

Table S1. Basic properties of test soil.

physicochemical indexes	numerical value
pH	6.6
organic matter content	20.36 g/kg
total nitrogen content	99.8 g/kg
total phosphorus content	22.4 g/kg
total potassium content	7.11 g/kg
alkaline hydrolyzed nitrogen	136 mg/kg
available phosphorus	83 mg/kg
available potassium	77.1 mg/kg

Table S2. Physiological responses of plants under NaHCO₃ stress.

Variety	Treatment	Plant height (cm)	ground diameter (mm)	Plant biomass (g)	Chlorophyll content (mg/g)	Relative conductivity (%)	MDA ($\mu\text{mol/g}$)	SOD (U/g)	CAT (U/g·min ⁻¹)	POD(U/g·min ⁻¹)	(U/g·m)	Pro(μg/g)	SS(mg/g)	SP(mg/g)

The values represent the mean of three soil samples. The Tukey's test showed that the same column of different lowercase letters indicated a significant difference in the 2× plants' NaHCO₃ stress treatment, while different uppercase letters indicated a significant difference in the 4× plants' NaHCO₃ stress treatment (P < 0.05). Significant at the 0.001 level. A0, A1, A2, and A3 represent 2× plants subjected to 0, 50, 100, and 150 mM NaHCO₃ stress treatment, B0, B1, B2, and B3 represent 4× plants subjected to 0, 50, 100, and 150 mM NaHCO₃ stress treatment.

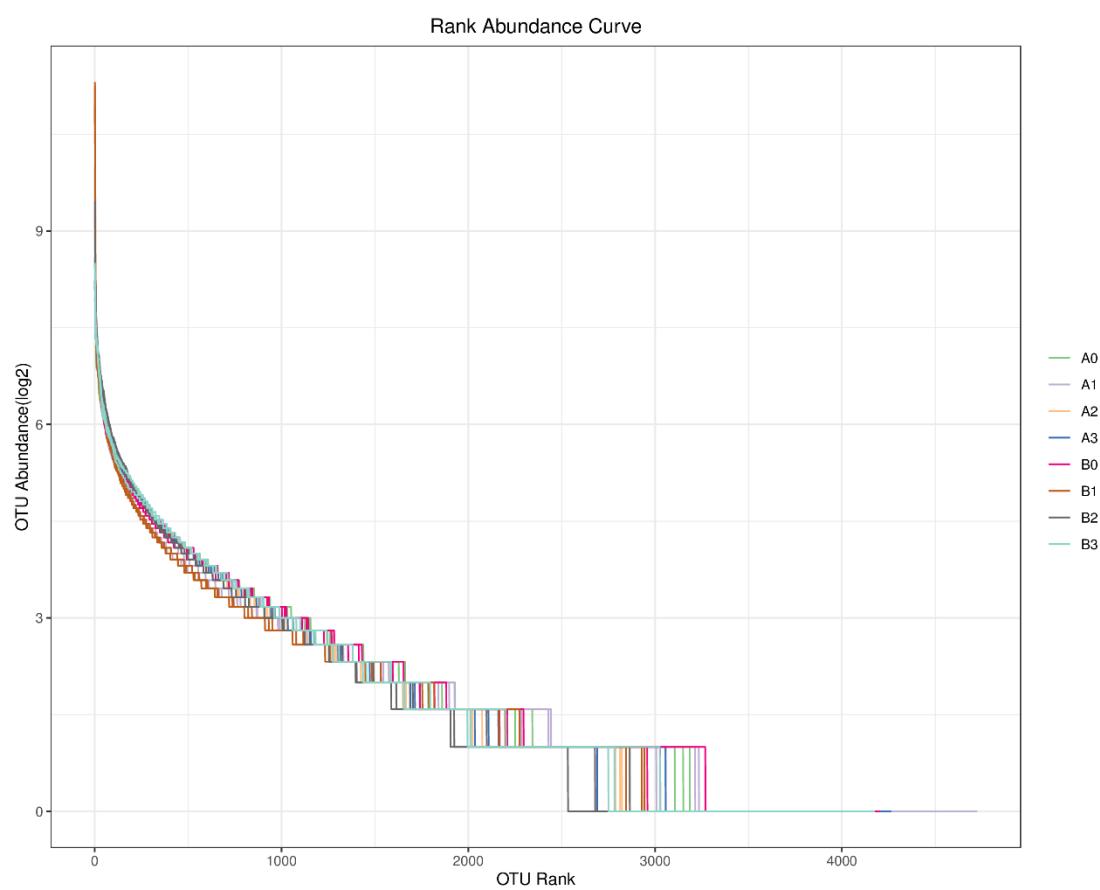

Figure S1. Rank abundance curves were generated using bacterial 16S rRNA gene sequences obtained from amplicon sequencing.

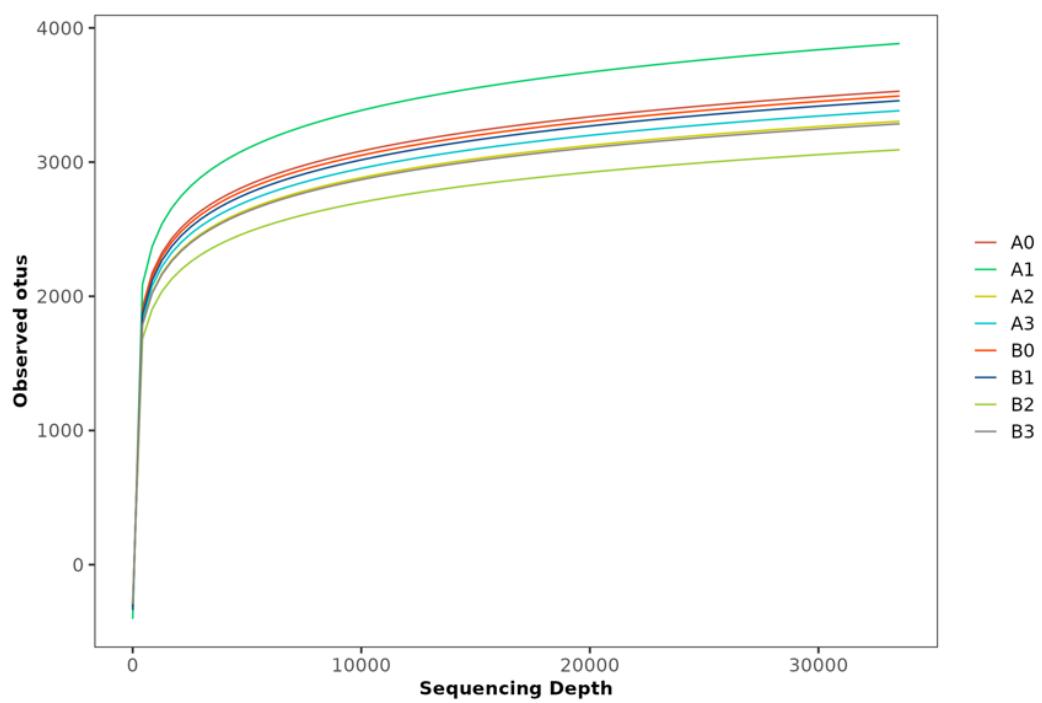

Figure S2. Rarefaction Curve of bacterial 16S rRNA gene sequences obtained from amplicon sequencing.

Table S3. The correlation between each factor and the principal component of the RDA plot is displayed.

Indicators	R2	Pr>(r)
S-UE	0.3911	0.008**
S-ACP	0.3424	0.014*
S-SC	0.4129	0.005**
S-CAT	0.6646	0.001**

The R2 of the environmental factor of the RDA chart and the significance p-value.

*P value < 0.05; **P value < 0.01; ***P value < 0.001.

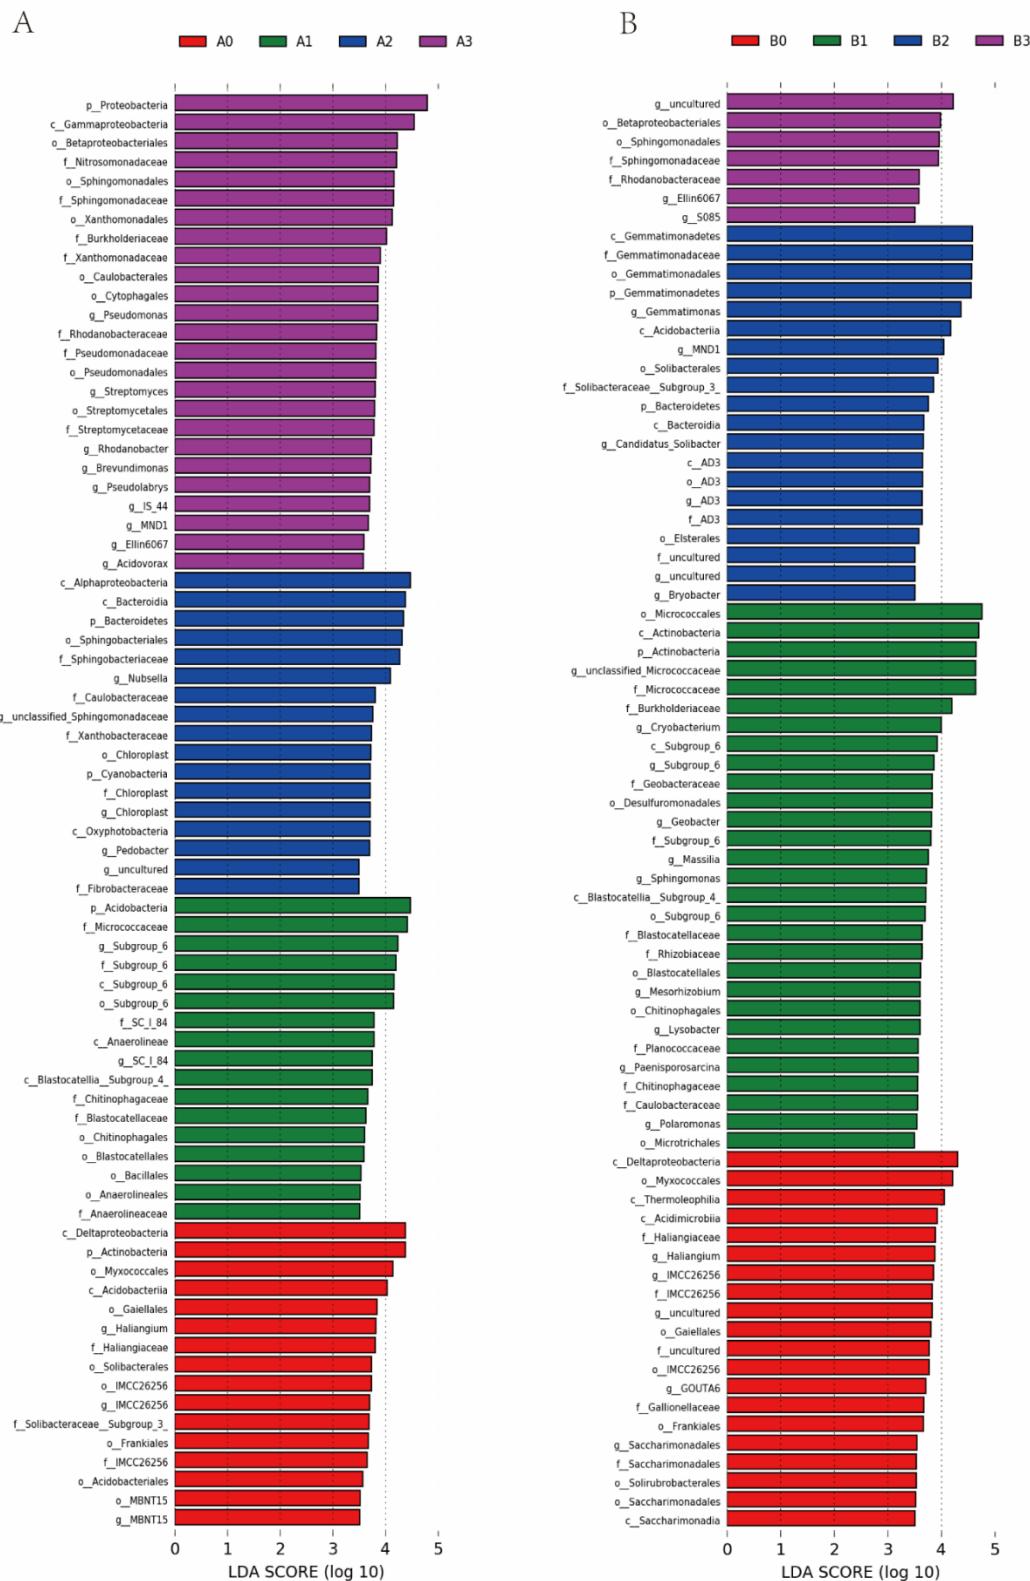

Figure S3. Linear discriminant analysis effect size (LEfSe) analysis was conducted to assess the bacterial abundance from phylum to genus (LDA threshold score ≥ 3.5) in the rhizosphere microbial communities of $2 \times$ plant (A) and $4 \times$ plant (B) under different stress concentrations.
