Figures S1: Reference intervals for PT in seconds (A), aPTT in seconds (B), PTT-LA in seconds (C), DRVV Screening in seconds (D) and APCR in seconds (E) in the subjects subgrouped by sex and age. The horizontal segments represent the RIs, while the vertical segments indicate the limits of the 90% confidence interval of the RIs. For each class RIs are reported combining males and females (red) or, respectively, only in females (green) or males (blue)
