                               | <ul style="list-style-type: none"> <li>❖ Cardiac arrest refractory to CPR</li> </ul>                                                                                                     |

ARDS - acute respiratory distress syndrome; CPB - cardiopulmonary bypass; ECMO - extracorporeal membrane oxygenation; eCPR - extracorporeal cardiopulmonary resuscitation.

Table S2: Other Diagnosis

- ❖ Asplenia
- ❖ Cardiac tumor
- ❖ Congenital hypothyroidism
- ❖ Cornelia-de-Lange-syndrome
- ❖ Cystic fibrosis
- ❖ DiGeorge syndrome
- ❖ Hypogammaglobulinemia
- ❖ Kartagener syndrome
- ❖ Macrocephaly
- ❖ Situs inversus abdominalis
- ❖ Trisomy 21
- ❖ Uhl's disease
- ❖ Ulrich-Turner syndrome
- ❖ VACTERL association
