Water Resources, University of  
California, Davis, CA 95616, USA

Deadline for manuscript  
submissions:

**25 August 2024**

### Message from the Guest Editor

Hydrogeophysics has advanced significantly because of substantial investigations in stochastic subsurface hydrology, which have served as an impetus for the developments in on-site investigative methodologies. The effectiveness of these unique hydrogeophysical approaches, which focus on identifying heterogeneity and fluid behavior within shallow subsurfaces, is rooted in the refinement of efficient data inversion techniques. Notably, these methods include electrical resistivity tomography, ground-penetrating radar, nuclear magnetic resonance and specific electromagnetic approaches.

This call for papers aims to promote innovative approaches in hydrogeophysical characterization, utilizing advanced geophysical tools, data fusion methodologies and machine learning for data interpretation. It emphasizes integrating hydrological models to understand soil variations, infiltration dynamics, root-water uptake and their impact on crop productivity. We encourage diverse submissions, from experimental studies to theoretical models, real-world case studies and comprehensive reviews charting future research directions.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

*Agriculture* (ISSN 2077-0472) is an international, crossdisciplinary and scholarly open access journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. *Agriculture* is published in an open access format – research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the public have unlimited and free access to the content as soon as it is published.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

**Journal Rank:** JCR - Q1 (*Agronomy*) / CiteScore - Q2 (*Plant Science*)
