

Supplementary Table 4. Questionnaire on views about telemedicine and clinical research for patients included in a clinical research protocol at the Internal Medicine and Clinical Immunology Department, CHU Lille, France

<i>You have agreed to take part in a clinical research protocol.</i>						
1. Do you have to visit the hospital more frequently since the start of the study?						
<input type="radio"/> Yes <input type="radio"/> No						
2. Do you find it difficult to organise your visits to the hospital?						
<input type="radio"/> Yes <input type="radio"/> No						
If Yes, why?: _____						
3. Have you already heard of telemedicine and teleconsultation?						
<i>Definition of telemedicine: telemedicine is a form of medical practice conducted remotely using information and communication technologies to establish a link between patients and their doctors or between health professionals.</i>						
<i>Definition of teleconsultation: remote consultation between a patient (whether or not accompanied by a health professional) and a doctor.</i>						
<input type="radio"/> Yes <input type="radio"/> No						
4. If you could choose between a consultation at the hospital and a teleconsultation at home, which would you choose?						
<input type="radio"/> Hospital <input type="radio"/> Home						
5. Would you feel reassured if, in the context of the research protocol, there were additional follow-up visits by teleconsultation?						
	1	2	3	4	5	
Not at all reassured	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	Very reassured
6. Do you think telemedicine could improve the care you receive?						
<input type="radio"/> Yes <input type="radio"/> No						
7. If a clinical research study included the possibility of conducting some visits where the patient would stay at home and the physician stay in his/her office using a telemedicine tool:						
Do you think that would take you less time?						
<input type="radio"/> Yes <input type="radio"/> No						
8. If a clinical research study included the possibility of conducting some visits where the patient would stay at home and the physician stay in his/her office using a telemedicine tool:						
Do you think it would be more convenient for you?						
<input type="radio"/> Yes <input type="radio"/> No						
9. If a clinical research study included the possibility of conducting some visits where the						

patient would stay at home and the physician stay in his/her office using a telemedicine tool:

Do you think that could be dangerous for you?

	1	2	3	4	5	
Do not agree at all	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	Agree entirely
