

Figure S1. Chromosomal location of genes encoding differentially expressed proteins of cultivated rice cv. Pusa Basmati-1 (black colour) and wild rice accession *O. grandiglumis* (red colour). The Proteins were mapped to the rice genome according to the locus of the markers.

Figure S2. Chromosomal location of genes encoding differentially expressed proteins of barley cv. NDB-1445 . The proteins mapped to the barley genome according to the locus of the markers.
