Call for Papers

Call for Papers

Dear Colleagues,

You are invited to contribute a long research article or a comprehensive review for consideration and publication in *Animals* (ISSN 2076-2615). *Animals* is an international open access journal on the fauna and animals, including zoology and veterinary sciences.

Manuscripts prepared in Microsoft Word or LaTeX can be submitted to the Editorial Office online at www.mdpi.com. Detailed instructions for authors are also available online: www.mdpi.com/journal/animals/instructions/

Animals is published in open access format—research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published.

Animals is a new journal and publication fees are fully waived for papers submitted in 2012. However, a fee of 250 CHF may apply for those articles that need major editing and formatting and/or English editing.

We would be pleased to welcome you as one of our authors.

Aims & Scope

Animals is an international and interdisciplinary scholarly open access journal. It publishes reviews, regular research papers, communications, and short notes that are relevant to any field of study that involves animals, including zoology, ethnozoology, animal science, animal ethics and animal welfare.

The scope of *Animals* includes:

Zoology:

- physiology and physical structure of animals and its relevance to the ecosystem in which they live
- evolution, phylogeny, genetics taxonomy and biodiversity of animals
- animal behavioral and psychological responses to human activity and the environment

Ecology:

- protection and restoration of endangered and threatened species
- abundance and distribution of animals and the relevance to sustainability of the ecosystem
- predator-prey dynamics and interactions between animals in ecological communities

Animal and veterinary sciences:

- management of captive and domesticated animals
- rehabilitation of animals into the wild
- epidemiology and its implications for sustainability of the population

Animals and society:

- animal ethics, welfare and use
- pest management
- animal derived food
- animal diseases and public health
- ethnobiological and cross-cultural perspectives on animals

Animals regularly publishes special issues on relevant and timely topics. Be sure to check our website for an updated list of special issues: www.mdpi.com/journal/animals/

Open Access. What Does It Really Mean?

Open access is mainly a response to what is known as the serials crisis: yearly increasing journal subscription prices, which make subscription-based journals increasingly difficult to afford.

Many university libraries around the world have had to cancel existing subscriptions, or are unable to keep up with subscribing to new journals, because the cost of publication has risen disproportionately to their budgets.

With open access publishing, the cost of peer-review and production of an article is borne by the institute of the author by payment of a one-time flat fee. Conversely, readers and their institutes are no longer charged for accessing the journals they need.

For researchers, open access brings the convenience of immediate access to the literature that they need—no matter for which university or company they work, or whether they just want to read a paper in their spare time at home.

For authors, open access means a much wider circle of readers due to the easy access to their research papers. The interested general public is also able to access research works, giving higher transparency to the outcome of taxpayer money spent on research.
