Message from the Guest Editors

Dear Colleagues,

This Special Issue aims to contribute to the Sustainable Energy agenda through advanced scientific and multi-disciplinary knowledge, combined to improve renewable energy availability and control environmental pollution. We, therefore, invite papers on innovative technical developments, reviews, case studies, analytical, as well as assessments, from different disciplines, which are relevant to renewable and cleaner energy, and to environmental remediation and pollution control.

Dr. Nídia Caetano

Dr. Rosa M. Quinta-Ferreira

Guest Editors

Keywords

Energy and Environmental Engineering

- Bioenergy engineering technology
- Pollution control and waste treatment and Environmental bioprocesses
- Clean energy and chemical engineering technology

Materials Engineering

- Materials synthesis and characterization
- Biomaterials and Nanomaterials

Process Engineering

- Chemical and catalytic reaction engineering
- Separation and purification engineering
