

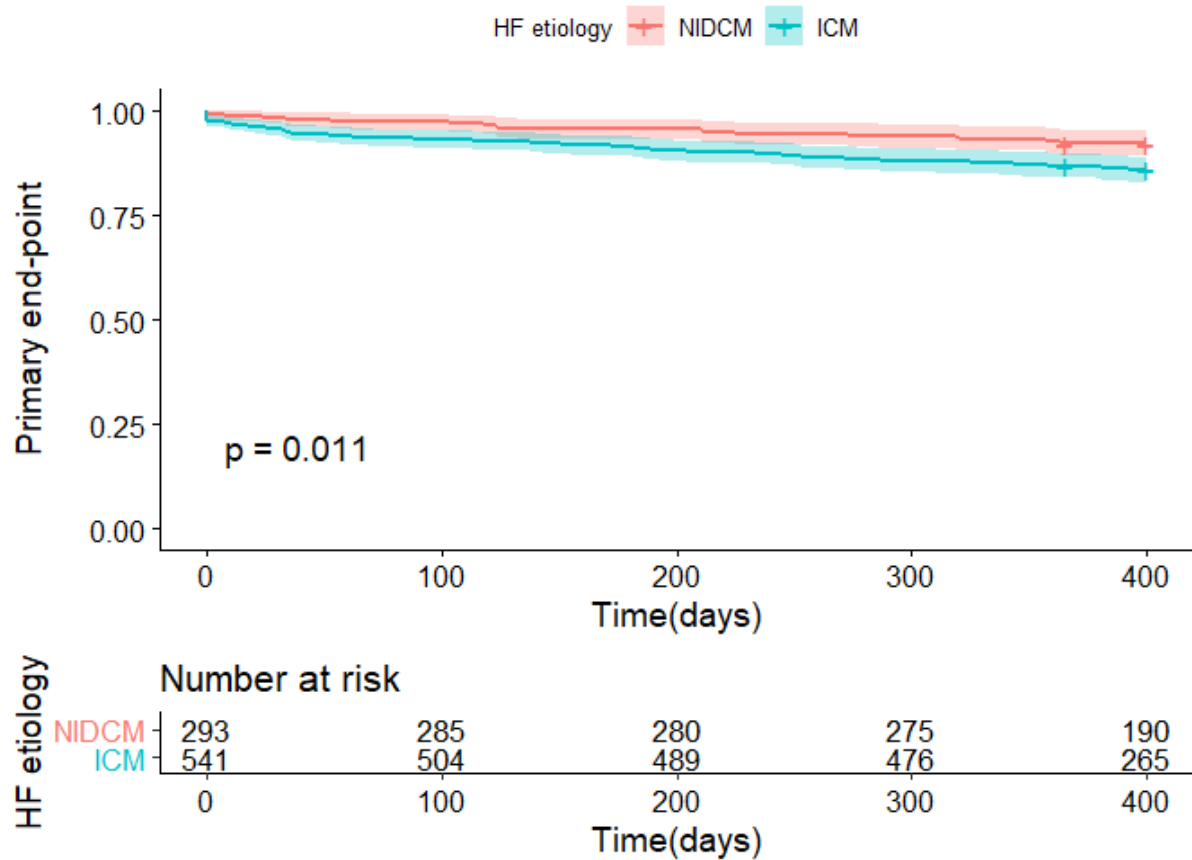

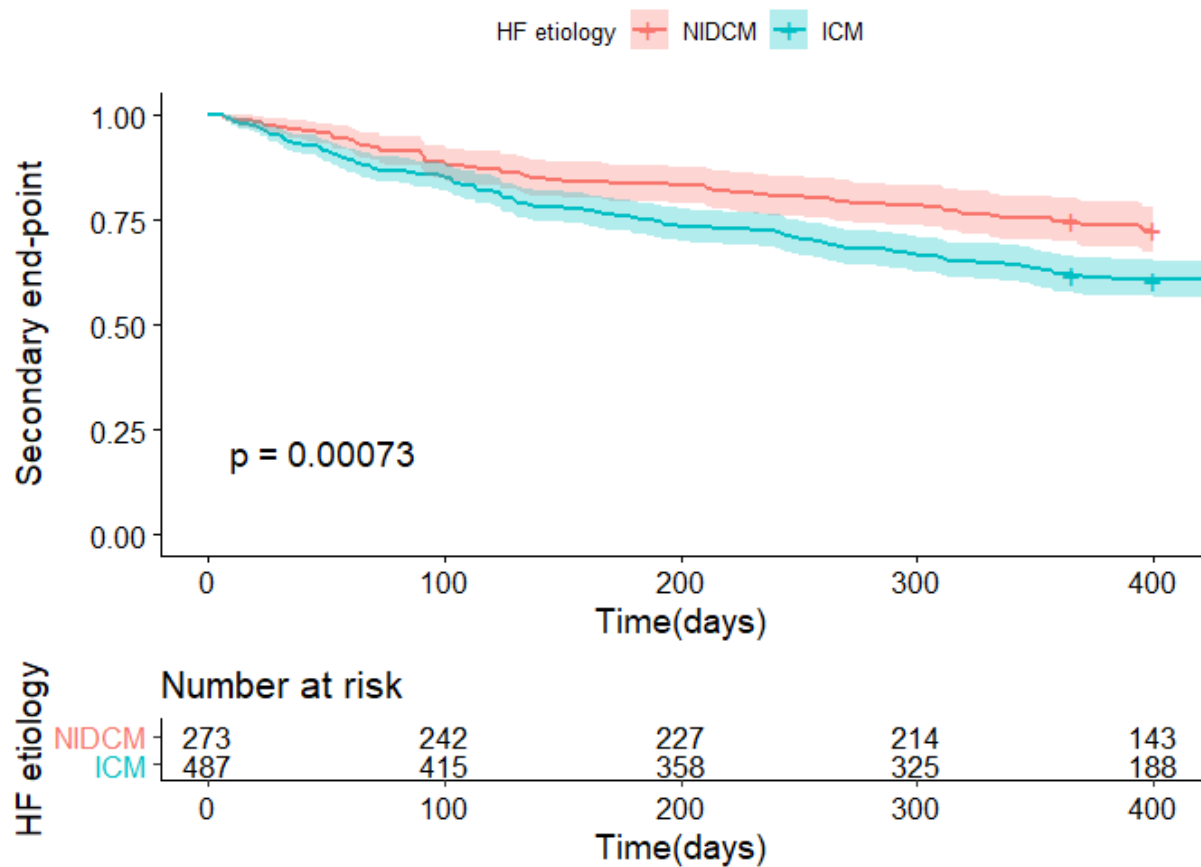

**Figure S1.** Kaplan–Meier curves for the primary endpoint\* of patients with the ICM and NIDCM etiology of HF after censoring for in-hospital events.

ICM – ischemic cardiomyopathy; NIDCM – non-ischemic dilated cardiomyopathy;  
 \*primary endpoint - all-cause death at one year

**Figure S2.** Kaplan–Meier curves for the secondary endpoint\* of patients with the ICM and NIDCM etiology of HF after censoring for in-hospital events.

ICM – ischemic cardiomyopathy; NIDCM – non-ischemic dilated cardiomyopathy;

\*secondary endpoint - composite of all-cause death and hospitalization for HF worsening at one year)
