

Dear Colleagues,

As Editor-in-Chief of *Algorithms*, I am pleased to announce the winner of the *2017 Algorithms Travel Award* on behalf of the Evaluation Committee:

**Aviad Rubinstein**, Ph.D. student at the UC Berkeley, whose research focuses on computational complexity. He is planning to present his work “Settling the complexity of computing approximate two-player Nash equilibria” at the Highlights of Algorithms (HALG 2017). The award consists of **800 Swiss Francs** towards attending this conference.

It was a difficult decision with such high quality applications for the award and we thank all applicants. We wish to congratulate Mr. Aviad Rubinstein for his accomplishments.

Henning Fernau,  
Editor-in-Chief

## 2017 TRAVEL AWARD WINNER

*Algorithms* (ISSN 1099-4893) is an international open access journal, which provides an advanced forum for studies related to algorithms and their applications, published quarterly online by MDPI.
