*Table S1: Absolute stiffness (in  $10^{-3} \text{ N} \cdot \mu\text{m}^{-1}$ ) values for all the samples at day 0 and day 21 for the three different series. The subscripts 1, 2 and 3 correspond to the 3 samples in each series. Samples from the same column (with the same name and subscript) are not associated. NS-Stat : Non-seeded static scaffolds.*
