Table S1. Mean (micrograms of glucose released per minute (U/min)) and Standard error (SE) for endo β -1, 4 glucanase activity assay of PEA1, PEA2, 34OX and 1757 OX upon addition of glucose, citrus pectin, oat bran, sokolik and santana extract. The results were statistically insignificant ($p>0.05$).

Endo β -1, 4- glucanase

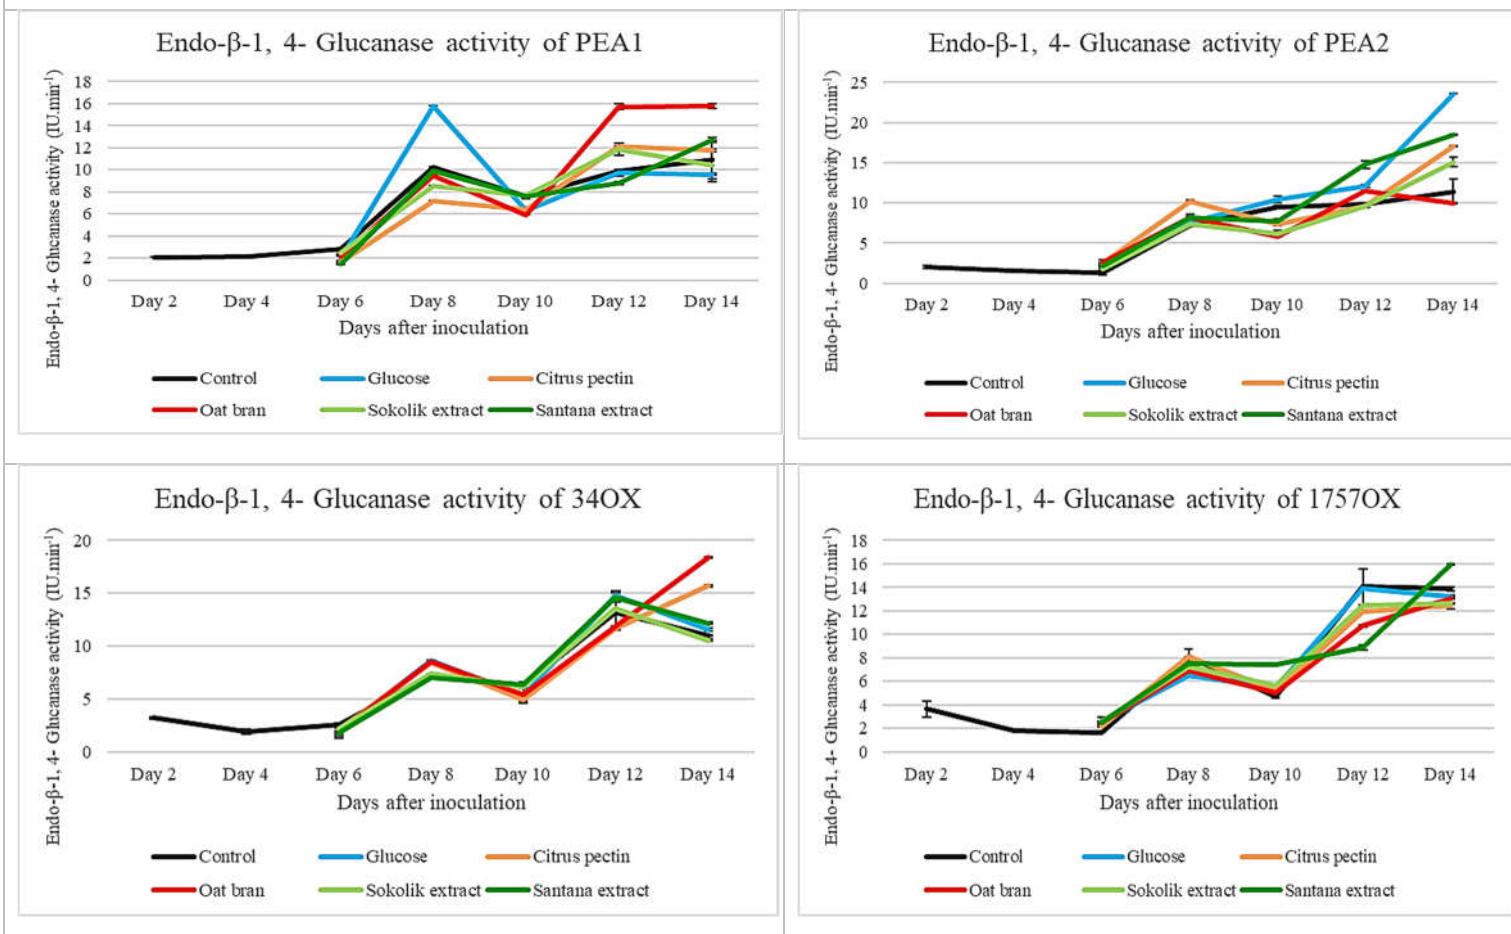

Figure S1. Endo β -1, 4 glucanase activity (micrograms of glucose released per minute (U/min)) of PEA1, PEA2, 34OX and 1757 OX upon addition of glucose, citrus pectin, oat bran, sokolik and santana extract. Error bar represent standard error.

Table S5. Mean(micromoles of galacturonic acid produced per minute (U/min)) and Standard error (SE) for polygalacturonase activity assay of PEA1, PEA2, 34OX and 1757 OX upon addition of glucose, citrus pectin, oat bran, sokolik and santana extract. Statistically significant values are given in red color ($p<0.05$).

Polygalacturonase

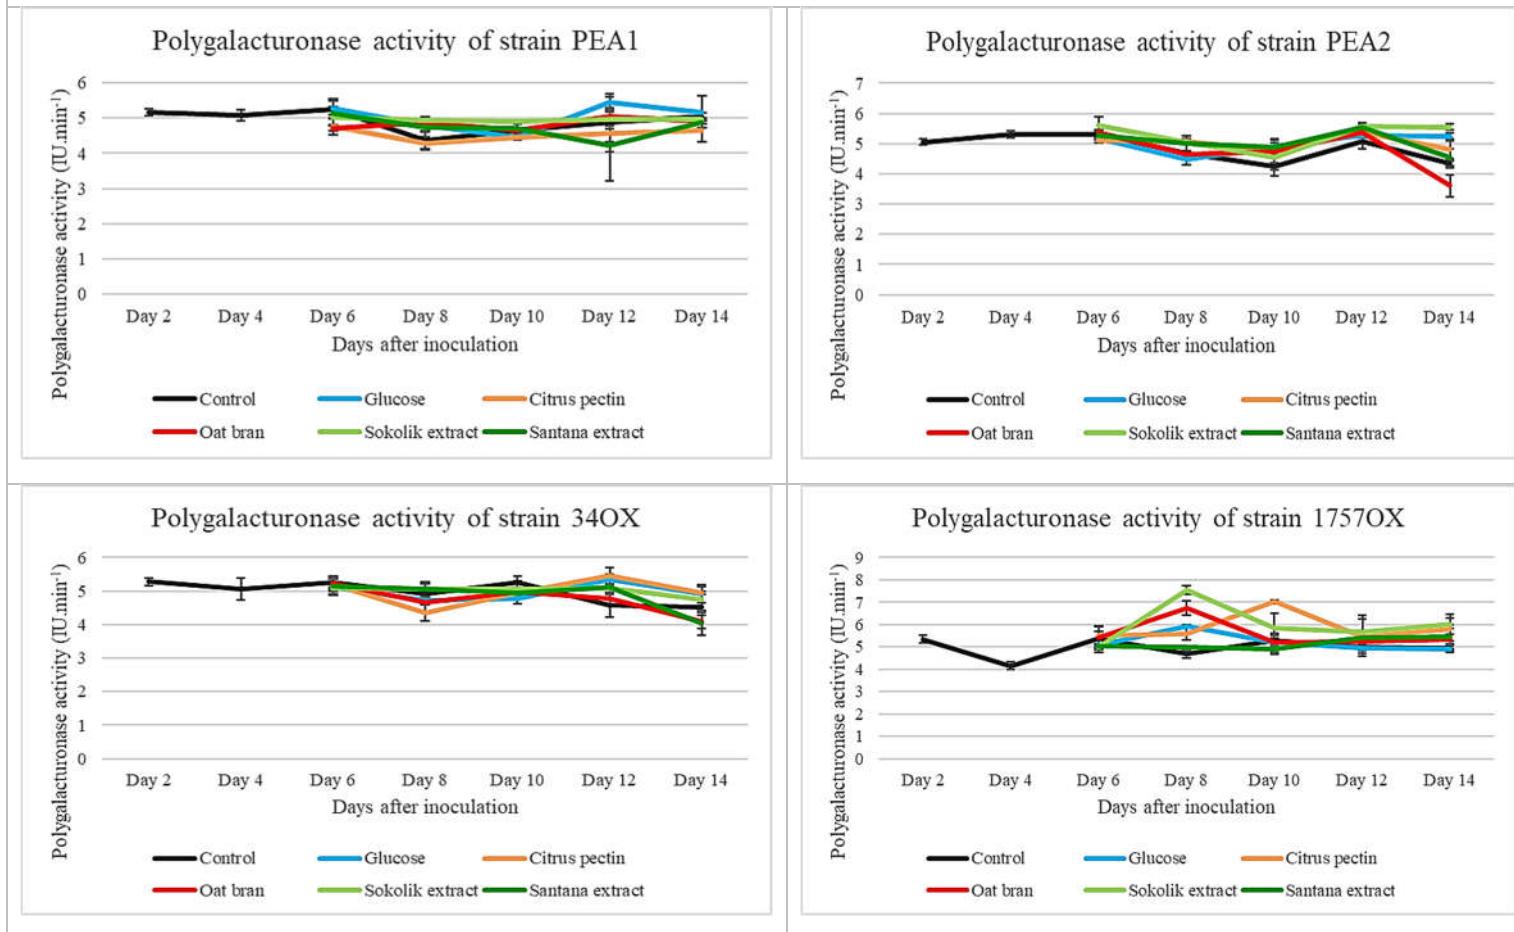

Figure S5. Polygalacturonase activity (micromoles of galacturonic acid produced per minute (U/min)) of PEA1, PEA2, 34OX and 1757 OX upon addition of glucose, citrus pectin, oat bran, sokolik and santana extract. Error bar represents standard error.
