The authors wish to make the following corrections to this paper [1].

In the original publication, Figure 1 was reproduced without appropriate copyright permission. As this figure does not affect the scientific information presented in the paper in any way, it has been deleted in the corrected manuscript.

In addition, a sentence has been paraphrased to differentiate it further from that used in a different publication. The statement on page 2, which states, “The two parts of this osteological collection are known as the University of Athens Human Skeletal Reference Collection or, in short, The Athens Collection”, has been modified as follows: “All these skeletons now comprise the so-called University of Athens Human Skeletal Reference Collection (“The Athens Collection”) [32]”.

In the original publication [1], references [32–34] are in wrong order. With this correction, the order of some references has been adjusted accordingly. The authors state that the scientific conclusions of the paper are unaffected by these changes. These corrections have been approved by the Academic Editor. The original publication has also been updated.
