Call for Papers

Call for Papers

Dear Colleagues,

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Administrative Sciences* (ISSN 2076-3387). *Administrative Sciences* is an international, peer-reviewed, open access journal (free for readers), which publishes original theoretical and empirical work on organization studies.

Manuscripts prepared in Microsoft Word or LaTeX can be submitted to the Editorial Office online at www.mdpi.com. Detailed instructions for authors are also available online: www.mdpi.com/journal/admsci/instructions/

Administrative Sciences is published in open access format—research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public can unlimitedly access the content for free as soon as it is published.

Administrative Sciences is a new journal and publication fees are fully waived for papers submitted in 2012. However, a fee of 250 CHF may apply for those articles that need major editing and formatting and/or English editing.

We would be pleased to welcome you as one of our authors.

Administrative Sciences Editorial Office

Aims & Scope

Administrative Sciences aims to advance and communicate knowledge concerning organization theory, strategic management, public administration as well as interdisciplinary research in related fields, such as business, economics, sociology, physiology, communication theory or artificial intelligence and their implications on management, organizations and the society.

Additionally, electronic files or software regarding the full details of the calculations, experimental procedure, etc., can be deposited along with the publication as “Supplementary Material”.

The scope of *Administrative Sciences* includes:

- decision making
- organization structure and dynamics
- human resources management
- innovation management
- motivation
- ethics in public administration
- policy analysis
- public choice
- public budgeting
- public management
- governance
- accountability
- diversity
- balance

Administrative Sciences regularly publishes special issues on relevant and timely topics. Be sure to check our website for an updated list of special issues:

Open Access. What Does it Really Mean?

Open access is mainly a response to what is known as the serials crisis: yearly increasing journal subscription prices, which make subscription-based journals increasingly difficult to afford.

Many university libraries around the world have had to cancel existing subscriptions, or are unable to keep up with subscribing to new journals, because the cost of publication has risen disproportionately to their budgets.

With open access publishing, the cost of peer-review and production of an article is borne by the institute of the author by payment of a onetime flat fee. Conversely, readers and their institutes are no longer charged for accessing the journals they need.

For researchers, open access brings the convenience of immediate access to the literature that they need—no matter for which university or company they work, or whether they just want to read a paper in their spare time at home.

For authors, open access means a much wider circle of readers due to the easy access to their research papers. The interested general public is also able to access research works, giving higher transparency to the outcome of taxpayer money spent on research.
