

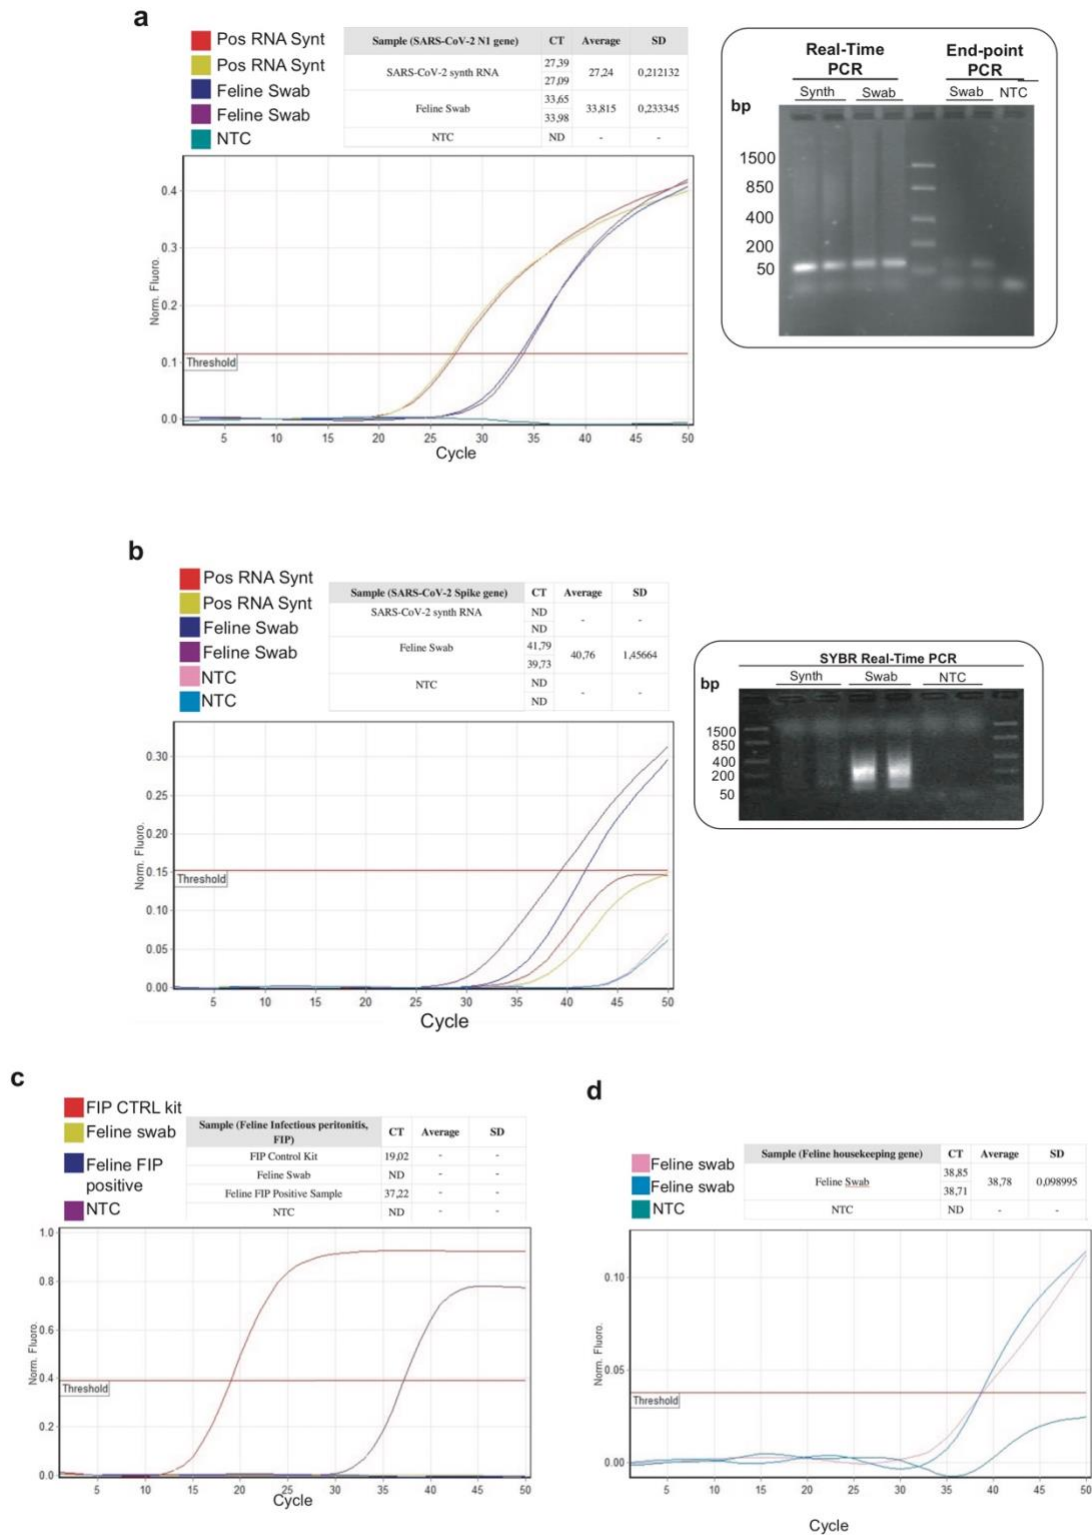

**Figure S1. Amplification profiles for the detection of SARS-CoV-2.**

CT: cycle threshold, SD: standard deviation, ND: not detected, NTC: no template control.

**a)** RT-qPCR detection of SARS-CoV-2 N1 gene (left) and relative real-time and End-point PCR in 1,8% agarose gel (right); **b)** RT-qPCR detection of SARS-CoV-2 spike gene (left) and respective agarose fragment evaluation SYBR PCR (right). **c)** RT-qPCR detection of FIP; **d)** RT-qPCR detection of feline housekeeping gene (Techne-FCoV Kit).
