

Supplementary Materials

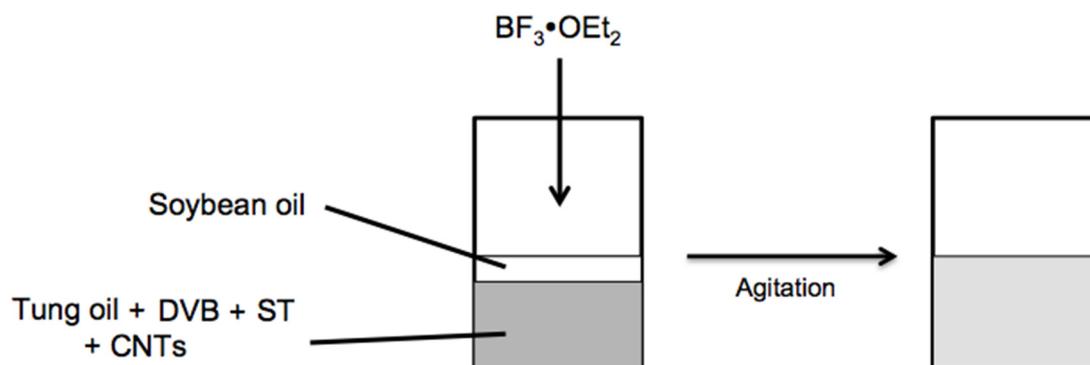

Figure S1. Sample preparation for the cationic polymerization of tung oil-based thermosetting resins.

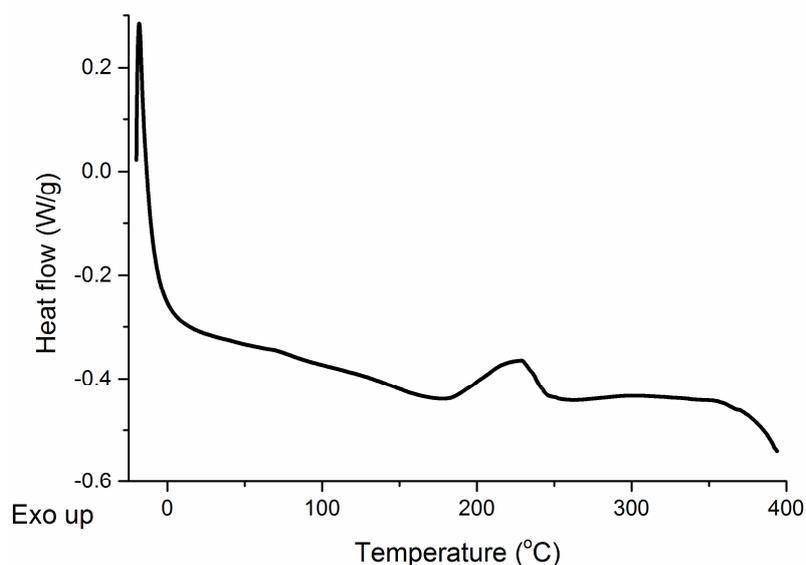

Figure S2. DSC curve of a tung oil-based resin reinforced with 0.25 wt % CNTs microwaved at 100 W for 10 min, followed by 200 W for 10 min, and a 1 h 30 min post-cure step at 140 °C in a convection oven.
