

Supplementary data

Figure legends

Figure S1 The composition of the bacterial community in the rumen fermentation system: at the phylum level (A); at the class level (B); at the order level (C); at the family level (D); at the genus level (E).

Figure S2 The composition of the archaeal community in the rumen fermentation system: at the phylum level (A); at the class level (B); at the order level (C); at the family level (D); at the genus level (E); at species level (F).

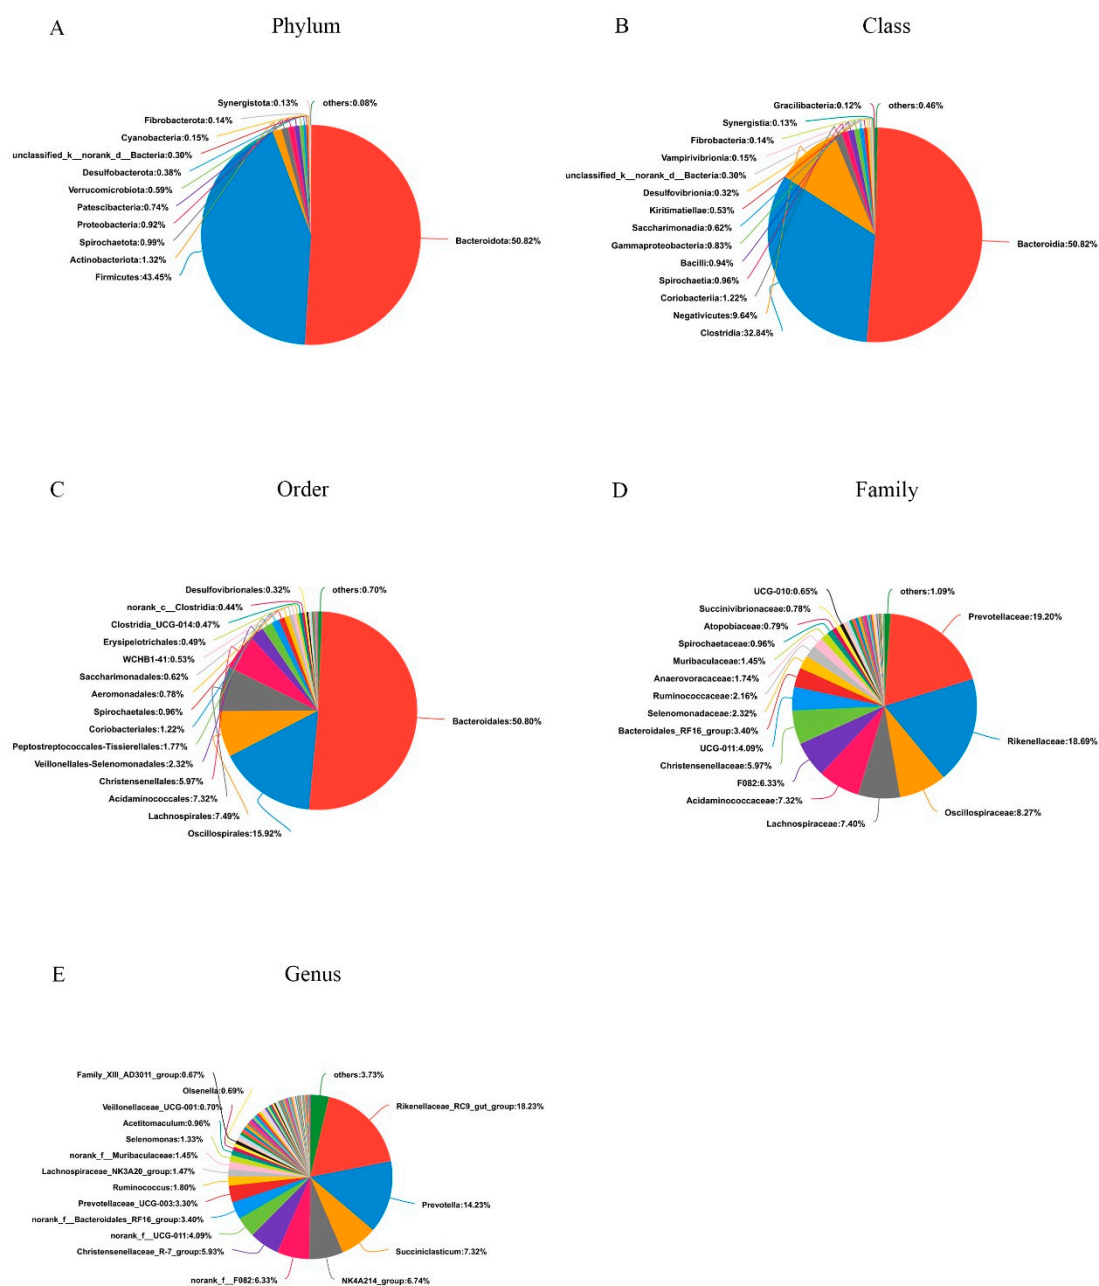

Figure S1 The composition of the bacterial community in the rumen fermentation system: at the phylum level (A); at the class level (B); at the order level (C); at the family level (D); at the genus level (E).

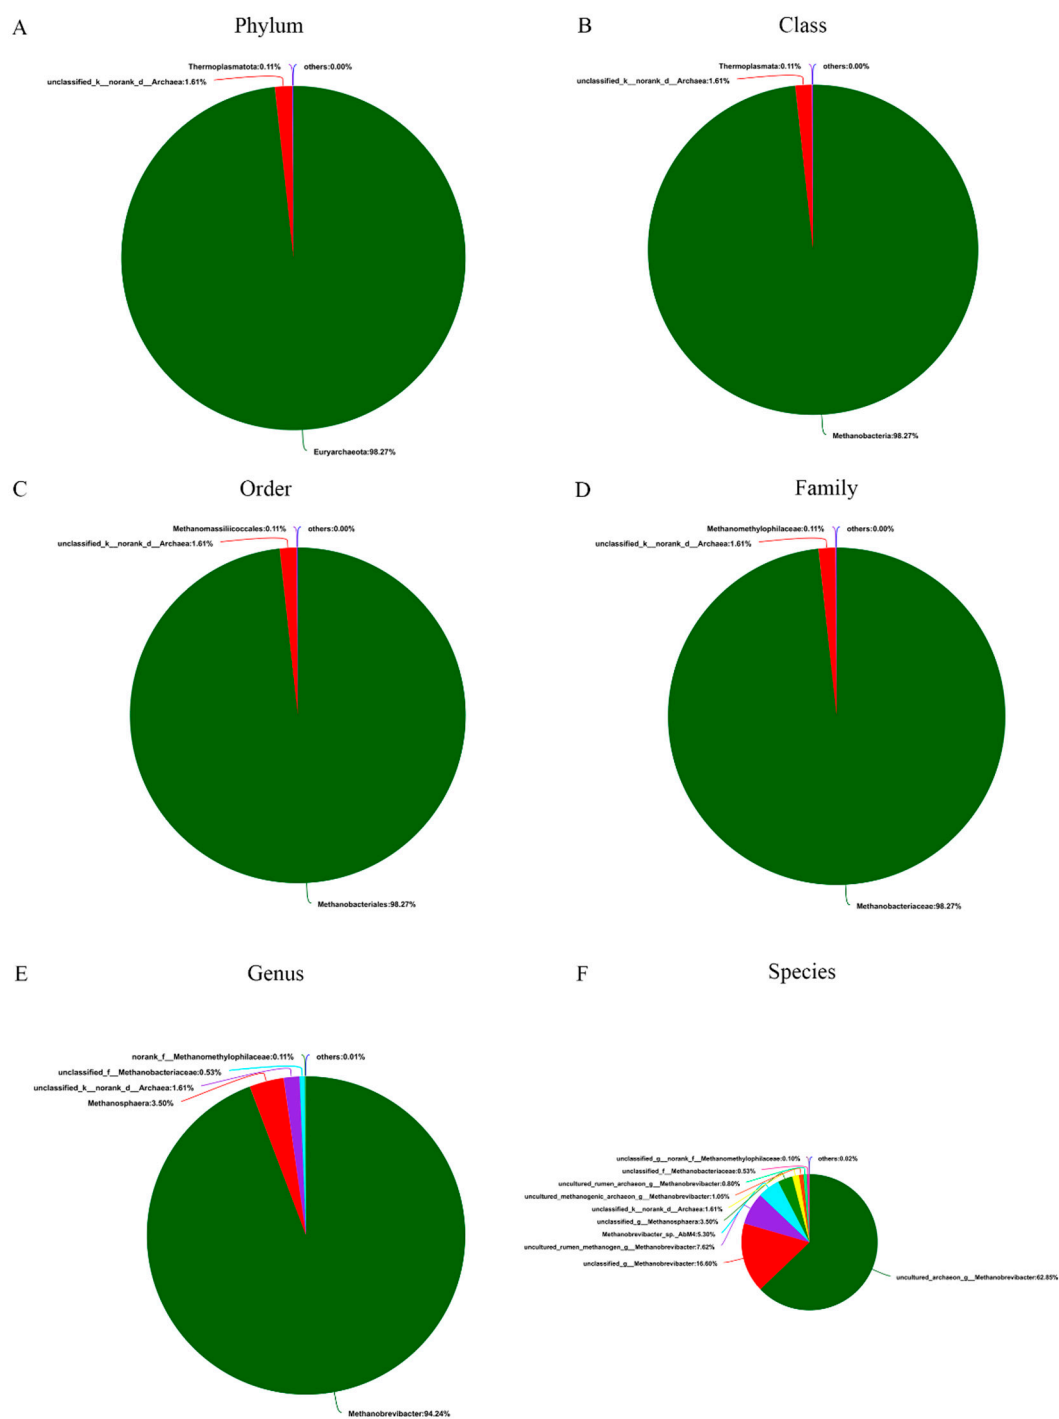

Figure S2 The composition of the archaeal community in the rumen fermentation system: at the phylum level (A); at the class level (B); at the order level (C); at the family level (D); at the genus level (E); at species level (F).
