

Supplementary Material

**Table S1.** Three-way analysis of Variance (ANOVA) results in *Pyropia yezoensis* on the relative growth rate at different  $p\text{CO}_2$  concentrations, light intensities and salinity levels. df: degree of freedom, F: the value of F statistic, and Sig.: p value.

	df	F	Sig.
<b>Growth</b>			
$p\text{CO}_2$	1	0.22	0.648
Ligh	1	117.48	<0.001
Salinity	1	9.82	0.006
$p\text{CO}_2*\text{Light}$	1	0.30	0.593
$p\text{CO}_2*\text{Salinity}$	1	0.24	0.633
Light*Salinity	1	0.10	0.757
$p\text{CO}_2*\text{Light}*\text{Salinity}$	1	0.50	0.492

**Table S2.** Three-way analysis of Variance (ANOVA) results in *Pyropia yezoensis* on the chlorophyll fluorescence parameters at different  $p\text{CO}_2$  concentrations, light intensities and salinity levels. df: degree of freedom, F: the value of F statistic, and Sig.: p value.

	df	F	Sig.
<b>rETR<sub>max</sub></b>			
$p\text{CO}_2$	1	5.96	0.027
Ligh	1	26.41	<0.001
Salinity	1	38.73	<0.001
$p\text{CO}_2*\text{Light}$	1	0.01	0.937
$p\text{CO}_2*\text{Salinity}$	1	1.35	0.262
Light*Salinity	1	0.41	0.530
