

Supplementary material

Figure S1. Schematic conceptualisation of the key dimensions, items, and behavioural elements involved in the individual food-related pleasure response, allowing a holistic study of quantitative (level of pleasure) and qualitative (drivers of pleasure) aspects of food-related pleasure. The model is kindly borrowed from Andersen, B. V., Chan, R. C. K., & Byrne, D. V. (2021). A Conceptual Framework for Multi-Dimensional Measurements of Food Related Pleasure—The Food Pleasure Scale. *Foods*, 10(9), 2044. <https://doi.org/10.3390/foods10092044>

Table S1. Multivariate Regression by Odd's Ratio on all variables for each of the three segments.

	Low anhedonia n=537		Intermediate anhedonia n=360		High anhedonia n=154	
	Odd's Ratio (CI)	p-value	Odd's Ratio (CI)	p-value	Odd's Ratio (CI)	p-value
