

Figure S8: Fasta sequence of the 45S rDNA of 10524 bp used as a reference to estimate 18S and 25S copy number variation and rDNA variants. This reference includes the most abundant 5' and 3'ETS variants identified in the reference Col-0 and At66, VARA (150-1409) and VAR1 (7852-8322). Annotation of 18S, ITS1, 5.8S, ITS2 and 25S coordinates respectively 1841-3644, 3645-3912, 3913-4073, 4074-4263, 4264-7639.

>45S rDNA unit
