

## Supplementary material

**Table S1.** List of health deficits items included in the frailty index

**Table S2.** Baseline characteristics of 16,293 participants by frailty status in the cross-sectional analysis

**Table S3.** Cross-sectional association between the frailty index and CVD

**Table S4.** Cross-sectional association between the frailty index and CVD in subpopulations of 10,803 participants underwent biomarkers measurements

**Table S5.** Longitudinal association between the frailty index and CVD in subpopulations of 8971 participants underwent biomarkers measurements

**Table S6.** Longitudinal association between the frailty index and CVD events by competing risk analysis

**Table S7.** Cross-sectional association between the frailty index and CVD in complete dataset

**Table S8.** Longitudinal association between the frailty index and CVD events in complete dataset

**Figure S1.** Cross-sectional association between the frailty index and CVD stratified by age, gender, residence, BMI, and chronic disease status

**Table S1.** List of health deficits items included in the frailty index.

Type of deficit	Item	Variables	Cut-off point
Activities of daily living	1	Bathing	No=0; a little =0.33; need help = 0.67; Yes=1
	2	Dressing	No=0; a little =0.33; need help = 0.67; Yes=1
	3	Use of toilet	No=0; a little =0.33; need help = 0.67; Yes=1
	4	Transferring	No=0; a little =0.33; need help = 0.67; Yes=1
	5	Continence	No=0; a little =0.33; need help = 0.67; Yes=1
	6	Eating	No=0; a little =0.33; need help = 0.67; Yes=1
Instrumental activities of daily living	7	Cooking	No=0; a little =0.33; need help = 0.67; Yes=1
	8	Shopping	No=0; a little =0.33; need help = 0.67; Yes=1
	9	Doing household	No=0; a little =0.33; need help = 0.67; Yes=1
	10	Taking medicine	No=0; a little =0.33; need help = 0.67; Yes=1
	11	Managing money	No=0; a little =0.33; need help = 0.67; Yes=1
Physical functional limitations	12	Lift a weight of 5 kg	No=0; a little =0.33; need help = 0.67; Yes=1
	13	Walking 1 km	No=0; a little =0.33; need help = 0.67; Yes=1
	14	Walking 100m	No=0; a little =0.33; need help = 0.67; Yes=1
	15	Stooping, kneeling, or crouching	No=0; a little =0.33; need help = 0.67; Yes=1
	16	Able to stand up from sitting	No=0; a little =0.33; need help = 0.67; Yes=1
	17	Able to pick up a coin from a table	No=0; a little =0.33; need help = 0.67; Yes=1
	18	Running or jogging about 1 km	No=0; a little =0.33; need help = 0.67; Yes=1
	19	Reaching or extend arms	No=0; a little =0.33; need help = 0.67; Yes=1
	20	Climbing several flights of stairs without resting	No=0; a little =0.33; need help = 0.67; Yes=1
Chronic disease	21	Chronic lung diseases (Chronic bronchitis, emphysema)	Yes=1, no=0
	22	Asthma	Yes=1, no=0

	23	Cancer	Yes=1, no=0
	24	Arthritis or Rheumatism	Yes=1, no=0
	25	Gastric or duodenal ulcer	Yes=1, no=1
	26	Kidney disease	Yes=1, no=1
	27	Liver disease	Yes=1, no=1
	28	Memory related disease (Dementia, brain atrophy, and Parkinson's disease)	Yes=1, no=0
	29	Emotional, nervous, or psychiatric problems	Yes=1, no=0
Mental health	30	Feel depressed	Always=1; often=0.33; sometimes=0.67; seldom or never=0
	31	Feel fearful	Always=1; often=0.33; sometimes=0.67; seldom or never=0
	32	Feel happy	Always=1; often=0.33; sometimes=0.67; seldom or never=0
	33	Feel everything was an effort	Always=1; often=0.33; sometimes=0.67; seldom or never=0
	34	Feel could not get "going"	Always=1; often=0.33; sometimes=0.67; seldom or never=0
Subjective functioning	35	Self-rated health	Very good=0; good=0.25; average=0.5; bad=0.75; very bad=1

**Table S2.** Baseline characteristics of 16,293 participants by frailty status in the cross-sectional analysis.

Characteristic	Total (N=16,293)	Robust (N=8791)	Pre-frailty (N=5844)	Frailty (N=1658)	<i>P</i> value

Abbreviation: FBG, fasting blood glucose; HbA1c, glycated hemoglobin; TC, total cholesterol; TG, triglycerides. LDL-c, low-density lipoprotein cholesterol; HDL-c, high-density lipoprotein cholesterol; eGFR, estimated glomerular filtration rate.

Model 3 was adjusted age, gender, educational level, marital status, residence, smoking status, drinking status, hypertension, diabetes mellitus, dyslipidemia, use of antihypertensive medications, antidiabetic medications and lipid-lowering therapy, BMI, SBP, DBP.

**Table S6.** Longitudinal association between the frailty index and CVD events by competing risk analysis
