The benchmark dataset with 221 proteins. Each protein is represented using a line that starts with > followed by the UniProt accession number, | separator, and the complete list of annotations/labels separated by semicolon. To accommodate for the changes in UniProt, the sequence of these 221 proteins can be obtained on the website of the PSIONplus<sup>m</sup> webserver at <https://yanglab.nankai.edu.cn/PSIONplusm/benchmark/>.
