

**Figure S2.** The increased sensitivity of *SIBAG9*-overexpressing *Arabidopsis* exposed to mannitol, NaCl, and ABA stress. Seven-day-old seedlings grown on the 1/2 MS media were transferred to 1/2 MS media supplemented with 0, 300 mM mannitol, 175 mM NaCl, or 1.5  $\mu$ M ABA and vertically grew for 14 days.
