University of Catania, Via Andrea  
Doria, 6, 95125 Catania, Italy

Deadline for manuscript  
submissions:

**1 September 2024**

### Message from the Guest Editors

Dear Colleagues,

The annual occurrence of healthcare-associated infections (HCAIs) caused by pathogens, particularly multidrug-resistant bacteria, has a significant impact on millions of patients worldwide. Antimicrobial-coating-based approaches, which have garnered substantial commercial investment and academic research endeavors, are widely acknowledged for their potential in mitigating microbial populations on surfaces within clinical settings. This Special Issue will encompass research that harnesses innovative agents or materials and strategies for the development of antimicrobial coatings aimed at preventing infectious diseases. Papers pertaining to the development of novel agents or materials for antimicrobial coatings and the significant prevention of infectious diseases, such as antimicrobial nanomaterials, herbal-medicine-derived antimicrobial agents, antimicrobial peptides, antibiotic adjuvants, and antimicrobial hydrogel dressings, are highly encouraged.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

There are very few fields that attract as much attention as scientific endeavor related to antibiotic discovery, use and preservation. The public, patients, scientists, clinicians, policy-makers, NGOs, governments, and supra-governmental organizations are all focusing intensively on it: all are concerned that we use our existing agents more effectively, and develop and evaluate new interventions in time to face emerging challenges for the benefit of present and future generations. We need every discipline to contribute and collaborate: molecular, microbiological, clinical, epidemiological, geographic, economic, social scientific and policy disciplines are all key. *Antibiotics* is a nimble, inclusive and rigorous indexed journal as an enabling platform for all who can contribute to solving the greatest broad concerns of the modern world.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPUS / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (*Pharmacology & Pharmacy*) / CiteScore - Q1  
(*General Pharmacology, Toxicology and Pharmaceutics*)
