

Table S1 Parameters, Laboratory Analytical procedures and Mexican Technical Standards, describing analytical methodologies and quality controls, considered for the analytical determination of arsenic, fluoride, pH and physicochemical parameters of water.

| Parameter | Analytical procedure | Mexican Standard (NMX), Reference Method |
|------------------|--|--|
| Sampling | Water Analysis – Sampling of Groundwater | NMX-AA-152-SCFI-2009 |
| Arsenic | Water analysis – measurement of metals by atomic absorption in natural waters, drinking, wastewaters and treated wastewaters – test method | NMX-AA-051-SCFI-2016 |
| Fluoride | Waters analysis - determination of fluoride in natural, wastewaters and wastewaters treated - test method | NMX-AA-077-SCFI-2001 |
| pH | Water analysis.-measurement of pH in natural waters, wastewaters and treated wastewaters.- test method | NMX-AA-008-SCFI-2016 |
| Temperature (°C) | Water analysis - determination of temperature in natural waters, wastewaters and treated wastewaters – test method. | NMX-AA-007-SCFI-2013 |
