Phytochemical cue for the fitness costs of herbicide-resistant weeds

Hong-Yu Li¹, Yan Guo¹, Bo-Yan Jin¹, Xue-Fang Yang^{2,*} and Chui-Hua Kong^{1,*}

This supplementary material was prepared to add the readers more details, for which there was not enough space in the main manuscript, about:

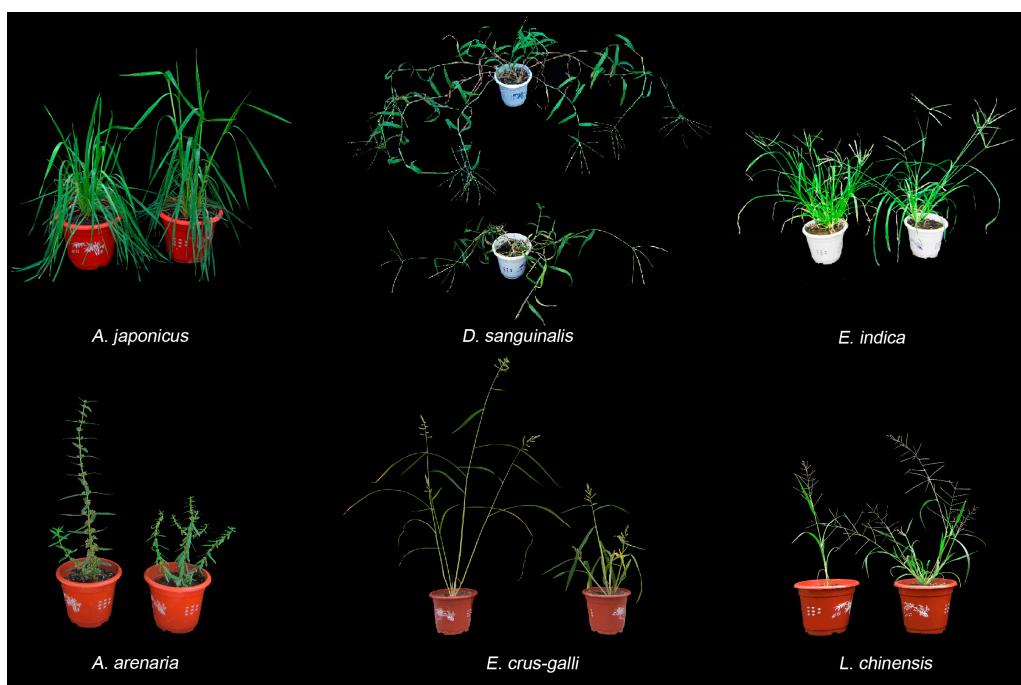

Figure S1. Aboveground morphology of herbicide-resistant and -susceptible weeds at the flowering stage. The left or above are herbicide-resistant biotypes and the right or below are the susceptible counterparts within a weed species.

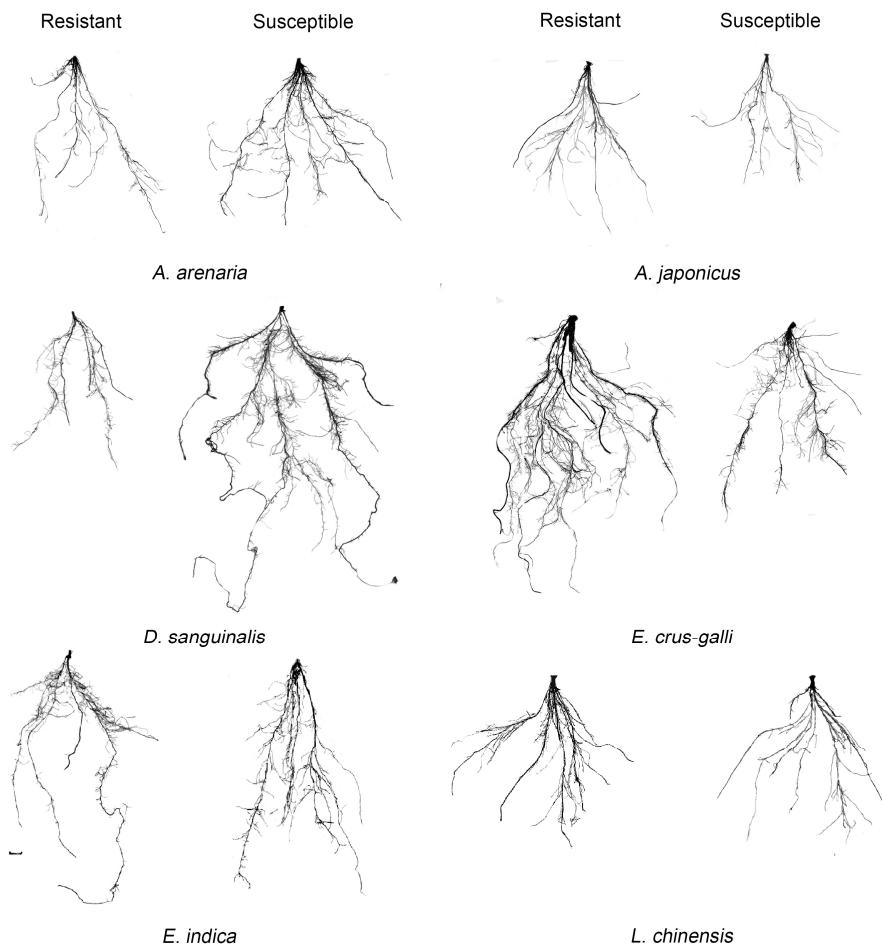

Figure S2. Root morphology of herbicide-resistant and -susceptible weeds. The left is herbicide-resistant biotypes and the right is the susceptible counterparts within a weed species.
