

Figure Supplementary 1. The correlation of FAHFAs with their fatty acids precursors.

**Figure S1.** The correlation of FAHFAs with their fatty acids precursors. The correlation between PA, SA, POA, and OA with 9-POHSA and 9-OAHSA were shown in (A), (B), (C), and (D), respectively. POA level had a positive correlation with 9-POHSA and 9-OAHSA.  $r_p$ : Pearson correlation coefficient. Data are presented as mean  $\pm$  SD (\*  $p < 0.05$ ).
