**Figure S9.** Phosphorus (P), sulphur (S) PIXE maps and total EBS maps taken from fresh frozen lung tissue sections after DESI analysis using 95:5 (%v/v) MeOH:H<sub>2</sub>O or 50:50 (%v/v) MeOH:EtOH. A third section (Control) was also analysed – no DESI measurements were taken on this sample.

**Figure S10.** Overlay of the X-ray spectra taken from the squares containing the caseum in each of the lung tissue section samples.
