

Table S1 Primers used in qRT-PCR

Primer	Sequence
COMT-F	GTCGACCGTGCTGTCTATGT
COMT-R	GCAATTGAGCACAGAGTGGC
β-actin-F	AGGGGAAGCTGGCTTATGTT
β-actin-R	CGGGCAGCTCATAGTTCTTC

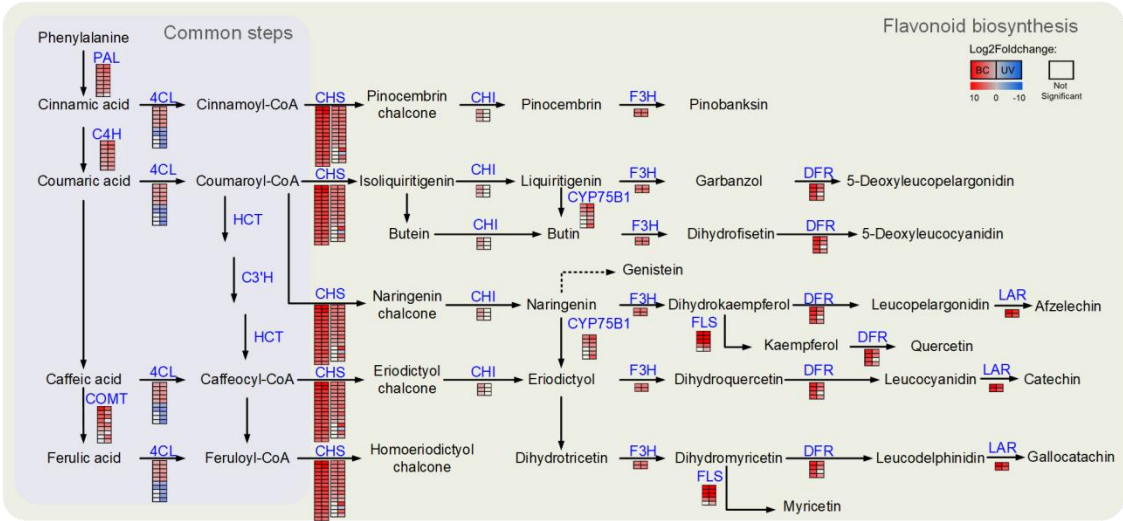

Figure S1 DEGs in flavonoid biosynthesis. Data was extracted from published transcriptome study of *M. alba* leaves [20]. Each line of squares represented an RNA. Filled color represented Log2Foldchange of RNA. Left column represented Log2Foldchange in BC group, and right column represented Log2Foldchange in UVB group.
