### Message from the Guest Editor

Dear Colleagues,

It is my pleasure to cordially and collegially invite you to contribute your paper for consideration for a Special Issue of *Administrative Sciences* under the broad topic of “Project, Program, and Portfolio Management (P3M): Attaining Stakeholder Satisfaction, Sustainable Success, and Strategic Scalability”. Please focus your paper on project, and/or program, and/or portfolio management. However, your paper should address all three subtopics with an integrated plan of action and viable model with a roadmap of how to credibly attain: (1) *Stakeholder Satisfaction*; (2) *Project Success*; and, (3) *Strategic Scalability*. Each of these subtopics may have a different emphasis as compared to the other two. For instance, “Strategic Scalability” may pertain more to Programs and Portfolios than to Projects; “Stakeholder Satisfaction” should gain from the perspectives of all: Project, Program, and Portfolio Managers; and, “Project Success” primarily involves projects, yet ultimately impacts the program/portfolio.

Victor S. Sohmen
