

Supplementary file 2 (File S2): Survey questions

Primary outcome measures relating to the survey

- 1) Description of stakeholder views on the **effectiveness of implementing the ADRe Profile** (survey rating of the ADRe Profile - Likert scale). A brief survey will be distributed to the main stakeholders (patients, nurses, GP's and pharmacists) following completion of Randomised Controlled Trial
- 2) Description of stakeholder views on ADRe **Profile implementation feasibility** (eliciting interview themes). Semi-structured interview with a purposive sample of the main stakeholders (patients, nurses, GP's and pharmacists) to explore their views on feasibility of ADRe Profile integration in GP practices.

Secondary outcome measures relating to Interviews/survey

- 3) Description of stakeholders' views on **multidisciplinary collaboration** (eliciting interview themes). Semi-structured interviews with the main stakeholders (patients, nurses, GP's and pharmacists) will explore their views on whether and how the ADRe Profile delivered clinical benefits and / or contributed to multidisciplinary collaboration between nurses, doctors and pharmacists.
- 4) Description of the patients' views on the **contribution of ADRe Profile to their health and well-being and patient-centred care** (eliciting interview themes). Semi-structured interviews with the patients will seek their views on whether and how ADRe Profile contributes to their health and well-being and patient-centred care. [Time Frame: 22 months from the start of the study]
- 5) **Time spent** completing one ADRe Profile
