Message from the Guest Editor

Dear Colleagues,

Considerable research has been done on conservation tillage systems under organic or regenerative practices. Much of the published research has focused on field studies located in Europe and the USA. This important work has continued and been expanded to include efforts on other continents and in different countries as well. It is appropriate and timely to publish a Special Issue in *Agriculture*, which highlights the progress made in developing strategies for the successful adoption of conservation tillage practices by organic farming researchers and farmers. I invite those working in this area to submit manuscripts summarizing results of this research for this Special Issue.

Message from the Editor-in-Chief

Agriculture (ISSN 2077-0472) is an international, crossdisciplinary and scholarly open access journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. *Agriculture* is published in an open access format – research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the public have unlimited and free access to the content as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

Journal Rank: JCR - Q1 (*Agronomy*) / CiteScore - Q2 (*Plant Science*)
