# Developing the Evidence Base for Rural Development Policies and Interventions to Address Novel and Emerging Societal Problems

Guest Editors:

#### Prof. Dr. Francesco Caracciolo

Department of Agricultural Sciences, University of Naples Federico II, 80055 Naples, Italy

#### Prof. Dr. Danilo Bertoni

Department of Environmental Science and Policy, University of Milan, Milano, Italy

#### Dr. Raffaele Cortignani

Department of Agriculture and Forest Sciences (DAFNE), Tuscia University, Via San Camillo de Lellis, 01100 Viterbo, Italy

Deadline for manuscript submissions:

closed (15 February 2023)

## **Message from the Guest Editors**

The COVID-19 pandemic is emphasizing the importance of a resilient food system that ensures affordable food for consumers and helps to uncover the existing critical interrelations between ecosystem preservation, food system characteristics, and health. The need for a transition toward a more sustainable food system maximizing environmental, health, and social benefits while supporting economic growth is therefore particularly needed.

To foster this transition, countries are asked to orient their policy interventions in agriculture to improve their response to societal demands on food and health, including safe, nutritious, and sustainable food. Agricultural policies need to adapt to the current challenges, which leads to two relevant and related research gaps. Empirical evidence on the fitness and suitability of traditional measures and interventions in agriculture in achieving the expected outcomes and impact is particularly limited with regard to novel expectations and requests.

## Message from the Editor-in-Chief

Agriculture (ISSN 2077-0472) is an international, crossdisciplinary and scholarly open access journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. Agriculture is published in an open access format – research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the public have unlimited and free access to the content as soon as it is published.

#### **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

Journal Rank: JCR - Q1 (Agronomy) / CiteScore - Q2 (Plant Science)
