

Supplementary Material

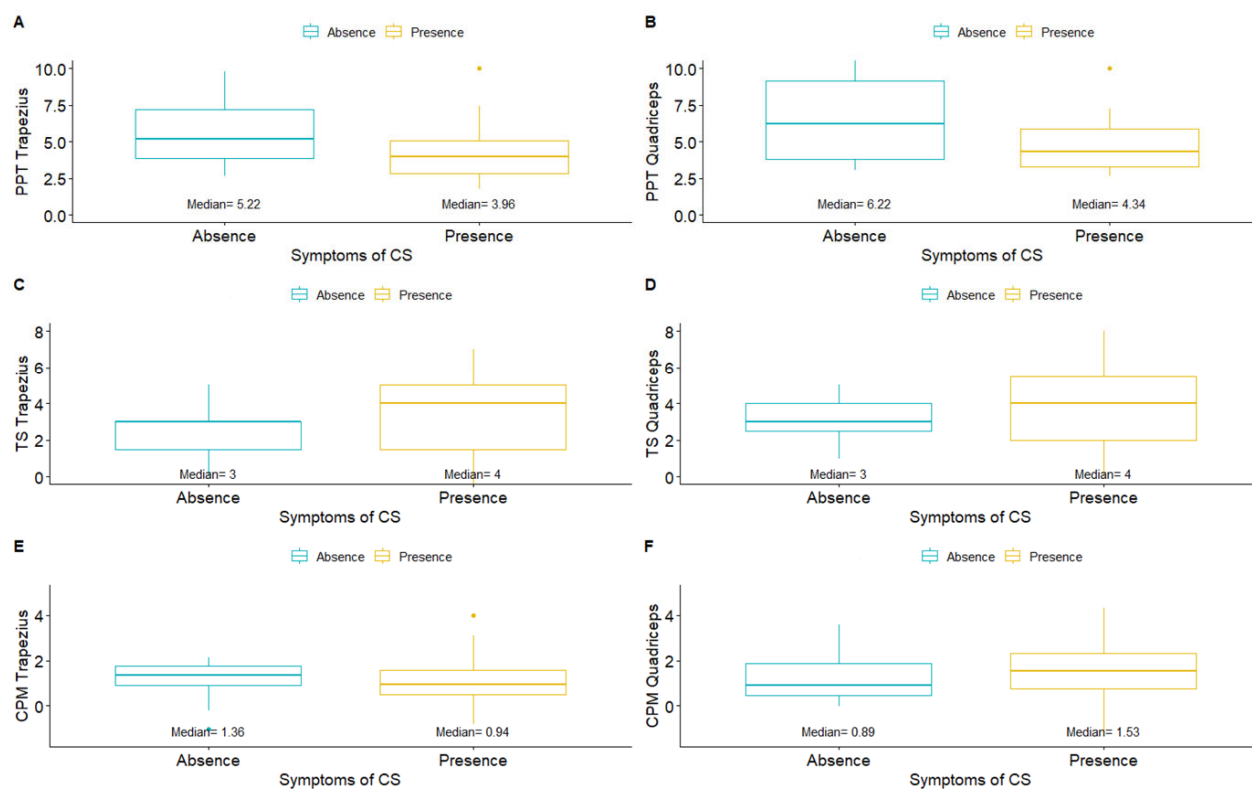

Figure S1. Boxplots of the different experimental pain measurements by presence of symptoms of central sensitization. Total scores <40/100 are denoted as absence of symptoms of central sensitization (blue boxes). Total scores $\geq 40/100$ are denoted as presence of symptoms of central sensitization (yellow boxes). Abbreviations. CPM: Conditioned Pain Modulation, CS: Central Sensitization, CSI: Central Sensitization Inventory, PPT: pressure pain threshold, Quad: Quadriceps, Trap: Trapezius, TS: temporal summation.

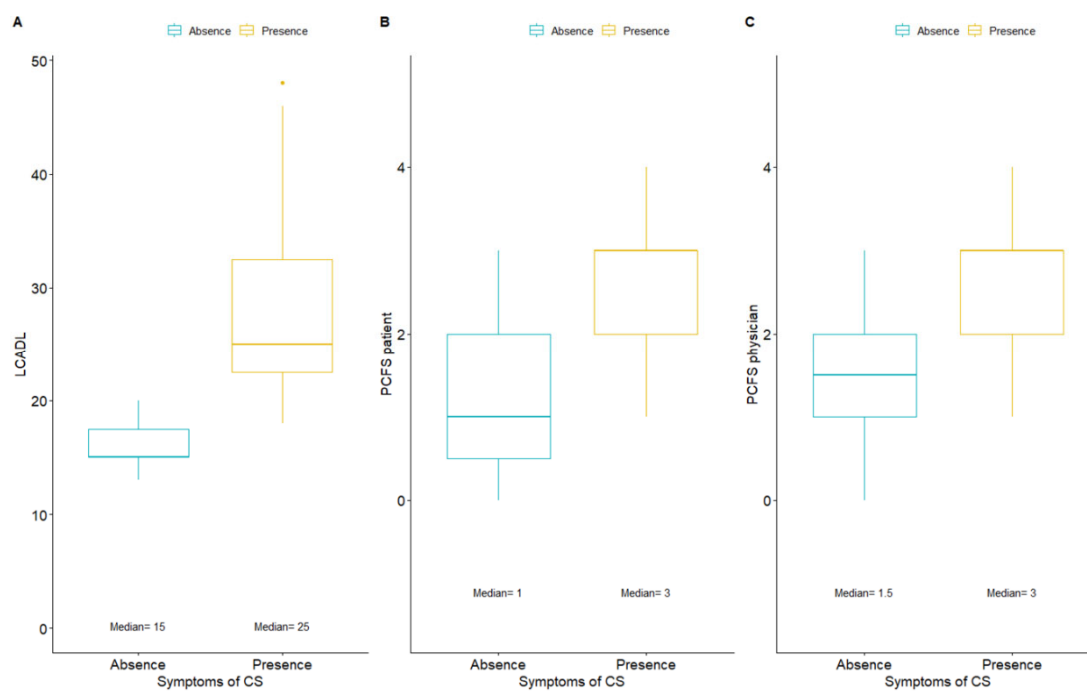

Figure S2: Boxplots of the LCADL and PCFS scores, separated by presence of symptoms of central sensitization. Total scores <40/100 are denoted as absence of symptoms of central sensitization. (blue boxes). Total scores $\geq 40/100$ are denoted as presence of symptoms of central sensitization. (yellow boxes). Abbreviations. CS: Central Sensitization, CSI: Central Sensitization Inventory, LCADL: London chest Activity of Daily Living, PCFS: Post-COVID-19 Functional Status Scale.
