

Supplementary Material

Figure S1: Sound Pressure Level (dB) at the different frequencies of 1/3 of an octave (kHz) detected by the species. In grey the spectrum of sound pressure no detected by the species considering the family audiogram.

a) species from family Bovidae

b) species from family Camelidae

c) species from family Canidae

d) species from family Cervidae

e) species from family Elephantidae

f) species from family Equidae

g) species from family Felidae

h) species from family Suidae
