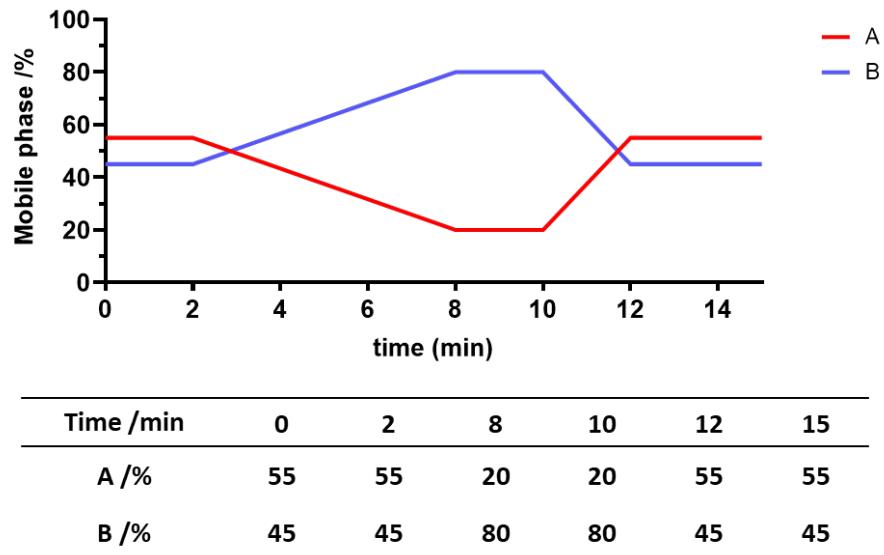

Figure S1. Eluting gradient for chromatographic separation of plasmalogen species.

Table S1. MS general hardware settings

Ionization mode	Ion spray voltage	Vaporizer temperature	Sheath gas pressure	Aux gas pressure	Capillary temperature	Collision pressure
Positive	4000 V	500 °C	20 psi	35 psi	300 °C	1.5 mTorr
Negative	3750 V	250 °C	10 psi	20 psi	370 °C	1.6 mTorr
