

Table S1. List of the enriched pathways in the *mdx* vs. WT analysis. Created based on the proteomics data (protein ID changed for gene ID for the purpose of analysis) using the Search Tool for the Retrieval of Interacting Genes/Proteins (STRING) database (and the incorporated Reactome and KEGG databases). FDR < 0.05

#term ID	term description	changed genes	all genes in the pathway	strengh	FDR	Changed genes
