

Table S1. Callus induction rate of stem segments and leaves under different induction media of *J. sambac* and *J. mesnyi*.

Type of media	Type of explant	Number of explant	Callus formation	Induction rate ¹ %
<i>J. sambac</i>				
MS	Stems	179	59	32.96
	Leaves	180	66	36.66
WPM	Stems	179	162	90.50
	Leaves	180	96	53.33
<i>J. mesnyi</i>				
MS	Stems	185	38	21.54
	Leaves	180	88	48.88
WPM	Stems	180	155	86.11
	Leaves	180	112	62.22

¹No statistical test on these data.

WPM + combination of auxin & cytokinin at higher concentration (mg/L)

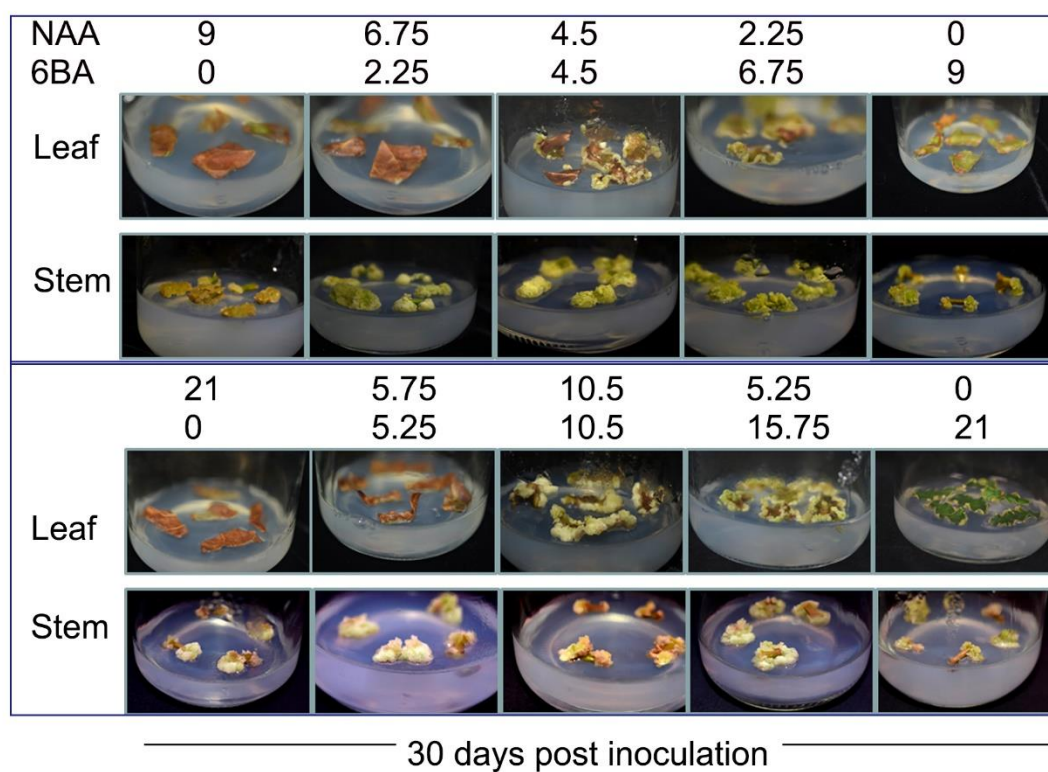

Figure S1: Effect of 6-BA and NAA on callus induction.
