Method

Accessibility: Based on participants' responses, we define a simple information accessibility metric, namely, COVID-19 information accessibility score (CovIA score) to determine the accessibility level of each respondent [47,48]. We have computed this COVID-19 information accessibility score as follows. The respondents were asked through which source(s) they heard about COVID-19. Here multiple options were provided, and the respondents were free to choose multiple sources. We counted the number of sources and defined it as the COVID-19 information accessibility score. So, a high CovIA score indicates better accessibility.

Behavior: We define a simple behavioral score metric, namely, COVID-19 behavioral score (CovBh score) with respect to the behavior/practices of the respondents [49–52]. There were some questions related to positive behavior/practices (e.g., Practicing self-isolation/Home quarantine) and some with respect to negative practices (e.g., visiting public places). All these questions were 'yes/no' questions. The score is defined by summing the individual practices as follows: for positive (negative) practices, a positive response was translated to a 1 (0) score and a negative response to a 0 (1) score. So, a high CovBh score indicates better behavior/practice.

Knowledge: A simple knowledge score metric, namely, COVID-19 knowledge score (CovKd score) has been defined to determine the COVID-19 knowledge level of the respondents [49,50,53,54]. All the relevant questions expected simple 'yes/no' answers about a particular piece of knowledge (e.g., whether COVID-19 transmission is done through Contact with respiratory droplets of infected persons) and an affirmative (negative) answer was given a score of 1 (0). In the sequel all the individual scores were summed up to get the CovKd score. Clearly, a high CovKd score indicates a better knowledge level.

Opinion: Responses to a few questions asking the opinion of the respondents on various intervention related issues (e.g., whether the government should lock-down/restrict travel areas to avoid spread of COVID-19) have been used to define a COVID-19 Opinion score (CovOp score) as follows [55,56]. Each of these questions expected a response from a choice of 5 options (strongly agree, agree, neutral, disagree, and strongly disagree) which was later translated into a score in a scale of 5 (5 for strongly agree and 1 for strongly disagree). Thus, a higher CovOp score indicates a more positive opinion towards various interventions (expected to be implemented by the government) to control the spread of COVID-19.

Psychosocial Health: To capture a brief psychosocial profile of the respondents, a simple score metric, namely, COVID-19 psychosocial-health score (CovPsy score) has been defined based on a few queries regarding the mental state thereof during and due to COVID-19 [52,57–59]. All the relevant questions expected simple 'yes/no' answers about a particular mental state (e.g., depression/ anxiety) and an affirmative (negative) answer was given a score of 1 (0). In the sequel all the individual scores were summed up to get the CovPsy score. Unlike the other scores defined above, a high CovPsy score indicates a worse psychological profile.

Susceptibility: To judge the susceptibility to COVID-19, the respondents were asked a few questions (e.g., whether they had some severe pre-existing

conditions like respiratory disease) expecting 'yes/no' answers [60]. Subsequently, an affirmative (negative) answer was translated to a score of 1 (0) and all the individual scores were summed up to get a COVID-19 Susceptibility score (CovSus score). Thus, a high CovSus score indicates a more susceptible profile.

Knowledge, Perception and Control measures on COVID-19

Socio Demographic information:

1. Your profession: ………………..

2. Place of residence (Country):

3. Place of residence (province & city):

4. Highest Level of education:

5. Which setting do you work?..................................

6. Sex: □Female   □Male

7. Age (years):

8. Marital status: □Single   □Married   □Divorced/Separated

9. Monthly total Income/family income in local currency (optional)

Part 1: Knowledge/ Awareness

1.1 Have you heard about COVID-19?

   □No   □Yes

1.2 Where did you hear about Coronavirus (COVID-19) most? (multiple answer acceptable)

   □Television/Radio

   □Newspaper/ Magazines

   □Social media (Facebook/ twitter/ YouTube/ Instagram etc.)

   □Colleagues/workplace

   □Neighbors

   □ Others (answer if others)

1.3 How would you rate the extend of your knowledge of COVID-19?

	1	2	3	4	5	
very limited	□	□	□	□	□	good understanding

1.4 How does COVID19 Spread/Transmitted (multiple answer acceptable)

Spread/Transmissions	Yes	No

Contact with respiratory droplets of infected persons	□	□
Touching and shaking hands with an infected person	□	□
The use of objects used by an infected person	□	□
Sexual route	□	□
Close contact with asymptomatic infected persons	□	□
	□	□
COVID-19 can float on air almost 30 minutes	□	□
Others (answer if others)		

1.5 In your opinion, what are the signs and symptoms of COVID-19 (check all that apply)

Signs & Symptoms	Yes	No
Fever	□	□
Tiredness	□	□
Dry cough	□	□
Shortness of breath/Breathing difficulties	□	□
Aches and pains	□	□
Nasal congestion	□	□
Runny nose	□	□
Sore throat	□	□
Diarrhea	□	□
Others		

1.6 Which mask(s) do you think is best to control the spread of the COVID-19?

　　　　□N95 Mask

　　　　□Surgical Mask

　　　　□Reusable Mask

　　　　□Any Mask

　　　　□Masks are not required

　　　　□Usage of masks depends on the situation and guidelines

　　　　□Other (answer if others)

1.7 How long is the incubation period for COVID-19?

  □2-14 days

  □1-7 days

  □Don't know/ Not sure

  □ Other (answer if others)

1.8 Are there any vaccines, drugs or treatments for COVID-19?

  □No

  □Yes

  □Don't know/Not sure

1.9 Are you familiar with the bellow terms? (check all that apply)

	Yes	**No**
Lock-down	□	□
Self-isolation	□	□
Home quarantine）	□	□

1.10 Are you concerned about anyone in your immediate environment (workplace/family e.g. parents, siblings, close friends/colleagues) at risk of infection with COVID-19 due to the following factors? (check all that apply)

	Yes	**No**	**Not sure**
age (over 60 years)	□	□	□
severe pre-existing conditions (e.g. Respiratory diseases, heart diseases, cancer, immune deficiency problem)	□	□	□
work environment (e.g. Working in the health care environment and involving in contact with patients)	□	□	□
exposure to a risk zone/areas/country (e.g. China, Italy etc.)	□	□	□

Part 2. Attitudes/Opinions

2.1 Do you think the government should lock-down/restrict travel areas to avoid spread of COVID-19?

□Strongly agree

□Agree

□Neutral

□Disagree

□Strongly disagree

2.2 Do you think home quarantine can reduce COVID-19 outbreaks?

□Strongly agree

□Agree

□Neutral

□Disagree

□Strongly disagree

2.3 Isolation and treatment of infected people are effective ways to reduce the spread of the virus?

□Strongly agree

□Agree

□Neutral

□Disagree

□Strongly disagree

2.4 Do you think personal hygiene is important in controlling the spread of COVID-19?

□Strongly agree

□Agree

□Neutral

□Disagree

□Strongly disagree

2.5 Media should take a leading role in raising awareness coronavirus risk reduction and prevention issues?

□Strongly agree

□Agree

□Neutral

□Disagree

□Strongly disagree

2.6 Do you think you are at increased personal risk of infection with COVID-19 due to any of the following factors? (check all that apply)

	Yes	**No**	**Not sure**
age (over 60 years)	□	□	□

severe pre-existing conditions (e.g. Respiratory diseases, heart diseases, cancer, immune deficiency problem)	□	□	□
work environment (e.g. Working in the health care environment and involving in contact with patients)	□	□	□
exposure to a risk zone/areas/country (e.g. China, Italy etc.)	□	□	□
Others (answer if others)			

Part 3. Protection measures

3.1 Do you have any of the following practices to prevent COVID-19 transmission (check all that apply)?

Practices	Yes	No
Practicing self-isolation/Home quarantine	□	□
Practicing respiratory hygiene	□	□
Washing hand frequently using hand sanitizer (alcohol based)	□	□
Using face mask (Surgical)	□	□
Avoiding touching nose, mouth and eyes	□	□
Maintaining social distance (min 1 meter)	□	□

3.2 Have you been provided with personal protection equipment (PPE) in your workplace?

    □Yes   □No □Maybe

3.3 Have you tested yourself for COVID-19?

    □Yes, it was requested by the public health department

    □Yes, voluntarily

    □No

3.4 Do you have any of the following practices during COVID-19 pandemic? (check all that apply)

	Yes	No

Any handshake?	□	□
Hug	□	□
Visiting public places	□	□
Contact with infected person	□	□
You/your family members going church/ mosque/ temple/synagogue/ pagoda for prayer	□	□

3.5 How many times you washed hand in last 12 hours or 24 hours:

3.6 What is your normal health seeking behavior regarding primary symptoms (fever/cough/pain/difficulty in breathing etc.)?

    □Hide symptoms

    □Seek immediate medical attention / treatment

    □Wait for symptoms to go away

    □Other

3.7 Are service providers of nearby health center available when necessary?

□No   □Yes

Source of Information

3.8 Do you or your household members use internet?

    □No □Yes

3.9 Please indicate which of the following do you use for COVID-19 update (check all that apply)?

Media	Yes	No
Newspaper	□	□
TV (local/ international)	□	□
Social media (Facebook, Instagram, Line, YouTube etc.)	□	□
Internet (WHO websites)	□	□
Radio		
Others		

3.10 How much time, on average, per day do you spend on the topics related to COVID-19 (e.g. due to news coverage, work, conversations, thoughts)? Please indicate a daily average for the last seven days.

    □Not at all

    □1-30 minutes

□31-60 minutes

□1 - 3 hours

□More than 3 hours per day

□Other:

4.1 What are your mental health/psychological problems regarding COVID-19? (check all that apply)

Psychological aspects	Yes	No
Fear of falling ill and dying	□	□
Anxiety	□	□
Depression	□	□
Fear of being socially excluded/placed in quarantine	□	□
Feelings of helplessness, boredom, loneliness	□	□
