

Figure S1: TKC of voriconazole against *C. albicans* tested with **originator (O)** from Pfizer (**black symbols**), **generic-1 (G1)** from Strada (**white symbols**), **generic-2 (G2)** from Ratiopharm (**crossed symbols**) with concentrations 0.125mg/L **(a)** and 0.25mg/L **(b)** over 72 hours are shown. Standard deviations are given. Additionally, the **growth control (GC)** is depicted with **star symbols**.

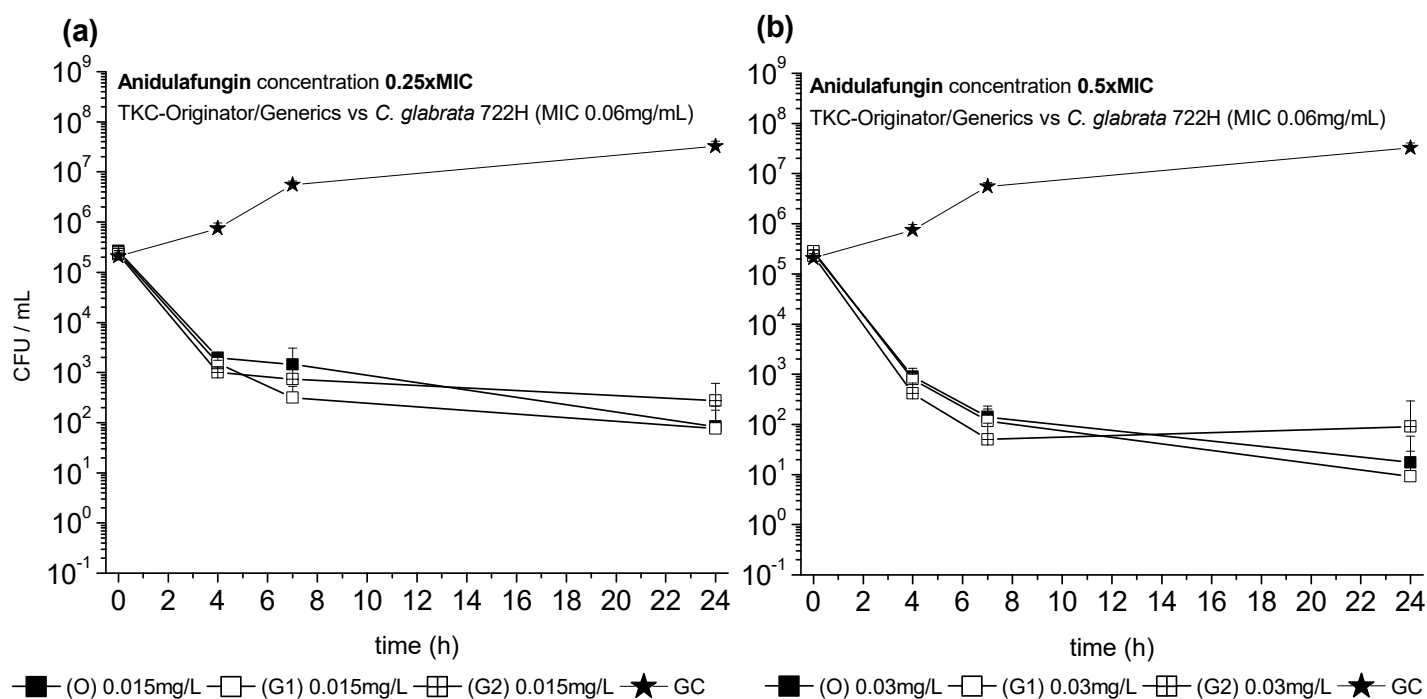

Figure S2: TKC of anidulafungin against *C. glabrata* tested with **originator (O)** from Pfizer (**black symbols**), **generic-1 (G1)** from Strada (**white symbols**), **generic-2 (G2)** from Pharmore (**crossed symbols**) with concentrations 0.015mg/L **(a)** and 0.03mg/L **(b)** over 24 hours are shown. Standard deviations are given. Additionally, the **growth control (GC)** is depicted with **star symbols**.
