### Message from the Guest Editors

In this special issue, we invite the submission of original research or review articles, short notes, and communications on different aspects of infection with SRLV including epidemiology, reservoir animals and characterization of the virus and route of transmission. However, contributions concerning diagnostic tools for the diagnosis of infection with SRLV and studies on virus–host interactions, innate and acquired immune responses and vaccine development, are also welcome. You are cordially invited to contribute on this topic in order to improve the knowledge of lentivirus infections in small ruminants.
