

# Denoising of Optical Coherence Tomography Images in Ophthalmology using deep learning: A systematic review

*H. Ahmed, Q. Zhang, R. Donnan and A. Alomainy*

**Table S1**

TABLE S1: LIST OF EXCLUDED STUDIES AND THE REASONS

Author, Year	Title	Reason
<i>Dong, 2020 [1]</i>	Optical coherence tomography image denoising using a generative adversarial network with speckle modulation	The dataset and the splitting procedure were not explained
<i>Liu, 2021 [2]</i>	Axial and horizontal registration guided speckle suppression in single-line HD mode for retinal optical coherence tomography images	Did not use any deep learning approaches
<i>Cheng, 2021 [3]</i>	Robust three-dimensional registration on optical coherence tomography angiography for speckle reduction and visualization	
<i>Cheong, 2020 [4]</i>	DeshadowGAN: A Deep Learning Approach to Remove Shadows from Optical Coherence Tomography Images	The dataset and the splitting procedure were not explained
<i>Liu, 2017 [5]</i>	Patch-based denoising method using low-rank technique and targeted database for optical coherence tomography image	Did not use any deep learning approaches
<i>Daneshmand, 2021 [6]</i>	Reconstruction of Optical Coherence Tomography Images Using Mixed Low Rank Approximation and Second Order Tensor Based Total Variation Method	
<i>Samieinasab, 2020 [7]</i>	Multivariate Statistical Modeling of Retinal Optical Coherence Tomography	
<i>Hu, 2020 [8]</i>	Noise Redistribution and 3D Shearlet Filtering for Speckle Reduction in Optical Coherence Tomography	
<i>Fang, 2012 [9]</i>	Sparsity based denoising of spectral domain optical coherence tomography images	
<i>Chen, 2021 [10]</i>	Optical coherence tomographic image denoising based on Chi-square similarity and fuzzy logic	
<i>Liu, 2020 [11]</i>	Using a dual-tree complex wavelet transform for denoising an optical coherence tomography angiography blood vessel image	
<i>Gomez-Valverde, 2021 [12]</i>	Adaptive compounding speckle-noise-reduction filter for optical coherence tomography images	
<i>Esmaili, 2020 [13]</i>	Three-dimensional curvelet-based dictionary learning for speckle noise removal of optical coherence tomography	
<i>Yu, 2022 [14]</i>	A noise statistical distribution analysis-based two-step filtering mechanism for optical coherence tomography image despeckling	
<i>Smitha, 2021 [15]</i>	A nonlocal deep image prior model to restore optical coherence tomographic images from gamma distributed speckle noise	The dataset and the splitting procedure were not explained
<i>Chen, 2021 [16]</i>	Fusion denoising algorithm of optical coherence tomography image based on point-estimated and block-estimated	Did not use any deep learning approaches

<i>Fan, [17]</i>	2020	OCT Image Restoration Using Non-Local Deep Image Prior	The outcome of the model was not adequately reported
<i>Jorjandi, [18]</i>	2021	Statistical modeling of retinal optical coherence tomography using the Weibull mixture model	Did not use any deep learning approaches
<i>Paul, [19]</i>	2019	Speckle Removal Using Diffusion Potential for Optical Coherence Tomography Images	
<i>Wong, [20]</i>	2010	General Bayesian estimation for speckle noise reduction in optical coherence tomography retinal imagery	
<i>Cheng, [21]</i>	2016	Speckle Reduction in 3D Optical Coherence Tomography of Retina by A-Scan Reconstruction	
<i>Thapa, [22]</i>	2015	Reduction of speckle noise from optical coherence tomography images using multi-frame weighted nuclear norm minimization method	
<i>Bian, [23]</i>	2015	Multiframe denoising of high-speed optical coherence tomography data using interframe and intraframe priors	
<i>Cheng, [24]</i>	2015	Speckle reduction in optical coherence tomography by matrix completion using bilateral random projection	
<i>Karri, [25]</i>	2016	Simultaneous reconstruction and restoration of sparsely sampled optical coherence tomography image through learning separable filters for deep architectures	The outcome of the model was not adequately reported
<i>Lv, [26]</i>	2018	Speckle noise reduction of multi-frame optical coherence tomography data using multi-linear principal component analysis	Did not use any deep learning approaches
<i>Cheng, [27]</i>	2019	Pixel Reconstruction For Speckle Reduction In 3D Optical Coherence Tomography Of Retina	
<i>Yoo, [28]</i>	2019	Adaptive Weighted Nuclear Norm Minimization for Removing Speckle Noise from Optical Coherence Tomography Images	
<i>Husvagt, [29]</i>	2021	Maximum a posteriori signal recovery for optical coherence tomography angiography image generation and denoising	
<i>Chitchian, [30]</i>	2012	Retinal optical coherence tomography image enhancement via shrinkage denoising using double-density dual-tree complex wavelet transform	
<i>Kopriva, [31]</i>	2016	Enhanced low-rank + sparsity decomposition for speckle reduction in optical coherence tomography	
<i>Hu, [32]</i>	2019	Selective retinex enhancement based on the clustering algorithm and block-matching 3D for optical coherence tomography images	
<i>Huang, [33]</i>	2021	Image Noise Recognition Algorithm Based on Improved DenseNet	The outcome of the model was not adequately reported
<i>Hu, [34]</i>	2022	Unsupervised denoising of retinal OCT with diffusion probabilistic model	Did not use any deep learning approaches
<i>Yan, [35]</i>	2020	Speckle reduction of OCT via super resolution reconstruction and its application on retinal layer segmentation	
<i>Gupta, [36]</i>	2022	A De-Speckling Framework for Optical Coherence Tomography Images	
<i>Huang, [37]</i>	2020	Both speckle reduction and contrast enhancement for optical coherence tomography via sequential optimization in the logarithmic domain based on a refined Retinex model	
<i>Hu, [38]</i>	2021	Noise reduction by adaptive-SIN filtering for retinal OCT images	
<i>Li, [39]</i>	2021	Speckle noise removal based on structural convolutional neural networks with feature fusion for medical image	The dataset and the splitting procedure were not explained

<i>P.S,</i> 2022 [40]	Despeckling of OCT images using DT-CWT based fusion technique	Did not use any deep learning approaches
<i>Amini,</i> 2019 [41]	Speckle Noise Reduction and Enhancement for OCT Images	
<i>Yu,</i> 2021 [42]	A two-step filtering mechanism for speckle noise reduction in OCT images	
<i>Guo,</i> 2020 [43]	Deep OCT image compression with convolutional neural networks	The dataset and the splitting procedure were not explained and the outcome of the model was not adequately reported
<i>Wu,</i> 2020 [44]	Cooperative Low-Rank Models for Removing Stripe Noise From OCTA Images	Did not use any deep learning approaches
<i>Das,</i> 2021 [45]	A diagnostic information based framework for super-resolution and quality assessment of retinal OCT images	
<i>Schirmacher,</i> 2017 [46]	QuaSI: Quantile Sparse Image Prior for Spatio-Temporal Denoising of Retinal OCT Data	
<i>Huang,</i> 2021 [47]	Cluster-based filtering framework for removing speckles with structural protection in OCT images	
<i>Yoo,</i> 2020 [48]	CycleGAN-based deep learning technique for artifact reduction in fundus photography	The dataset and the splitting procedure were not explained and the outcome of the model was not adequately reported
<i>Dong,</i> 2020 [49]	Optical coherence tomography image de-noising using a generative adversarial network with speckle modulation	The dataset and the splitting procedure were not explained
<i>Xu,</i> 2021 [50]	Enhanced Visualization of Retinal Microvasculature via Deep Learning on OCTA Image Quality	The dataset and the splitting procedure were not explained and the outcome of the model was not adequately reported
<i>Menon,</i> 2019 [51]	A Novel Deep Learning Approach for the Removal of Speckle Noise from Optical Coherence Tomography Images Using Gated Convolution–Deconvolution Structure	The dataset and the splitting procedure were not explained
<i>Gisbert,</i> 2020 [52]	Self-supervised Denoising via Diffeomorphic Template Estimation: Application to Optical Coherence Tomography	The dataset and the splitting procedure were not explained and the outcome of the model was not adequately reported
